# Daikin world

The perfect working environment is essential for all businesses. From supermarkets to offices, from public buildings to hotels, from restaurants to shops it is essential that the quality of the air is optimised at all times – but no space is used in exactly the same way and that calls for flexible, tailored and economic solutions. Daikin, the innovation leader for more than 90 years, understands this and its ‘total solution’ concept is built around customised solutions for individual clients. Whether cooling, heating, ventilation, air curtains or refrigeration with intelligent control systems.

Daikin has the units, the experience and the solution for you. Learn all about our solutions for your business and read more about customer experiences.

## Our promise...

... is to ensure that customers can depend on Daikin for the ultimate in comfort, so that they are free to focus on their own working and home lives.

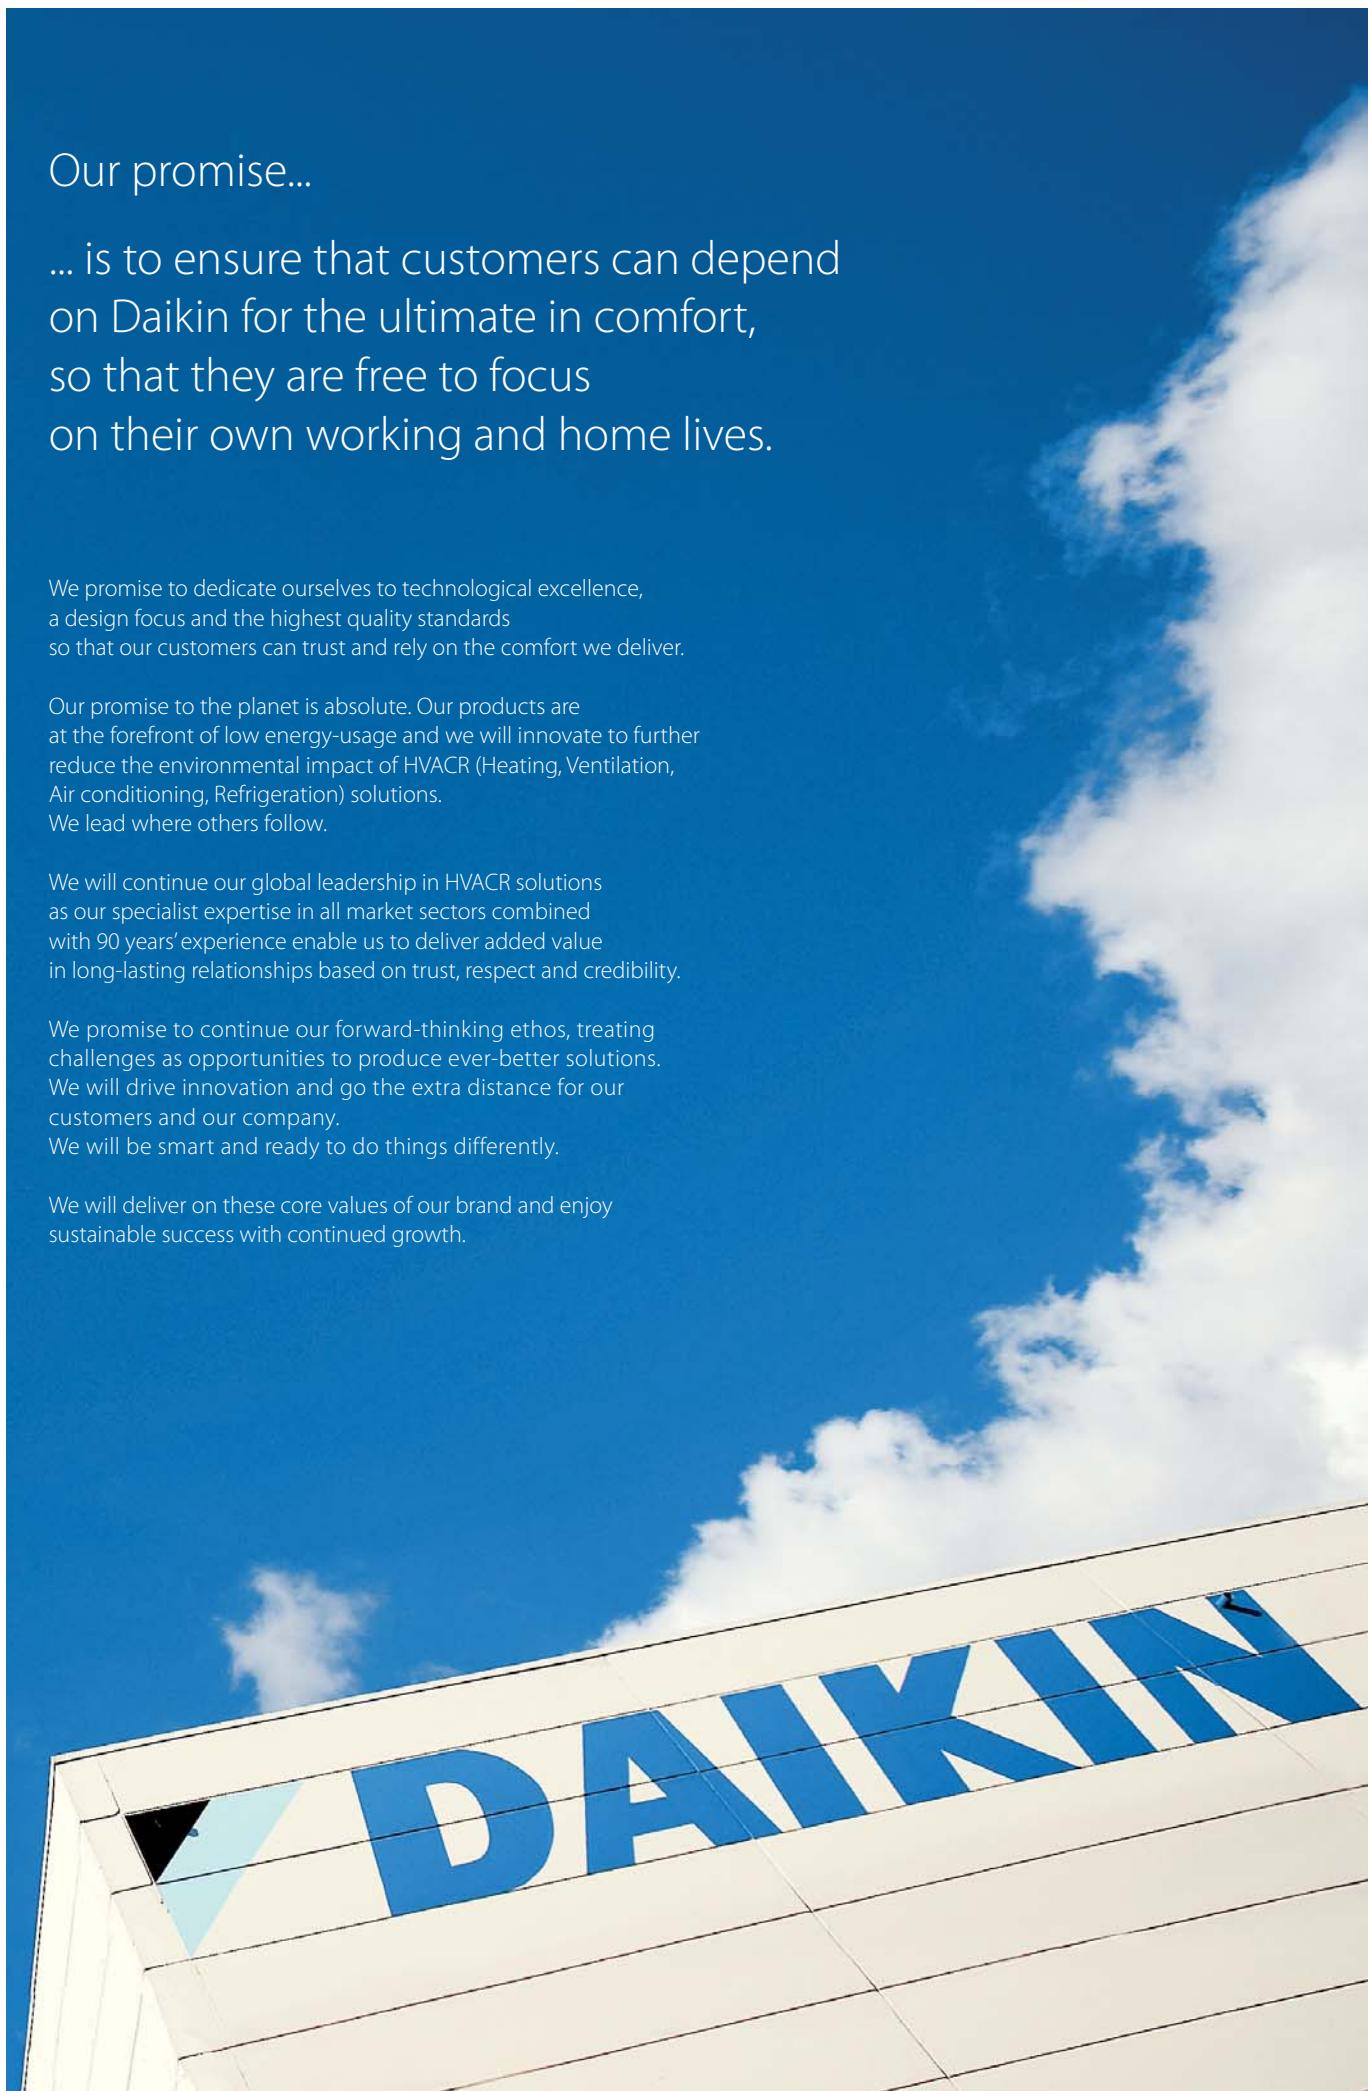

We promise to dedicate ourselves to technological excellence, a design focus and the highest quality standards so that our customers can trust and rely on the comfort we deliver.

Our promise to the planet is absolute. Our products are at the forefront of low energy-usage and we will innovate to further reduce the environmental impact of HVACR (Heating, Ventilation, Air conditioning, Refrigeration) solutions.  
We lead where others follow.

We will continue our global leadership in HVACR solutions as our specialist expertise in all market sectors combined with 90 years' experience enable us to deliver added value in long-lasting relationships based on trust, respect and credibility.

We promise to continue our forward-thinking ethos, treating challenges as opportunities to produce ever-better solutions.  
We will drive innovation and go the extra distance for our customers and our company.  
We will be smart and ready to do things differently.

We will deliver on these core values of our brand and enjoy sustainable success with continued growth.

# What's new in 2016

p.49 **NEW** E(D/B)LQ-CV3 - Small monobloc

- › Compact heating only and reversible monobloc for space heating & cooling with optional domestic hot water
- › Fuss-free installation : only water connections required
- › Reliable operation even when -25°C outside thanks to frost protection features such as free hanging coil

p.71 **NEW** EKHHPP-A2V3+ERWQ-AV3 - Domestic hot water heat pump

- › Domestic hot water is heated almost immediately
- › Combine it with solar heating for even better energy efficiency
- › Easy installation: no water tank pressure and only limited pressure in the heat exchanger
- › Low maintenance: no anode means no scale and lime deposits or corrosion
- › Electrical back-up (2.5 kW) ensures hot water under all circumstances. The 500L tank can also be equipped with an external hydraulic back-up

**R-32**

p.92 **NEW** Full pair and multi range with top efficiency and comfort

- › Seasonal efficiency values up to A+++
- › New European designed indoor unit (FTXM-M) with perfect indoor air quality
- › 2,3,4 and 5 port multi units connectable to wall mounted and concealed ceiling units
- › Low global warming potential thanks to R-32 refrigerant
- › New online controller

**R-32**

**SkyAir**

p.182

FCAHG-F / RZAG-LV1 - Sky Air

- › First light commercial range available with R-32 refrigerant in the European market!
- › Lowest environmental impact:
  - GWP reduced with 68% compared with R-410A
  - 12% lower refrigerant charge
- › Minimum 5% more efficient compared to R-410A units

p.188

## Round flow cassette auto-cleaning panel with finer mesh filter

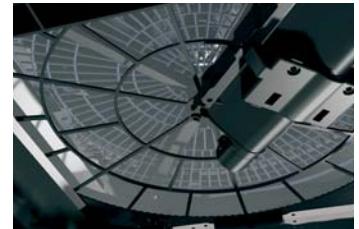

**NEW**

- For fine dust applications (e.g. clothing shops) a decoration panel with finer mesh filter guarantees optimal working conditions within these high demanding surroundings

For every application a panel:

- Auto-cleaning panel with standard filter BYCQ140DG, white (RAL9010) with grey louvers
- Auto-cleaning panel with finer mesh filter BYCQ140DGF, white (RAL9010) with grey louvers
- Full white (RAL9010) panel with standard filter BYCQ140DW
- White (RAL9010) with grey louvers panel with standard filter BYCQ140D

p.249 **NEW** RXYSCQ-TV1 / RXYSQ-TV1 / RXYSQ-TY1  
VRV IV S-series

**VRV IV S-series**

- Widest range of mini units on the market: from 4 up to 12HP
- RXYSCQ4,5T: The most compact (823mm high) and lightweight (88kg) VRV in the market makes the unit almost unnoticeable
- Either connect VRV or stylish indoor units (Daikin Emura, Nexura)
- Incorporates VRV IV standards & technologies such as Variable Refrigerant temperature

p.253 **NEW** SB.RKXYQ-T - VRV IV heat pump for indoor installation

**VRV IV i-series**

### The invisible VRV

- Unique VRV heat pump for indoor installation
- Total flexibility for any shop location and building type as the outdoor unit is invisible and split up in 2 parts
- Highly suited to densely populated areas thanks to the low operation sound and seamless integration into surrounding architecture
- Incorporates VRV IV standards & technologies such as Variable Refrigerant temperature
- Lightweight units reduce installation time and effort

**VRV IV W-series**

**p.261 RWEYQ-T8 - Water cooled VRV IV**

**NEW** › Connectable to the most extended and compact range of BS boxes (BS1Q-A / BS-Q14A)

- › Ideal for high-rise buildings, using water as heat source
- › Unified range for geothermal and standard series and heat pump and heat recovery
- › Incorporates VRV IV standards & technologies such as Variable Refrigerant temperature
- › 2-stage heat recovery: between indoor units and between outdoor units via the water circuit

**p.290 VRV hydroboxes compliant with Eco-design legislation**

**NEW** › LT hydrobox HXY-A8 and HT hydrobox HXHD-A8 fully Eco-design compliant thanks to new pump

- › For efficient space cooling/heating and hot water production
- › Free heating provided by transferring heat from areas requiring cooling to areas requiring heating or hot water
- › Saves time on design and installation as all water-side components are fully integrated with direct control over leaving water temperature

**p.306 VAM-FC compliant with Eco-design legislation**

**NEW** › Fully compliant with the new Eco-design legislation coming into force 01/01/2016

- › Energy saving ventilation using indoor heating, cooling and moisture recovery
- › Free cooling possible
- › Prevent energy losses with optional CO<sub>2</sub> sensor
- › High efficiency filters available

**p.336 NEW EWAQ-G - EWYQ-G-  
p.378 Air cooled scroll chiller and heat pump**

- › Single refrigerant circuit (2 scroll compressors) with single evaporator
- › Compact design to allow easy indoor installation or retrofit operations
- › Micro channel heat exchanger technology reduces the amount of refrigerant used in the system, lowering environmental impact
- › Partial and total heat recovery option available
- › Stainless steel plate heat exchanger

p.390 NEW EWHQ-G-/EWWQ-G-/EWWQ-L-/EWLQ-G-/EWLQ-L-  
 p.391 Water cooled scroll (condenserless) chiller  
 p.392 and heat pump  
 p.401  
 p.402

- › Single refrigerant circuit (2 scroll compressors) with single evaporator (EWWQ-G-SS)
- › Dual refrigerant circuit (4 scroll compressors) with single evaporator (EWWQ-L-SS)
- › Conceived for stacked installation of two single circuit units to reduce the footprint (EWWQ-G-SS)
- › Heat pump version with reversibility on refrigerant side, ideal for geothermal applications (EWHQ-G-SS)
- › For chilled water production, to be combined with a remote condensing unit (EWLQ-G-SS/EWLQ-L-SS)

p.467 NEW Mini-ZEAS

COMING SPRING 2016

- › Ideal solution for multiple smaller refrigeration requirements
- › Small footprint (up to 60 % smaller than equivalent products in the market)
- › F-Gas compliant (R-410A)
- › Plug and play system reduces installation time and cost

p.483 BRC1E53A/B/C - Wired remote control with duty rotation

COMING SPRING 2016

NEW

- › Replaces BRC1E52A/B in Spring 2016 and includes following additional functionalities:
- Duty rotation and back-up for infrastructure cooling
- Remote control save mode : screen turns off when no person is changing mode or adjusting settings
- Demand control: decreases the power consumption to 70 or 40 % when other large appliances need to be switched on
- Selection of quiet mode function for the outdoor unit

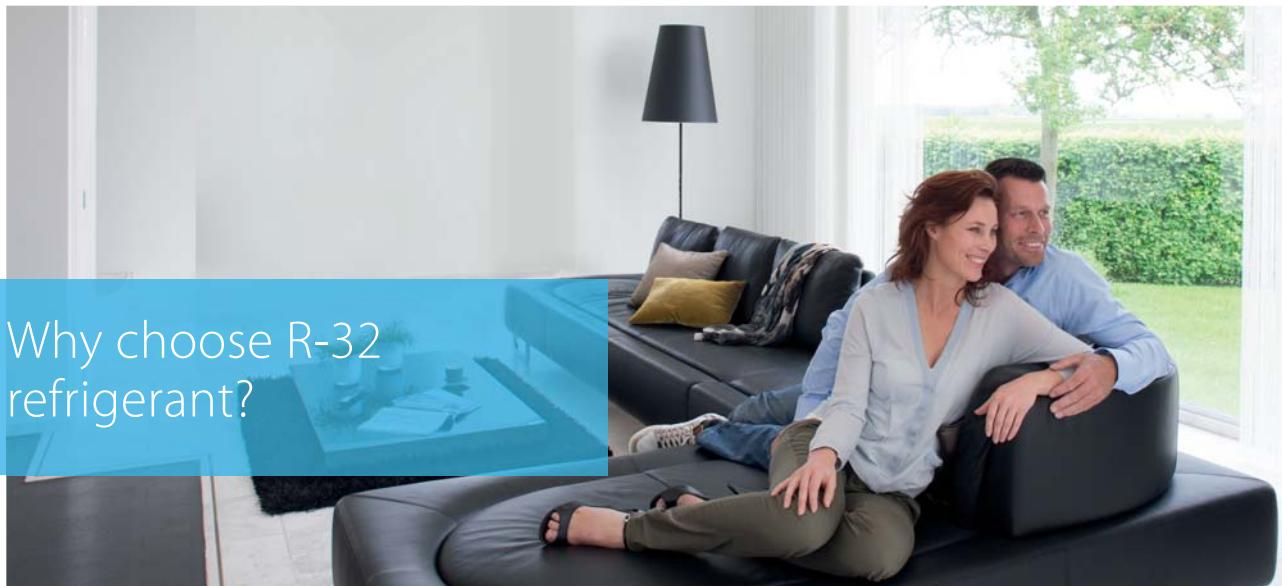

p.490 NEW DCC601A51 - Centralised touch controller with cloud connection

- › Centrally control your building (air conditioning, window contact, ...)
- › Intuitive and user-friendly interface
- › Stylish optional screen fits any interior
- › Plug&play installation

Cloud package options:

- › Online control: control your system no matter where you are
- › Multi site: control and compare the energy use of multiple sites
- › Energy saving: Maximize your air conditioning system operation automatically and keep track of your energy use

## Why choose R-32 refrigerant?

### Ten years ahead of legislation

Improving indoor comfort while having a low environmental impact. With this in mind, Daikin launched the **first worldwide air conditioners with R-32 refrigerant in Japan at the end of 2012**, where millions have since been installed. Meanwhile, R-32 models have been introduced in many other countries and since 2013 as a first in Europe.

#### Did you know?

The new European F-gas regulation 517/2014 includes a ban on some refrigerants in certain applications. R-32 is a perfect answer to this. **Daikin has introduced R-32 models 10 years ahead of time. The sooner the industry changes to lower GWP refrigerants, the better for the environment.**

### GWP is not the only parameter

There is no refrigerant which can meet the needs of every kind of application. This means that Daikin had to evaluate its options carefully, taking into account not only the GWP or amount of refrigerant used, but also aspects such as energy efficiency, safety and affordability.

For example, selecting a refrigerant with a lower GWP but which uses more energy would not be a good choice, as it would be counterproductive for the total product's global warming impact.

Daikin, followed by other industry players, selected R-32 because it contributes to the EU F gas regulation targets, whilst being energy efficient, safe and affordable.

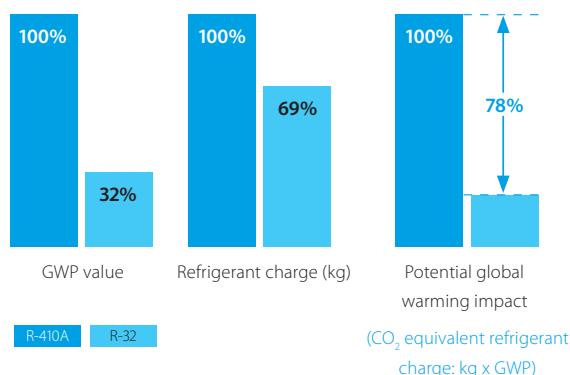

### Advantages of R-32

The chemical name for R-32 is difluoromethane. It has been used for many years as a component of the refrigerant blend R-410A. Daikin and others in the industry recognise the advantages of using R-32 in its pure form.

	R-410A	R-32
Composition	Blend of 50% R-32 + 50% R-125	Pure R-32 (no blend)
GWP (Global Warming Potential)	2087.5	675
ODP (Ozone Depletion Potential)	0	0

Compared to R-410A, the GWP (Global Warming Potential) of R-32 is only one third, while it allows for a much smaller refrigerant volume. It contributes to the EU F-gas regulation targets, while being energy efficient, safe and affordable. R-32 is also easier to recycle and re-use. In addition, R-32 is easy to handle for installers and service technicians as it can be charged in both liquid and gas phase. And there is no need to worry about fractionation or glide problems.

Comparison example for Daikin Emura 3.5 kW model available in R-410A and R-32 version

## Replacement technology

Replacement technology  
The quick and quality way  
of upgrading R-22 and  
R-407C systems

Service and maintenance with R-22 is prohibited since 01/01/2015, meaning repairs are impossible to R-22 systems. Avoid unexpected downtime for your customers and replace these systems now!

## Installer benefits

### Less installation time

Tackle more projects in less time thanks to **faster installation**. It is more profitable than replacing the full system with new piping.

### Lower installation costs

Reducing installation costs enables you to offer customers the most **cost-effective** solution and improve your competitive edge.

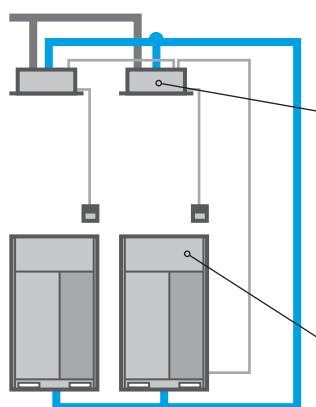

### Replace competitor systems

It is a trouble-free replacement solution for Daikin systems and for systems made by other manufacturers.

### Optimize your business

A simple solution for replacement technology enables you **to handle more projects** for more customers in less time and offer them the best price! Everybody gains.

## Keep your refrigerant piping

### The Daikin low-cost upgrade solution

#### ! Replace indoor units and BS boxes

Contact your local dealer to check compatibility in case you need to keep the indoor units.

#### ! Replace outdoor units

## Customer benefits

### Save on running costs

#### Comparison based on EER

(efficiency of a residential product in cooling mode)

#### Comparison based on SEER

(efficiency of a residential product according to current seasonal legislation of a product in cooling mode)

### No disturbance

**Re-use** your **existing piping** ensuring a quick and quality replacement allowing work to be done without affecting your comfort or business

### Upgrade your comfort

Upgrade your comfort with cutting-edge design, low noise levels, WIFI controls and more...

# It's all about A

New energy labels for heat generators and water heaters

From September 26, 2015, all space heating and hot water systems are required to display a label which clearly indicates the system's efficiency class. The new labelling requirements follow on from the adoption in 2010 of the energy labelling Directive (2010/30/EU). The primary aim of the Directive has been to remove poorly performing, energy inefficient products from the market. Only heat pumps with an efficiency class of A+ (for 55°C) or A (for low temperature heat pumps declared at 35°C) and better will be allowed in the market. Condensing gas and oil boilers will need at least a B label.

Daikin has been proactive in addressing the new energy requirements, through further improvements and additions to Daikin heating and hot water systems which guarantee energy efficiency to an 'A' grade or higher.

Daikin leads the way...

# Seasonal efficiency, Smart use of energy

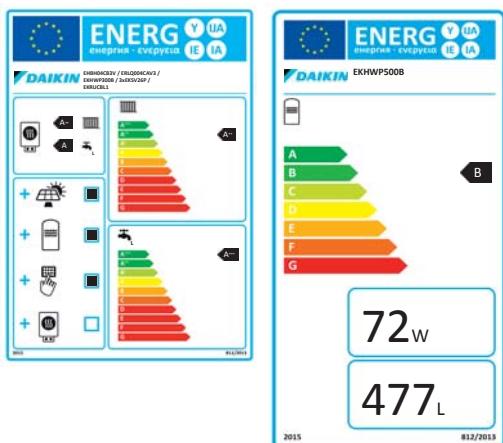

## Challenging 20-20-20 environmental targets with Europe's energy label

The European Commission has set challenging targets for improving energy efficiency in the EU. These so-called 20-20-20 targets aim at a 20% reduction in CO<sub>2</sub> emissions, 20% share of renewable energy and a 20% reduction in the use of primary energy, all by the year 2020. To realise these objectives, Europe issued the Eco-Design Directive [2009/125/EC]. This sets minimum efficiency requirements for energy related products.

### Air-to-Air heat pumps

Since 2013, all air conditioners and air-to-air heat pumps under 12 kW are in scope of this Eco-Design Directive. Products unable to comply with the minimum efficiency requirement (such as non-inverter air conditioners) will lose their CE marking and thus may no longer be sold in the European Union.

To inform consumers concerning these new energy performance standards, Europe also introduced a new energy label. The former European energy label, introduced in 1992, has had its effect. Consumers were able to compare and make purchasing decisions based on uniform labelling criteria. The new label that came into force on 1 January 2013 allows end-users to make even better informed choices, since seasonal efficiency reflects air conditioner efficiency over an entire season.

The energy label includes multiple classifications from A+++ to D reflected in colour shadings ranging from dark green (most energy efficient) to red (least efficient). Information on the label includes not only the new seasonal efficiency ratings for heating (SCOP) and cooling (SEER), but also annual energy consumption and sound levels.

### Heating systems

Since September 2015, space heaters, combi heaters (Lot 1) and domestic hot water heaters (Lot 2) need to comply with these 20-20-20 targets. This gives the opportunity to the end user to choose the most efficient heating system for his specific solution by for example comparing oil boilers with air-to-water heat pumps.

### Ventilation

The EU has decided to extend this system of minimum seasonal efficiency requirements and energy labels also to ventilation systems, from January 2016 onwards. Ecodesign data will be required for both VAM units and air handling units. Energy labels for VAM units only.

### Refrigeration and process chillers

Next to heat pumps, heat generators, water heaters and ventilation also refrigeration units and process chillers need to comply to minimum efficiency requirements. From July 2016 onwards, commercial condensing units, ZEAS and process chillers will be in scope of this new EU legislation.

Although legislation for ventilation will only come into force from January 2016 onwards, and for refrigeration and process chillers from July 2016 onwards Daikin is already preparing their units and communication tools to be ahead of legislation again.

# Pure air

## Because Daikin cares

### MC70L

The streamer technology air purifier, a blend of new technology, improved performance, and ultra quiet operation, is designed to care for you by unobtrusively providing **purified air** to produce a healthy home environment. Purified air improves the perception of **comfort** and, by **removing** and destroying **contaminants** and **odours**, the streamer technology air purifier also plays an essential role for those who suffer from **asthma** or **allergies**. These efforts place the streamer technology air purifier among the best residential air purifiers on the market today.

#### Three times purification, a good deed for your health

Pollen, dust and pet hair are just some of the potential causes of allergies, asthma and respiratory problems. A Daikin air purifier cleans the air and relieves you of these troubles thanks to a three-part operation:

- allergen removal
- virus and bacteria removal
- odour removal

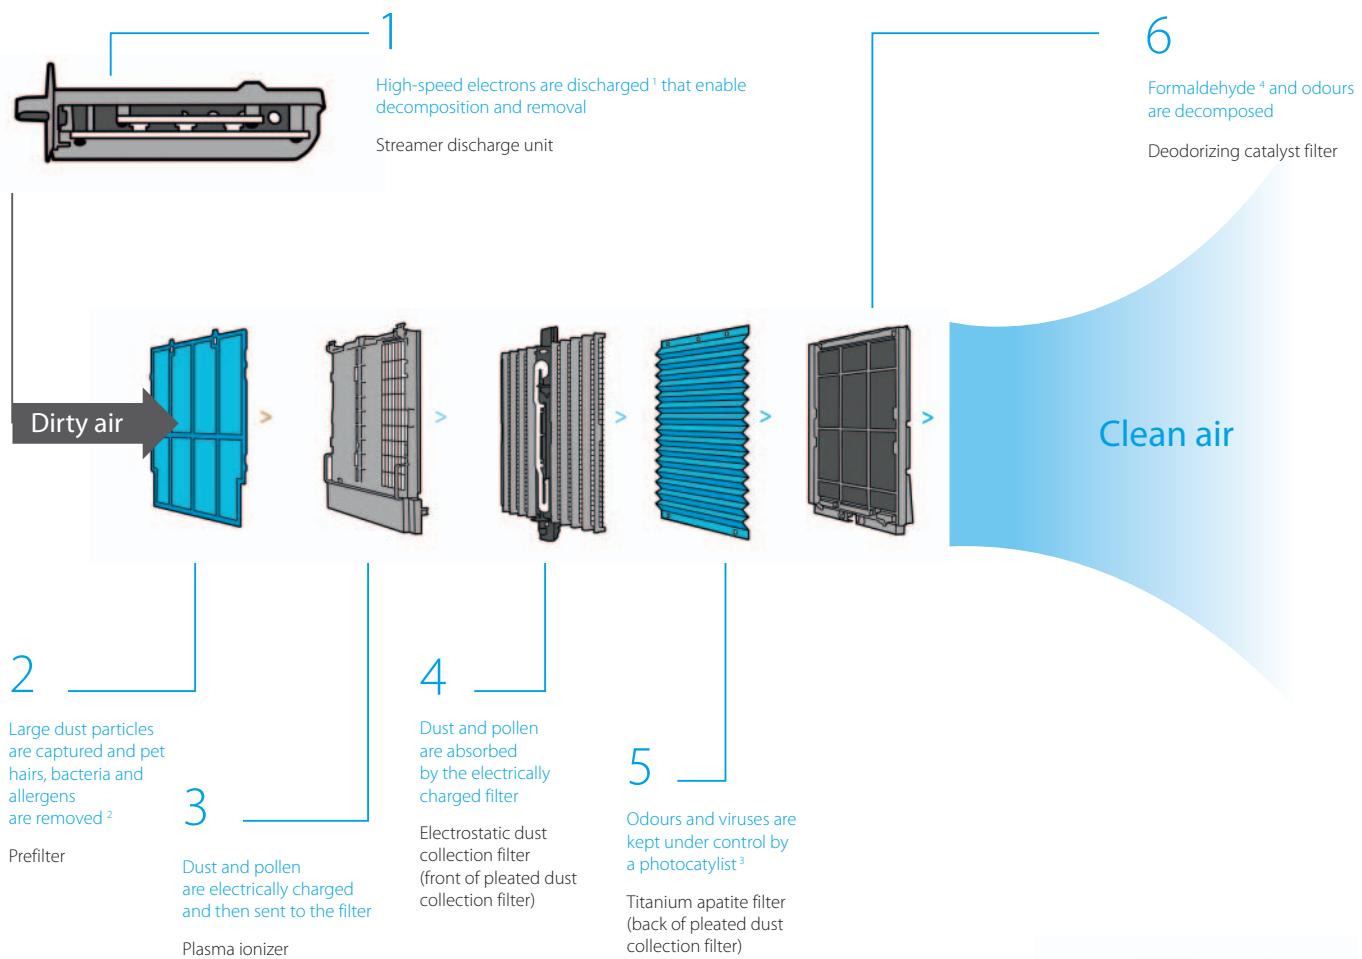

#### What is the Daikin streamer technology ?

"Streamer Discharge" is a type of plasma discharge in which high speed electrons capable of **oxidative decomposition** are generated. It has the ability to **eliminate bacteria** and **mould** as well as hazardous **chemical substances** and **allergens**, etc. Compared to standard plasma discharge (glow discharge), the discharge range of Daikin's Streamer Discharge is wider, which makes it easier for electrons to collide with oxygen and nitrogen in the air. This enables high speed electrons to be generated three dimensionally over a wide area, which results in an oxidative decomposition speed that is over 1,000 times greater with the same electrical power. Daikin's Streamer Discharge technology has proven successful in stably generating high speed electrons, a feat that has been considered difficult up to now.

#### Main specifications

Daikin has already received great praise for its air purifiers: a British Allergy Foundation seal of approval and the TÜV Nord test mark confirm the efficiency of our units.

## Six-layer powerful decomposition and removal configuration

- Stylish design
- Improved performance
- Unprecedented comfort
- Super quiet operation
- Easy to maintain
- Portable
- No installation

# Humidification and purification in one

## MCK75J

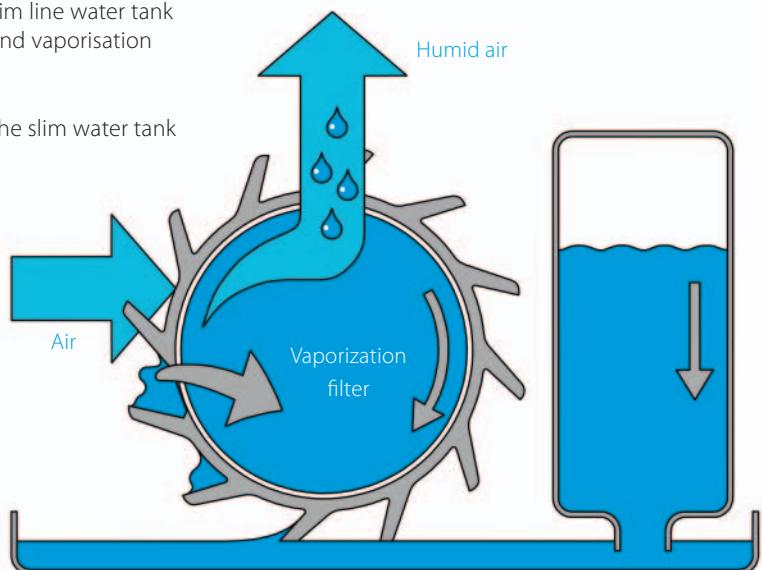

There are many substances in the air you breathe such as allergen, bacteria, virus and tobacco smoke, which causes your health to suffer. Above all things, dryness is especially a big issue during wintertime. Daikin Ururu Air Purifier **purifies and moisturizes** the air inside your home and relieves the effects of dry air. Just fill the 4l tank occasionally and it will humidify your room with a maximum volume of 600ml/h. This useful and innovative function stems from the incorporation of a slim line water tank and combined water wheel and vaporisation filter assembly.

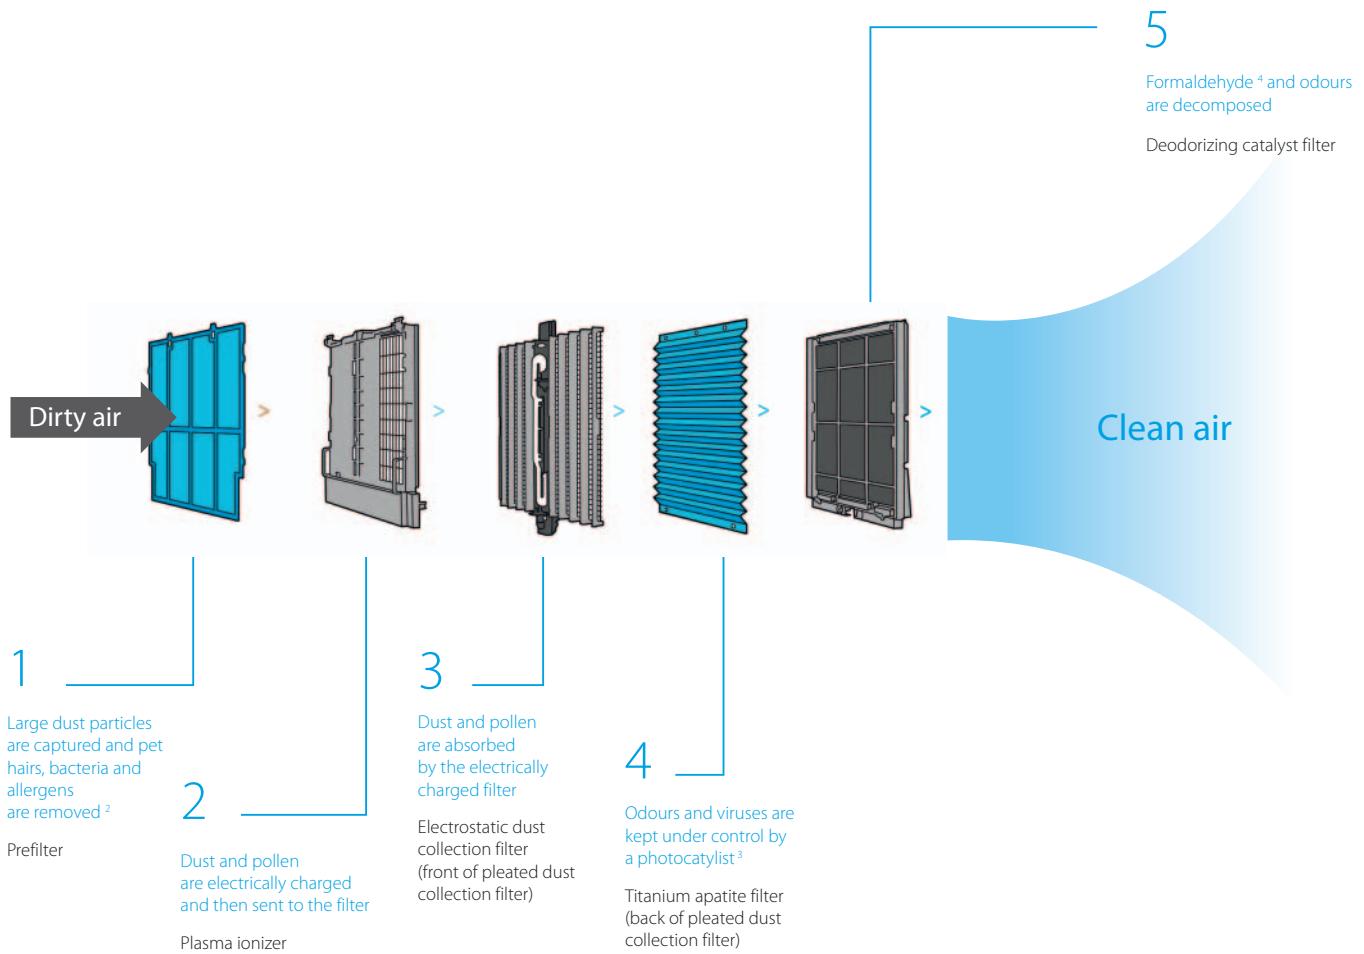

- Humidification thanks to the slim water tank
- Air purification

Daikin has already received great praise for its air purifiers: the Daikin TÜV award confirms the efficiency of this unit.

### How does the humidification function work?

Water in the tank flows into the receiver tray housing the water wheel, which lifts the water as it rotates and releases it onto the filter. Air blown onto the filter, absorbs its moisture and discharges it into the room as humidification.

## How does the filter work?

Daikin Ururu Air Purifier also removes efficiently allergens (e.g. pollen, house dust mites, dust, etc.), bacteria and viruses. Additionally, it has a high deodorizing efficiency; it eliminates efficiently tobacco smoke whilst decomposing other smells. It quickly collects particles and breaks them down rapidly. Its quiet operation makes it ideal for quiet nights. The unit includes seven pleated filters (one for immediate use and 6 spares).

Daikin offers you all types of **energy-efficient** heating solutions with **low CO<sub>2</sub> emissions**, whether you need a heating system for a replacement project or a new house. You can choose between different technologies based on the requirements of your customer: **air to water** heat pumps, **ground to water** heat pumps, **hybrid** technology and **gas condensing** technology.

All-in-one heating comfort  
for residential & commercial  
applications

## Why choose a Daikin heating system?

- More than **50 years of experience** in heat pumps
- Innovative heating technologies to **reduce running costs** and optimise renewable energy usage
- Research and development **in Europe for Europe**
- A solution for any application
- Combinable

with **all kinds of heat emitters**

## Solutions for space heating and domestic hot water

**Air to water technology:** extracting heat from the outside air

- Guaranteed heating capacity down to -25°C: no need to worry in winter time
- Solar connection possible for domestic hot water support to optimise renewable energy use

**Hybrid technology:** gas condensing technology combined with air-to-water technology

- Most economical operation mode is selected depending on energy prices, outdoor temperature and internal heat load
- Optimisation of both technologies

**Ground to water technology:** extracting heat from the ground

- Ideal for climates where the average winter ambient temperature drops below 3°C
- High seasonal efficiency thanks to stable underground temperatures

**Gas condensing technology:**

- Low costs for **both** heating and hot water tanks to new dual heat exchanger
- Easy installation in minimum space by using our optional pre-assembled B-pack which contains all the components for the functional installation in one module and fits behind the boiler

## Optimal comfort ... all combined into one system

- › Heating
- › Domestic hot water with optional solar support
- › Cooling
- › Easy control

## A solution for any application

- › New build
- › Low energy houses
- › Renovation of complete heating system
- › Renovation without changing radiators/piping
- › Bivalent solution: combination of current heating system with Daikin heating system

## Combinable with all kinds of heat emitters

Depending on the needs of your customer, you can select a system combinable with

- › Under floor heating
- › Heat pump convectors
- › Low temperature radiators
- › High temperature radiators (up to 80°C)

## Solutions for domestic hot water only

**Air to water technology:** extracting heat from the outside air to heat up the water.

- › Perfect solution when replacing an electric domestic hot water tank
- › Ideal to combine with a drain-back or pressurised solar system to optimise energy savings
- › Water temperatures of up to 55°C with heat pump operation only

# Daikin Altherma hybrid heat pump, the natural combination

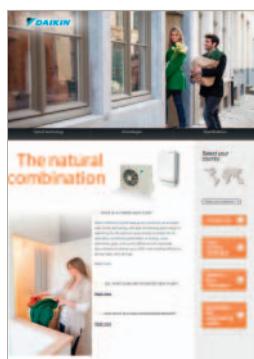

## Why choose Daikin Altherma hybrid heat pump?

- **Low running costs** for heating and domestic hot water compared to traditional boilers
- Low investment cost
- **Ideal for renovation** applications with 27 kW gas boiler and 5 or 7 kW heat pump
- Easy and fast installation

## Supporting tools

### Extranet

- › Experience our new business portal at [my.daikin.eu](http://my.daikin.eu)
- › Find information easily
- › Access via mobile or desktop
- › Customise the options so you see only info relevant for you

### Software

- › Calculate your energy savings:  
<http://ecocalc.daikin.eu/>

### Low running costs

#### 1. Space heating

Daikin Altherma hybrid heat pump smartly chooses between the heat pump and/or the gas boiler, possibly in simultaneous operation based on

- › energy prices
- › outdoor temperature
- › the internal heat load

always selecting the most economical mode to operate.

#### 2. Domestic hot water: heated using gas condensing technology

- › Efficiency increase of up to 10-15% compared to traditional gas condensing boilers thanks to a special dual heat exchanger:
- › cold tap water flows directly into the heat exchanger
- › optimal and continuous condensing of the flue gases during domestic hot water preparation

### Low investment cost

- › No need to replace the existing radiators (up to 80°C) and pipe work
- › Compact dimensions: space needed for the new system is very similar to that of an existing system

Gas condensing boiler

### Ideal for renovation applications

- › All heat loads are covered up to 27 kW

### Easy and fast installation: 3 components

- › Heat pump outdoor unit
- › Heat pump indoor unit
- › Gas condensing boiler

# Daikin Altherma hybrid heat pump

Hybrid technology combining gas and air to water heat pump for heating and hot water

- Daikin Altherma hybrid heat pump combines air-to-water heat pump technology with gas condensing technology
- Depending on outdoor temperature, energy prices and internal heat load, Daikin Altherma hybrid heat pump always selects the most economical mode to operate
- Low investment cost: no need to replace the existing radiators (up to 80°C) and pipe work
- Provides sufficient heat in renovation applications as all heat loads are covered up to 32kW
- Easy and fast installation thanks to the compact dimensions and quick interconnections
- Outdoor unit extracts heat from the outdoor air, even at -25°C

## Daikin Altherma ground source heat pump

### Why choose Daikin?

The simple answer is that it is more efficient than an on/off ground source heat pump. Thanks to high efficiencies resulting from our **inverter technology**, the Daikin Altherma ground source heat pump provides a **leading edge performance**.

#### Highest seasonal efficiency thanks to our inverter heat pump technology

The Daikin inverter heat pump technology has been shown to provide an increase in seasonal efficiency of up to 20% when compared to traditional on/off ground source heat pumps. Higher brine temperatures during continuous compressor operation, in partial load conditions Less back up heater operation thanks to the boosting of the inverter compressor frequency.

#### Quick and easy installation including a domestic hot water tank

Installation time is reduced up to 5 hours thanks to the compact designed unit that includes both the space heating and the brine expansion vessel.

#### Flexibility covering multiple house types

Providing a solution which can cover heat loads from 3-12 kW means replacement of a 6 to 12 kW range is possible with one single unit. This is not only a flexible solution but also space saving.

#### No affected surroundings

Very limited outdoor space is required, except for the necessary space to prepare the excavation works.

# Daikin Altherma ground source heat pump

## Ground source heat pump for heating & hot water

- › Ground source heat pump technology uses stable geothermal energy, unaffected by the outside temperature
- › Highest seasonal efficiency thanks to our inverter heat pump technology
- › Quick and easy installation thanks to factory-fitted piping on top of the unit and reduced overall weight
- › Integrated indoor unit: all-in-one floor standing unit including the domestic hot water tank
- › User interface with thermostat function for higher comfort, quick commissioning, easy servicing and energy management to control energy consumption and costs

## Daikin Altherma low temperature The natural choice

### Why choose Daikin Altherma low temperature?

Daikin Altherma low temperature offers a wide range to adapt to your customer's needs.

- Ideal for **new builds**
- Heating, domestic hot water and cooling with optional solar support
- Capacities from 4 to 16 kW
- Combinable with **under floor heating**, heat pump convectors and low temperature radiators
- Easy control
- **Flexible solutions:** split floor standing, split wall mounted, monobloc

#### Daikin Altherma low temperature split

- › Best seasonal efficiencies providing the highest savings on running costs
- › Perfect fit for new builds, as well as for low-energy houses

Floor-standing unit with integrated domestic hot water tank

#### Compact and yet 100% comfort guaranteed

- › All components and connections factory-mounted
- › Very small installation footprint required
- › Minimum electrical input with constantly available hot water
- › Bi-zone option: two temperature zones automatically regulated by the same indoor unit

Integrated solar unit and domestic hot water tank

#### Maximising renewable energy with top comfort for hot water preparation

- › Solar support for domestic hot water
- › Lightweight plastic tank
- › Bivalent option: can be combined with a secondary heat source
- › App control available

Wall mounted unit

#### High flexibility for installation and domestic hot water connection

- › Compact unit with small installation space: almost no side clearance required
- › Can be combined with a separate domestic hot water tank of up to 500 litres, with or without solar support

Monobloc outdoor unit

#### Ideal when indoor space is limited

- › Compact monobloc for space heating & cooling with optional domestic hot water
- › Fuss-free installation: only water and electricity connections are required
- › Reliable operation down to -25°C (outside) thanks to effective frost-protection features

#### Typical application:

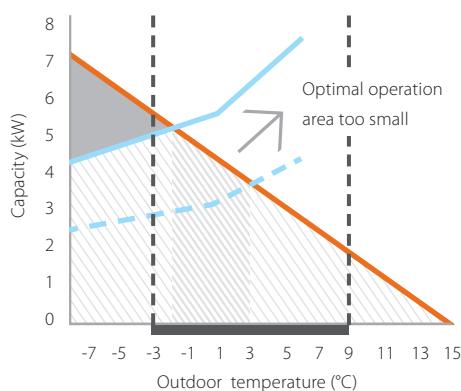

- › Location: Paris
- › Design temperature: -7°C
- › Heat load: 7kW
- › Heating off temperature: 16°C

## Case Study

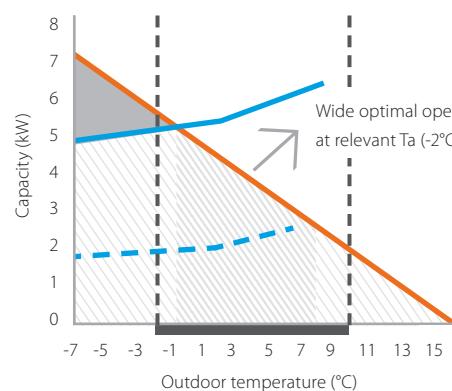

Efficient partial-load operation is especially important for the temperature range where the highest heat output is required. Typically, 80% of the total heat output is required in an outdoor temperature range of -2°C to 10°C. Achieving high efficiencies in this temperature range, contributes strongly to high seasonal efficiencies.

- › Largest part of heat output delivered at optimal efficiencies
- › Less on/off operation when heat load becomes lower than the minimum capacity the heat pump can deliver, optimising efficiency and comfort
- › Modulating range doubled vs standard air-to-water heat pumps
- › New range delivers around 1kW additional in full-load condition at -7°C (+25%)

Standard heat pump

Daikin Altherma

Resulting in  
the best possible  
efficiencies

- heat load line
- standard heat pump max capacity
- standard heat pump min capacity
- ERLQ006CAV3 max capacity
- ERLQ006CAV3 min capacity

Eco-calculator

Floor standing air to water heat pump for heating and hot water, ideal for low energy houses

- › Integrated indoor unit: all-in-one floor standing unit including the domestic hot water tank
- › Energy efficient heating only system based on air to water heat pump technology
- › Perfect fit for new built as well as for low energy houses
- › Best seasonal efficiencies, providing the highest savings on running costs
- › Flexible configuration with respect to heat emitters
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Daikin Altherma low temperature split

Optimum efficiency offering full flexibility in heat emitters throughout the house

- › Two different temperature zones can be automatically regulated by the same indoor unit
- › Offers flexibility to the end user to combine different heat emitters e.g. under floor heating and radiators while optimising the efficiency
- › Integrated indoor unit: all-in-one floor standing unit including the domestic hot water tank
- › Energy efficient heating only system based on air to water heat pump technology
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Daikin Altherma low temperature split

Floor standing air to water heat pump for **heating and hot water with thermal solar support**

- › Integrated solar unit, maximising renewable energy and offering top comfort in heating and hot water
- › Solar support of domestic hot water with unpressurised (drain-back) solar system
- › Lightweight plastic tank with exceptional hygienic benefits
- › App control possible for managing heating and hot water operation
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Daikin Altherma low temperature split

Floor standing air to water heat pump for **heating, cooling and hot water with thermal solar support**

- › Integrated solar unit, maximising renewable energy and offering top comfort in heating, hot water and cooling
- › Solar support of domestic hot water with unpressurised (drain-back) solar system
- › Lightweight plastic tank with exceptional hygienic benefits
- › App control possible for managing heating, hot water and cooling operation
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Daikin Altherma low temperature split

Wall mounted **heating only** air to water heat pump ideal for low energy houses

- › Energy efficient heating only system based on air to water heat pump technology
- › Perfect fit for new built as well as for low energy houses
- › Best seasonal efficiencies, providing the highest savings on running costs
- › Flexible configuration with respect to heat emitters
- › Possible to combine with domestic hot water
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

Wall mounted **reversible** air to water heat pump ideal for low energy houses

- › Wall mounted indoor unit
- › Energy efficient heating and cooling system based on air to water heat pump technology
- › Perfect fit for new built as well as for low energy houses
- › Best seasonal efficiencies, providing the highest savings on running costs
- › Flexible configuration with respect to heat emitters
- › Possible to combine with domestic hot water
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Daikin Altherma small capacity monobloc

Why choose Daikin Altherma low temperature monobloc?

The simple answer is that our inverter technology delivers **leading edge performance**, all the hydraulic components are pre-installed in the outdoor unit which is the **smallest in the market**, and it works with all our output devices.

All hydraulic components  
are combined in the outdoor unit

Available in 5kW and 7kW models, the new Daikin Altherma LT monobloc requires only a controller indoors, when space heating is needed. For use of both space heating and domestic hot water, a wiring centre is added. And the outdoor unit can be installed almost anywhere, under a window sill, or in the smallest of gardens. So it's a natural fit for new build and renovation projects alike.

The space-saving design is ideal for homes where space is limited

- › The outdoor unit includes all hydraulic components  
Smallest installed volume in the market:  
H735 x W1085 x D360 mm –only 80 kg
  - › The separate installation of controller  
and wiring centre allows a flexible  
installation in the house.

## Everything you need from one source

The Daikin Altherma monobloc works efficiently with Daikin's range of under-floor heating, radiators and fan convectors and can be combined with solar thermal systems. So you can count on Daikin for your entire project.

## Supporting tools

## Extranet

# Daikin Altherma low temperature monobloc

**Small capacity** air to water monobloc system, ideal when indoor space is limited

- › Compact monobloc for space heating with optional domestic hot water
- › Fuss-free installation : only water connections required
- › Reliable operation even when -25°C outside thanks to frost protection features such as free hanging coil
- › COP up to 5 with typical annual efficiencies up to 300%

# Daikin Altherma low temperature monobloc

**Reversible** air to water monobloc system,  
ideal when indoor space is limited

- › Energy efficient **heating and cooling** system based on air to water heat pump technology
- › Low energy bills and low CO<sub>2</sub> emissions
- › H2O piping between outdoor unit and indoor heat emitters
- › Inverter controlled scroll compressor
- › Built-in electric back-up heater as additional heating during extremely cold outdoor temperature
- › Possible to combine with domestic hot water
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

# Solar collector

## Thermal solar collector for hot water production

- › Solar collectors can produce up to 70% of the energy needed for hot water production - a major cost saving
- › Vertical and horizontal solar collectors for domestic hot water production
- › High efficiency collectors transfer all the short-wave solar radiation into heat as a result of their highly selective coating
- › Easy to install on roof tiles

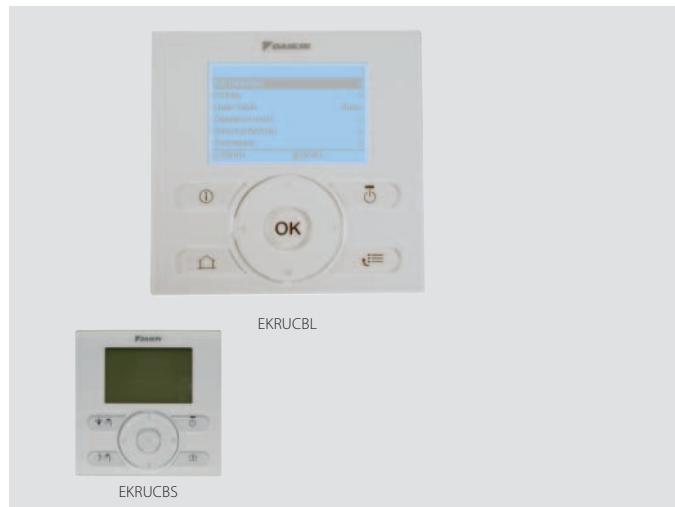

<b>Solar collector</b>				<b>EKSV21P</b>	<b>EKSV26P</b>	<b>EKSH26P</b>
Mounting				Vertical		Horizontal
Dimensions	Unit	HeightxWidthxDepth	mm	1,006x85x2,000		2,000x85x1,300
Weight	Unit		kg	33	42	
Volume			l	1.3	1.7	2.1
Surface	Outer		m <sup>2</sup>	2.01	2.60	
	Aperture		m <sup>2</sup>	1.800	2.360	
	Absorber		m <sup>2</sup>	1.79	2.35	
Coating				Micro-therm (absorption max. 96%, Emission ca. 5% +/-2%)		
Absorber				Harp-shaped copper pipe register with laser-welded highly selective coated aluminium plate		
Glazing				Single pane safety glass, transmission +/- 92%		
Allowed roof angle Min.~Max.				15~80°		
Operating pressure Max.				bar		
Stand still temperature Max.				°C		
Thermal performance	collector efficiency ( $\eta_{col}$ )			%		
	Zero loss collector efficiency $\eta_0$			%		
	Heat loss coefficient $a_1$			W/m <sup>2</sup> .K		
	Temperature dependence of the heat loss coefficient $a_2$			W/m <sup>2</sup> .K <sup>2</sup>		
	Thermal capacity			kJ/K		

## User interface

- › User friendly remote control with contemporary design
- › For control of space heating, cooling and domestic hot water with among others reheat, scheduled and booster mode
- › Easy to use: all main functions directly accessible
- › An additional user interface can be a room thermostat in the space to be heated.
- › Several languages possible depending on the model : English, German, Dutch, Spanish, Italian, French, Greek, Russian, etc.
- › Easy commissioning: intuitive interface for advanced menu settings
- › User friendly simplified remote control with contemporary design
- › For control of space heating, cooling and domestic hot water, including booster mode
- › Easy to use: all main functions directly accessible
- › The simplified user interface can only be used in combination with the main user interface
- › Use of universal symbols, no text

## EKRTW/EKRTW

## Remote control

Room thermostat for easy regulation of the indoor temperature

- › Easy and convenient regulation of the indoor temperature, resulting in ideal comfort and energy efficiency
- › Heating and cooling mode, with possibility to disable cooling mode if not required
- › Comfort function mode activates the programmed temperature levels intended for a home occupied during the day; default setpoints are 21°C in heating mode and 24°C in cooling mode and can be changed by the user
- › Reduced function mode activates the programmed temperature levels for periods when the house is unoccupied or at night; default setpoints are 17°C in heating, 28°C in cooling mode and can be changed by the user
- › Scheduled function mode: uses a timer to schedule heating and cooling setpoints throughout the day; up to 12 setpoints can be programmed per day; the selected setpoints will be automatically activated at the scheduled time
- › Holiday function mode: intended for setting reduced and fuel-efficient setpoints when the house is unoccupied for long periods. The default setpoints are 14°C for heating and 30°C for cooling.
- › Off function: switches the system off; however, the integrated frost protection remains activated (set by default at 4°C).
- › Setpoint limitation sets the upper and lower setpoint limits within which the user can programme the desired comfort levels and can only be modified by the installer
- › Number of setpoint changes: 12/day
- › Key lock function: possible to lock the keys of the room thermostat

## Heat pump convector

Floor standing unit saving on running costs when combined with under floor heating thanks to its low leaving water temperatures

- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › Energy efficient heating and cooling system based on air source heat pump technology
- › Optimum energy efficiency when connected to a Daikin Altherma low temperature system
- › The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 22dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- › Reduced running costs
- › Its low height enables the unit to fit perfectly beneath a window
- › Weekly timer can be set to start heating or cooling anytime on a daily or weekly basis
- › Indoor unit silent operation: „silent“ button on the remote control lowers the operation sound of the indoor unit by 3dBA
- › Can be installed against a wall or recessed
- › Powerful mode can be selected for rapid cooling; after the powerful mode is turned off, the unit returns to the preset mode.
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air

## Heating & domestic hot water for renovations

### Why choose Daikin Altherma high temperature?

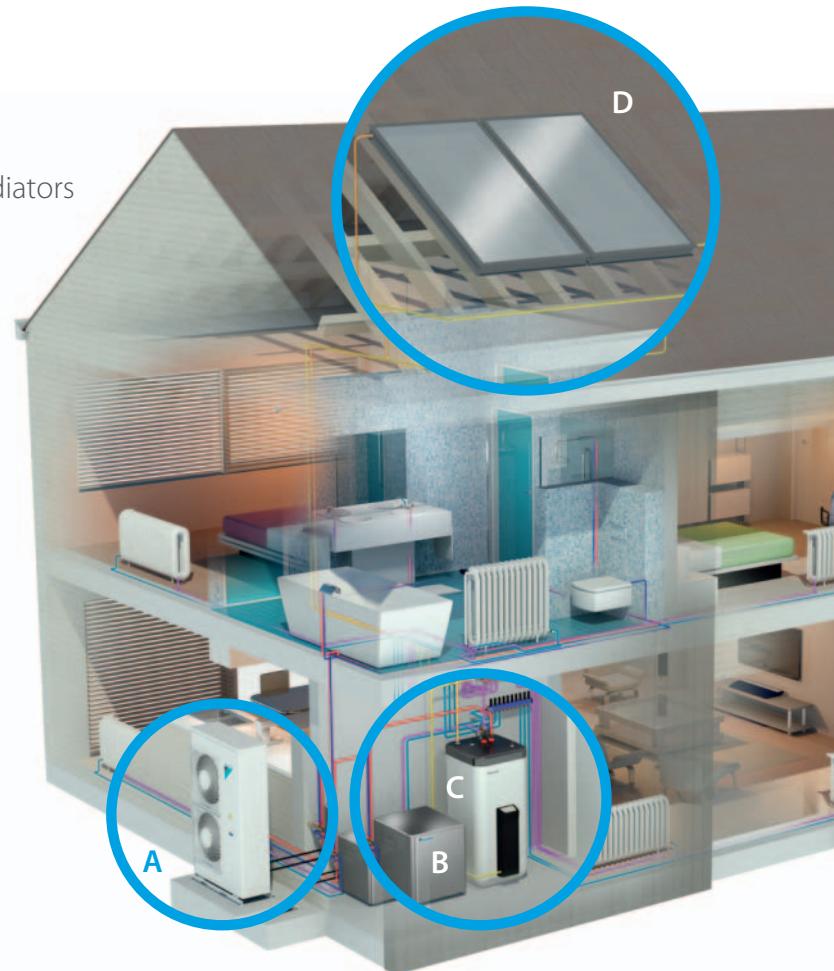

Daikin Altherma high temperature is ideal **to replace a current oil boiler**, without replacing your existing radiators.

It offers a wide range to adapt to your customer's needs.

- Heating and domestic hot water with optional solar connection
- Capacities from 11 to 16 kW
- Combinable with existing high temperature radiators
- Easy control

#### Energy efficient solution when replacing an oil boiler

- › Low running costs and optimum comfort at even the coldest outdoor temperatures, thanks to the unique cascade compressor approach
- › No need to change existing radiators and piping as water temperatures can be increased up to 80°C for heating and domestic hot water use
- › Only limited installation space needed as the indoor unit and domestic hot water tank can be stacked on each other

- A Outdoor unit
- B Indoor unit
- C Domestic hot water tank
- D Optional solar connection

## User interface

With Daikin Altherma's user interface, the ideal temperature can be easily, quickly and conveniently regulated. It allows for more precise measurement and can regulate your comfort even more optimally and energy efficiently.

## Heat emitters

The Daikin Atherma high temperature system is designed to work only with high-temperature radiators, which come in various sizes and formats to suit the interior design as well as the heating requirement. Our radiators can be individually controlled or they can be regulated by the central heating control programme.

## Solar connection

The Daikin Altherma high temperature heating system can optionally use solar energy for hot water production.

If the solar energy is not required immediately, the purpose-built hot water tank (EKHWP) can store large quantities of heated water for up to a day for later use as domestic hot water or for heating.

# Daikin Altherma high temperature split

Floor standing heating only air to water heat pump combinable with existing radiators

- › Energy efficient heating only system based on air to water heat pump technology
- › High temperature application: up to 80°C without electric heater
- › Easy replacement of existing boiler, without changing heating pipes
- › Combinable with high temperature radiators
- › Low energy bills and low CO<sub>2</sub> emissions
- › Inverter controlled scroll compressor
- › Outdoor unit extracts heat from the outdoor air, even at -20°C

## Domestic hot water tank

### Stackable stainless steel domestic hot water tank

- › Stainless steel domestic hot water tank
- › The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- › Available in 200 and 260 liters
- › Heat loss is reduced to a minimum thanks to the high quality insulation
- › At necessary intervals, the indoor unit can heat up the water to 60°C to prevent the risk of bacteria growth
- › Efficient temperature heat-up: from 10°C to 50°C in only 60 minutes

<b>Accessory</b>		<b>EKHTS</b>		<b>200AC</b>	<b>260AC</b>

## Solar collector

### Thermal solar collector for hot water production

- > Solar collectors can produce up to 70% of the energy needed for hot water production - a major cost saving
- > Vertical and horizontal solar collectors for domestic hot water production
- > High efficiency collectors transfer all the short-wave solar radiation into heat as a result of their highly selective coating
- > Easy to install on roof tiles

<b>Solar collector</b>				<b>EKSV21P</b>	<b>EKSV26P</b>	<b>EKSH26P</b>
Mounting				Vertical		Horizontal
Dimensions	Unit	HeightxWidthxDepth	mm	1,006x85x2,000		2,000x85x1,300

# Daikin Altherma Flex Type

for large residential and commercial applications

## Why choose Daikin Altherma Flex Type

Daikin Altherma Flex Type is a flexible solution for space heating, domestic hot water and cooling for e.g. apartments, spas, hotels and restaurants

- Low operating costs thanks to high efficiency
- Large hot water volume
- Cooling in the most efficient way thanks to heat recovery technology
- Limited installation space thanks to small footprint of indoor unit and outdoor unit

### Heat emitters

All types of heat emitters can be connected thanks to its wide water temperature range (up to 80°C) and its ability to work with multiple set points, allowing a combination of different heat emitters operating at different water temperatures.

### Supporting tools

#### Extranet

- > Experience our new business portal at [my.daikin.eu](http://my.daikin.eu)

#### Literature

- > See all the literature available on [www.daikineurope.com/support-and-manuals/catalogues](http://www.daikineurope.com/support-and-manuals/catalogues)

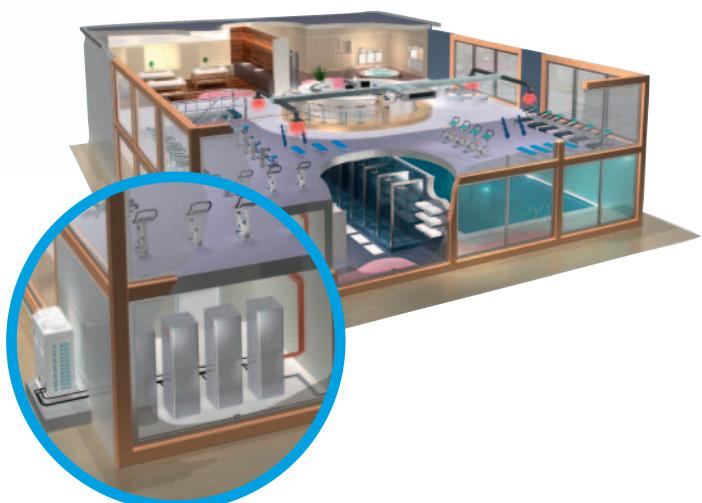

### Modular system

One or more outdoor units can be connected to several indoor units (maximum 10 indoor units per outdoor unit).

### Advanced control and monitoring

To further increase the efficiency, an RTD-W per indoor unit and a sequencing controller for the full heating system can be installed to monitor the exact heating demand.

- 1 Heating
- 2 Cooling
- 3 Hot water

## Daikin Altherma Flex Type

Floor standing reversible air to water heat pump for large residential and commercial applications

- › Floor standing indoor unit up to 9kW
- › Low energy bills and low CO<sub>2</sub> emissions
- › Energy efficient heating only system based on air to water heat pump technology
- › High temperature application: up to 80°C without electric heater
- › Flexible configuration with respect to heat emitters
- › Inverter controlled scroll compressor

### EKHTS-AC

## Domestic hot water tank

### Stackable stainless steel domestic hot water tank

- > Stainless steel domestic hot water tank
- > The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- > Available in 200 and 260 liters
- > Heat loss is reduced to a minimum thanks to the high quality insulation
- > At necessary intervals, the indoor unit can heat up the water to 60°C to prevent the risk of bacteria growth
- > Efficient temperature heat-up: from 10°C to 50°C in only 60 minutes

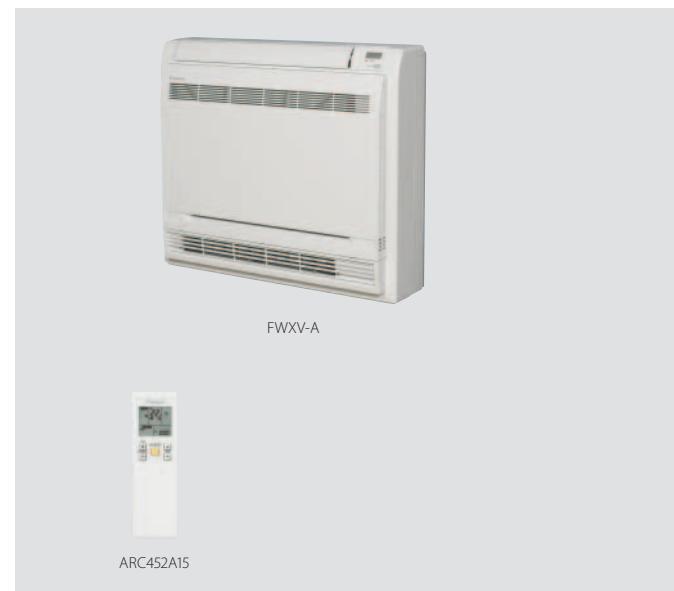

Accessory	EKHTS	200AC	260AC
Casing	Colour	Metallic grey	
	Material	Galvanised steel (precoated sheet metal)	
Dimensions	Unit	Height mm	2,010
		Integrated on indoor unit	
		Width mm	600
		Depth mm	695
Weight	Unit	Empty kg	70
Tank	Water volume l		200
	Material	Stainless steel (EN 1.4521)	
	Maximum water temperature °C	75	
	Insulation	Heat loss kWh/24h	12.0
	Energy efficiency class		B
	Standing heat loss W	50	63
	Storage volume l	200	260
Heat exchanger	Quantity	1	
	Tube material	Duplex steel (EN 1.4162)	
	Face area m²	1.560	
	Internal coil volume l	7.5	

## Heat pump convector

Floor standing unit saving on running costs when combined with under floor heating thanks to its low leaving water temperatures

- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › Energy efficient heating and cooling system based on air source heat pump technology
- › Optimum energy efficiency when connected to a Daikin Altherma low temperature system
- › The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 22dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- › Reduced running costs
- › Its low height enables the unit to fit perfectly beneath a window
- › Weekly timer can be set to start heating or cooling anytime on a daily or weekly basis
- › Indoor unit silent operation: „silent“ button on the remote control lowers the operation sound of the indoor unit by 3dBA
- › Can be installed against a wall or recessed
- › Powerful mode can be selected for rapid cooling; after the powerful mode is turned off, the unit returns to the preset mode.
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air

# Domestic hot water heat pump

Hot water in an efficient way

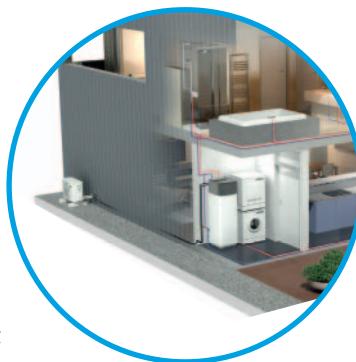

## Why choose the domestic hot water heat pump?

- Domestic hot water is heated almost immediately
- Combine it with solar heating for even better energy efficiency
- Easy installation: no water tank pressure and only limited pressure in the heat exchanger
- Low maintenance: no anode means no scale and lime deposits or corrosion
- Electrical back-up (2.5 kW) ensures hot water under all circumstances. The 500L tank can also be equipped with an external hydraulic back-up.

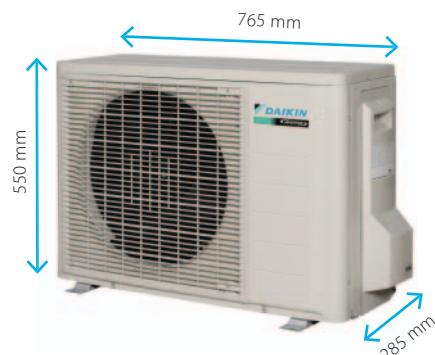

## How does it work?

The outdoor unit extracts (pumps) heat from the air. Through a heat exchanger this heat is transferred directly to the storage tank – for hot water almost immediately.

## High performance inverter heat pump

Just using the heat pump, hot water can be provided up to 55°C and hot water production is guaranteed down to -15°C.

## Solar connection

For even more energy efficiency the heat pump can be combined with solar collectors. Two technologies are possible:

### Pressureless (drain-back)

The solar collectors are only filled with water when the sun provides enough heat. In this case, both pumps in the control and pump unit switch on briefly and fill the collectors with storage tank water. After filling, one switches off and the other maintains water circulation. If there is not enough sunshine or if the solar storage tank doesn't need more heat, the circulation pump switches off and the entire solar system drains into the storage tank.

### Pressurised

This system uses heat transfer fluid containing antifreeze to avoid freezing in winter. The whole system is pressurised and sealed.

# Gas condensing boiler

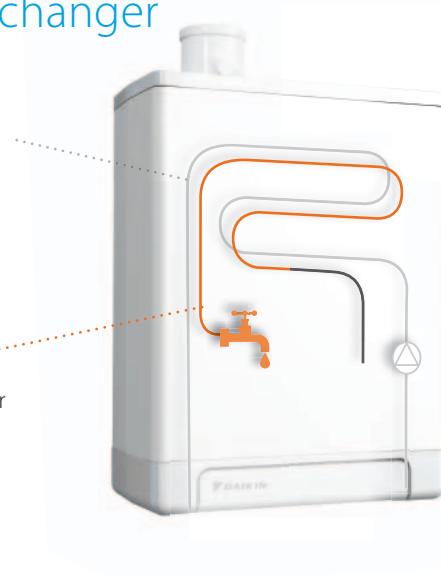

Reliability and peace of mind

## Why choose the Daikin gas condensing boiler?

- Low costs for both heating and hot water thanks to new dual heat exchanger resulting in high efficiencies
- Easy installation in minimum space

Low costs for both heating and hot water thanks to new dual heat exchanger

1. With the first heat exchanger, maximum efficiency is reached when heating your home through condensation of the flue gases.

2. Also when producing hot water the efficiency is maximised thanks to condensation with the unique second heat exchanger.

Unique in the market: double condensation, not only for heating but also for domestic hot water resulting in low running costs

## Easy installation in minimum space

Installation time can be reduced to the minimum by using our optional pre-assembled B-pack which contains all the components for the functional installation in one module and fits behind the boiler. And as there are fewer parts, the Daikin condensing gas boiler is more reliable and easier to service.

### Control at a distance

Program your gas condensing boiler and follow up your energy consumption from a smartphone, tablet or computer with the RTRNETA3AA controller.

Additional roof breakthrough for opposite side connection	CON FE
Connection kit between 2 solar panels	FIX VBP
Connection kit between 2 rows of Collectors	CON RVP
Connection kit between 2 rows of Collectors	CON LCP
Mounting support for V26P	FIX MP 130
Mounting support for H26P	FIX MP 200
Mounting support for V21P	FIX MP 100
Supporting shell for pressureless connection pipe	TS
Standard mounting set for on-roof mounting suitable for roof tiles	FIX AD
Variable height mounting set for on-roof mounting suitable for roof tiles	FIX ADP
Mounting set for on-roof mounting	FIX ADD
Mounting set for on-roof mounting suitable for flat tiles e.g. shingles	FIX ADS
Mounting set for on-roof mounting suitable for corrugated plates	FIX - WD
Mounting set for on-roof mounting suitable for metal roofs	FIX BD
Basic IN ROOF installation kit for 2 EKSV21P	IBV21P
Extension IN ROOF installation kit for 1 additional EKSV21P	IEV21P
Basic IN ROOF installation kit for 2 EKSV26P	IBV26P
Extension IN ROOF installation kit for 1 additional EKSV26P	IEV26P
IN ROOF covering slate complementing kit	FIX-IES
Basic FLAT ROOF support frame for 2 EKSV26P	FB V26P
Extension FLAT ROOF support frame for additional EKSV26P	FE V26P
Basic FLAT ROOF support frame for 1 EKSH26P	FB H26P
Extension FLAT ROOF support frame for additional EKSH26P	FE H26P
Release tool	FIX LP
Glycol fluid 20 l	GFL

## Comfort all year round

The choice of the right system mostly depends on the specific project. Every home is unique. Furthermore, it concerns the daily living environment. Whether you are talking in terms of construction or renovation, small areas or large spaces, Daikin heat pumps adapt to each layout with efficiency.

Total comfort at home

## Why choose a Daikin split system?

- The ideal solution for each application thanks to the **wide range of available products** both for cooling and heating
- **Low energy** bills thanks to high seasonal efficiencies up to A+++ and energy saving features such as intelligent eye and weekly timer
- Control via a **smartphone app** or a user friendly remote controller
- Perfect indoor climate: **whisper quiet sound** level & **perfect airflow** pattern

Any kind of indoor unit

### 1. Wall mounted unit:

a wide range from top efficiency and design units to units offering good value for money

German Design Award  
SPECIAL MENTION 2015

Focus Open 2014  
Silver

reddot award 2014  
winner

1. Daikin Emura  
Wall mounted unit

2. Nexura  
Floor standing unit

3. FDXS-F(9)  
Concealed ceiling unit

4. FLXS-B(9)  
Flexi type unit

### 2. Floor standing unit:

ideal for heating comfort, offering features like a radiant heat panel.

### 3. Concealed ceiling unit:

as it can be mounted in a ceiling void, it blends unobtrusively with any décor as only the grilles are visible.

### 4. Flexi type unit:

can fit on either ceiling or lower wall.

## One or multiple rooms?

The choice is yours.

With **1** multi **outdoor unit**, up to **5 or 9\*** **indoor units** can be connected. All indoor units can be **individually controlled** and do not need to be installed in the same room or even at the same time.

\* with RXYS(C)Q-TV1

## R-32 - the refrigerant of the future

**R-32**

Daikin is leading the way to the most energy efficient product range with the lowest environmental impact

› **68% Reduction in environmental impact**

compared to R-410A

› Seasonal efficiency values up to A+++

› Full split range available including wall mounted and concealed ceiling units, connectable to pair and multi outdoor units

Optimised for heating

Our special split range optimised for heating is suitable for colder climates, even withstanding severe winter conditions

› Guaranteed capacity down to -25°C

› High heating energy efficiency with SCOP up to A++

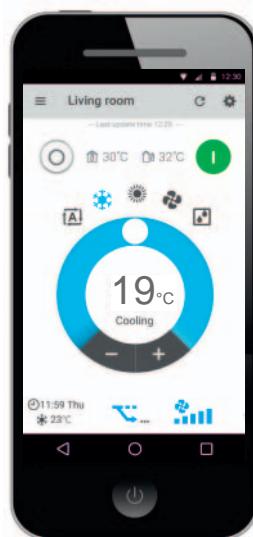

› Improved defrost thanks to unique **free hanging coil** technology

## Online controller

Always in control, no matter where you are

Control your indoor from any location with an app (available for iOS & Android), via your local network or internet. It is now connectable to most of the split indoors.

URURU SARARA WALL  
MOUNTED UNIT, FTXZ-N

# The best of the best

reddot design award  
winner 2013

## Why choose Ururu Sarara?

- First R-32 air to air heat pump in the European market at lowest environmental impact thanks to high energy efficiency and use of low GWP refrigerant.
- **Market leader in terms of seasonal efficiency.**
- Advanced technologies have been integrated to create the perfect indoor climate by controlling not only the room temperature but **also air quality and humidity**.

## Benefits

- › Low energy bill thanks to very high seasonal energy efficiency (A+++ in heating and cooling)
- › Perfect indoor comfort thanks to 5 air treatment technologies and 3 area intelligent eye
- › Optimal airflow distribution: cools down spaces in a fast, efficient and controllable way
- › Award winning design
- › No need to clean filters thanks to self cleaning filter
- › New remote control: user friendly with backlight and information on actual energy consumption
- › As easy to install as any R-410A unit
- › Wide operation range, from -20°C to +43°C
- › Online controller: always in control, no matter where you are

## Supporting tools

### **NEW** Business portal

- › Experience our new extranet that thinks with you at [my.daikin.eu](http://my.daikin.eu)
- › Find information in seconds via a powerful search
- › Customise the options so you see only info relevant for you
- › Access via mobile device or desktop

### Internet

- › Visit the website:  
[www.daikineurope.com/for-your-home/needs/air-conditioning/ururu-sarara/index.jsp](http://www.daikineurope.com/for-your-home/needs/air-conditioning/ururu-sarara/index.jsp)

### Literature

- › See all literature available on [www.daikineurope.com/support-and-manuals/catalogues](http://www.daikineurope.com/support-and-manuals/catalogues)

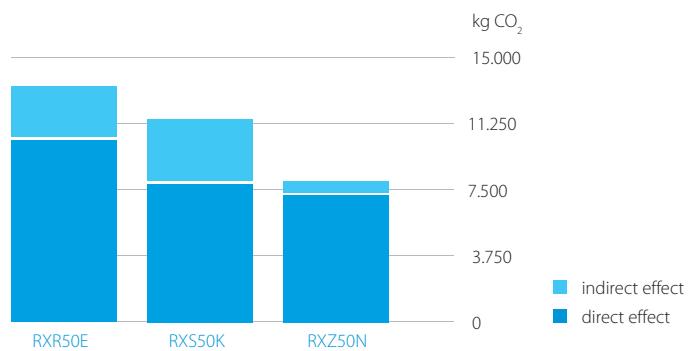

## 5 air treatment techniques

### Perfect indoor climate

- › Cooling & heating
- › Fresh air (ventilation)
- › Ururu Humidification
- › Sarara Dehumidification
- › Air purification

### Lowest environmental impact

- › SEER and SCOP A+++
- › Low GWP refrigerant R-32

### Perfect comfort thanks to 3 area intelligent eye:

- › Air flow is sent to a zone other than where the person is located at that moment. Detection is done in 3 directions: left, front & right.
- › If no people are detected, the unit automatically switches over to energy-efficient setting and eventually switches off.

# Wall mounted unit

Complete climate control with (de)humidification, air purification & ventilation with top efficiencies in heating & cooling

- > SEER + SCOP = A+++ on the entire range
- > No need to clean filters, thanks to the self cleaning filter
- > Unique combination of humidification, dehumidification, ventilation, air purification and heating & cooling in 1 system
- > 3 area intelligent eye: air flow is sent to a zone other than where the person is located at that moment. Detection is done in 3 directions: left, front and right. If no people are detected, the unit will automatically switch over to the energy-efficient setting
- > Reddot design award winner 2013
- > Online controller (optional): control your indoor from any location with an app, via your local network or internet
- > First R-32 air-to-air heat pump in the European market

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# Daikin Emura

## Form. Function. Redesigned

## Why choose Daikin Emura?

- Unique **design**  
Designed in Europe for Europe.
- High seasonal **efficiency**, further improved by energy saving techniques like weekly timer and intelligent eye
- Optimal **comfort** thanks to advanced technologies e.g. 2-area intelligent eye, whisper quiet operation and online controller

## Benefits

- › A remarkable blend between iconic design and engineering excellence
- › Stylish design in matt crystal white and silver
- › The choice between R-32 and R-410A model
- › Whisper quiet with sound levels down to 19 dBA
- › Horizontal and vertical autoswing

- › 2-area intelligent eye saves energy by reducing the set point if nobody is present and directs airflow away from people, thus avoiding cold draught
- › Weekly timer
- › Guaranteed operation down to -25°C (with RXLG-M)
- › Connectable to pair, multi and (mini) VRV
- › Online controller: Always in control no matter where you are

### Unique design

Daikin is the only manufacturer offering a design model designed in Europe for the European market, using European technical and design standards to meet exactly with the customer's needs. Daikin Europe N.V. is also proud to announce that Daikin Emura has been awarded with several design awards.

### Improved energy efficiency

Seasonal efficiency gives a more realistic indication on how efficient air conditioners operate over an entire heating or cooling season. The label includes multiple classifications from A+++ to G. Daikin Emura achieves high energy efficiencies:

- › SEER up to 
- › SCOP up to 

### Lowest environmental impact

- › Possible to choose between an R-32 and R-410A model

**R-32** **R-410A**

### Comfort

- › 2-Area intelligent eye: Air flow is sent to a zone other than where the person is located at that moment. If no people are detected, the unit will automatically switch over to the energy efficient setting.
- › Whisper quiet: Daikin Emura is whisper quiet with sound levels down to 19dBA.

GOOD DESIGN

German Design Award  
SPECIAL MENTION 2015

Focus Open 2014  
Silver

red dot award 2014  
winner

# Wall mounted unit

Design at its best, delivering superior efficiency and comfort

- › Seasonal efficiency values up to A+++
- › Choosing for an R-32 product, reduces the environmental impact with 68% compared to R-410A and leads directly to lower energy consumption thanks to its high energy efficiency
- › Remarkable blend of iconic design and engineering excellence with an elegant finish in silver and anthracite or in matt crystal white
- › Daikin Emura has been awarded with Reddot design award 2014 by an international jury, thanks to its excellent design
- › Designed to perfectly balance technological leadership and the beauty of aerodynamics
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!

## Concealed ceiling unit

Compact concealed ceiling unit, with a height of only 200mm

- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

- Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- Choosing for an R-32 product, reduces the environmental impact with 68% compared to R-410A and leads directly to lower energy consumption thanks to its high energy efficiency
- Low energy consumption thanks to DC fan motor
- Medium external static pressure up to 40Pa facilitates unit use with flexible ducts of varying lengths

## Multi model application

- › Outdoor units for multi model application.
- › Outdoor units are fitted with a swing compressor, renowned for its low noise and high energy efficiency
- › Up to 5 indoor units can be connected to 1 multi outdoor unit; all indoor units are individually controllable and do not need to be installed in the same room or at the same time; they operate simultaneously within the same cooling or heating mode
- › Different types of indoor units can be connected: e.g. wall mounted units, concealed ceiling units
- › Choosing for an R-32 product, reduces the environmental impact with 68% compared to R-410A and leads directly to lower energy consumption thanks to its high energy efficiency

only available in multi model application

(1) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

  \*Note: blue cells contain preliminary data

## Multi model application

- › Outdoor units for multi model application.
- › Outdoor units are fitted with a swing compressor, renowned for its low noise and high energy efficiency
- › Up to 3 indoor units can be connected to 1 multi outdoor unit; all indoor units are individually controllable and do not need to be installed in the same room or at the same time
- › Choosing for an R-32 product, reduces the environmental impact with 68% compared to R-410A and leads directly to lower energy consumption thanks to its high energy efficiency

# Wall mounted unit

Design at its best, delivering superior efficiency and comfort

- › Seasonal efficiency values up to A+++
- › Remarkable blend of iconic design and engineering excellence with an elegant finish in silver and anthracite or in matt crystal white
- › Daikin Emura has been awarded with Reddot design award 2014 by an international jury, thanks to its excellent design
- › Designed to perfectly balance technological leadership and the beauty of aerodynamics
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!

## Wall mounted unit

Discreet, modern design for optimal efficiency and comfort thanks to 2 area intelligent eye

- › Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- › High quality matt crystal white finish
- › Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- › Ideal for installation in bedrooms (20,25 class) and larger or irregular shaped living areas (35,42,50 class)
- › 2 area intelligent eye: air flow is sent to a zone other than where the person is located at that moment; if no people are detected, the unit will automatically switch over to the energy-efficient setting.
- › Online controller (optional): control your indoor unit from any location with an app, via your local network or internet

## Wall mounted unit

Discreet wall mounted unit providing high efficiency and comfort

- › SEER / SCOP up to A++
- › Discreet, stylish front panel blends easily with the wall, and matches all interior décors
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Dry programme allows humidity levels to be reduced without variations in room temperature
- › Up to 2 indoor units can be connected to 1 multi outdoor unit; all indoor units are individually controllable and do not need to be installed in the same room or at the same time

\*Note: blue cells contain preliminary data

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# Wall mounted unit

Wall mounted unit providing high efficiency and comfort

- › ECONO mode decreases power consumption so that other appliances that need large power consumption can be used
- › Comfort mode guarantees draught free operation by preventing that warm or cold air is directly blown on to the body
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet

## Wall mounted unit

Stylish wall mounted unit for low energy consumption and pleasant comfort

- › Seasonal efficiency values up to A+
- › Stylish, modern casing in white or silver
- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › The infrared remote control is user friendly and equipped with a timer function that enables you to programme the unit to start or stop at your desired time.
- › 24 hour timer can be set to start heating or cooling anytime during a 24 hour period

The best of two worlds united

# Pure comfort and design

## Why choose Nexura?

- Unique radiant heat panel that heats up just like a traditional radiator
- Whisper quiet operation down to 19 dBA
- Unobtrusive yet stylish design
- Reduced air flow, creating an even distribution of air through the room

### Comfort is key

Nexura makes your world a comfortable one. The coolness of a summer breeze or the cosiness of an extra heat source brings a feeling of well-being to your living space all year round. Its unobtrusive yet stylish design with a front panel that radiates additional heat, its low noise level and reduced air flow turn your room into a haven.

### Benefits

- › Vertical autoswing
- › Weekly timer
- › Guaranteed operation down to -25°C (with RXLG-M)

### Radiant heat panel

To add even more comfort on cold days, the aluminium front panel of the Nexura unit has the capability of warming up, just like a traditional radiator. The result? A comfortable feeling of warm air that envelopes you. And all you have to do to activate this unique feature is push the "radiant" button on your remote control.

### Online controller

Always in control, no matter where you are. Control your indoor from any location with an app, via your local network or internet.

## Supporting tools

### **NEW** Business portal

- › Experience our new extranet that thinks with you at [my.daikin.eu](http://my.daikin.eu)

## Floor standing unit with radiant heat panel

Stylish floor standing unit with radiant heat panel for comfortable heat and very low noise

- › The aluminium part of the front panel of the Nexura indoor unit has the capability of warming up, just like a traditional radiator, to add even more comfort on cold days
- › Quiet and discrete, Nexura offers you the best in heating and cooling, in comfort and design
- › The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 22dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- › Comfortable vertical auto swing ensures draughtfree operation and prevents ceiling soiling
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Can be installed against a wall or recessed
- › Its low height enables the unit to fit perfectly beneath a window
- › Weekly timer can be set to start heating or cooling anytime on a daily or weekly basis

## Floor standing unit

Floor standing unit for optimal heating comfort thanks to dual airflow

- › Its low height enables the unit to fit perfectly beneath a window
- › Can be installed against a wall or recessed
- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet

## Flexi type unit

Flexible unit, ideal for rooms without false ceiling, can fit on either ceiling or wall

- > Can fit on either ceiling or lower wall; its low height enables the unit to fit beneath a window
- > Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- > Home leave operation maintains the indoor temperature at your specified comfort level during absence, thus saving energy
- > Online controller (optional): control your indoor from any location with an app, via your local network or internet

Only available in multi model application

Only available in multi model application

# Concealed ceiling unit

Compact concealed ceiling unit, with a height of only 200mm

- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

- Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- Low energy consumption thanks to DC fan motor
- Medium external static pressure up to 40Pa facilitates unit use with flexible ducts of varying lengths

## Small concealed ceiling unit

### Designed for hotel applications

- Compact unit (230mm high & 652mm deep), can easily be mounted in narrow ceiling voids
- Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- Whisper quiet operation: down to 28dBA sound pressure level
- Flexible installation, as the air suction direction can be altered from rear to bottom suction

- For easy mounting, the drain pan can be located to the left or right of the unit

<b>Indoor unit</b>				<b>FDBQ</b>	<b>25B</b>

# Make all applications possible

## Multi model applications

- All indoor units can be individually controlled and do not need to be installed in the same room.
- Combine different types of indoor units: wall mounted, floor standing, ceiling suspended, round flow cassette, concealed ceiling.
- Phased installation possible.

### MXS

#### Installation flexibility

- › A very wide range is available, from 2-port to 5-port units, making all applications possible.
- › Up to 5 indoor units can be connected to 1 multi outdoor unit.
- › Outdoor multi split units are fitted with the Daikin swing compressor, renowned for its low noise and high energy efficiency.
- › The outdoor units are neat and sturdy and can be mounted easily on a roof or terrace or simply placed against an outside wall.

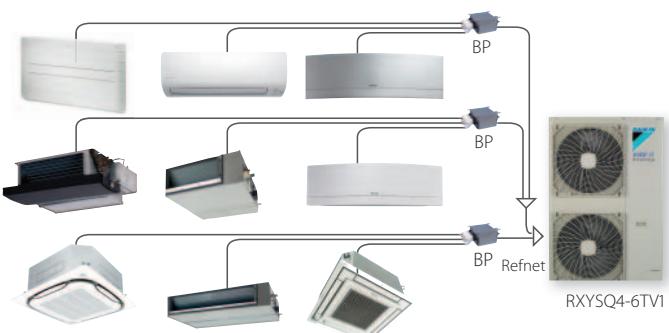

### RXYS(C)Q

#### Installation flexibility

- › Up to 9 indoor units can be connected to 1 VRV outdoor unit
- › Maximum total piping length of 145m offers much more flexibility in the choice of installation position

### VRV IV S-series

## Multi model application

- Outdoor units for multi model application.
- Outdoor units are fitted with a swing compressor, renowned for its low noise and high energy efficiency
- Up to 5 indoor units can be connected to 1 multi outdoor unit; all indoor units are individually controllable and do not need to be installed in the same room or at the same time; they operate simultaneously within the same cooling or heating mode
- Different types of indoor units can be connected: e.g. wall mounted, ceiling mounted cassette corner, concealed ceiling unit

# VRV IV S-series compact heat pump

## The most compact VRV

- › Compact & lightweight single fan design makes the unit almost unnoticeable
- › Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, air handling units and Biddle air curtains
- › Wide range of indoor units: either connect VRV or stylish indoor units such as Daikin Emura, Nexura ...
- › Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature and full inverter compressors
- › 3 steps in night quiet mode: step 1: 47 dBA, step 2: 44 dBA, step 3: 41 dBA
- › Possibility to limit peak power consumption between 30 and 80%, for example during periods with high power demand
- › Contains all standard VRV features

# Siesta

## wall mounted units

*Siesta*

The Siesta range offers a wide variety of wall mounted units with high efficiency values up to A++. They provide excellent levels of comfort, and several indoor units are connectable to a multi outdoor unit (ATXS-K, ATX-J3, ATX-KV).

Type	Refrigerant	Model	Product name	20	25	35	42	50	60	page
Wall mounted	R-32	Siesta wall mounted unit	ATXM-M	(multi only)	●	●		●		96
		Discreet, modern design for optimal efficiency and comfort thanks to 2 area intelligent eye								
		Siesta wall mounted unit - Multi model applications	ATXP-KV	(multi only)	●	●	●			97
	R-410A	Discreet Siesta wall mounted unit providing high efficiency and comfort								
		Wall mounted unit	ATXS-K	(multi only)	●	●		●		117
		Siesta, discreet, modern unit for optimal efficiency and comfort thanks to 2 area intelligent eye								
	Designed for colder climates	Wall mounted unit	ATX-J3	●	●	●				116
		Siesta, providing high efficiency and comfort								
		Wall mounted unit	ATX-KV	●	●	●				119
	R-410A	Wall mounted unit	ATXN-NB9	(pair only)	●	●		●	●	120
		Siesta, offering good value for money and ensuring a steady supply of clean air								
		Wall mounted unit	ATXB-C	(pair only)	●	●		●	●	121
	Designed for colder climates	Wall mounted unit	ATXL-JV	(pair only)	●	●				129
		Siesta, providing high efficiency and comfort even at low ambient temperatures								

# Wall mounted unit

Discreet, modern Siesta unit for optimal efficiency and comfort thanks to 2 area intelligent eye

- › Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- › High quality matt crystal white finish
- › Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- › Ideal for installation in bedrooms (20,25 class) and larger or irregular shaped living areas (35,50 class)
- › 2 area intelligent eye sends the air flow to a zone other than where the person is located at that moment; if no people are detected, the unit will automatically switch over to the energy-efficient setting (35,50 class)
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# Wall mounted unit

Siesta wall mounted unit providing high efficiency and comfort

- › Seasonal efficiency values up to A++
- › ECONO mode decreases power consumption so that other appliances that need large power consumption can be used
- › Comfort mode guarantees draught free operation by preventing that warm or cold air is directly blown on to the body
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# Wall mounted unit

Siesta wall mounted unit, offering good value for money and ensuring a steady supply of clean air

- › Seasonal efficiency values up to A+
- › Flat, stylish front panel blends easily within any interior décor and is more easy to clean
- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › The infrared remote control is user friendly and equipped with a timer function that enables you to programme the unit to start or stop at your desired time.
- › 24 hour timer can be set to start heating or cooling anytime during a 24 hour period

## Multi model application

- › Outdoor units for multi model application.
- › Outdoor units are fitted with a swing compressor, renowned for its low noise and high energy efficiency
- › Up to 3 indoor units can be connected to 1 Multi outdoor unit; all indoor units are individually controllable and do not need to be installed in the same room or at the same time; they operate simultaneously within the same cooling or heating mode
- › Night quiet mode automatically reduces the operation sound of the outdoor unit by 3dBA during nighttime (multi outdoor units in cooling mode only)
- › Daikin outdoor units are neat, sturdy and can easily be mounted on a roof or terrace or simply placed against an outside wall

# Optimised for heating

## Why choose Daikin?

- Wide range of indoor units
- Guaranteed heating capacities even with outdoor temperatures down to -25°C.
- Outdoor units delivering leading-edge efficiency with improved defrosting and no ice build up.

## Benefits

- › Online controller
- › Guaranteed operation down to -25°C

## Designed for living

For most people, total indoor climate control means having the ability to select a desirable temperature for each space in a house and to have that temperature maintained no matter what the temperature outside and this means heating, cooling and high air quality is needed for year round comfort.

For the coldest regions, the outdoor units of our heat pump have been redesigned to withstand extreme weather conditions with excellent energy efficiency ratings.

Designed to operate in a whisper-quiet mode and to distribute purified air in a way that does not produce unpleasant air currents, our indoor units have won prestigious design awards.

Truly, climate control by design.

## Online controller

Always in control, no matter where you are. Control your indoor from any location with an app, via your local network or internet.

## Wall mounted unit

Design at its best, delivering superior efficiency and comfort, even at ambient temperatures **down to -25°C**

- › Remarkable blend of iconic design and engineering excellence with an elegant finish in matt crystal white
- › Daikin Emura has been awarded with Reddot design award 2014 by an international jury, thanks to its excellent design
- › Designed to perfectly balance technological leadership and the beauty of aerodynamics
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- › Guaranteed heating capacity at low ambient temperature, down to -25°C
- › Thanks to the unique free hanging coil technology, the defrost cycle is improved, resulting in lower running costs and no ice buildup

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

## Wall mounted unit

Wall mounted unit providing high efficiency and comfort, even at ambient temperatures **down to -25°C**

- › The unit's compact dimensions makes it ideal for renovation projects, especially for above door installation
- › Excellent air flow and air distribution
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Guaranteed heating capacity at low ambient temperature, down to -25°C
- › Thanks to the unique free hanging coil technology, the defrost cycle is improved, resulting in lower running costs and no ice buildup
- › Also available in Siesta range, see page 129

## Floor standing unit with radiant heat panel

Stylish floor standing unit with radiant heat panel for comfortable heat and very low noise, even at ambient temperatures down to -25°C

- › The aluminium part of the front panel of the Nexura indoor unit has the capability of warming up, just like a traditional radiator, to add even more comfort on cold days
- › Quiet and discrete, Nexura offers you the best in heating and cooling, in comfort and design
- › The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 22dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- › Comfortable vertical auto swing ensures draughtfree operation and prevents ceiling soiling
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Can be installed against a wall or recessed
- › Guaranteed heating capacity at low ambient temperature, down to -25°C
- › Thanks to the unique free hanging coil technology, the defrost cycle is improved, resulting in lower running costs and no ice buildup

## Floor standing unit

Floor standing unit for optimal heating comfort thanks to dual airflow, even at ambient temperatures **down to -25°C**

- › Its low height enables the unit to fit perfectly beneath a window
- › Can be installed against a wall or recessed
- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › Online controller (optional): control your indoor from any location with an app, via your local network or internet
- › Guaranteed heating capacity at low ambient temperature, down to -25°C
- › Thanks to the unique free hanging coil technology, the defrost cycle is improved, resulting in lower running costs and no ice buildup

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected indoor unit is up to 7.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5kW: wall mounted FTXS-K series

# Combination tables

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor Temperature). Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected indoor unit is up to 9.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected indoor unit is up to 11.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0 kW class; wall mounted G series

# Combination tables

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected indoor unit is up to 11.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0 kW class: wall mounted G series

Notes:

1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature). Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).
2. The total ability of connected indoor unit is up to 14.5kW.
3. It is impossible to connect the indoor unit for one room only.
4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series  
6.0, 7.1 kW class; wall mounted G series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature). 35°CDB (Outdoor temperature). Heating capacity is based on 20°CDB (Indoor temperature). 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected indoor unit is up to 14.5kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0, 7.1 kW class; wall mounted G series

- Notes:
- The total capacity of each connected indoor unit is up to 8.5 kW.
  - The values above are for connecting with the following indoor unit types:  
2.0, 2.5, 3.5, 5.0 kW class  
Wall-mounted ATXS-K series
  - These indoor units can only be used in a multi-unit setup.
  - Cooling capacity conditions:  
Indoor temperature 27°C DB / 19°C WB  
Outdoor temperature 35°C DB
  - Heating capacity conditions:  
Indoor temperature 20°C DB  
Outdoor temperature 7°C DB / 6°C WB
  - Design temperature: -10°C

- Notes:
- The total capacity of each connected indoor unit is up to 9.0kW.
  - The values above are for connecting with the following indoor unit types:  
2.0, 2.5, 3.5, 5.0 kW class  
Wall-mounted ATXS-K series
  - These indoor units can only be used in a multi-unit setup.
  - Cooling capacity conditions:  
Indoor temperature 27°C DB / 19°C WB  
Outdoor temperature 35°C DB
  - Heating capacity conditions:  
Indoor temperature 20°C DB  
Outdoor temperature 7°C DB / 6°C WB
  - Design temperature: -10°C

## Sky Air the solution for the light commercial sector

Sky Air is Daikin's industry-leading light commercial range, which has been designed for optimum seasonal energy efficiency.

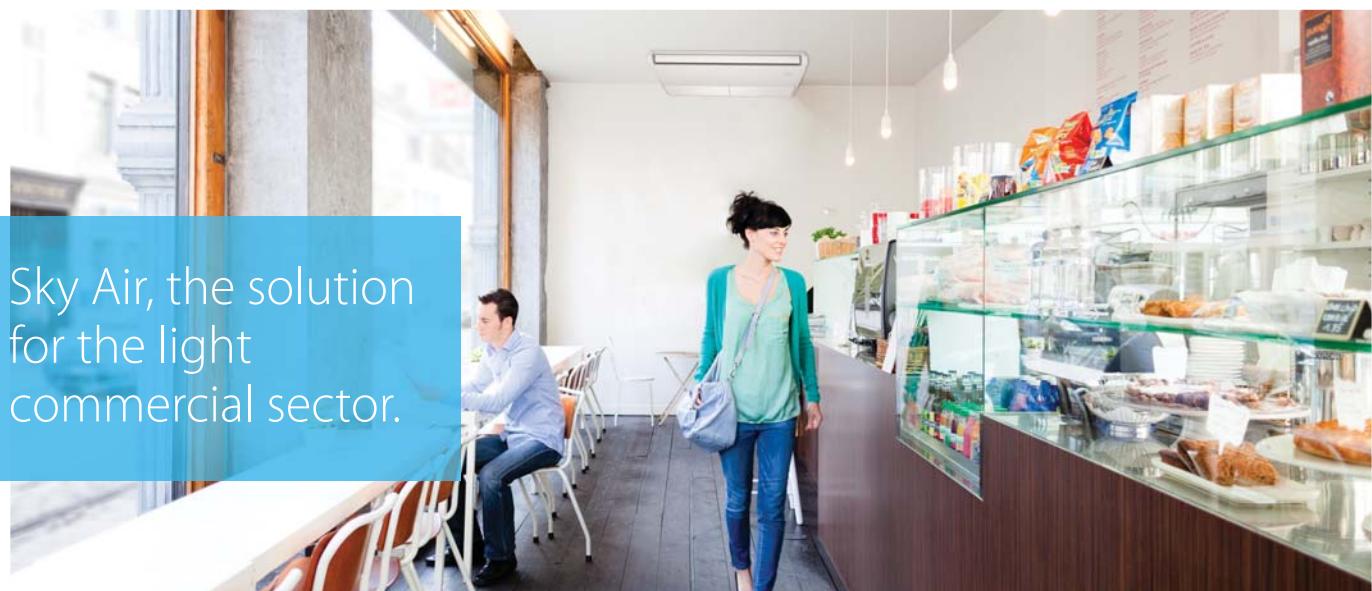

Providing the ideal solution for all kinds of small commercial spaces, the Sky Air series offers a complete comfort solution that puts you in total control of your heating and cooling, ventilation and air curtains.

Sky Air, the solution  
for the light  
commercial sector.

## Offering Comfort - Energy efficiency - Reliable systems

### Why choose Sky Air

- First light commercial range available with R-32 refrigerant in the European market!
- Industry-leading product range for small offices, shops, retail stores, restaurants, banks or data centers.
- From reliable and high quality comfort air conditioning, to customised applications with a smart use of energy and flexible installation and operation.
- Extensive range which meets even the most stringent building specifications.
- Ensures total control over your customers' space heating and cooling, ventilation and doorway climate separation requirements.

### Benefits for the installer

- › Modular designs and factory fitted extras make installation easier to achieve.

### Benefits for the consultant

- › You will have the confidence of knowing that you can recommend the right climate control systems to meet tomorrow's legislation
- › You will have systems that are designed to blend into any décor and provide optimal performance with top seasonal efficiencies
- › You will have access to innovative technology to maximize the climate control performance of the entire building
- › Your credentials as an eco-conscious consultant and designer will be enhanced.

### Benefits for the end user

- › Your climate control system will meet legal requirements well beyond the current legislation
- › You will obtain optimal seasonal performance thus saving energy and reducing costs
- › You will have even better energy efficient units when choosing our Sky Air R-32 product range (minimum 5% more efficient compared to R-410A products)
- › The climate control system will add value to the building thus protecting your investment
- › You will save on installation and running costs, obtain rapid return on investment and contribute to ecological protection objectives.

### Heating and cooling

- › Extract heat from the outside air, even in cold weather (down to -20°C).
- › Electrically powered compressor.
- › Extremely effective at heating.
- › Silent and discreet,
- › State-of-the-art technology to keep energy bills as low as possible.

### Top seasonal efficiency

- › A++ label both in cooling and heating for combination FCQHG71F/100F + RZQG71L9V1/100L9V1 **A++**
- › Top efficiency by choosing R-32 products (minimum 5% more efficient when compared to R-410A)

### Wide range of heat pump units

- › Ideal for both new build and renovation projects.
- › Select from a wide range of indoor units: wall mounted and floor standing, concealed or ceiling mounted.
- › Very quiet and draught-free operation.
- › For long or irregularly shaped rooms, you can use up to four indoor units linked to a single outdoor unit. All the indoor units are controlled at the same time.

### Replacement

Split and Sky Air outdoor and indoor units can be used to replace R-22 and R-407C systems.  
Reuse existing piping and wiring

### Flexible Installation

- › Outdoor units are neat and sturdy.
- › They can be installed against a wall or on a roof or terrace.

### Control systems

User-friendly controls allow your customers to manage their Sky Air system for maximum efficiency:

- › From individualised unit control to centralised management via touchscreen options and code based controllers, they are in control at all times.
- › The Dlli-net connection is standard, allowing you to link into the wider building management systems.
- › Buildings can be monitored from a distance using Internet monitoring.

### Ventilation

Daikin's ventilation option provides a supply of fresh air to help create a healthy and high quality indoor environment.

### Biddle air curtains

- › Biddle air curtains can be used in combination with the Sky Air system to provide highly efficient heating at building entrances:  
Ideal for buildings with open door policies such as retail stores.

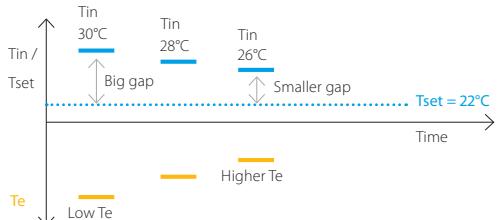

- › Year round climate control and comfort even on the most demanding days.
- › Payback time of less than 12 months compared with electric air curtains.

1. Operates with variable refrigerant temperature: all Daikin Sky Air outdoor units are able to adapt their operation to meet your unique cooling and heating requirements, without compromising efficiency.

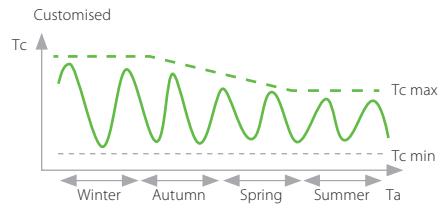

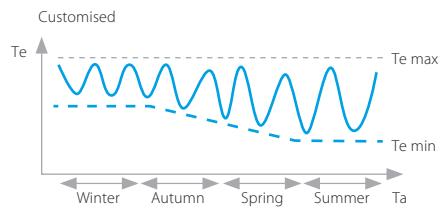

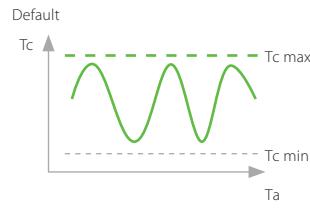

2. Go one step further in improving comfort and efficiency by having the possibility to customize the settings at time of installation. These special settings allow the boundaries of fluctuation of refrigerant's evaporating and condensing temperature to be customized to fit the application.

### Cooling

### Heating

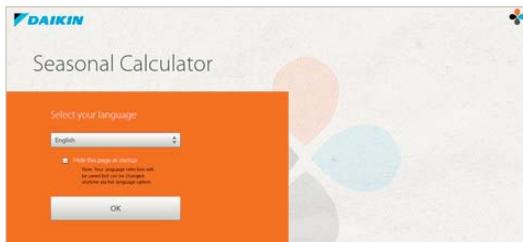

$T_{in}$  = indoor temperature /  $T_{set}$  = setpoint /  $T_e$  = evaporating temperature of refrigerant  
 $T_c$  = condensing temperature of refrigerant /  $T_a$  = ambient temperature

Daikin launches the first light commercial product range on the European market with R-32

Daikin's industry-leading Seasonal Smart outdoor unit together with the unique round flow cassette will be the first product range in Europe using R-32 refrigerant.

RZAG-LV1

FCAHG-F

**R-32**

- Industry-leading technology extended with R-32

- **Lowest environmental impact**

- GWP reduced with 68% as compared with R-410A refrigerant
  - 12% lower refrigerant charge

- **Increased energy savings** thanks to R-32 refrigerant (minimum 5% more efficient when compared to R-410A products)

- **Replacement technology**

- **Operation range** down to -20°C

in heating mode

Help your customers make the right choice

The main impact on global warming from air conditioners and heat pumps comes from electricity use

With electricity generated by renewable sources the impact can be near zero. It is far higher with electricity from fossil fuels. In either case it is important to be energy efficient.

→ Advise customers to choose a model with a top-class European Energy label (A++, A++, A+, A, B, C, etc.).

The other impact on global warming comes from the refrigerant gas in the system

In addition to preventing leaks and ensuring proper end-of-life recovery, choose a refrigerant with a lower GWP and minimise the volume to reduce risk in case of leaking.

→ Advise customers to select a model with a low CO<sub>2</sub> equivalent refrigerant charge. (shown in catalogues and on the Daikin website).

## Why has Daikin introduced R-32 models?

A core element of Daikin's corporate philosophy is that the company strives to be a leader in applying environmentally friendly practices, with energy efficiency and refrigerant choice as key factors. Daikin launched the first worldwide air conditioners with R-32 refrigerant at the end of 2012 in Japan, where several million units have since been installed. Subsequently, R-32 models have been providing indoor climate comfort in other countries such as Australia, New Zealand, India, Thailand, Vietnam, the Philippines, Malaysia and Indonesia. In 2013, R-32 models made their debut in Europe, adding new environmental benefits to the unrivalled control they offer users.

### What is R-32?

R-32's chemical name is difluoromethane. It is a refrigerant which has been used for many years as a component of the refrigerant blend R-410A (which is 50% R-32 and 50% R-125). Daikin was the first company to recognise that there are several advantages of using pure R-32 instead of using it as part of a blend. Many other industry players have now followed suit.

	<b>R-410A</b>	<b>R-32</b>
Composition	Blend of 50% R-32 + 50% R-125	Pure R-32 (no blend)
GWP (Global Warming Potential)	2087.5	675
ODP (Ozone Depletion Potential)	0	0

### What is GWP?

Global Warming Potential (GWP) is a number which expresses the potential impact that a particular refrigerant would have on global warming if it were released into the atmosphere. It is a relative value which compares the impact of 1kg of refrigerant to 1kg of CO<sub>2</sub> over a period of 100 years.

Although this impact can be avoided by preventing leaks and ensuring proper end of life recovery, choosing a refrigerant with a lower GWP and minimising the volume of refrigerant will reduce the risk to the environment if a leak were to occur accidentally.

### What is ODP?

Ozone Depletion Potential (ODP) is a number that refers to the harmful impact on the stratospheric ozone layer caused by a chemical substance. It is a relative value which compares the impact of a refrigerant to a similar mass of R-11. Thus, the ODP of R-11 is defined to be 1.

### Refrigerants with lower environmental impact

R-32, R-410A, R-134a and other refrigerants currently used in the European Union do not deplete the ozone layer. The previous generation refrigerants such as R-22 had a detrimental effect on the stratospheric ozone layer because they contained chlorine. Since 2004, EU regulations have banned any new equipment using ozone-depleting refrigerants such as R-22. Since January 2015, servicing existing equipment with R-22, even with recycled R-22, has also been banned.

### Phasing out R-22

If your customer is still using R-22 based equipment today, you should recommend replacing it soon and not waiting until a breakdown occurs. Deciding to change to R-32 equipment instead of R-22 would create a double benefit for the environment. It would eliminate the risk of damaging the ozone layer and would be a better solution in terms of the global warming impact. Just replacing the R-22 refrigerant with R-32 in an existing installation is not allowed because oil and pressures are different. However, it may be possible to replace the indoor and outdoor units and keep the refrigerant piping. (More detailed instructions are available in our catalogue on R-22 replacement technologies)

# Benefits overview

<b>We care</b>	 Seasonal efficiency - Smart use of energy	Seasonal efficiency gives a more realistic indication on how efficient air conditioners operate over an entire heating or cooling season.
	 Inverter technology	In combination with inverter controlled outdoor units
	 Home leave operation	During absence, the indoor temperature can be maintained at a certain level.
	 Fan only	The air conditioner can be used as fan, blowing air without cooling or heating.
	 Auto cleaning filter	The filter automatically cleans itself once per day. Simplicity of upkeep means optimum energy efficiency and maximum comfort without the need for expensive or time-consuming maintenance.
	 Floor and presence sensor	The presence sensor directs the air away from any person detected in the room, when the air flow control is on. The floor sensor detects the average floor temperature and ensures an even temperature distribution between ceiling and floor.
<b>Comfort</b>	 Draught prevention	When starting to warm up or when the thermostat is off, the air discharge direction is set horizontally and the fan to low speed, to prevent draught. After warming up, air discharge and fan speed are set as desired.
	 Whisper quiet	Daikin indoor units are whisper quiet. Also the outdoor units are guaranteed not to disturb the quiet of the neighbourhood.
	 Auto cooling-heating changeover	Automatically selects cooling or heating mode to achieve the set temperature.
<b>Air treatment</b>	 Air filter	Removes airborne dust particles to ensure a steady supply of clean air.
<b>Humidity control</b>	 Dry programme	Allows humidity levels to be reduced without variations in room temperature.
<b>Air flow</b>	 Ceiling soiling prevention	A special function prevents air blowing out too long in horizontal position, to prevent ceiling stains.
	 Vertical auto swing	Possibility to select automatic vertical moving of the air discharge louvre, for uniform air flow and temperature distribution.
	 Fan speed steps	Allows to select up to the given number of fan speed.
	 Individual flap control	Individual flap control via the wired remote controller makes it simple to fix the position of each flap individually, to suit any new room configuration. Optional closure kits are available as well.
<b>Remote control &amp; timer</b>	 Weekly timer	Timer can be set to start operation anytime on a daily or weekly basis
	 Infrared remote control	Infrared remote control with LCD to start, stop and regulate the air conditioner from a distance.
	 Wired remote control	Wired remote control to start, stop and regulate the air conditioner from a distance.
	 Centralised control	Centralised control to start, stop and regulate several air conditioners from one central point.
<b>Other functions</b>	 Infrastructure cooling	Remove in a reliable, efficient and flexible way the heat constantly generated by the IT and server equipment to ensure maximum uptime while offering the best return on investment.
	 Auto-restart	The unit restarts automatically at the original settings after power failure.
	 Self-diagnosis	Simplifies maintenance by indicating system faults or operating anomalies.
	 Drain pump kit	Facilitates condensation draining from the indoor unit.
	 Twin/triple/double twin application	2, 3 or 4 indoor units can be connected to only 1 outdoor unit even if they have different capacities. All indoor units operate within the same mode (cooling or heating) from one remote control.
	 Multi model application	Up to 5 indoor units (even different capacities) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.
	 VRV for residential application	Up to 9 indoor units (even different capacities and up to 71 class) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.

# Round flow cassette

### Why choose a round flow cassette?

- 360° air discharge for optimum efficiency and comfort in shops, offices and restaurants.
- Unique auto-cleaning panel.

#### Unique functions which help save costs

› Daikin was the first company to launch a cassette using the round flow principle with sensors\* and a unique auto-cleaning panel\*.

##### ... More energy efficient than any other

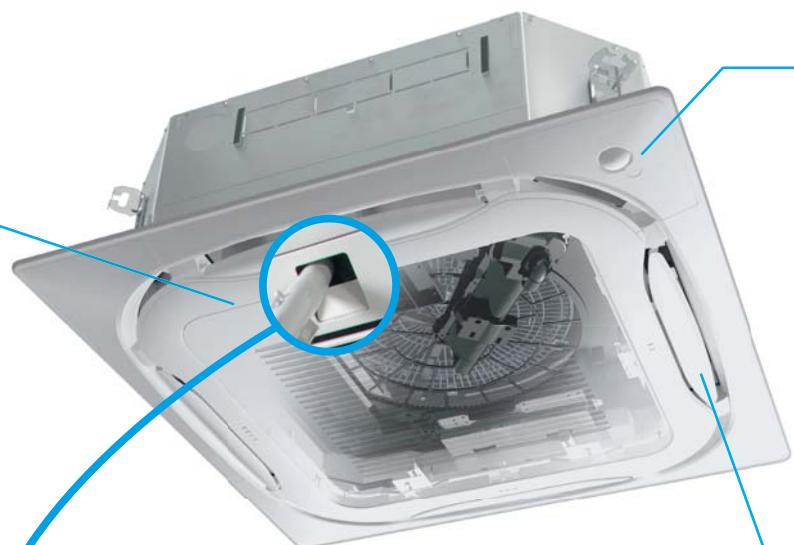

› The auto-cleaning panel\* means:

- Running costs are reduced by 50% compared with standard solutions thanks to automatic daily filter cleaning.
- Less time is required to maintain the filter: dust can be removed easily with a vacuum cleaner without opening the unit.
- For fine dust applications (i.e. clothing shops) a finer mesh filter (BYCQ140DGF) ensures consistent, optimum performance.
- Round flow cassette - overview decoration panels

BYCQ140DG	BYCQ140DGF	BYCQ140DW	BYCQ140D
Auto-cleaning panel	auto-cleaning panel with fine mesh filter	White panel	Standard panel
White with grey louvers	White with grey louvers	Full white	White with grey louvers

› Thanks to presence and floor sensors\*, the unit changes its setpoint or switches off completely, if there are no people in the room, resulting in energy savings of up to 27%.

Dust can be removed easily with a vacuum cleaner without opening the unit.

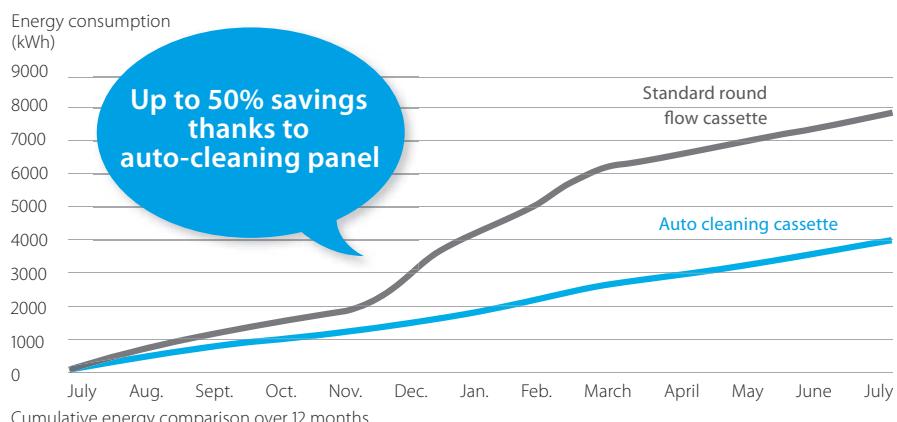

AUTO CLEANING FILTER

### References

#### Wolverhampton, UK

Running costs were reduced by up to 50% compared with standard solutions thanks to daily filter cleaning.

### ... And improved comfort

› 360° air flow discharge pattern.

› The presence sensor\* directs the air away from anyone it detects in the room.

› The floor sensor\* detects the average floor temperature and ensures an even temperature distribution between the ceiling and the floor.

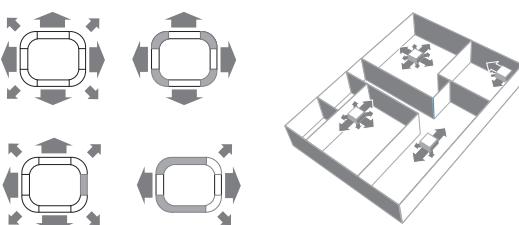

\* available as an option

### Flexible installation

› Flaps can be individually controlled or closed using the wired remote control, to suit room configuration.

Optional closure kits are also available.

### Benefits for the installer

› Product with unique functions in this market.

› Less time needed for onsite maintenance.

› Use the controller to individually open or close any of the four flaps to easily adapt to a changing room layout.

› Easy set-up of the sensor option to improve comfort and save energy.

### Benefits for the consultant

› Product with unique functions in this market.

› Designed for use in all types and sizes of commercial offices and retail environments.

› Ideal product for improving BREEAM score/EPBD in combination with Sky Air Seasonal Smart or VRV IV heat pump units.

### Benefits for the end user

› Designed for use in all types and sizes of commercial offices and retail environments.

› Perfect environment conditions: no more draughts or cold feet.

› Save up to 50% on running costs with the auto-cleaning panel, which also facilitates maintenance.

› Your customers can save up to 27% on their energy bills thanks to the sensor option!

› Flexible use of space thanks to individual flap control.

# High COP, round flow cassette

360° air discharge for optimum efficiency and comfort

- › Industry leading technology extended with R-32
- › 68% lower GWP compared to R-410A products
- › 12% lower refrigerant charge compared to R-410A products
- › Minimum 5% more efficient when compared to R-410A products
  
- › Duty rotation control (via BRC1E53A/B/C)
- › Power saving mode can be set to 70% or 40% of the demand (via BRC1E53A/B/C)
- › 5 different fan speeds available
- › Includes all R-410A high COP round flow cassette features

# Round flow cassette

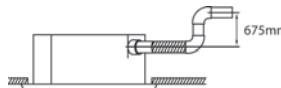

360° air discharge for optimum efficiency and comfort

Combination with split outdoor units is ideal for small retail, offices or residential applications

- › The round flow cassette provides a more comfortable environment and offers greater savings in energy consumption to shop, office and restaurant owners
- › Lowest installation height in the market: 204mm for class 7I
- › Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- › Modern style decoration panel is available in 3 different variations: white (RAL9010) with grey louvers, full white (RAL9010) or auto-cleaning panel
- › Daily automatic filter cleaning results in higher efficiency, comfort and lower maintenance costs. 2 filters available: standard filter and finer mesh filter (for fine-dust applications, e.g. clothing shops).
- › Two optional intelligent sensors improve energy efficiency and comfort.
- › No optional adapter needed for DIII-connection, link your unit into the wider building management system
- › Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms
- › Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump

- › Standard drain pump with 675mm lift increases flexibility and installation speed

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing. (3) The BYCQ140D7WTW has white insulations. Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140D7WTW decoration panel in environments exposed to concentrations of dirt.

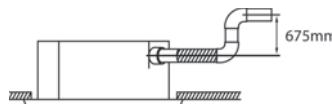

# High COP, round flow cassette

360° air discharge for optimum efficiency and comfort

Combination with Seasonal Classic ensures good value for money for all types of commercial applications

- › High COP cassette ensures top performance, great savings in energy consumption and a comfortable environment for commercial applications
- › Lowest installation height in the market: 204mm for class 71
- › Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- › Modern style decoration panel is available in 3 different variations: white (RAL9010) with grey louvers, full white (RAL9010) or auto-cleaning panel
- › Daily automatic filter cleaning results in higher efficiency, comfort and lower maintenance costs. 2 filters available: standard filter and finer mesh filter (for fine-dust applications, e.g. clothing shops).

- › Two optional intelligent sensors improve energy efficiency and comfort.
- › No optional adapter needed for DIII-connection, link your unit into the wider building management system
- › Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms
- › Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- › Standard drain pump with 675mm lift increases flexibility and installation speed

# Fully Flat Cassette

Design & Genius in one

## Why choose fully flat cassette

- Unique design in the market that integrates fully flat into the ceiling
- Advanced technology and top efficiency combined
- Most quiet cassette available on the market

[www.youtube.com/  
DaikinEurope](http://www.youtube.com/DaikinEurope)

## Marketing tools

- › Visit the website: [www.daikineurope.com/fullyflat](http://www.daikineurope.com/fullyflat)

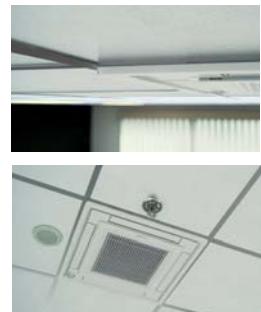

## Benefits for the installer

- › Unique product in the market!
- › Most quiet unit (25dBA)
- › The user-friendly remote control, available in several languages, enables the easy set-up of sensor option and control of the individual flap position
- › Meeting European design taste.

### Unique design

- › Designed by a European design office to fully meet the European taste.
- › Fully flat into the ceiling, leaving only 8mm.
- › Fully integrated in the one ceiling tile, enabling lights, speakers and sprinklers to be installed in adjoining ceiling tiles.
- › Decoration panel available in 2 colours (white and white-silver).

## Benefits for the consultant

- › Unique product in the market!
- › Blends seamlessly in any modern office interior design
- › Ideal product to improve BREEAM score/EPBD in combination with Sky Air Seasonal Smart (FFQ-C) or VRV IV heat pump units (FXZQ-A).

### Differentiating in technology

#### Optional presence sensor

- › When the room is empty, it can adjust the set temperature or switch off the unit – saving energy.
- › When people are detected, the direction of the airflow is adapted to avoid cold draughts being directed towards occupants.

#### Optional floor sensor

- › Detects the temperature difference and re-directs the airflow to ensure even temperature distribution.

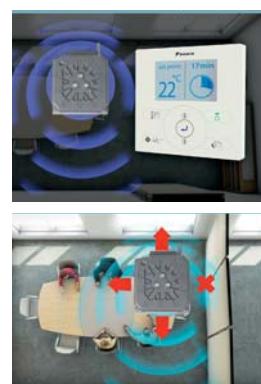

## Benefits for the end user

- › Engineering excellence and unique design in one
- › Most quiet unit (25dBA)
- › Perfect working conditions: no more cold draughts
- › Save up to 27% on your energy bill thanks to the optional sensors
- › Flexible usage of space and suits any room configuration thanks to individual flap control
- › User-friendly remote control, available in several languages.

### Top efficiency

- › Seasonal labels up to **A++\***
- › When the room is empty, the sensor option can adjust the set temperature or switch off the unit – saving up to 27% energy.
- › Individual flap control: easily control one or more flaps via the wired remote controller (BRC1E52) when rearranging the room. When fully closing or blocking the flaps, the option "Sealing member of air discharge outlet" is needed.

\* for FFQ25,35C in combination with RXS25,35L

### Most quiet unit in the market

- › Most silent cassette in the market (25dBA), important for office applications.

## Fully flat cassette

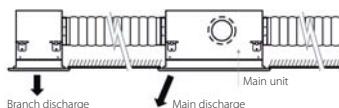

Unique design in the market that integrates fully flat into the ceiling

Combination with split outdoor units is ideal for small retail, offices or residential applications

- › Fully flat integration in standard architectural ceiling tiles, leaving only 8mm
- › Remarkable blend of iconic design and engineering excellence with an elegant finish in white or a combination of silver and white
- › Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- › Two optional intelligent sensors improve energy efficiency and comfort.

- › No optional adapter needed for DII-connection, link your unit into the wider building management system.

- › Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms
- › Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- › Standard drain pump with 675mm lift increases flexibility and installation speed

RXS25-35L3      BRC1E52A-B, BRC7F530W\_S - white/grey panel, BRC7EB530 - standard panel

› Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required

\* Brings in up to 10% of fresh air into the room

\* Allows larger quantities of fresh air to be brought in

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

## 4-way blow ceiling mounted cassette

### Solution addressing the primary needs of small shops

- › Ideal solution for busy retail and business environments and small shops
- › Improved energy efficiency: up to A+ energy labels
- › Robust design and body quality
- › Easy installation and maintenance thanks to improved body structure
- › Exclusively offered for pair applications
- › Air can be discharged in any of 4 directions
- › Air filter removes airborne dust particles to ensure a steady supply of clean air
- › Control several indoor units at the same time via the Siesta Sky Air group control (optional)
- › Standard drain pump
- › Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required

## Small concealed ceiling unit

### Designed for hotel applications

- Compact unit (230mm high & 652mm deep), can easily be mounted in narrow ceiling voids
- Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- Whisper quiet operation: down to 28dBA sound pressure level
- Flexible installation, as the air suction direction can be altered from rear to bottom suction

- For easy mounting, the drain pan can be located to the left or right of the unit

# Concealed ceiling unit

Compact concealed ceiling unit, with a height of only 200mm

- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

- Medium external static pressure up to 40Pa facilitates unit use with flexible ducts of varying lengths
- Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- Low energy consumption thanks to DC fan motor
- Optimised heating solution for your home

# Concealed ceiling unit with medium ESP

**Slimmest yet most powerful medium static pressure unit on the market**

Combination with split outdoor units is ideal for small retail, offices or residential applications

- › Top efficiency in the market! Energy label up to A++
- › Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge
- › Lowest sound levels in the market: down to 25dBA!
- › Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths
- › Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- › Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- › Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required
- › Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- › No optional adapter needed for Dll-connection, link your unit into the wider building management system.
- › Flexible installation: air suction direction can be altered from rear to bottom suction and choice between free use or connection to optional suction grilles

- › Standard built-in drain pump with 625mm lift increases flexibility and installation speed

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# Concealed ceiling unit with medium ESP

**Slimmest yet most powerful medium static pressure unit on the market**

Combination with Seasonal Classic ensures good value for money for all types of commercial applications

- › Top efficiency in the market! Energy label up to A++
- › Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge
- › Lowest sound levels in the market: down to 25dBA!
- › Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths
- › Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- › Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- › Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required
- › Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- › No optional adapter needed for DIII-connection, link your unit into the wider building management system.

FBQ-D

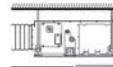

RZQSG100-125L3/9V1/L(8)Y1

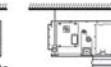

BRC1E52A-B, BRC4C65

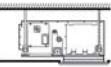

- › Flexible installation: air suction direction can be altered from rear to bottom suction and choice between free use or connection to optional suction grilles

For free use into a false ceiling

For connecting onto a suction canvas (not supplied by Daikin)

For direct connection to Daikin panel (via EKBYBSD kit)

- › Standard built-in drain pump with 625mm lift increases increases flexibility and installation speed

Combination with Seasonal Smart ensures best in class quality, highest efficiency and performance

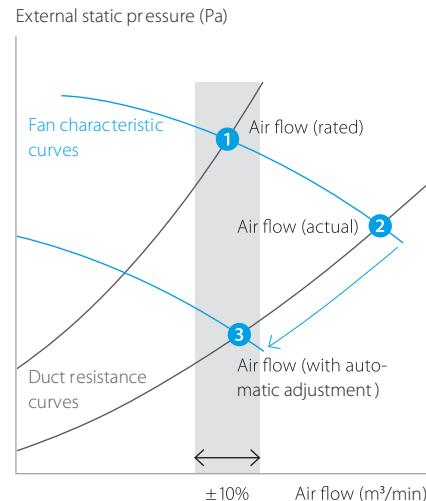

## Automatic Airflow Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within ±10%

### Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance → the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature

Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically (10 or more fan curves are available on every model), making installation much faster

# Concealed ceiling unit with high ESP

ESP up to 200, ideal for large sized spaces

- › Seasonal Smart ensures the best in quality, highest efficiency and performance. Seasonal Classic gives value for money.
- › Automatic air flow adjustment function measures the air volume and static pressure and adjusts it towards the nominal air flow, whatever the length of duct, making installation easier and guaranteeing comfort. Moreover, the ESP can be changed via the wired remote control to optimize the supply air volume
- › High external static pressure up to 200Pa facilitates using flexible ducts of varying lengths
- › Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- › Reduced energy consumption thanks to specially developed DC fan motor
- › Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- › Flexible installation, as the air suction direction can be altered from rear to bottom suction
- › Standard built-in drain pump increases flexibility and installation speed
- › No optional adapter needed for Dlll-connection, link your unit into the wider building management system.

# Concealed ceiling unit

Ideal for medium sized shops with false ceilings

- › Ideal solution for busy retail and business environments and small shops
- › Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- › Exclusively offered for pair applications
- › Air filter removes airborne dust particles to ensure a steady supply of clean air
- › Easy installation and maintenance
- › Double protection drainage system ensures quality

## Ceiling suspended unit

For wide rooms with no false ceilings nor free floor space

- > Ideal for comfortable air flow in wide rooms thanks to Coanda effect: up to 100° discharge angle
- > Even rooms with ceilings up to 3.8m can be heated up or cooled down very easily without capacity loss
- > Can easily be mounted in corners and narrow spaces, as it only needs 30mm lateral service space

- > Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- > Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.
- > Drain pump kit available as accessory

# Ceiling suspended unit

For wide rooms with no false ceilings nor free floor space

Combination with Seasonal Classic ensures good value for money for all types of commercial applications

- > Ideal for comfortable air flow in wide rooms thanks to Coanda effect: up to 100° discharge angle
- > Even rooms with ceilings up to 3.8m can be heated up or cooled down very easily without capacity loss
- > Can easily be mounted in corners and narrow spaces, as it only needs 30mm lateral service space

- > Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- > Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.
- > Drain pump kit available as accessory
- > Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

# Ceiling suspended unit

For wide rooms with no false ceilings nor free floor space

- › Ideal solution for commercial spaces with no or narrow false ceilings
- › Exclusively offered for pair applications
- › Can easily be installed in both new and refurbishment projects
- › Air filter removes airborne dust particles to ensure a steady supply of clean air
- › Decrease of temperature variation by automatic fan speed selection or freely selectable 3-step fan speed.
- › Easy installation and maintenance

(1) EER/COP according to Eurovent 2012, for use outside EU only (2) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

# 4-way blow ceiling suspended unit

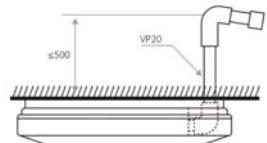

**Unique Daikin unit for high rooms with no false ceilings nor free floor space**

Combination with Seasonal Smart ensures best in class quality, highest efficiency and performance

- > Even rooms with ceilings up to 3.5m can be heated up or cooled down very easily without capacity loss
- > Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- > 5 different discharge angles between 0 and 60° can be programmed via the remote control
- > Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible
- > Optimum comfort guaranteed with automatic air flow adjustment to the required load
- > No optional adapter needed for DIII-connection, link your unit into the wider building management system

- > Standard drain pump with 500mm lift increases flexibility and installation speed

# Wall mounted unit

## For rooms with no false ceilings nor free floor space

Combination with Seasonal Classic ensures good value for money for all types of commercial applications

- › Flat, stylish front panel blends easily within any interior décor and is easier to clean
- › Can easily be installed in both new and refurbishment projects
- › Reduced energy consumption thanks to specially developed DC fan motor
- › The air is comfortably spread up- and downwards thanks to 5 different discharge angles that can be programmed via the remote control
- › Maintenance operations can be performed easily from the front of the unit
- › Flexible to install as the largest casing only weighs 17kg and piping connection can be done at the bottom, left or right of the unit

- › Optimum comfort guaranteed with automatic air-flow volume control as this minimises the difference between room and required temperature. No action required from occupants to meet the desired temperature.
- › No optional adapter needed for Dlll-connection, link your unit into the wider building management system.

# Floor standing unit

For commercial spaces with high ceilings

Combination with Seasonal Classic ensures good value for money for all types of commercial applications

- › Ideal solution for commercial and busy environments
- › Decrease of temperature variation by automatic fan speed selection or freely selectable 3-step fan speed.
- › Improved comfort as a result of better airflow distribution from the vertical out blow which allows manual adjustment of air outlet blades at the top of the unit.
- › Selectable horizontal out blow to better suit the layout of the room (via wired remote controller BRC1E52)
- › No optional adapter needed for Dlll-connection, link your unit into the wider building management system.

## Concealed floor standing unit

Designed to be concealed in walls

- > Ideal for installation in offices, hotels and residential applications
- > Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- > Its low height (620 mm) enables the unit to fit perfectly beneath a window
- > Requires very little installation space as the depth is only 200 mm

- > High ESP allows flexible installation

SKY AIR

Seasonal Smart: The premium solution

## RZQG-L9V1/L(8)Y1

Daikin is leading the way towards more efficient and cost-effective comfort solutions with its Sky Air product range

Why choose Seasonal Smart?

Best in class quality

Highest seasonal efficiency values

when compared with other systems under the same test conditions

Advanced and leading technologies

Flexible as no other

### Top seasonal efficiency

- › Inverter control logic optimises efficiency
- › Efficiency is enhanced even further thanks to the Variable Refrigerant Temperature settings
- › Using a highly efficient swing compressor
- › Losses are reduced in standby mode
- › A++ label both in heating and cooling **A<sup>++</sup>** FCQHG71/100F + RZQG71/100L9V1

### Advanced and leading technologies

- › Variable Refrigerant Temperature to suit application requirements better: eliminating cold draughts by varying the evaporating temperature.

### Flexible as no other

- › Reliable, efficient and flexible solution offered to meet the demanding needs of infrastructure cooling environments
- › Long pipe runs (up to 75m)
- › Wide operation range for cooling (down to 15°C) and for heating (down to -20°C)
- › Replacement technology: re-use of existing pipework of R-22 and R-407C systems
- › Wide range of indoor units connectable: wall mounted, concealed ceiling, cassette ...

## Benefits for the installer

Whatever the installation requirements or restrictions, Seasonal Smart will be able to meet them thanks to:

- › R-22/R-407C replacement technology
- › Wide operation range for cooling (down to -15°C) to suit even infrastructure cooling applications
- › Wide operation range for heating (down to -20°C) to be able to deliver heating in the most severe winters.
- › Long pipe runs of up to 75m
- › Easy accessibility to the gas cooled PCB (L9V1)
- › Easy to install discreetly against the wall thanks to the limited depth of the unit
- › Wide range of indoor units available

## Benefits for the consultant

- › Market leader in terms of seasonal efficiency. The unit operates extremely efficiently throughout the whole summer and winter.
- › R-22/R-407C replacement technology: delivering major energy savings, rapid payback and cost-effective upgrade solution with minimum downtime
- › This system has been optimised to perform well in the most severe conditions.
- › Wide range of indoor units available to suit buildings with or without false ceilings

## Benefits for the end user

- › Market leader in terms of seasonal efficiency which reduces your customers' electricity bills to a minimum all year round
- › Possibility to reduce sound level via settings on the remote controller
- › Wide range of stylish, comfortable and silent indoor units available
- › Possibility of integrating the unit into a Building Management system
- › Reliable system in all weather conditions

# Twin, triple and double twin applications

## The benefits

### Air conditioning in long or irregularly shaped rooms

A twin/triple/double twin application allows up to 4 indoor units to operate in L-shaped, U-shaped or long rooms powered by a single outdoor unit. All indoor units are controlled at the same time.

### The widest choice

Different types of indoor units - wall mounted, concealed ceiling, cassettes etc - can be selected for twin/triple/double twin application

### Ideal comfort in every part of the room

Delivery of optimal efficiency and comfort in each part of a long or irregularly shaped room.

### Benefits for the installer

- Less piping required as all indoor units can be connected to one single outdoor unit

### Benefits for the consultant

- Ideal solution for long or irregularly shaped rooms
- Up to 4 indoor units can be connected to a single outdoor unit
- The air flow is evenly spread into the area as smaller indoor units are installed on different locations in the room

### Benefits for the end user

- All indoor units are controlled at the same time and via 1 single wired remote controller
- Only 1 outdoor unit standing on a roof, terrace or against an outside wall to control up to 4 indoor units
- Same comfortable feeling through the entire room

Seasonal Classic

Seasonal Smart

Super Inverter

## Pair, Twin, Triple, double twin

Technology and comfort combined  
for commercial applications

› Top efficiency:

- Energy labels up to A++ (cooling) /A+ (heating) for RZQG71/100L9V1 + FCQG71/100F
- compressor that offers substantial efficiency improvements
- control logic that optimises efficiency at the most frequently encountered operating conditions and that optimises the auxiliary modes (when the unit is not active)
- heat exchangers that optimise the refrigerant flow at the most frequent operating conditions (temperature and load)
- via improved nominal performances
- › Re-use of existing R-22 or R-407C technology

- › Guarantees operation in both heating and cooling mode down to -15°C
- › With a gas cooled PCB reliable cooling is guaranteed as it is not influenced by ambient temperature
- › Maximum piping length up to 50m, minimum piping length is 5m.
- › Outdoor units for pair, twin, triple, double twin application

- › Daikin outdoor units are neat, sturdy and can easily be mounted on a roof or terrace or simply placed against an outside wall
- › Compatibility with D-BACS
- › Units optimized for seasonal efficiency give an indication on how efficient an air conditioner operates over an entire heating or cooling season.

(I) MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). For more detailed information on each combination, please refer to the electrical data drawing.

## Pair, Twin, Triple, double twin

Industry leading technology for commercial applications and even for technical rooms

› Top efficiency:

- energy labels up to A++ in both cooling and heating
  - compressor that offers substantial efficiency improvements
  - control logic that optimises efficiency at the most frequently encountered operating conditions and that optimises the auxiliary modes (when the unit is not active)
  - heat exchangers that optimise the refrigerant flow at the most frequent operating conditions (temperature and load)
  - via improved nominal performances
- › The perfect balance in efficiency and comfort thanks to Variable Refrigerant Temperature: top seasonal efficiency throughout most of the year and quick reaction speed on the hottest days.

- › Suits high sensible, infrastructure cooling applications  
› Re-use of existing R-22 or R-407C technology

- › Extended operation range down to -20°C in heating and down to -15°C in cooling  
› With a gas cooled PCB reliable cooling is guaranteed as it is not influenced by ambient temperature

- › Maximum piping length up to 75m, minimum piping length is 5m.  
› Outdoor units for pair, twin, triple, double twin application  
› Daikin outdoor units are neat, sturdy and can easily be mounted on a roof or terrace or simply placed against an outside wall  
› Compatibility with D-BACS  
› Units optimized for seasonal efficiency give an indication on how efficient an air conditioner operates over an entire heating or cooling season.

## Pair, Twin, Triple, double twin

Packaged system for commercial applications

- › Available as 20 and 25kW
- › Re-use of existing R-22 or R-407C technology

- › Guarantees operation in heating mode down to -15°C
- › Standard night quiet mode
- › Maximum piping length up to 100m
- › Maximum installation height difference up to 30m
- › Wide range of connectable indoor units

Industry leading technology with R-32 delivering optimal efficiency and comfort for commercial applications

- Daikin's Seasonal Smart range is the first R-32 light commercial range available in the European market
- 68% lower GWP compared to R-410A products
- 12% lower refrigerant charge compared to R-410A products
- Minimum 5% more efficient when compared to R-410A products
- Quiet mode: set via the remote control for example during night time, ...
- The perfect balance in efficiency and comfort thanks to Variable Refrigerant Temperature: top seasonal efficiency throughout most of the year and quick reaction speed on the hottest days.

- Re-use of existing R-22 or R-407C technology

- Extended operation range down to -20°C in heating and down to -15°C in cooling

## Pair application

Ideal solution for busy environments and small shops

- › Daikin outdoor units are neat, sturdy and can easily be mounted on a roof or terrace or simply placed against an outside wall
- › With a gas cooled PCB reliable cooling is guaranteed as it is not influenced by ambient temperature
- › Outdoor units are fitted with either a swing or scroll compressor, renowned for low noise and high energy efficiency
- › Exclusively offered for pair applications (capacity from 71 up to 140)
- › Units optimized for seasonal efficiency give an indication on how efficient an air conditioner operates over an entire heating or cooling season.

## Rooftop

- › Easy to install 'plug and play' concept plus single installation configuration; no additional piping is required since indoor and outdoor sides are pre-connected
- › High efficiency and reliable scroll compressor
- › Wide operating range
- › Flat top unit design allows maximum use of warehouse and container space
- › Free cooling and fresh air intake possible with optional economiser
- › Convertible return and supply air: fan can be mounted in two directions
- › Factory pre-charged refrigerant ensures clean and efficient operation
- › Belt driven fan enables air volume and static pressure to be adjusted as required.
- › Adjustable fan pulley as standard to meet a wide range of supply air volumes and external static pressures
- › Anti-corrosion treated coil

Notes:

- 1) Installation box for adapter PCB is necessary;
- 2) Interface adapter for Sky Air series (DTA112B51) is necessary;
- 3) Including following languages: English, German, French, Italian, Spanish, Dutch, Greek, Russian, Turkish, Portuguese, Polish;
- 4) Including following languages: English, German, Czech, Croatian, Hungarian, Romanian, Slovenian, Bulgarian, Slovak, Serbian, Albanian;
- 5) Option not available in combination with BYCQI40\*G;
- 6) Independently controllable flaps function not available in combination with RR and RQ models.;
- 7) Electrical heater, humidifier and hour meter are field supply. These parts should not be installed inside the equipment;
- 8) Sensing function is not available;
- 9) Independently controllable flaps function is not available;
- 10) With the infrared remote control, the individual flap control and automatic air volume control cannot be controlled;
- 11) Including following languages: pack 1: English, German, French, Dutch, Spanish, Italian, Portuguese with PC cable EKPCCAB3 in combination with the Updater PC software, you can additionally change the language to : language pack 2: English, Bulgarian, Croatian, Czech, Hungarian, Romanian and Slovenian. Language pack 3: English, Greek, Polish, Russian, Serbian, Slovak and Turkish.;
- 12) Only possible in combination with simplified remote control BRC2/3E52C;
- 13) These options require mounting plate KRP4A96, maximally 2 optional PCBs can be mounted.
- 14) When installing electrical heaters, an optional PCB for external electric heaters EKRP1B2A is required for each indoor unit.
- 15) This option needs to be installed together with installation box KRP1B101/KRP1BA101.

- The BYCQ140DW has white insulations. Be informed that dirt is more visible on white insulation and that it is consequently not advised to install the BYCQ140DW decoration panel in environments

- To be able to control BYCQ140D/W/DG(F), the controller BRC1E is needed and cannot be combined with mini-VRV, multi and split non-inverter outdoor units.

Notes:

- 1) Option not available in combination with BYCQ140D\*G\*;
- 2) Both parts of the fresh air intake are needed for each unit;
- 3) This option is intended exclusively for usage in fine dust environments (clothing shops). Do not use this option in high humidity and/or greasy environments.;
- 4) Sensor kit not available with RR & RQ units;
- 5) For directly mounting the decoration panel on the unit, decoration panel option EKBYBSD is required.

## VRV IV sets the standard ... again

### Why choose VRV?

#### • Inventor and market leader of VRV systems since 1982

- › Over 90 years of expertise in heat pumps
- › Designed for and produced in Europe

#### • Unique outdoor unit range covering all applications and climate conditions

#### • Unique products that make the difference

##### in efficiency

- › Variable Refrigerant Temperature leading to the highest seasonal efficiency
- › Round flow cassette with auto cleaning panel
- › Absolute credibility of data with Eurovent certification of air-cooled outdoor units

##### in comfort

- › Variable Refrigerant Temperature preventing cold draughts
- › True continuous heating, during defrost
- › 15 class units for small, well insulated rooms (cassette, wall, concealed ceiling models)
- › Low sound indoor and outdoor units

##### in design

- › Fully flat cassette, fully integrated in the ceiling
- › Daikin Emura, unique iconic design

##### in installation

- › Automatic refrigerant charge and refrigerant containment check
- › 4-way blow ceiling suspended cassette (FXUQ)
- › Plug & play Daikin air handling unit
- › Total solution incl. low and high temperature hydro box, Biddle air curtains, etc.

##### in control

- › Intelligent Touch manager cost-effective mini BMS integrating all pillars
- › Easy integrating in third party BMS
- › Dedicated control solutions for applications such as technical cooling, shops, hotels, ...

#### • Top reliability

- › True technical cooling
- › Gas-cooled PCB
- › Most extensive testing before new units leave the factory
- › Widest support network and after sales service
- › All spare parts available in Europe

#### • The best partner for your green project

**BREEAM®**

The VRV air conditioning system is the world's first individual air conditioning system with variable refrigerant flow control and was commercialised by Daikin in 1982. VRV is the trademark of Daikin Industries Ltd, which is derived from the technology we call "variable refrigerant volume".

BREEAM is a registered trademark of BRE (the Building Research Establishment Ltd. Community Trade Mark E5778551). The BREEAM marks, logos and symbols are the Copyright of BRE and are reproduced by permission

## What's new?

### • VRV IV S-series

- › Widest range of front blow units in the market
- › Most compact unit in the market (RXYSCQ-T)
- › Connect stylish residential or VRV indoor units
- › Total solution incl. air curtains, air handling units, ...
- › Compete reliability thanks to refrigerant cooled PCB

### • VRV IV i-series

- › The invisible VRV
- › Unique split outdoor unit concept
- › Easy and quick to transport and install by just 2 persons
- › Total solution incl. air curtains, air handling units, ...
- › Available in 5 and 8 HP

## VRV IV standards

### • Variable refrigerant temperature

- › Customize your VRV for best seasonal efficiency & comfort
- › Up to 28% higher seasonal efficiency (ESEER)
- › First weather dependent VRV
- › No more cold draft by supply of high outblow temperatures

### • Continuous comfort

- › True/real continuous heating makes VRV IV the best alternative to traditional heating systems

### • VRV configurator

- › software for the fastest and most accurate commissioning, configuration and customisation

### • Total solution

- › one supplier for heating, cooling, ventilation, hot water, Biddle air curtains and control
- › combine both residential and VRV indoor units

### • Free combination of outdoor units to meet installation space or efficiency requirements

### • Outdoor unit display for quick on-site settings

## Benefits for installers

Daikin VRV IV sets the standard with latest technology and time saving commissioning & servicing

- › Simplified and time saving commissioning with VRV configurator
- › Remote refrigerant containment check
- › One supplier = one point of contact
- Many options to meet customer requirements

## Benefits for consultants

Daikin's VRV IV technology leads the way in customisation to match individual building requirements in comfort and energy, facilitating reduced capital and running costs

- › Ecological design
- › Ideal for reaching top BREEAM/EPBD levels
- › No more cold draughts with higher evaporation temperatures up to 11 or 16°C, making VRV IV an ideal alternative to water-based systems
- › Unique specification for monovalent heating

## Benefits for owners

VRV IV is the ultimate in customised comfort and intelligent control tailored to your individual needs and to maximise energy efficiency

- › Annual cost savings up to 28% (compared with VRV III)
- › No more cold draughts with variable refrigerant temperature
- › Single point of contact for the design and maintenance of your climate control system
- › Integrated system allows maximum energy efficiency for the end user
- › Multiple systems can be managed in exactly the same way for key accounts

## **VRV IV** heat recovery technologies

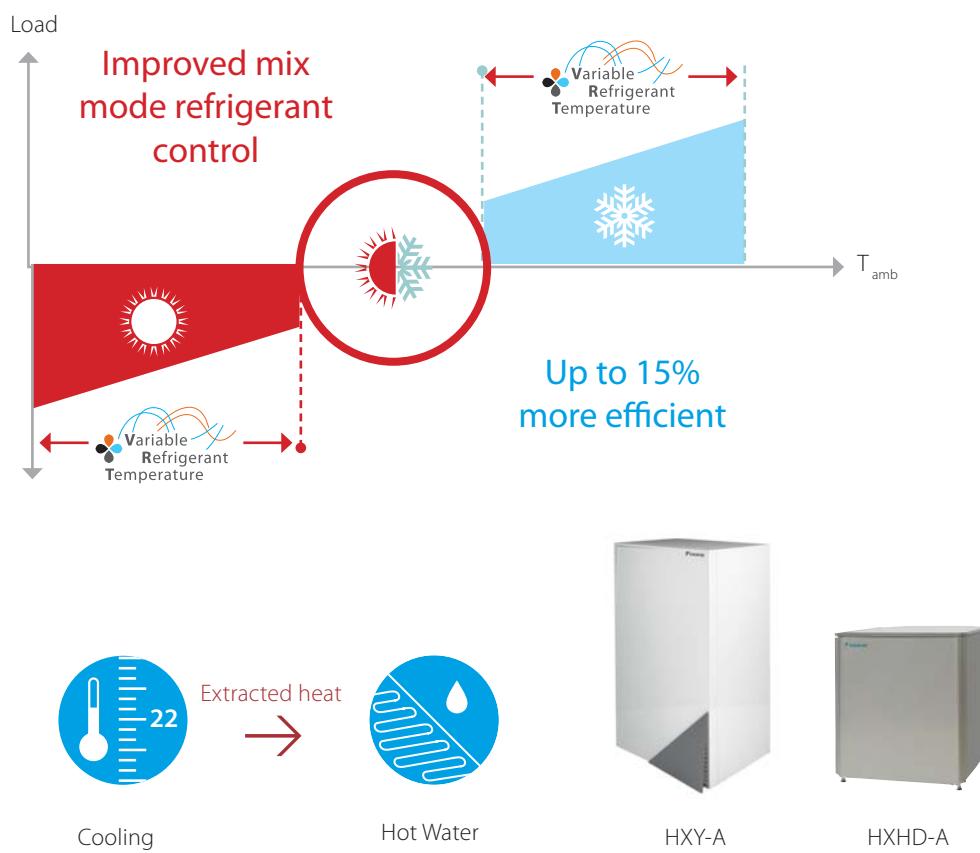

### Improved efficiency

- › In heat recovery operation VRV IV is up to 15% more efficient than VRV III
- › Overall efficiency is increased with up to 28% thanks to Variable Refrigerant Temperature
- › Heat can be re-used to create hot water 'for free'

### Maximum comfort

A VRV heat recovery system allows simultaneous cooling and heating.

- › For hotel owners it means a perfect environment for guests as they can freely choose between cooling or heating.
- › For offices it means a perfect working climate both for spaces facing south and north.

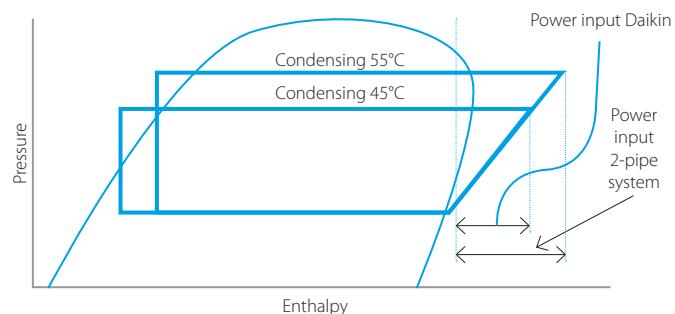

## Advantages of 3-pipe technology

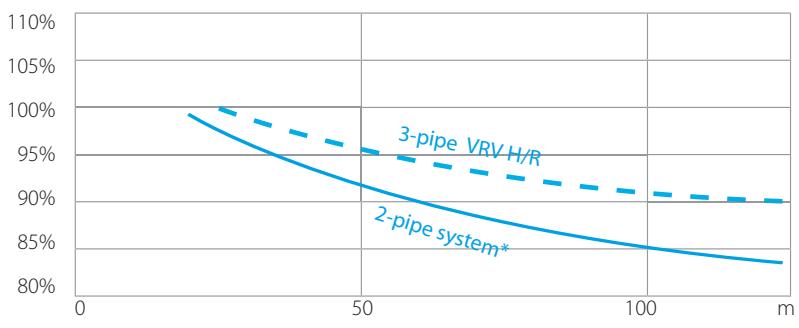

### More free heat

Daikin 3-pipe technology needs less energy to recover heat, meaning significant better efficiency during heat recovery mode. Our system can recover the heat at low condensing temperature because it has dedicated gas, liquid and discharge pipes.

In a 2-pipe system gas and liquid travel as a mixture so the condensing temperature needs to be higher in order to separate the mixed gas and liquid refrigerant. The higher condensing temperature means more energy is used to recover heat resulting in lower efficiency.

### More efficient due to lower pressure drop

- — Smooth refrigerant flow in 3-pipe system thanks to 2 smaller gas pipes leading to higher energy efficiency
- Disturbed refrigerant flow in large gas pipe on 2-pipe system leading to bigger pressure drop

\*only for heat pump series

### Maximum design flexibility and installation speed

- › Unique range of single and multi BS boxes for flexible and fast design
- › Major reduction in installation time thanks to wide range, compact size and light weight multi BS boxes

#### Single port

BS1Q10,16,25A

#### Multi port: 4 – 6 – 8 – 10 – 12 – 16

BS4Q14A

BS6,8Q14A

BS10,12Q14A

BS16Q14A

## But VRV is more... standard VRV features

### Low running costs

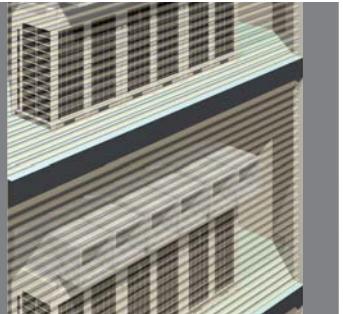

- › Precise zone control and inverter technology
- › Up to 50% savings with intelligent sensors and auto cleaning cassette
- › Running costs of a water-based fan coil unit can be 40 to 72% higher compared to a VRV heat recovery system

### Great design flexibility

- › Long refrigerant piping
- › Compact units require up to 29% less space than traditional water based systems, offering more lettable space
- › Zone by zone phased installation tailored to the needs of the building
- › Modular approach to better balance different heat load throughout a building
- › Outdoor units can be installed outdoors or indoors
- › Widest range of indoor units to fit customer needs
- › Solutions for every climate, from -25 to +52°C
- › Special VRV S-series designed for small capacities

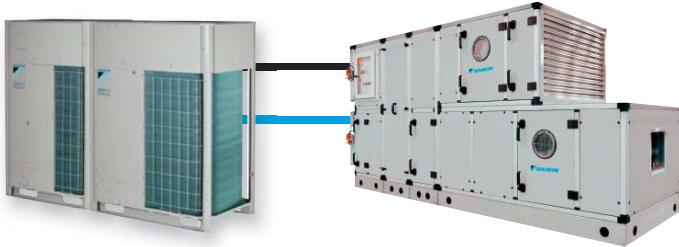

indoor installation

**ESP up to  
78pa**

## Easy installation and servicing

- › Automatic testing and refrigerant charging
- › Easy servicing and F-gas compliance with remote refrigerant containment check
- › Plug & play connection for VRV to Daikin Air Handling Units, the easiest solution with only one point of contact

## High comfort levels

- › Individual control and simultaneous cooling and heating for perfect personal environment
- › Low indoor sound levels down to 19 dBA
- › Intelligent sensors and high outblow temperatures prevent cold draughts
- › Uniquely designed units:  
Daikin Emura, Nexura and Fully flat cassette

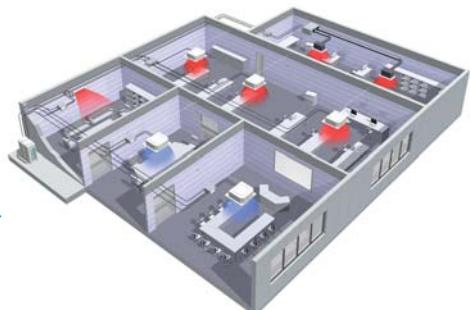

DAIKIN emura

nexura

FULLY FLAT CASSETTE

- › CO<sub>2</sub> sensor in combination with Daikin ventilation (VAM, VKM) units ensures fresh air, while preventing energy losses from over-ventilation

Total heat exchanged  
foul air

## Ease of use

- › Smart energy management optimises the performance automatically 24/7

## Ahead of or in line with legislation

- › All indoor units fully eco-design compliant by adopting DC fans (Lot 11)
- › All hydroboxes eco-design compliant by use of efficient pumps (Lot 11)
- › All ventilation units eco-design compliant (Lot 6)
- › VRV air-cooled outdoor units are Eurovent certified, which means absolute credibility of data, as Daikin clearly mentions the outdoor/indoor combinations

## Did you know

- › Daikin is the only manufacturer that clearly mentions the outdoor/indoor combinations for which our published data are applicable.
- › Daikin will continue to push Eurovent to select and check not only the outdoor unit for testing, but also the indoor unit types, and make reference to the combination on the Eurovent website.
- › A new line-up of high efficiency ducted indoor units FXTQ50A, FXTQ63A, FXTQ80A and FXTQ100A is launched for connection with VRV IV Heat pump and Heat Recovery only.
- › We keep investing in improving our seasonal efficiency rather than nominal efficiency.

## Supporting tools

### Sales supporting apps

#### Solutions seasonal simulator, simulate & compare

With this software tool you can simulate and the seasonal efficiency, the annual power consumption and CO<sub>2</sub> emission for a given climate, load profile (cooling, heating, heat recovery, covalent, bivalent...) and combination of systems. With its intuitive and graphical appealing interface, a simulation, comparison and ROI calculation can be made in a matter of minutes.

#### Xpress, Quick Quotation tool

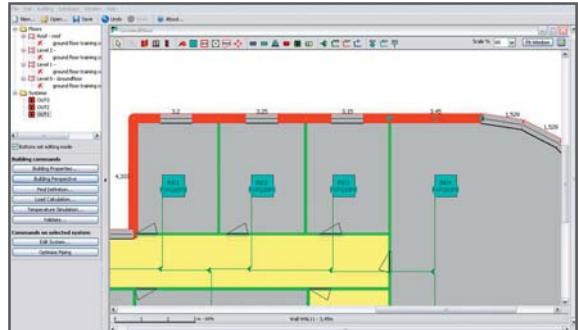

Xpress is a software tool that allows creating on the spot quotations for a Daikin VRV system. It provides a result in 6 steps to enable a professional budget quotation in the fastest possible way:

- › Select indoor units
- › Connect outdoor units to indoor units
- › Automatic generation of piping diagram with joints
- › Automatic generation of wiring diagram
- › Select possible centralised control systems
- › Visualise result in MS Word, MS Excel and AutoCAD

#### Ventilation Xpress

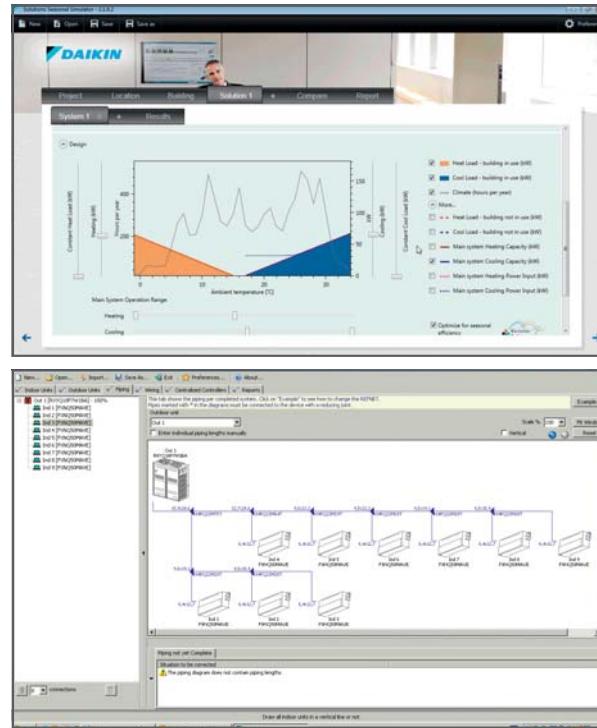

Selection tool for ventilation devices (VAM, VKM). The selection is based on given supply/extract airflows (including fresh up), and given ESP of the supply/extract ducting:

#### VRV Pro, Design tool

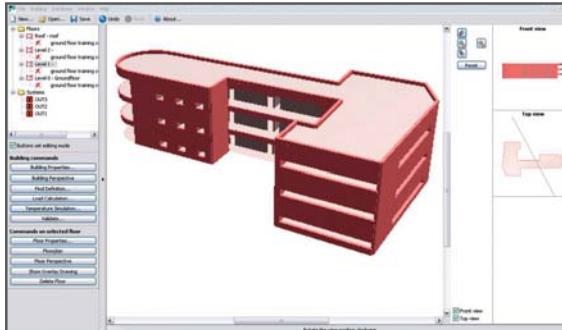

The VRV Pro selection program is a true VRV design tool. The program enables VRV air conditioning systems to be engineered in a precise and economical way, taking into account the realtime thermal properties of any building. By calculating annual energy consumptions, it gives the

[www.daikineurope.com/  
support-and-manuals/  
software-downloads](http://www.daikineurope.com/support-and-manuals/software-downloads)

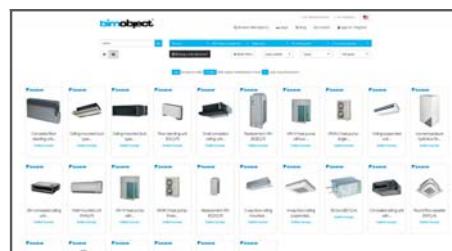

- › Determines size of electrical heaters
- › Visualization of psychrometric chart
- › Visualization of selected configuration
- › Required field settings mentioned in the report

designer the possibility to make accurate selections and **get competitive quotations** for each project. Moreover, it ensures optimum operating cycles and maximum energy efficiency.

#### NEW Building Information Modelling (BIM) support

- › BIM is improving efficiency in the design and built phase
- › Daikin is among the first to supply a full library of BIM objects for its VRV products
- › Download them at  
<http://bimobject.com/en/product/?freetext=daikin>

# Online support

## NEW Business portal

VRV

# The total solution

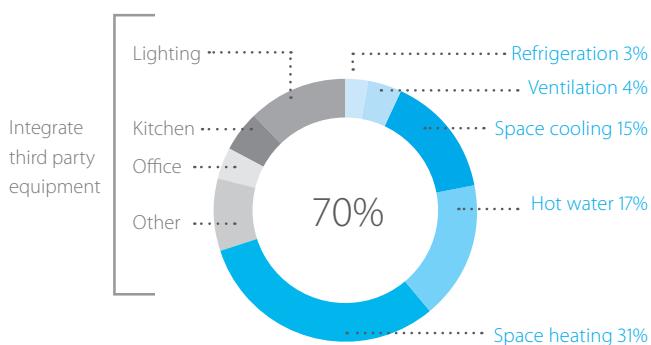

Typically, many buildings today rely on several separate systems for heating, cooling, air curtain heating and hot water. As a result energy is wasted. To provide a much more efficient alternative, VRV technology has been developed into a total solution managing up to 70% of a buildings energy consumption giving large potential to cost saving.

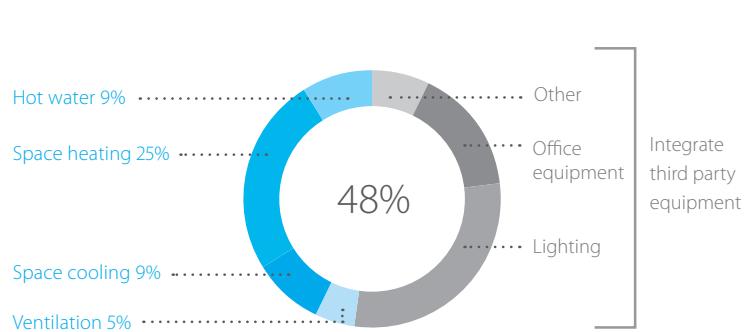

- › **Heating and cooling** for year round comfort
- › **Hot water** for efficient production of hot water
- › **Underfloor heating /cooling** for efficient space heating/cooling
- › **Ventilation** for high quality environments
- › **Air curtains** for optimum air separation
- › **Controls** for maximum operating efficiency

Combine up to 70% of your building's energy consumption

Average hotel energy consumption

Average office energy consumption

# One system, multiple applications for hotels, offices, retail, home ...

## Heating and cooling

- › Combine VRV indoor units with other stylish indoor units in one system
- › New round flow cassette sets the standard for efficiency and comfort

## Intelligent control systems

- › Mini BMS with connects Daikin and third-party equipment
- › Integrate intelligent control solutions with energy management tools to reduce running costs

## Low-temperature hydrobox

- › Highly efficient space heating through:
  - Underfloor heating
  - Low temperature radiators
  - Heat pump convector
- › Hot water from 25 °C to 45 °C

## Biddle air curtain

- › Payback time less than 1 year compared to electrical air curtain
- › A highly efficient solution for doorway climate separation

## High temperature hydrobox\*

\*only for connection to VRV heat recovery

- › efficient hot water production for:
  - Showers
  - Sinks
  - Tapwater for cleaning
- › Hot water from 25 °C to 80 °C

## Ventilation

- › Widest range in DX ventilation – from small heat recovery ventilation to large scale air handling units
- › Provides a fresh, healthy and comfortable environment

## VRV for offices and banks

Efficiency in the workplace

Efficient building and facilities management are key to minimising operational costs

### Our office solution offers:

- › Significantly reduced costs for hot water and heating by re-using heat recovered from areas requiring cooling
- › Unique cassette integrating fully flat into architectural ceilings
- › Intelligent sensors
  - maximise efficiency by switching off the unit if there is nobody in the meeting room
  - maximise comfort by directing the air flow from people to avoid cold draught
- › Complete Daikin mini BMS for office building management with Intelligent Touch Manager
- › Plug & play connection to air handling units for a healthier office atmosphere
- › Hot water production for sinks and underfloor heating
- › True reliable technical cooling down to -20°C, including duty/standby function

DaikinEurope](http://www.youtube.com/DaikinEurope)

## VRV for hotels

Hospitality with economy

A hotel's reputation depends on how welcome and comfortable guests feel during their stay. Yet at the same time, hotel owners must maintain complete control of their operating costs and energy consumption.

### Our hotel solution offers:

- › Low cost heating and hot water by recovering heat from areas requiring cooling
- › The perfect personal environment for guests by simultaneously heating spaces while cooling others
- › Flexible installation: the outdoor unit can be installed outdoors to maximise hospitality space or indoors to minimise external space or noise in city centres
- › Concealed ceiling units developed for small, well-insulated rooms such as hotel bedrooms, offering very low sound levels ensuring a good's night rest
- › Smart energy management via Intelligent Touch Manager puts the hotel owner in full control of energy costs
- › Intelligent and user-friendly hotel room controllers change the set point automatically when a guest leaves the room or opens the window
- › Easy integration in hotel booking software
- › Hot water production for bathrooms, underfloor heating and radiators up to 80°C

Hotel

Bank / Retail

## VRV for retail

Reducing retail costs

Retailers are under pressure to reduce both store development costs and running costs. That is why affordable, energy-efficient solutions are vital for minimising lifetime costs, while ensuring compliance with the latest regulations.

### Our retail solutions offer:

- › Compact inverter heat pump technology
- › Flexible installation: the outdoor unit can be installed outdoors to maximise hospitality space or indoors to minimise external space or noise in city centres
- › Unique round flow cassettes with autocleaning panel saving up to 50% of energy use compared to standard cassette units
- › Easy to use remote control with lock-key function to avoid improper use
- › Individual control of each indoor unit or shop zone
- › Savings on runningcost via pre/post trade modes, limiting energy use by lights, air conditioning, ...
- › The most efficient open-door solution with Biddle air curtains

Upgrade R-22 and R-407C systems quick and qualitatively with...

**VRV Replacement solutions:**

## VRV for residential use

There is no place like home

A cost effective, low energy consumption heat pump system for home owners, offering maximum comfort

### Our residential solution offers:

- › Lower CO<sub>2</sub> emissions compared to traditional heating systems
- › Compact outdoor unit design with a low sound level
- › Whisper-quiet indoor units down to 19dBA
- › Daikin Emura, iconic design wall mounted unit
- › Unique Nexura floor standing unit offering the feel of a radiator with the efficiency of a heat pump
- › Units to be concealed in the wall or ceiling to make them completely unnoticed
- › User-friendly, intuitive control
- › Up to 9 indoor units that can be connected to one outdoor unit

**Check on**

**You**Tube

[www.youtube.com/  
DaikinEurope](http://www.youtube.com/DaikinEurope)

- › Keep your customers operational even during system replacement
- › Less installation time
- › Lower installation costs
- › Replace non-Daikin systems
- › Automatic refrigerant charge and pipe cleaning

HOTEL LE PIGONNET, 8 REPLACEMENT VRV

VRV IV S-SERIES

CINEMEERSE, CINEMA, 12 OUTDOOR UNITS WITH AHU

# Products overview

Model	Product name	4	5	6	8	10	12	13	14	16	18	20	22	24	26	28	30
Air cooled - heat recovery																	
VRV IV heat recovery	REYQ-T 											●	●	●	●	●	●
VRV IV heat recovery	Daikin's optimum solution with top comfort											●	●	●	●	●	●
VRV IV heat pump with continuous heating	RYYQ-T 																
VRV IV heat pump without continuous heating	RXYQ-T(9) 											●	●	●	●	●	●
VRV IV-S series Compact	RXYSCQ-TV1 																
VRV IV-S series	Space saving solution without compromising on efficiency											●	●				
VRV IV/heat pump for indoor installation	SB.RKXYQ-T* 																
VRV III heat pump, optimised for heating	RTSYQ-PA 											●	●	●	●	●	●
VRV classic	RXYCQ-A 											●	●	●	●	●	●
heat recovery	Quick & quality replacement for R-22 and R-407C systems																
heat pump	RQCEQ-P* 																
heat pump	Quick & quality replacement for R-22 and R-407C systems											●	●	●	●	●	●
Water cooled VRV IV	RXYQQ-T* 																
Water cooled VRV IV	Ideal for high rise buildings, using water as heat source											●	●				
	Reduced CO <sub>2</sub> emissions thanks to the use of geothermal energy as a renewable energy source																
	No need for an external heating or cooling source when used in geothermal mode																
	Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, air handling units and Biddle air curtains																
	Compact & lightweight design can be stacked for maximum space saving																
	Incorporates VRV IV standards & technologies such as Variable Refrigerant temperature																
	Variable Water Flow control option increases flexibility and control																

\* Not Eurovent certified

# VRV IV heat recovery

Best efficiency & comfort solution

- > Fully integrated solution with heat recovery for maximum efficiency with COPs of up to 8 !
- > Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, hot water, air handling units and Biddle air curtains
- > „Free“ heating and hot water production provided by transferring heat from areas requiring cooling to areas requiring heating or hot water
- > The perfect personal comfort for guests/tenants via simultaneous cooling and heating

- > Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature, continuous heating, VRV configurator, 7 segment display and full inverter compressors, 4-side heat exchanger, refrigerant cooled PCB, new DC fan motor
- > Free combination of outdoor units to meet installation space or efficiency requirements
- > Possibility to extend the operation range in cooling down to -20°C for technical cooling operation such as server rooms
- > Contains all standard VRV features

(1) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m. Data for standard efficiency series (2) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m. Data for high efficiency series, Eurovent certified (3) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m. Data for standard efficiency series (4) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m. Data for high efficiency series, Eurovent certified (5) Actual number of connectable indoor units depends on the indoor unit type (VRV indoor, Hydrobox, RA indoor, etc.) and the connection ratio restriction for the system (50% <= CR <= 130%) (6) Technical cooling setting, refer to the installation manual for more information | Contains fluorinated greenhouse gases

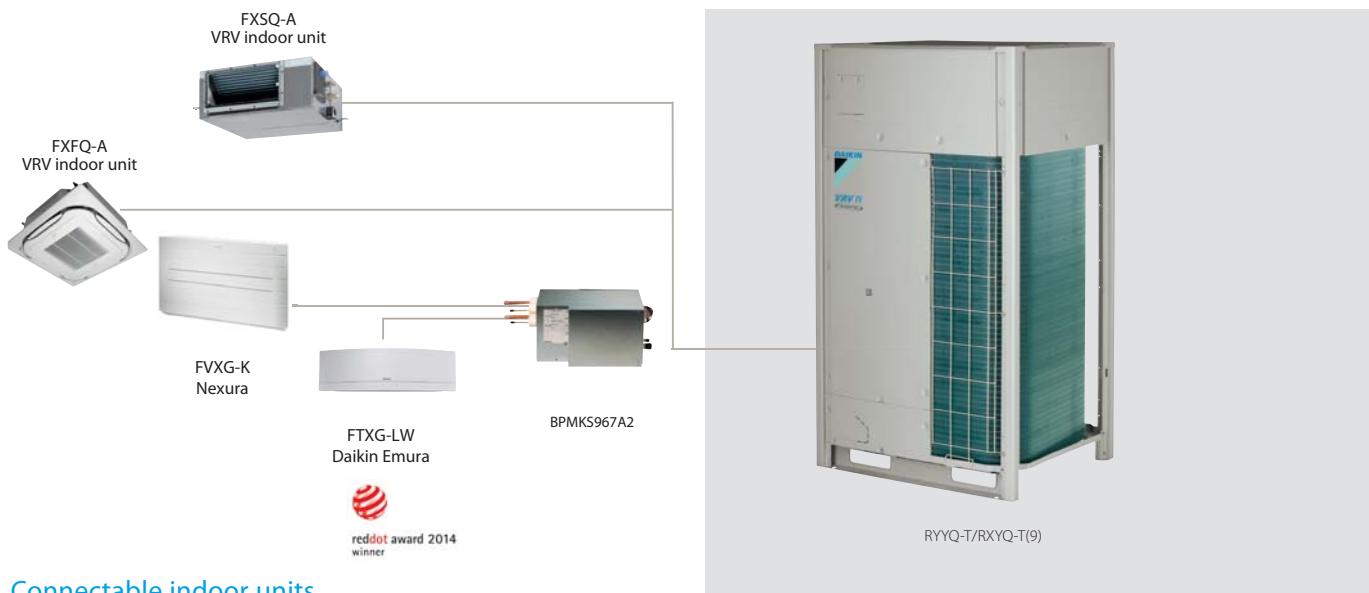

# VRV IV heat pump

**Daikin's optimum solution with top comfort**

- › Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, hot water, air handling units and Biddle air curtains
- › Wide range of indoor units: possibility to combine VRV with stylish indoor units (Daikin Emura, Nexura, ...)
- › Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature, continuous heating, VRV configurator, 7 segment display and full inverter compressors, 4-side heat exchanger, refrigerant cooled PCB, new DC fan motor
- › Free combination of outdoor units to meet installation space or efficiency requirements
- › Available as heating only by irreversible field setting
- › Contains all standard VRV features

(1) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m. Data for standard efficiency series (2) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m. Data for high efficiency series, Eurovent certified (3) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m. Data for standard efficiency series (4) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m. Data for high efficiency series, Eurovent certified (5) Actual number of connectable indoor units depends on the indoor unit type (VRV indoor, Hydrobox, RA indoor, etc.) and the connection ratio restriction for the system (50% <= CR <= 130%) | The STANDARD ESEER value corresponds with normal VRV4 Heat Pump operation, not taking into account advanced energy saving operation functionality | The AUTOMATIC SEER value corresponds with normal VRV4 Heat Pump operation, taking into account advanced energy saving operation functionality ( variable refrigerant temperature control operation) | Contains fluorinated greenhouse gases

## RXYSCQ-TV1 / RXYSQ-TV1 / RXYSQ-TY1

A wide range, big on features

They may be discreet, but Daikin VRV IV S-series units stand out when it comes to benefits they deliver. They provide the perfect indoor climate, while remaining totally discreet from the outside. If you need efficient and effective air conditioning from a completely unnoticeable unit, look no further.

### Features

- › A wide range of stylish residential or commercial indoor units can be connected
- › A total air conditioning solution integrating air handling units and/or air curtains
- › Complete reliability thanks to refrigerant-cooled PCB
- › Suitable for bigger projects of up to 150 to 200m<sup>2</sup>
- › Light weight unit (down to 88kg) is easy to install and handle
- › A perfect match for any application thanks to the wide range of small-footprint units
- › Widest range of front blow units on the market

### Total solution

Daikin Emura  
wall mounted unit

Fully flat cassette

Biddle air curtain

Nexura

Fully flat cassette

Air handling unit ventilation

Most compact unit on the market  
823mm high & 88kg

Compact:  
Easy for a two person crew to move and install.

[www.youtube.com/  
DaikinEurope](http://www.youtube.com/DaikinEurope)

# VRV IV S-series compact heat pump

## The most compact VRV

- › Compact & lightweight single fan design makes the unit almost unnoticeable
- › Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, air handling units and Biddle air curtains
- › Wide range of indoor units: either connect VRV or stylish indoor units such as Daikin Emura, Nexura ...
- › Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature and full inverter compressors
- › 3 steps in night quiet mode: step 1: 47 dBA, step 2: 44 dBA, step 3: 41 dBA
- › Possibility to limit peak power consumption between 30 and 80%, for example during periods with high power demand
- › Contains all standard VRV features

**VRV IV heat pump  
for indoor installation**

## SB.RKXYQ-T

Keep looking  
you'll never find me

You can install highly efficient, reliable Daikin air conditioning systems in the most demanding locations while remaining invisible from street level.

### Invisible

- › Completely invisible only the grilles are visible
- › Seamless integration into surrounding architecture
- › Highly suited to densely populated areas thanks to the low operation sound

### Intuitive

- › Total flexibility as the outdoor unit is split up in 2 parts
- › Easy and quick to transport and install by just 2 persons
- › Easy servicability, all components can be easily reached

### Intelligent

- › Patented V-shape heat exchanger for the most compact unit (400 mm high) ever
- › Connectable to all VRV indoor units
- › Provides a total solution when combined with ventilation units, Biddle air curtains and controls

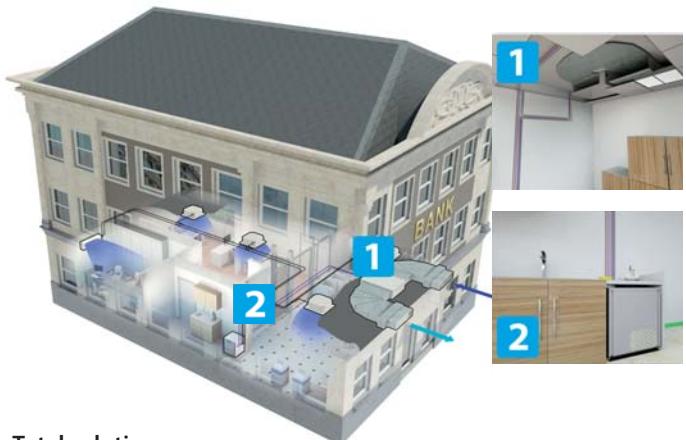

Unique concept with  
**5** patents

### Invisible

### Unique split outdoor unit

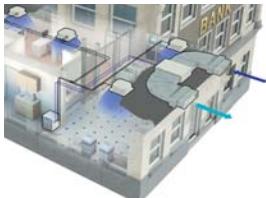

### Total solution

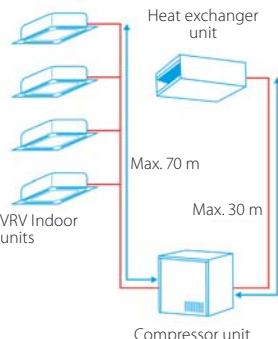

# VRV IV heat pump for indoor installation

## The invisible VRV

- Unique VRV heat pump for indoor installation

- Unrivalled flexibility because the unit is split up into two elements: the heat exchanger and the compressor

- Highly suited to densely populated areas thanks to the low operation sound and seamless integration into surrounding architecture as only the grille is visible

SB.RKXYQ5T

- Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature, VRV configurator and full inverter compressors
- Lightweight units (max. 97kg) can be installed by two people
- Unique V-shape heat exchanger results in compact dimensions (h/e unit only 400mm high) allowing false ceiling installation, while ensuring top efficiency
- Super efficient centrifugal fans (over 50% efficiency increase compared to sirocco fan)
- Small footprint compressor unit (600 x 550 mm) maximizing useable floor space
- Contains all standard VRV features

# VRVIII heat pump, optimised for heating

Where heating is priority without compromising on efficiency

- › First system in the industry developed for heating operation in low ambient conditions, making it suitable for single source heating
- › Extended operation range down to -25°C in heating
- › Stable heating capacity and high COP values at low ambients thanks to the two stage compression technology (COP values of 3.0 and more at -10°C)
- › Improved comfort thanks to shorter defrost time
- › Shorter heat up time compared to standard VRVIII heat pump
- › Contains all standard VRV features

# Replacement technology

The quick and quality way of upgrading R-22 and R-407C systems

These benefits will convince your customer

Drastically improve your efficiency, comfort and reliability

## Avoid loss of business

Replacing now prevents unplanned, lengthy downtime of air conditioning systems. It also avoids loss of business for shops, complaints from guests in hotels, lower working efficiency and loss of tenants in offices.

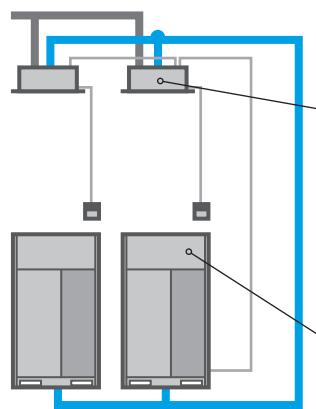

## Quick and easy installation

No interruption of daily business while replacing the system thanks to phased-in, fast installation.

## Smaller footprint, more performance

Thanks to a smaller footprint, Daikin outdoor units save space. Also, more indoor units can be connected to the new outdoor unit compared to the old system, allowing to increase capacity.

## Keep your refrigerant piping

### The Daikin low-cost upgrade solution

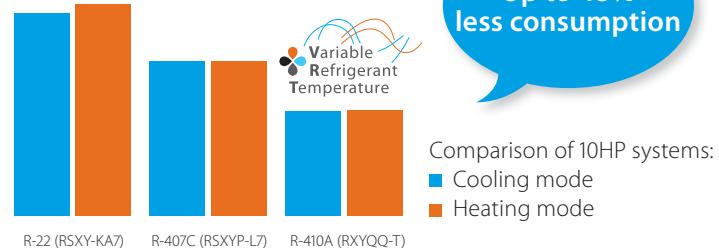

#### ! Replace indoor units and BS boxes

Contact your local dealer to check compatibility in case you need to keep the indoor units.

#### ! Replace outdoor units

## Lower long-term costs

EU Directives prohibit system repairs with R-22 after January 1, 2015. Delaying the required R-22 replacement until an unplanned system breakdown is a losing game. Replacement day will come. Installing a technically advanced system lowers energy consumption and maintenance costs from day one.

Comparison of 10HP systems:  
■ Cooling mode  
■ Heating mode

## Your copper pipes will last for multiple generations

- › copper pipes used in air conditioning systems tested by Daikin will last over 60 years after installation.
- › Japan/China have replaced with VRV Q-series already 10 years ago!

### Umeda Center Building, Japan

- › original A/C system: 20 years in use
- › replacement with VRV Q-series: 2006 - 2009
- › capacity up from 1620HP to 2322HP
- › SHASE renewal award:

## ! Planning your replacement in future?

### Monitor your system now!

Your building use might have changed over the years. Monitoring and Daikin expert advice prepare you for an optimum replacement to maximize efficiency and comfort, while minimizing the investment cost of your new system.

## VRV-Q benefits to increase your profit

### Optimise your business

#### Less installation time

Tackle more projects in less time thanks to faster installation. It is more profitable than replacing the full system with new piping.

#### Lower installation costs

Reducing installation costs enables you to offer customers the most cost-effective solution and improve your competitive edge.

#### Replace non-Daikin systems

It is a trouble-free replacement solution for Daikin systems and for systems made by other manufacturers.

#### Easy as one-two-three

A simple solution for replacement technology enables you to handle more projects for more customers in less time and offer them the best price! Everybody gains.

### Automatic refrigerant charge

The unique automatic refrigerant charge eliminates the need to calculate refrigerant volume and ensures that the system will operate perfectly. Not knowing the exact piping lengths because of changes or mistakes in case you didn't do the original installation or replacing a competitor installation no longer poses a problem.

### Automatic pipe cleaning

There is no need to clean inside piping as this is handled automatically by the VRV-Q unit. Finally the test operation is performed automatically to save time.

### Compare installation steps

#### Conventional solution

- 1 Recover refrigerant
- 2 Remove units
- 3 Remove refrigerant pipes
- 4 Install new piping and wiring
- 5 Install new units
- 6 Leak test
- 7 Vacuum drying
- 8 Refrigerant charging
- 9 Collect contamination
- 10 Test operation

#### VRV-Q

- 1 Recover refrigerant
- 2 Remove units
- Re-use existing piping and wiring
- 3 Install new units
- 4 Leak test
- 5 Vacuum drying
- 6 Automatic refrigerant charging, cleaning and testing

**Up to 45% shorter installation time**

#### One touch convenience:

- › Measure and charge refrigerant
- › Automatic pipe cleaning
- › Test operation

## Replacement VRV

- › Cost effective and fast replacement as only the outdoor and indoor unit needs to be replaced, meaning almost no work has to be carried out inside the building
- › Efficiency gains of more than 70% can be realized, by virtue of technological developments in heat pump technology and the more efficient R-410A refrigerant
- › Less intrusive and time consuming installation compared to installing a new system, as the refrigerant piping can be maintained
- › Unique automatic refrigerant charge eliminates the need to calculate refrigerant volume and allows safe replacement of competitor replacement
- › Automatic cleaning of refrigerant piping ensures a clean piping network, even when a compressor breakdown has occurred
- › Accurate temperature control, fresh air provision, air handling units and Biddle air curtains all integrated in a single system requiring only one single point of contact
- › Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature and full inverter compressors (for RXYQQ-T units)
- › Possibility to add indoor units and increase capacity without changing the refrigerant piping
- › Possibility to spread the various stages of replacement thanks to the modular design of the VRV system
- › Free combination of outdoor units to meet installation space or efficiency requirements (for RXYQQ-T units)
- › Contains all standard VRV features

Contains fluorinated greenhouse gases | The STANDARD ESEER value corresponds with normal VRV4 Heat Pump operation, not taking into account advanced energy saving operation functionality | The AUTOMATIC SEER value corresponds with normal VRV4 Heat Pump operation, taking into account advanced energy saving operation functionality (variable refrigerant temperature control operation) | Actual number of connectable indoor units depends on the indoor unit type (VRV indoor, Hydrobox, RA indoor, etc.) and the connection ratio restriction for the system (50% <= CR <= 130%)

## RWEYQ-T8

### Water-to-air heat pump

**Indoor installation makes unit invisible from the outside**

- › Seamless integration in the surrounding architecture as you cannot see the unit
- › Highly suited for sound sensitive areas as there is no external operation sound
- › Superior efficiency, even in the most extreme outside conditions, especially in geothermal operation

#### Variable water flow control

- › The variable water flow control option reduces excessive energy use by the circulation pump.
- › By controlling a variable water valve, the water flow is reduced when possible, saving energy.

#### Lower refrigerant levels

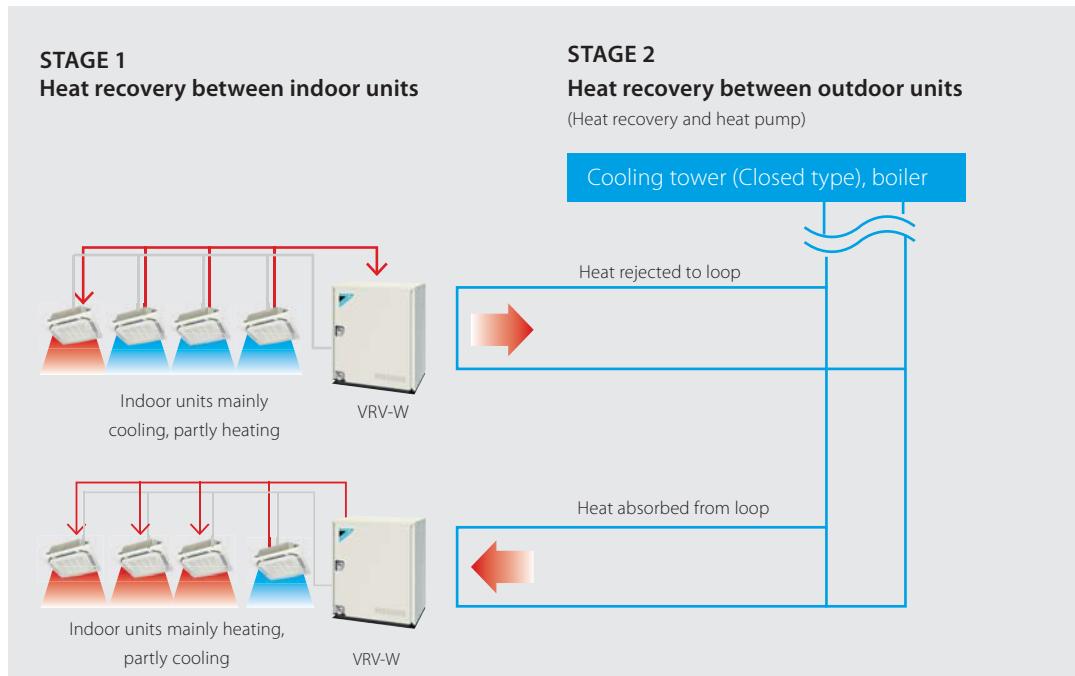

Water-cooled VRV systems typically have less refrigerant per system making it ideal to comply with the EN378 legislation limiting the amount of refrigerant in hospitals and hotels.

#### The refrigerant levels remain limited

thanks to:

- › limited distance between outdoor and indoor unit
- › modularity: enabling small systems per floor instead of one big system. Thanks to the water circuit heat recovery is still possible in the entire building

#### 2-stage heat recovery

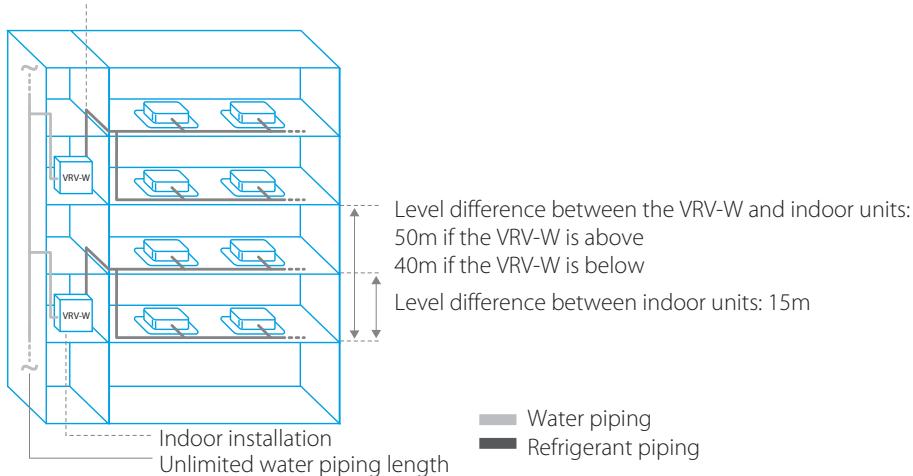

# VRV IV water cooled series

Ideal for high rise buildings, using water as heat source

- › Unified range for standard and geothermal series simplifies stock.
- Geothermal series reduce CO<sub>2</sub> emmisions thanks to the use of geothermal energy as a renewable energy source
- › No need for an external heating or cooling source when used in geothermal mode
- › Covers all thermal needs of a building via a single point of contact: accurate temperature control, ventilation, air handling units and Biddle air cutains
- › Compact & lightweight design can be stacked for maximum space saving
- › Incorporates VRV IV standards & technologies: Variable Refrigerant Temperature and full inverter compressors
- › 2-stage heat recovery: first stage between indoor units, second stage between outdoor units thanks to the storage of energy in the water circuit
- › Available in heat pump and heat recovery version
- › Variable Water Flow control option increases flexibility and control
- › Contains all standard VRV features

(1) Cooling: Indoor temp. 27°CDB; inlet water temp.: 30°C; equivalent refrigerant piping: 7.5m; level difference: 0m. Rated values are with 100% water (no glycol) (2) Cooling: Indoor temp. 27°CDB; 19°CWB; inlet water temp.: 30°C; equivalent refrigerant piping: 7.5m; level difference: 0m. Rated values are with 30% glycol. (3) Heating: Indoor temp. 20°CDB; inlet water temp.: 20°C; equivalent refrigerant piping: 7.5m; level difference: 0m. Rated values are with 100% water (no glycol). (4) Heating: Indoor temp. 20°CDB; inlet water temp.: 20°C; equivalent refrigerant piping: 7.5m; level difference: 0m. Rated values are with 30% glycol. (5) Actual number of connectable indoor units depends on the indoor unit type (VRV indoor, Hydrobox, RA indoor, etc.) and the connection ratio restriction for the system (50% <= CR <= 130%) (6) In case of heat pump system, gas pipe is not used (7) In case of heat recovery system (8) In case of heat pump system | Contains fluorinated greenhouse gases

## Individual branch selector for VRV IV heat recovery

- › Unique range of single and multi BS boxes for flexible and fast design
- › Compact & light to install
- › Ideal for remote rooms as no drain piping is needed
- › Allows integration of server rooms into the heat recovery solution thanks to technical cooling function
- › Connect up to 250 class unit (28kW)
- › Faster installation thanks to open connection
- › Allows multi tenant applications
- › Connectable to REYQ-T, RQCEQ-P3 and RWEYQ-T8 VRV IV heat recovery units

## Multi branch selector for VRV IV heat recovery

- › Unique range of single and multi BS boxes for flexible and fast design
- › Major reduction in installation time thanks to wide range, compact size and light weight multi BS boxes
- › Up to 70% smaller and 66% lighter than previous series
- › Faster installation thanks to a reduced number of brazing points and wiring
- › All indoor units connectable to one BS box
- › Less inspection ports needed compared to installing single BS boxes
- › Up to 16kW capacity available per port
- › Connect up to 250 class unit (28kW) by combining 2 ports
- › No limit on unused ports allowing phased installation
- › Faster installation thanks to open connection
- › Connectable to REYQ-T, RQCEQ-P3 and RWEYQ-T8 VRV IV heat recovery units

<sup>1</sup> Decoration panel BYCQ140DG or BYCQ140DGF + BRC1E52A/B needed

<sup>2</sup> To connect stylish indoor units a BPMKS unit is needed

<sup>3</sup> For RXYS(C)Q units a mix of RA indoor units and VRV indoor units is not allowed.

## Hydrobox range

Type	Product name	Model	Capacity class (kW)			
			80	125	Leaving water temperature range	
Low temperature hydrobox	HXY-A8		For high efficiency space heating and cooling Ideal for hot or cold water in underfloor, air handling units, low temperature radiators ... Hot/cold water from 5° to 45°C Large operation range (down to -20°C and up to 43°C) Fully integrated water-side components save time on system design Space saving contemporary wall hung design	●	●	5 °C - 45 °C
High temperature hydrobox	HXHD-A8		For efficient hot water production and space heating Ideal for hot water in bathrooms, sinks and for underfloor heating, radiators, air handling units, ... Hot water from 25 to 80°C "Free" heating and hot water through heat recovery Uses heat pump technology to produce hot water efficiently, providing up to 17% savings compared to a gas boiler Possibility to connect thermal solar collectors		●	25 °C - 80 °C

VRV

# Benefits overview

We care	 Inverter technology	In combination with inverter controlled outdoor units
	 Home leave operation	During absence, indoor comfort levels can be maintained
	 Fan only	The air conditioner can be used as fan, blowing air without cooling or heating
	 Auto cleaning filter	The filter automatically cleans itself once a day. Simplicity of upkeep means optimum energy efficiency and maximum comfort without the need for expensive or time-consuming maintenance
	 Floor and presence sensor	The presence sensor directs the air away from any person detected in the room. The floor sensor detects the average floor temperature and ensures an even temperature distribution between ceiling and floor
Comfort	 Draught prevention	When starting to warm up or when the thermostat is off, the air discharge direction is set horizontally and the fan to low speed, to prevent draught. After warming up, air discharge and fan speed are set as desired
	 Whisper quiet	Daikin indoor units are whisper quiet. Also the outdoor units are guaranteed not to disturb the quiet of the neighbourhood
	 Auto cooling-heating changeover	Automatically selects cooling or heating mode to achieve the set temperature
Air treatment	 Air filter	Removes airborne dust particles to ensure a steady supply of clean air
Humidity control	 Dry programme	Allows humidity levels to be reduced without variations in room temperature
Air flow	 Ceiling soiling prevention	The air discharge of the indoor unit is specially designed to prevent air being blown against the ceiling to prevent ceiling stains
	 Vertical auto swing	Possibility to select automatic vertical moving of the air discharge louvre, for uniform air flow and temperature distribution
	 Fan speed steps	Multiple fan speeds to select,to optimize comfort levels
	 Individual flap control	Individual flap control via the wired remote controller makes it simple to fix the position of each flap individually, to suit any new room configuration. Optional closure kits are available as well
Remote control & timer	 Weekly timer	Timer can be set to start and stop operation anytime on a daily or weekly basis
	 Infrared remote control	Infrared remote control with LCD to remotely control your indoor unit
	 Wired remote control	Wired remote control to remotely control your indoor unit
	 Centralised control	Centralised control to to control several indoor units from one single point
Other functions	 Auto-restart	The unit restarts automatically at the original settings after power failure
	 Self-diagnosis	Simplifies maintenance by indicating system faults or operating anomalies
	 Drain pump kit	Facilitates condensation draining from the indoor unit
	 Multi tenant	The indoor unit's main power supply can be turned off when leaving the building or for servicing purposes

# Round flow cassette

### Why choose a round flow cassette?

- 360° air discharge for optimum efficiency and comfort in shops, offices and restaurants.
- Unique auto-cleaning panel.

#### Unique functions which help save costs

› Daikin was the first company to launch a cassette using the round flow principle with sensors\* and a unique auto-cleaning panel\*.

##### ... More energy efficient than any other

› The auto-cleaning panel\* means:

- Running costs are reduced by 50% compared with standard solutions thanks to automatic daily filter cleaning.
- Less time is required to maintain the filter: dust can be removed easily with a vacuum cleaner without opening the unit.
- For fine dust applications (i.e. clothing shops) a finer mesh filter (BYCQ140DGF) ensures consistent, optimum performance.
- Round flow cassette - overview decoration panels

BYCQ140DG	BYCQ140DGF	BYCQ140DW	BYCQ140D
Auto-cleaning panel	auto-cleaning panel with fine mesh filter	White panel	Standard panel
White with grey louvers	White with grey louvers	Full white	White with grey louvers

› Thanks to presence and floor sensors\*, the unit changes its setpoint or switches off completely, if there are no people in the room, resulting in energy savings of up to 27%.

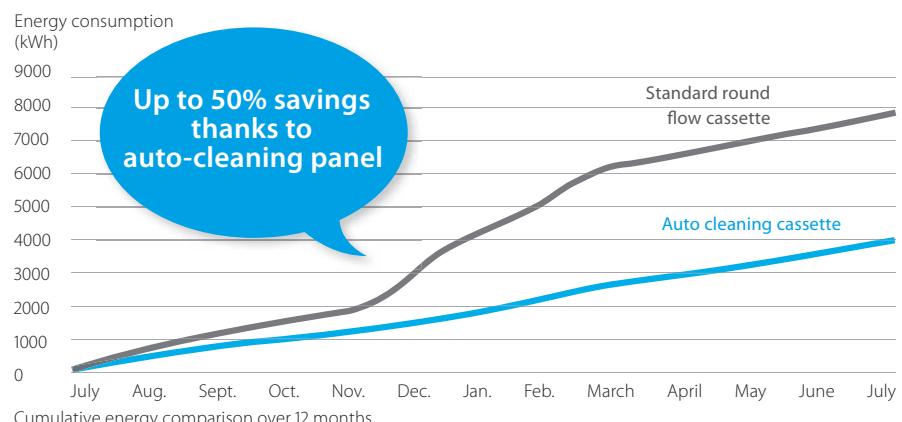

Dust can be removed easily with a vacuum cleaner without opening the unit.

### References

#### Wolverhampton, UK

Running costs were reduced by up to 50% compared with standard solutions thanks to daily filter cleaning.

### ... And improved comfort

› 360° air flow discharge pattern.

› The presence sensor\* directs the air away from anyone it detects in the room.

› The floor sensor\* detects the average floor temperature and ensures an even temperature distribution between the ceiling and the floor.

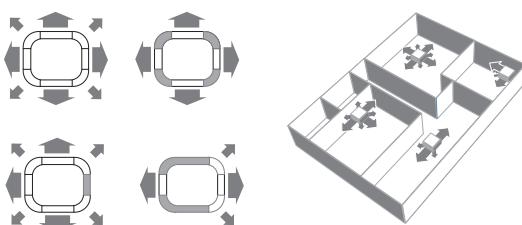

\* available as an option

### Flexible installation

› Flaps can be individually controlled or closed using the wired remote control, to suit room configuration.

Optional closure kits are also available.

### Benefits for the installer

› Product with unique functions in this market.

› Less time needed for onsite maintenance.

› Use the controller to individually open or close any of the four flaps to easily adapt to a changing room layout.

› Easy set-up of the sensor option to improve comfort and save energy.

### Benefits for the consultant

› Product with unique functions in this market.

› Designed for use in all types and sizes of commercial offices and retail environments.

› Ideal product for improving BREEAM score/EPBD in combination with Sky Air Seasonal Smart or VRV IV heat pump units.

### Benefits for the end user

› Designed for use in all types and sizes of commercial offices and retail environments.

› Perfect environment conditions: no more draughts or cold feet.

› Save up to 50% on running costs with the auto-cleaning panel, which also facilitates maintenance.

› Your customers can save up to 27% on their energy bills thanks to the sensor option!

› Flexible use of space thanks to individual flap control.

AUTO CLEANING PANEL WITH FINE  
MESH FILTER, IDEAL FOR CLOTHING  
SHOPS

# Round flow cassette

360° air discharge for optimum efficiency and comfort

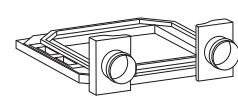

- > 360° air discharge ensures uniform air flow and temperature distribution
- > Daily automatic filter cleaning results in higher efficiency & comfort and lower maintenance costs. Dust can easily be removed with a vacuum cleaner without opening the unit
- > Two optional intelligent sensors improve energy efficiency and comfort.
- > Individual flap control: flexibility to suit every room layout without changing the location of the unit.
- > Modern style decoration panel is available in 3 different variations: white (RAL9010) with grey louvers, full white (RAL9010) or auto cleaning panel
- > Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required

Fresh air intake opening in casing

Optional fresh air intake kit

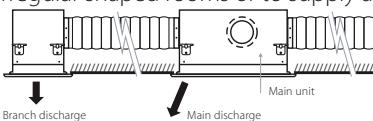

\* Brings in up to 10% of fresh air into the room

- \* Allows larger quantities of fresh air to be brought in
- \* Distributes fresh air so it is most effectively pre-cooled / pre-heated

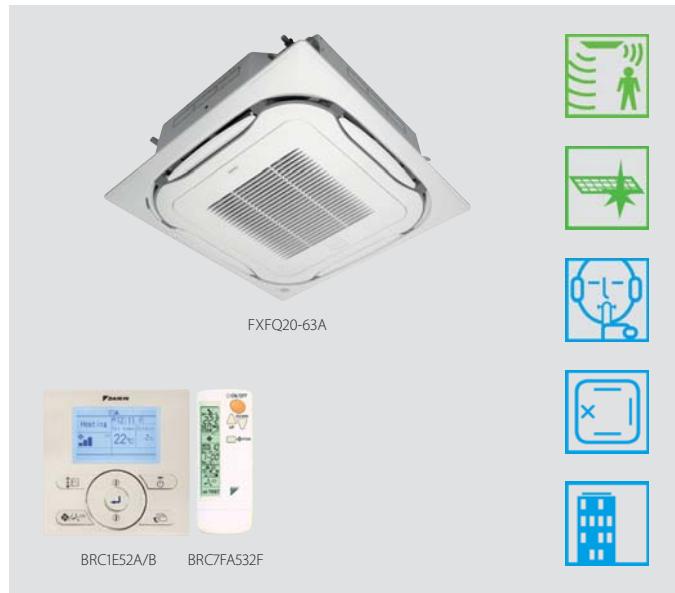

- > Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms

The BYCQ140D7WIW has white insulations. Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140D7WIW decoration panel in environments exposed to concentrations of dirt. | BYCQ140D7WI: pure white standard panel with grey louvers; BYCQ140D7WIW: pure white standard panel with white louvers; BYCQ140D7GFW1: pure white auto cleaning panel.

- > Lowest installation height in the market: 214mm for class 20-63
- > Standard drain pump with 675mm lift increases flexibility and installation speed

**FFQ-C / FXZQ-A**

# Fully Flat Cassette

Design & Genius in one

## Why choose fully flat cassette

- Unique design in the market that integrates fully flat into the ceiling
- Advanced technology and top efficiency combined
- Most quiet cassette available on the market

[www.youtube.com/  
DaikinEurope](http://www.youtube.com/DaikinEurope)

## Marketing tools

- › Visit the website: [www.daikineurope.com/fullyflat](http://www.daikineurope.com/fullyflat)

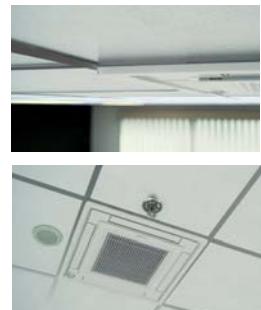

## Benefits for the installer

- › Unique product in the market!
- › Most quiet unit (25dBA)
- › The user-friendly remote control, available in several languages, enables the easy set-up of sensor option and control of the individual flap position
- › Meeting European design taste.

### Unique design

- › Designed by a European design office to fully meet the European taste.
- › Fully flat into the ceiling, leaving only 8mm.
- › Fully integrated in the one ceiling tile, enabling lights, speakers and sprinklers to be installed in adjoining ceiling tiles.
- › Decoration panel available in 2 colours (white and white-silver).

## Benefits for the consultant

- › Unique product in the market!
- › Blends seamlessly in any modern office interior design
- › Ideal product to improve BREEAM score/EPBD in combination with Sky Air Seasonal Smart (FFQ-C) or VRV IV heat pump units (FXZQ-A).

### Differentiating in technology

#### Optional presence sensor

- › When the room is empty, it can adjust the set temperature or switch off the unit – saving energy.
- › When people are detected, the direction of the airflow is adapted to avoid cold draughts being directed towards occupants.

#### Optional floor sensor

- › Detects the temperature difference and re-directs the airflow to ensure even temperature distribution.

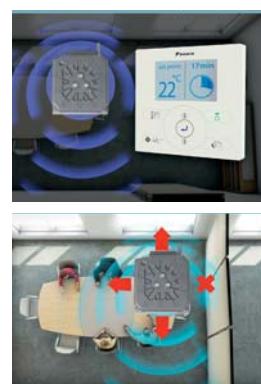

## Benefits for the end user

- › Engineering excellence and unique design in one
- › Most quiet unit (25dBA)
- › Perfect working conditions: no more cold draughts
- › Save up to 27% on your energy bill thanks to the optional sensors
- › Flexible usage of space and suits any room configuration thanks to individual flap control
- › User-friendly remote control, available in several languages.

### Top efficiency

- › Seasonal labels up to **A++\***
- › When the room is empty, the sensor option can adjust the set temperature or switch off the unit – saving up to 27% energy.
- › Individual flap control: easily control one or more flaps via the wired remote controller (BRC1E52) when rearranging the room. When fully closing or blocking the flaps, the option "Sealing member of air discharge outlet" is needed.

\* for FFQ25,35C in combination with RXS25,35L

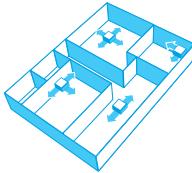

### Most quiet unit in the market

- › Most silent cassette in the market (25dBA), important for office applications.

## Fully flat cassette

Unique design in the market that integrates fully flat into the ceiling

- > Fully flat integration in standard architectural ceiling tiles, leaving only 8mm
- > Remarkable blend of iconic design and engineering excellence with an elegant finish in white or a combination of silver and white
- > Two optional intelligent sensors improve energy efficiency and comfort.
- > 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- > Individual flap control: flexibility to suit every room layout without changing the location of the unit!

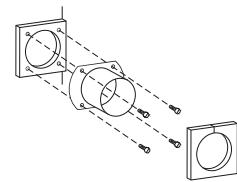

- > Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required

Fresh air intake opening in casing

\* Brings in up to 10% of fresh air into the room

Optional fresh air intake kit

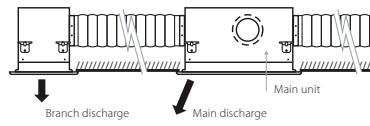

\* Allows larger quantities of fresh air to be brought in

(1) Dimensions do not include control box (2) Contains fluorinated greenhouse gases

- > Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms

- > Standard drain pump with 630mm lift increases flexibility and installation speed

## 2-way blow ceiling mounted cassette

**Thin, lightweight design installs easily in narrow corridors**

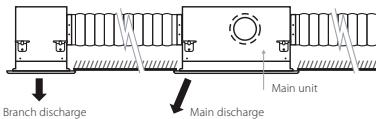

- › Depth of all units is 620mm, ideal for narrow spaces
- › Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- › Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- › Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible
- › Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

Fresh air intake opening in casing

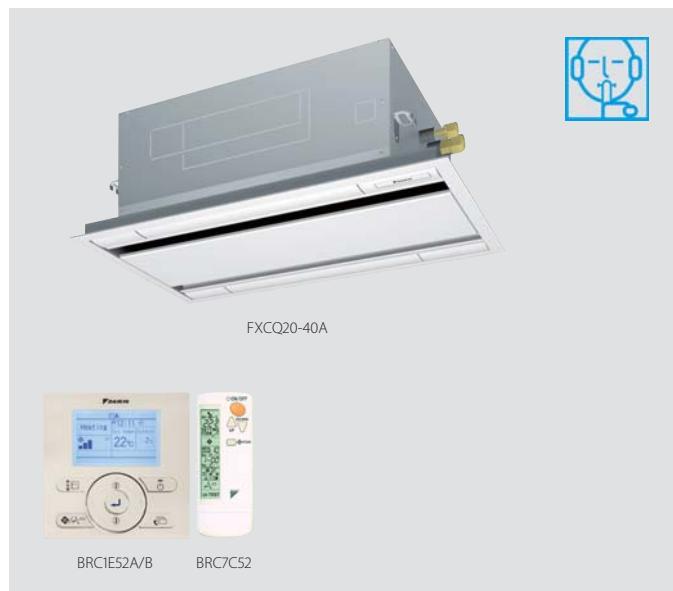

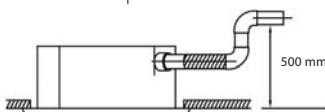

\* Brings in up to 10% of fresh air into the room

- › Optimum comfort guaranteed with automatic air flow adjustment to the required load
- › Maintenance operations can be performed by removing the front panel
- › Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms

- › Standard drain pump with 580mm lift increases flexibility and installation speed

# Ceiling mounted corner cassette

## 1-way blow unit for corner installation

- › Compact dimensions, can easily be mounted in a narrow ceiling void (only 220mm ceiling space required, 195 with panel spacer, available as accessory)
- › Optimum air flow conditions are created by either downward air discharge or frontal air discharge (via optional grille) or a combination of both

Downward discharge

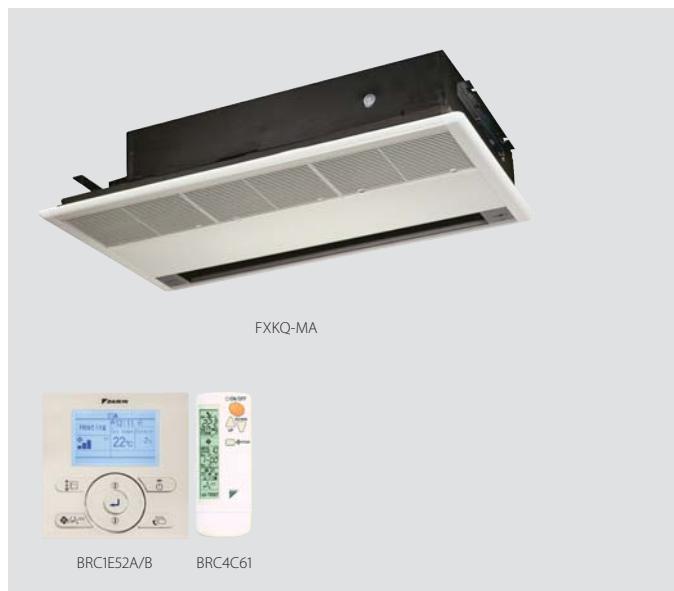

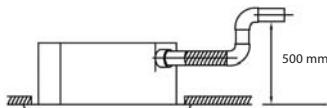

Frontal discharge

Combination

- › Maintenance operations can be performed by removing the front panel
- › Standard drain pump with 330mm lift increases flexibility and installation speed

## Small concealed ceiling unit

Designed for hotel applications

- > Compact unit (230mm high & 502mm deep), can easily be mounted in narrow ceiling voids
- > Discretely concealed in the ceiling: only the suction and discharge grilles are visible
- > Flexible installation, as the air suction direction can be altered from rear to bottom suction

- > For easy mounting, the drain pan can be located to the left or right of the unit

# Slim concealed ceiling unit

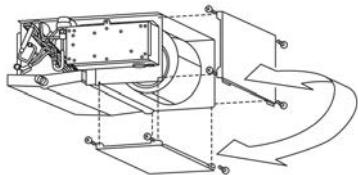

## Slim design for flexible installation

- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

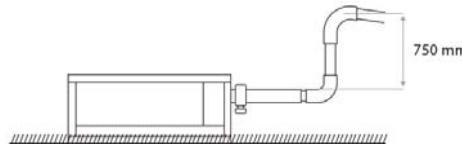

SERIE A (15, 20, 25, 32)

- Medium external static pressure up to 44Pa facilitates unit use with flexible ducts of varying lengths
- Discreetly concealed in the ceiling: only the suction and discharge grilles are visible
- 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- Reduced energy consumption thanks to specially developed DC fan motor
- Flexible installation, as the air suction direction can be altered from rear to bottom suction

- Standard drain pump with 750mm lift increases flexibility and installation speed

## Concealed ceiling unit with medium ESP

**Slimmest yet most powerful medium static pressure unit on the market**

- > Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge

- > Whisper quiet operation: down to 25dBA sound pressure level
- > Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths
- > Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- > Discretely concealed in the wall: only the suction and discharge grilles are visible
- > 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- > Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- > Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation is required

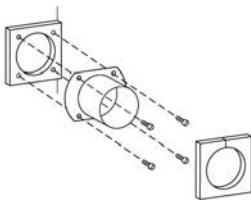

Fresh air intake opening in casing

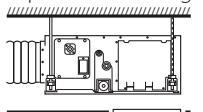

\* Brings in up to 10% of fresh air into the room

Optional fresh air intake kit

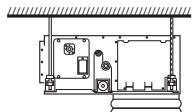

\* Allows larger quantities of fresh air to be brought in

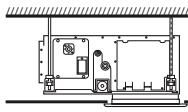

- > Flexible installation: air suction direction can be altered from rear to bottom suction and choice between free use or connection to optional suction grilles

For free use into a false ceiling

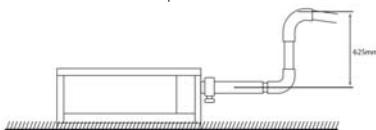

For connecting onto a suction canvas  
(not supplied by Daikin)

For direct connection to Daikin panel (via EKBYBSD kit)

- > Standard built-in drain pump with 625mm lift increases flexibility and installation speed

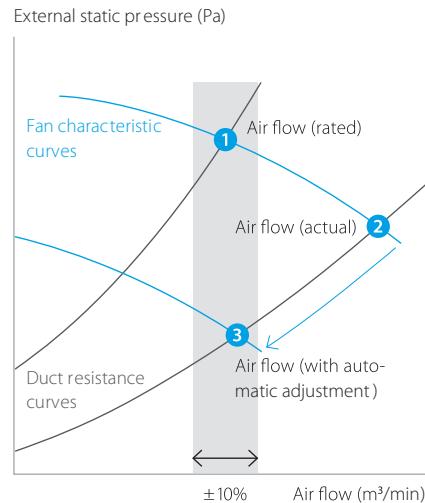

## Automatic Airflow Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within ±10%

### Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance → the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature

Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically(10 or more fan curves are available on every model), making installation much faster

	Simplified wired remote control for hotel applications						BRC2E52C (heat recovery type) / BRC3E52C (heat pump type)						

## Concealed ceiling unit with high ESP

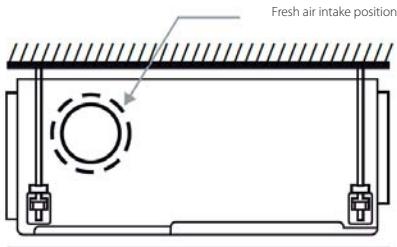

Ideal for large sized spaces

FXMQ-P7: ESP up to 200 Pa

- › Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- › High external static pressure up to 200Pa facilitates extensive duct and grille network
- › Discretely concealed in the wall: only the suction and discharge grilles are visible
- › Reduced energy consumption thanks to specially developed DC fan motor
- › Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

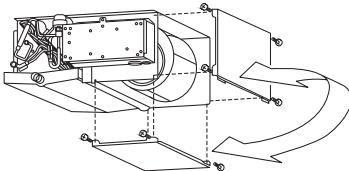

Fresh air intake opening in casing

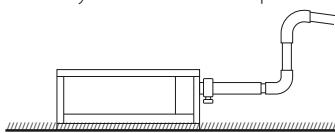

\* Brings in up to 10% of fresh air into the room

- › Flexible installation, as the air suction direction can be altered from rear to bottom suction

- › Standard built-in drain pump with 625mm lift increases increases flexibility and installation speed

FXMQ-MB: ESP up to 270

- › High external static pressure up to 270Pa facilitates extensive duct and grille network
- › Discretely concealed in the wall: only the suction and discharge grilles are visible
- › Large capacity unit: up to 31.5 kW heating capacity
- › Reduced energy consumption thanks to specially developed DC fan motor

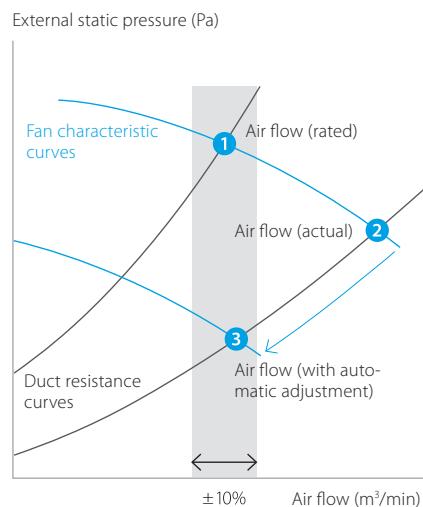

## Automatic Airflow Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within ±10%

### Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance → the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature

Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically(10 or more fan curves are available on every model), making installation much faster

# Concealed ceiling unit with high efficiency

For the highest energy efficiency

- Automatic air flow adjustment function measures the air volume and static pressure and adjusts it towards the nominal air flow, whatever the length of duct, making installation easier and guaranteeing comfort. Moreover, the ESP can be changed via the wired remote control to optimize the supply air volume (for 50 and 63 class)
- Narrow ceilings voids are no longer a challenge, 50 & 60 class units can swiftly be integrated as they only are 245mm in height.
- High external static pressure up to 270Pa facilitates using flexible ducts of varying lengths
- Discretely concealed in the ceiling: only the suction and discharge grilles are visible

## Wall mounted unit

For rooms with no false ceilings nor free floor space

- › Flat, stylish front panel blends easily within any interior décor and is easier to clean
- › Can easily be installed in both new and refurbishment projects
- › 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- › Reduced energy consumption thanks to specially developed DC fan motor
- › The air is comfortably spread up- and downwards thanks to 5 different discharge angles that can be programmed via the remote control
- › Maintenance operations can be performed easily from the front of the unit

## Ceiling suspended unit

For wide rooms with no false ceilings nor free floor space

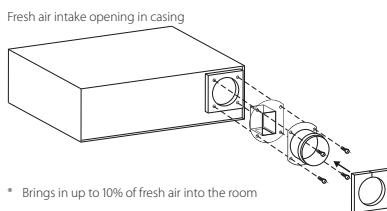

- > Ideal for comfortable air flow in wide rooms thanks to Coanda effect: up to 100° discharge angle

- > Even rooms with ceilings up to 3.8m can be heated up or cooled down very easily without capacity loss
- > Can easily be installed in both new and refurbishment projects
- > Can easily be mounted in corners and narrow spaces, as it only needs 30mm lateral service space

- > Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

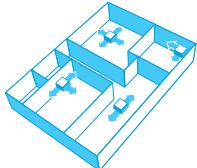

- > Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- > Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible

## 4-way blow ceiling suspended unit

Unique Daikin unit for high rooms with no false ceilings nor free floor space

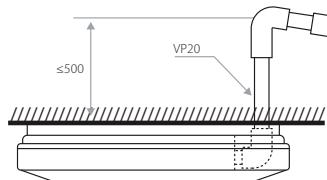

- > Even rooms with ceilings up to 3.5m can be heated up or cooled down very easily without capacity loss
- > Can easily be installed in both new and refurbishment projects
- > Individual flap control: flexibility to suit every room layout without changing the location of the unit!

- > Reduced energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating and there are no air intake grilles visible
- > Optimum comfort guaranteed with automatic air flow adjustment to the required load
- > 5 different discharge angles between 0 and 60°can be programmed via the remote control

- > Standard drain pump with 500mm lift increases flexibility and installation speed

## Concealed floor standing unit

Designed to be concealed in walls

- Discretely concealed in the wall: only the suction and discharge grilles are visible
- Requires very little installation space as the depth is only 200mm

- Its low height (620 mm) enables the unit to fit perfectly beneath a window
- High ESP allows flexible installation

## Floor standing unit

For perimeter zone air conditioning

- Unit can be installed as free standing model by use of optional back plate
- Its low height enables the unit to fit perfectly beneath a window
- Stylish modern casing finished in pure white (RAL9010) and iron grey (RAL7011) blends easily with any interior
- Requires very little installation space

- Wall mounted installation facilitates cleaning beneath the unit where dust tends to accumulate

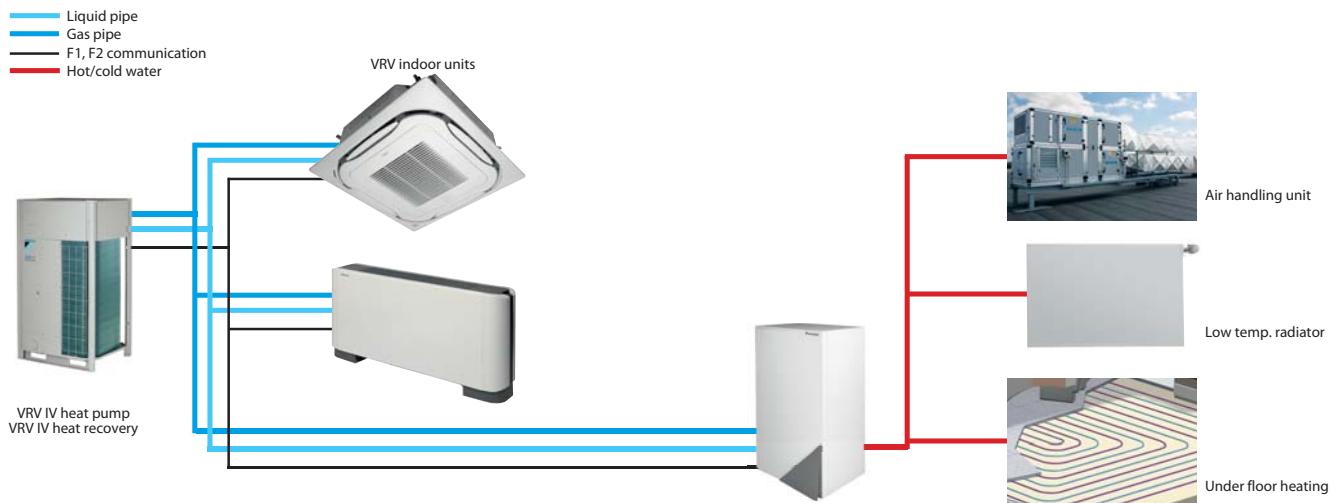

- Wired remote control can easily be integrated in the unit

# Low temperature hydrobox for VRV

For high efficiency space heating and cooling

- › Air to water connection to VRV for applications such as underfloor, air handling units, low temperature radiators, ...
- › Leaving water temperature range from 5°C to 45°C without electric heater
- › Super wide operating range for hot/cold water production from -20 to +43°C ambient outdoor temperature
- › Saves time on system design as all water-side components are fully integrated with direct control over leaving water temperature
- › Space saving contemporary wall hung design
- › No gas connection or oil tank needed
- › Connectable to VRV IV heat pump and heat recovery

Indoor unit		HXY	080A8	125A8

# High temperature hydrobox for VRV

For efficient hot water production and space heating

- › Air to water connection to VRV for applications such as bathrooms, sinks, underfloor heating, radiators and air handling units
- › Leaving water temperature range from 25 to 80°C without electric heater
- › „Free“ heating and hot water production provided by transferring heat from areas requiring cooling to areas requiring heating or hot water
- › Uses heat pump technology to produce hot water efficiently, providing up to 17% savings compared to a gas boiler
- › Possibility to connect thermal solar collectors to the domestic hot water tank
- › Super wide operating range for hot water production from -20 to +43°C ambient outdoor temperature
- › Saves time on system design as all water-side components are fully integrated with direct control over leaving water temperature
- › Various control possibilities with weather dependant set point or thermostat control
- › The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- › No gas connection or oil tank needed
- › Connectable to VRV IV heat recovery

## Domestic hot water tank

### Stackable stainless steel domestic hot water tank

- › The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- › Available in 200 and 260 liters
- › Heat loss is reduced to a minimum thanks to the high quality insulation
- › At necessary intervals, the indoor unit can heat up the water to 60°C to prevent the risk of bacteria growth
- › Efficient temperature heat-up: from 10°C to 50°C in only 60 minutes

### EKHWP-B/PB

## Domestic hot water tank

### Plastic domestic hot water tank with solar support

- › Available in 300 and 500 liters
- › Large hot water storage tank to provide domestic hot water at any time
- › Heat loss is reduced to a minimum thanks to the high quality insulation
- › Space heating support possible (500l tank only)
- › Tank designed for connection with pressured thermal solar system

		Average specific thermal output	W/K	-	280	-

## Pump station

- Save energy and reduce CO<sub>2</sub> emissions with a solar system for domestic hot water production
- Pump station connectable to unpressurised solar system
- Pump station and control provide the transfer of solar heat to the domestic hot water tank

EKSRPS4

Pump station for pressureless tank			
Dimensions	Unit	HeightxWidthxDepth	mm

## Solar collector

### Thermal solar collector for hot water production

- Solar collectors can produce up to 70% of the energy needed for hot water production - a major cost saving
- Vertical and horizontal solar collectors for domestic hot water production
- High efficiency collectors transfer all the short-wave solar radiation into heat as a result of their highly selective coating
- Easy to install on roof tiles

## Options & accessories - VRV outdoor

	VRV IV Heat Recovery				
	REYQ 8~12T	REYQ 14~20T	REM05T	2-module systems	3-module systems
<b>Multi-module connection kit (obligatory)</b> - Connects multiple modules into a single refrigerant system	-	-	-	BHFQ23P907	BHFQ23P1357
<b>Extended level difference kit</b> - Allows outdoor unit to be more than 50m above indoor units				Special order unit	
<b>Central drain pan kit</b> - Installs onto the underside of the outdoor unit and collects drain water from all bottom plate outlets into a single outlet. In cold areas should be heated by a field-supplied heater to prevent drain water from freezing in the drain pan.	-	-	-	-	-
<b>Heater tape kit</b> - Optional electrical heater to guarantee trouble-free operation in extremely cold and humid climates (one per outdoor unit needed)	EKBPH012T + EKBHPCBT	EKBPH020T + EKBHPCBT	EKBPH012T + EKBHPCBT	-	-
<b>External control adapter for outdoor unit</b> - Allows to activate Low Noise Operation and three levels of demand control, limiting power consumption via external dry contacts. Connects to the F1/F2 communication line and requires power supply from an indoor unit*, BSVQ box, or VRV-WIII outdoor unit.			DTA104A53/61/62 For installation into an indoor unit: exact adapter type depends on type of indoor unit. See Options & Accessories of indoor units		
<b>BHGP26A1</b> Digital pressure gauge kit – displays current condensing and evaporating pressures in the system as Standard, or expansion valve positions and temperature sensor data in a special service mode. Connect to the outdoor unit PCB, for installation in the outdoor unit.	●	●	●	1 kit per system	1 kit per system
<b>KRC19-26A</b> Mechanical cool/heat selector – allows to switch an entire Heat Pump system, or one BS-box of a Heat Recovery system between cooling, heating and fan only. Connects to the A-B-C terminals of the outdoor unit / BS-box.	-	-	-	-	-
<b>EBRP2B</b> - Cool/heat selector PCB	-	-	-	-	-
<b>BRP2A81</b> Cool/heat selector PCB (required to connect KRC19-26A to VRV IV outdoor)	-	-	-	-	-
<b>KKSA26A560*</b> Cool/heat selector PCB mounting plate (only required when cool/heat selector PCB and Heater tape kit are combined)	-	-	-	-	-

\*2 Installation box is necessary for these adapters

\*3 The BYCQ140D7W1 has white insulation

Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140D7W1 decoration panel in environments exposed to concentrations of dirt"

\*4 Not recommended because of the limitation of the functions

\*5 To be able to control the BYCQ140D7W1 the controller BRC1E is needed

\*6 The BYCQ140DGF1 is not compatible with Multi and Split Non-Inverter Outdoor units

\*7 Option not available in combination with BYCQ140D7W1

\*8 Both parts of the fresh air intake are needed for each unit

\*9 Sensing function not available

\*10 Independently controllable flaps function not available

\*11 Only possible in combination with simplified remote control BRC2/3E

\*2Installation box is necessary for these adapters

\*3The BYCQ140D7WIW has white insulation

Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140D7WIW decoration panel in environments exposed to concentrations of dirt

\*4Not recommended because of the limitation of the functions

\*5To be able to control the BYCQ140D7GW1 the controller BRC1E is needed

\*6The BYCQ140DGW1 is not compatible with Mini VRV, Multi and Split Non-Inverter Outdoor units

\*7Option not available in combination with BYCQ140D7GW1

\*8Both parts of the fresh air intake are needed for each unit

\*9Sensing function not available

\*10 Independently controllable flaps function not available

\*11 Only possible in combination with simplified remote control BRC2/3E

Daikin offers the widest range in DX ventilation in the market.

With a variety of ventilation solutions from small heat recovery ventilation to large scale air handling units we help provide a fresh, healthy and comfortable environment in offices, hotels, stores and other commercial environments.

# Heat reclaim ventilation

## Ventilation with heat recovery as standard

- › Energy saving ventilation using indoor heating, cooling and moisture recovery
- › Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- › Free cooling possible when outdoor temperature is below indoor temperature (eg. during nighttime)
- › Reduced energy consumption thanks to specially developed DC fan motor
- › Prevent energy losses from over-ventilation while maintaining indoor air quality with optional CO<sub>2</sub> sensor
- › Can be used as stand alone unit or integrated in the VRV system
- › Wide range of units: air flow rate from 150 up to 2,000 m<sup>3</sup>/h
- › High efficiency filters available in M6, F7, F8 grades
- › Shorter installation time thanks to easy adjustment of nominal air flow rate, so less need for dampers compared with traditional installation.
- › Specially developed heat exchange element with High Efficiency Paper (HEP)
- › No drain piping needed
- › Can operate in over- and under pressure
- › Total solution for fresh air with Daikin supply of both VAM and electrical heaters

## Electrical heater for VAM

### VH

- › Total solution for fresh air with Daikin supply of both VAM and electrical heaters
- › Increased comfort in low outdoor temperature thanks to the heated outdoor air
- › Integrated electrical heater concept (no additional accessories required)
- › Standard dual flow and temperature sensor
- › Flexible setting with adjustable setpoint
- › Increased safety with 2 cut-outs: manual & automatic
- › BMS integration thanks to:
  - Volt free relay for error indication
  - 0-10VDC input for setpoint control

ELECTRICAL HEATER FOR VAM		VH	(VH)					
Supply voltage			220/250V ac 50/60 Hz. +/-10%					
Output current (maximum)			19A at 40°C (ambient)					
Temperature sensor			5k ohms at 25°C (table 502 1T)					
Temperature control range			0 to 40°C / (0-10V 0-100%)					
Control fuse			20 x 5mm 250mA					
LED indicators			Power ON - Yellow Heater ON - Red (solid or flashing, indicating pulsed control) Airflow fault - Red					
Mounting holes			98mm x 181mm centres 5 mm ø holes					
Maximum ambient adjacent to terminal box			35°C (during operation)					
Auto high temp. cutout			100°C Pre-set					
Man. reset high temp. cutout			125°C Pre-set					
Run relay			1A 120V AC or 1A 24V DC					
BMS setpoint input			0-10VDC

# Heat reclaim ventilation and air processing

Pre heating or cooling of fresh air for lower load on the air conditioning system

- › Energy saving ventilation using indoor heating, cooling and moisture recovery
- › Creates a high quality indoor environment by pre conditioning incoming fresh air
- › Humidification of the incoming air results in comfortable indoor humidity level, even during heating
- › Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- › Free cooling possible when outdoor temperature is below indoor temperature (eg. during nighttime)
- › Low energy consumption thanks to DC fan motor
- › Prevent energy losses from over-ventilation while maintaining indoor air quality with optional CO<sub>2</sub> sensor

## Operation example: humidification & air processing (heating mode)<sup>1</sup>

# Air handling unit applications

## Wide range of air flows

For applications that require big volumes of treated fresh air (large atriums, banquet halls, etc) air handling units represent the ideal solution. Daikin's wide range of air handling units treat air volumes from 500 m<sup>3</sup>/h up to 144,000 m<sup>3</sup>/h.

The air handling unit can be designed to deliver whatever air flow you require, via the specific dimensions of flow section available at the installation.

### Professional

- › Pre-configured sizes
- › Tailored to the individual customer
- › Modular construction

### Energy

- › High-end solution for optimised energy consumption
- › High efficiency components
- › Strong Return on Investment

### Modular

- › Plug & play, with factory mounted controls
- › Pre-configured sizes
- › EC Fan Technology
- › High Efficiency Heat Wheel
- › Compact Design

## Selection software

ASTRA is the powerful software that Daikin has developed to offer a quick and comprehensive service for the customer in order to make the technical choice and the economic valorization of each AHU. It is a complete tool that can configure any type of product and respond exactly to the strictest design needs. The result is a comprehensive economic offer including all the technical data and drawings, the psychrometric diagram with the relative air treatment and the fans' performance curves. The ASTRA software features a specific DX heat pump coil section able to calculate cooling and heating performances with the automatic selection of the appropriate Daikin expansion valve. The complementary Xpress software allows the correct ERQ or VRV outdoor unit to be selected.

## Dainkin fresh air package - plug & play

The D-AHU Modular series provide a complete solution including unit control (EKEXV, EKEQ, DDC controller) factory mounted and configured, plug & play with our VRV and ERQ condensing units. The easiest solution as you save time and only have one point of contact!

## Return on investment

The air handling unit (AHU) is critical to an effective climate control system and the savings generated by our advanced designs and operating efficiencies guarantee a rapid return on the investment made. Our AHU Energy series has been designed to deliver exceptional performance thus driving down the energy consumed and so lowering energy bills. Taken over the expected 15-year life-span of the equipment, this will result in a substantial saving, especially in a time of ever increasing energy prices.

### Pre-defined sizes

27 fixed sizes are available, optimised to reach the optimum combination between value for money and manufacturing standardisation. Daikin's section by section design means that units can be sized by 1cm increments and assembled on site, without welding, to suit the space constraints of the installation.

### High efficiency components

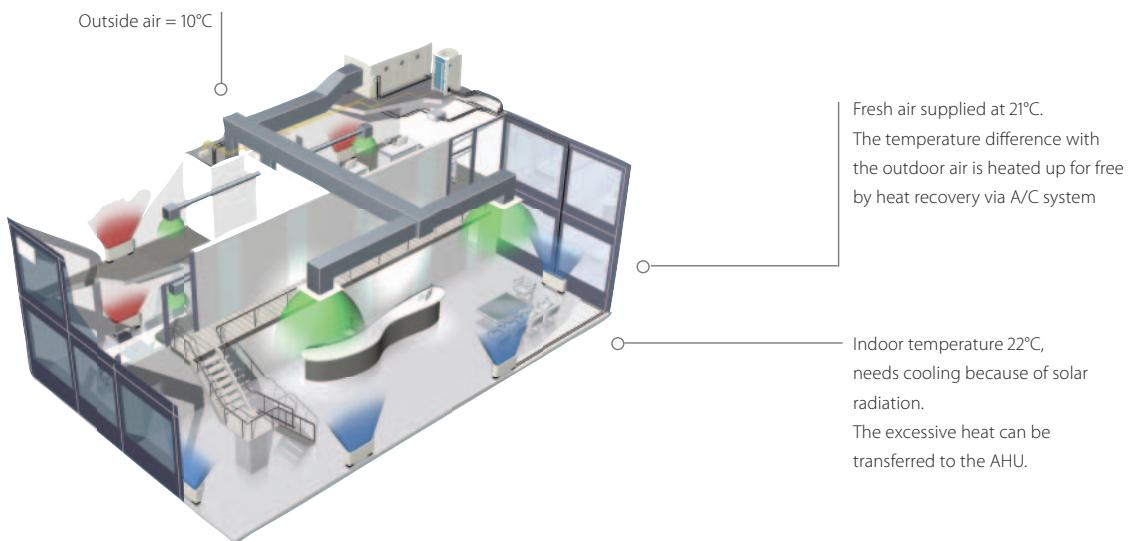

All Daikin air handling units have been designed for optimum energy efficiency. Polyurethane or Mineral wool panels guarantee excellent thermal insulation performance. And the widest range of filters are provided to meet even the most strict demands.

## Why use VRV and ERQ condensing units for connection to air handling units?

### High Efficiency

Daikin heat pumps are renowned for their high energy efficiency. Integrating the AHU with a heat recovery system is even more effective since an office system can frequently be in cooling mode

while the outdoor air is too cold to be brought inside in an unconditioned state. In this case heat from the offices is merely transferred to heat up the cold incoming fresh air.

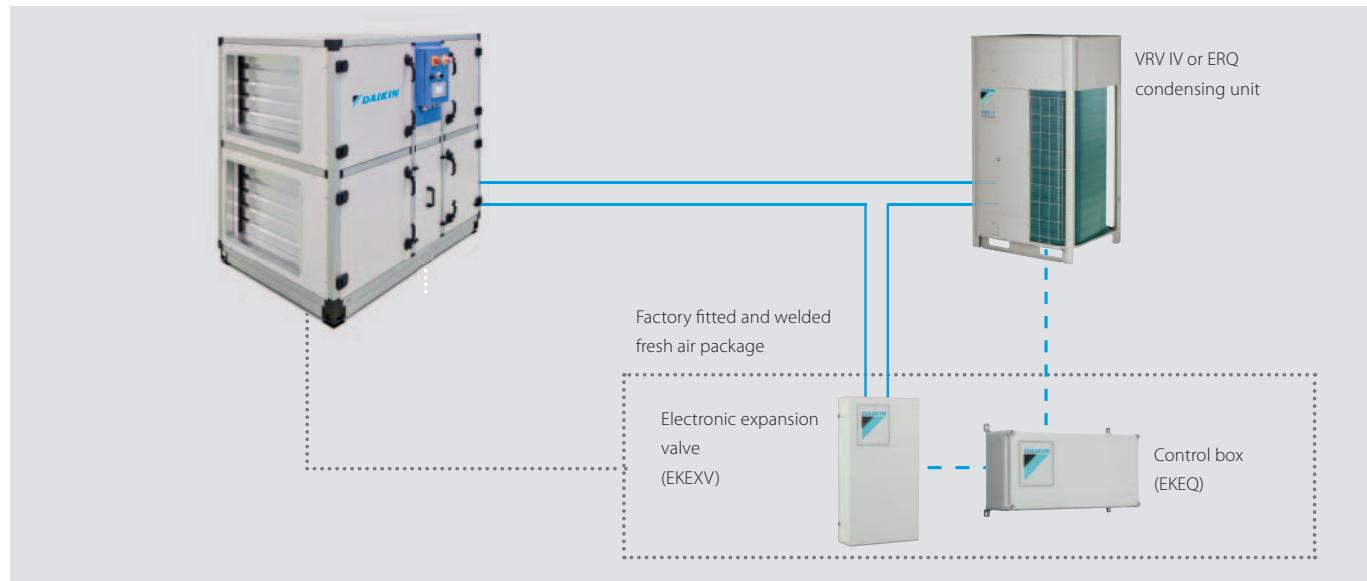

### Fast response to changing loads resulting in high comfort levels

Daikin ERQ and VRV units respond rapidly to fluctuations in supply air temperature, resulting in a steady indoor temperature and resultant high comfort levels for the end user. The ultimate is the VRV range which improves comfort even more by offering continuous heating, also during defrost.

### Easy Design and Installation

The system is easy to design and install since no additional water systems such as boilers, tanks and gas connections etc. are required. This also reduces both the total system investment and running cost.

### Daikin Fresh air package

## In order to maximise installation flexibility, 4 types of control systems are offered

**W control:** Off the shelf control of air temperature (discharge temperature, suction temperature, room temperature) via any DDC controller, easy to setup

**X control:** Precise control of air temperature (discharge temperature, suction temperature, room temperature) requiring a preprogrammed DDC controller (for special applications)

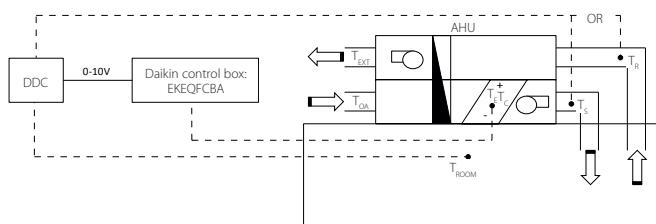

**Z control:** Control of air temperature (suction temperature, room temperature) via Daikin control (no DDC controller needed)

**Y control:** Control of refrigerant ( $T_e/T_c$ ) temperature via Daikin control (no DDC controller needed)

### 1. W control ( $T_s/T_r/T_{room}$ control):

#### Air temperature control via DDC controller

Room temperature is controlled as a function of the air handling unit suction or discharge air (customer selection). The DDC controller is translating the temperature difference between set point and air suction temperature (or air discharge temperature or room temperature) into a proportional 0-10V signal which is transferred to the Daikin control box (EKEQFCBA). This voltage modulates the capacity requirements of the outdoor unit.

### 2. X control ( $T_s/T_r/T_{room}$ control):

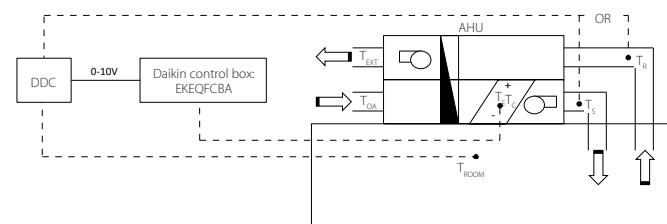

#### Precise air temperature control via DDC controller

Room temperature is controlled as a function of the air handling unit suction or discharge air (customer selection). The DDC controller is translating the temperature difference between set point and air suction temperature (or air discharge temperature or room temperature) into a reference voltage (0-10V) which is transferred to the Daikin control box (EKEQFCBA). This reference voltage will be used as the main input value for the compressor frequency control.

### 2. X control ( $T_s/T_r/T_{room}$ control):

#### Precise air temperature control via DDC controller

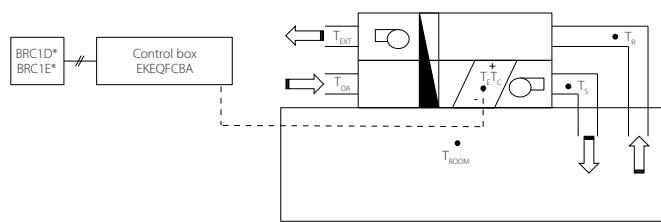

Room temperature is controlled as a function of the air handling unit suction or discharge air (customer selection). The DDC controller is translating the temperature difference between set point and air suction temperature (or air discharge temperature or room temperature) into a reference voltage (0-10V) which is transferred to the Daikin control box (EKEQFCBA). This reference voltage will be used as the main input value for the compressor frequency control.

### 3. Y control ( $T_e/T_c$ control):

#### By fixed evaporating /condensing temperature

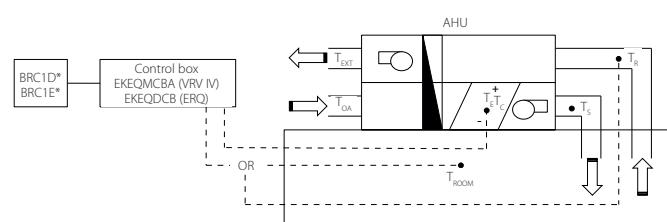

A fixed target evaporating or condensing temperature can be set by the customer. In this case, room temperature is only indirectly controlled. A Daikin wired remote control (BRC1D52 or BRC1E52A/B - optional) have to be connected for initial set-up but not required for operation.

### 4. Z control ( $T_s/T_{room}$ control):

#### Control your AHU just like a VRV indoor unit with 100% fresh air

Allows the possibility to control the AHU just like a VRV indoor unit. Meaning temperature control will be focused on return air temperature from the room into the AHU. Requires BRC1D52 or BRC1E52A/B for operation. The only control that allows the combination of other indoor units to the AHU at the same time.

$T_s$  = Supply air temperature

$T_{ext}$  = Extraction air temperature

$T_r$  = Return air temperature

$T_e$  = Evaporating temperature

$T_{OA}$  = Outdoor air temperature

$T_c$  = Condensing temperature

$T_{room}$  = Room air temperature

	Option kit	Features
Possibility W	EKEQFCBA	Off-the-shelf DDC controller that requires no pre-configuration
Possibility X		Pre-configured DDC controller required
Possibility Y		Using fixed evaporating temperature, no set point can be set using remote control
Possibility Z	EKEQDCB EKFQMCBA*	Using Daikin infrared remote control BRC1D52 or BRC1E52A/B Temperature control using air suction temperature or room temperature (via remote sensor)

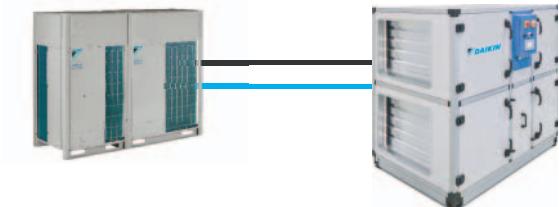

\* EKEQMCB (for 'multi' application)

# VRV - for larger capacities (from 8 to 54HP)

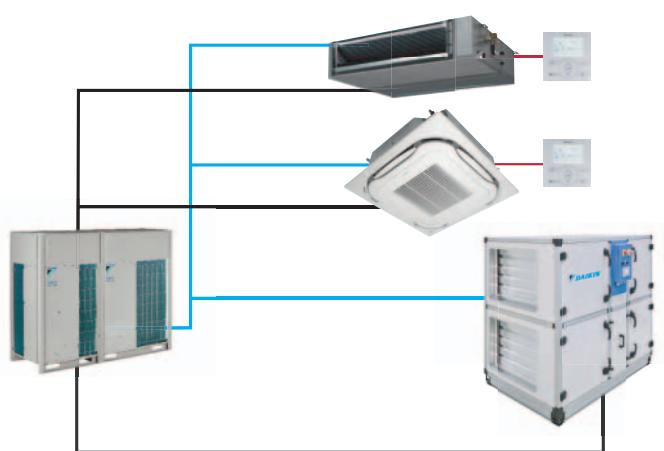

An advanced solution for both pair and multi application

- › Inverter controlled units
- › Heat recovery, heat pump
- › R-410A
- › Control of room temperature via Daikin control
- › Large range of expansion valve kits available
- › BRC1E52A/B is used to set the set point temperature (connected to the EKEQMCBA).
- › Connectable to all VRV heat recovery and heat pump systems

W, X, Y control for VRV IV heat pump

Z control for all VRV outdoor units

— Refrigerant piping  
— F1-F2  
— other communication

## ERQ - for smaller capacities (from 100 to 250 class)

### A basic fresh air solution for pair application

- › Inverter controlled units
- › Heat pump
- › R-410A
- › Wide range of expansion valve kits available
- › Perfect for the Daikin Modular air handling unit

The "Daikin Fresh Air Package" provides a complete Plug & Play Solution including AHU, ERQ or VRV Condensing Unit and all unit control (EKEQ, EKEX, DDC controller) factory mounted and configured. The easiest solution with only one point of contact.

VRV IV H/R VRV IV i-series	-	n1	-	n1	n1	n1	n1	n1	n1	n1	n1	n1	n1	Mandatory

• P (pair application); combination depends on the capacity of the air handling unit

• n1 (multi application) - Combination of AHUs and VRV DX indoors (mandatory). To determine the exact quantity please refer to the engineering data book.

• n2 (multi application) - Combination of AHUs and VRV DX indoors (not mandatory). To determine the exact quantity please refer to the engineering data book.

• Control box EKEQFA can be connected to some types of VRV IV outdoor units (with a maximum of 3 boxes per unit). Do not combine EKEQFA control boxes with VRV DX indoor units, RA indoor units or hydroboxes

## Capacity table

### Cooling

EKEXV Class	Allowed heat exchanger capacity (kW)		
	Minimum	Standard	Maximum
50	5.0	5.6	6.2
63	6.3	7.1	7.8
80	7.9	9.0	9.9
100	10.0	11.2	12.3
125	12.4	14.0	15.4
140	15.5	16.0	17.6
200	17.7	22.4	24.6
250	24.7	28.0	30.8
400	35.4	45.0	49.5
500	49.6	56.0	61.6

Saturated evaporating temperature: 6°C

Air temperature: 27°C DB / 19°C WB

### Heating

EKEXV Class	Allowed heat exchanger capacity (kW)		
	Minimum	Standard	Maximum
50	5.6	6.3	7.0
63	7.1	8.0	8.8
80	8.9	10.0	11.1
100	11.2	12.5	13.8
125	13.9	16.0	17.3
140	17.4	18.0	19.8
200	19.9	25.0	27.7
250	27.8	31.5	34.7
400	39.8	50.0	55.0
500	55.1	63.0	69.3

Saturated condensing temperature: 46°C

Air temperature: 20°C DB

## EKEXV - Expansion valve kit for air handling applications

Ventilation	EKEXV	50	63	80	100	125	140	200	250	400	500
Dimensions	Unit	mm						401x215x78			
Weight	Unit	kg						2.9			
Sound pressure level Nom.		dBA						45			
Operation range	On coil	Heating Min. °CDB						10 (1)			
	temperature	Cooling Max. °CDB						35 (2)			
Refrigerant	Type / GWP							R-410A / 2.0875			
Piping connections	Liquid OD	mm	6.35					9.52		12.7	15.9

(1) The temperature of the air entering the coil in heating mode can be reduced to -5°CDB. Contact your local dealer for more information. (2) 45% Relative humidity.

## EKEQ - Control box for air handling applications

Ventilation	EKEQ	FCBA	DCB	MCBA
Application		See note	Pair	Multi
Outdoor unit		ERQ / VRV	ERQ	VRV
Dimensions	Unit	mm		132x400x200
Weight	Unit	kg	3.9	3.6
Power supply	Phase/Frequency/Voltage	Hz/V		1~50/230

The combination of EKEQFCBA and ERQ is in pair application. The EKEQFCBA can be connected to some type of VRV IV outdoor units with a maximum of 3 control boxes. The combination with DX indoor units, hydroboxes, RA outdoor units, ... is not allowed. Refer to the combination table drawing of the outdoor unit for details.

## Pair application selection

- › the outdoor unit is connected to ONE COIL (with single circuit or maximum 3 interlaced circuits) using up to 3 control boxes
- › indoor unit combination is not allowed
- › only works with X, W, Y control

### Step 1: Required AHU capacity

An AHU with double flow, heat recovery and 100% fresh air is to be installed in Europe where the outdoor sizing temperature is 35 °CDB and the target supply air temperature for fresh air is 25 °CDB. Load calculations point to a required capacity of 45kW. By checking on the EKEXV capacity table, for cooling operation, 40kW falls within the 400 class valve. Since 40kW is not the nominal capacity, a class adjustment has to be done.  $40/45=0,89$  and  $0,89 \times 400 = 356$ . So the capacity class of the expansion valve kit is 356.

### Step 2: Outdoor unit selection

For this AHU, a VRV IV heat pump model with continuous heating is going to be used (RYYQ-T series). For a capacity of 40kW at 35 °CDB, an outdoor of 14HP (RYYQ14T). The capacity class of the 14 HP outdoor unit is 350.

Total connection ratio of the system is  $356/350=102\%$  hence it falls within the range 90-110%.

### Step 3: Control box selection

In this particular case, the control will work with precise air temperature control. Only W or X control allow this. Since the consultant wants to use an "off-the-shelf" DDC module, the EKEQFCBA box with W control allows easy set-up due to pre-set factory values.

## Multi application selection

- › the outdoor unit can be connected to MULTIPLE COILS (and their control boxes)
- › indoor units are also connectable but not mandatory
- › only works with Z control

### Step 1: Required AHU capacity

An AHU with double flow, heat recovery and 100% fresh air is to be installed in Europe where the outdoor sizing temperature is 35 °CDB and the target supply air temperature for fresh air is 25 °CDB. On top of this, for this building, 5 round-flow cassette units FXFQ50A will also be connected to this OU.

Load calculations point to a required capacity of 20kW for the AHU and 22,5 kW for the indoor units.

By checking on the EKEXV capacity table, for cooling operation, 20kW falls within the 200 class valve. Since 22,4 kW is the nominal capacity, a class adjustment has to be done.  $20/22,4=0,89$  and  $0,89 \times 200 = 178$ . So the capacity class of the expansion valve kit is 178. Total capacity class of the indoor unit system is  $178+250=428$

### Step 2: Outdoor unit selection

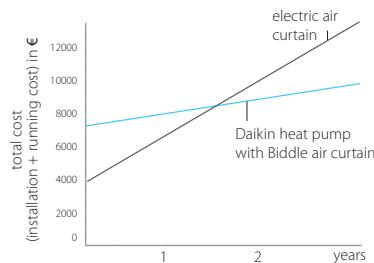

For this system where a AHU is connected with indoor units, it is mandatory to use a heat recovery unit. By consulting the engineering databook for REYQ-T, the total required capacity of 42,5 kW requires a 16HP model REYQ16T. Which will deliver 45kW at the design temperature of 35 °CDB. This unit has a capacity class of 400. Total connection ratio of the system is  $428/400=107\%$  hence it falls within the range 50-110%.

### Step 3: Control box selection

In this particular case, the only available control is Z control and the combination of AHU and VRV DX indoor units requires EKEQMCBA control box.

## Biddle air curtain for ERQ

- › Connectable to ERQ heat pump
- › ERQ is among the first DX systems suitable for connection to air curtains
- › Free-hanging model (F): easy wall mounted installation
- › Cassette model (C): mounted into a false ceiling leaving only the decoration panel visible
- › Recessed model (R): neatly concealed in the ceiling
- › A payback period of less than 1.5 years compared to installing an electric air curtain
- › Easy and quick to install at reduced costs since no additional water systems, boilers and gas connections are required
- › Maximum energy efficiency stemming from almost zero down flow turbulence, optimised air flow and the application of advanced discharge rectifier technology
- › Around 85% air separation efficiency, greatly reducing both heat loss and required indoor unit heating capacity

(1) Favorable conditions: covered shopping mall or revolving door entrance (2) Normal conditions: little direct wind, no opposite open doors, building with ground floor only (3) Unfavorable conditions: location at a corner or square, multiple floors and/or open stairway

## Biddle air curtain for VRV and Conveni-pack

- › Connectable to VRV heat recovery, heat pump and Conveni-pack
- › VRV is among the first DX systems suitable for connection to air curtains
- › Free-hanging model (F): easy wall mounted installation
- › Cassette model (C): mounted into a false ceiling leaving only the decoration panel visible
- › Recessed model (R): neatly concealed in the ceiling
- › A payback period of less than 1.5 years compared to installing an electric air curtain
- › Provides virtually free air curtain heating via recovered heat from indoor units in cooling mode (in case of VRV heat recovery)
- › Easy and quick to install at reduced costs since no additional water systems, boilers and gas connections are required
- › Maximum energy efficiency stemming from almost zero down flow turbulence, optimised air flow and the application of advanced discharge rectifier technology
- › Around 85% air separation efficiency, greatly reducing both heat loss and required indoor unit heating capacity

The marine branch office of Daikin Europe N.V., named Daikin Europe N.V. Hamburg Marine Office is located in the heart of one of the biggest harbour towns in the entire Europe. Through this decision, Daikin Europe N.V. aims to establish a firm basis to further increase its presence in the European Marine A/C market. The portfolio of products are focused on Marine application, such as Daikin - Packaged Marine Air conditioners, Chillers and DX- units in accordance to most of the well known classification societies for which Daikin Europe N.V. Hamburg Marine Office is your competent partner.

## Daikin Marine Type Deck Units

- › Energy saving
- › Compact design
- › Refrigerants R-404A - R-407C
- › Economical maintenance
- › Easy installation
- › Hermetic scroll compressor
- › Minimum piping and field work required
- › High performance reliability
- › Lesser refrigerant volum with leak proof hermetic structure
- › High static pressure fan facilitates the use of long ducts

› Quiet, less vibration operation makes it suitable for installation in accomodation areas

### Optional customized modifications:

- › Remote controls
- › Electrical heater
- › Data bus interfaces
- › Air plenum or duct connection
- › Higher external static pressure
- › Cooling water regulating valve
- › Higher air volume

### USP~HR1 / USP~H

## Daikin Marine Type Packaged Series

- › Excellent durability
- › Hermetic scroll compressor
- › Light weight design
- › Refrigerants: R-404A - R-407C
- › Resilient structure specially designed for marine applications
- › Abundant modification parts assures various applications
- › Wide operation range
- › Easy transportation and installation
- › Energy-saving

› Complete set of spare parts provided for certain models

### Optional customized modifications:

- › Remote controls
- › Electrical heater
- › Data bus interfaces
- › Air plenum or duct connection
- › Higher external static pressure
- › Cooling water regulating valve
- › Higher air volume

### USF\*J(A)

## Daikin Marine Type Galley Series

- › Respond to a wide temperature range
- › High efficient operation
- › Outstanding durable design
- › Easy transportation and installation
- › Excellent performance reliability
- › Spare parts are provided as standard accessories
- › Hermetic scroll compressor
- › High static pressure system
- › R-404A

### Optional customized modifications:

- › Remote controls
- › Electrical heater
- › Data bus interfaces
- › Air plenum or duct connection
- › Higher external static pressure
- › Cooling water regulating valve
- › Higher air volume

### RHSD~A / RKS~FR Unit

## Daikin Marine Type Small Size Condensing

### RHSD-A (R-134a):

- › A semi-hermetic reciprocating compressor with proven reliability
- › Saved maintenance work around compressor (without V belts & shaft seal)

### RKS-FR (R-404A):

- › An open type reciprocating compressor of optimum design for R-404A
- › Equal installation & maintenance as R-22

Daikin chillers offer the ultimate in reliability and flexibility — a reflection of the advanced technology inherent within them. Daikin chillers represent the sure and safe route to a comfortable environment and a process cooling solution that is clean and consistent.

## Why choose Daikin chillers?

Daikin Chillers are the perfect bridge between project requirements and customer satisfaction.

From the smallest chillers to the very largest, our quality control and attention detail is absolute.

Our systems have the **most advanced technologies**, deliver **the highest energy efficiencies** and **lowest running costs**, and are the gold standard for reliability and performance.

### The widest and most flexible chiller portfolio

- › From the smallest mini chiller for residential use to the largest chiller for district cooling
- › Tailor made solutions based on the most advanced technologies
- › Wide range of options and accessories

### Worldwide experience in chiller design and manufacturing

- › World's most advanced facilities for air conditioning research and development: the Applied Development Center in Minneapolis, Minnesota
- › Inhouse development and manufacturing of chiller main components (compressors, fans, condenser coils, software, etc...)

### The highest efficiency for every installation

- › Inverter technology over the whole capacity range
- › The lowest total cost of ownership and fast payback time

### Quality and reliability

- › Daikin's integrated zero defect policy ensures quality of components and finished products
- › Each Daikin chiller is factory run-tested and subjected to quality audit before shipment

### Benefits for installers

- › Plug & play solutions
- › Maximum serviceability
- › Ideal solutions for retrofit projects

### Benefits for consultants

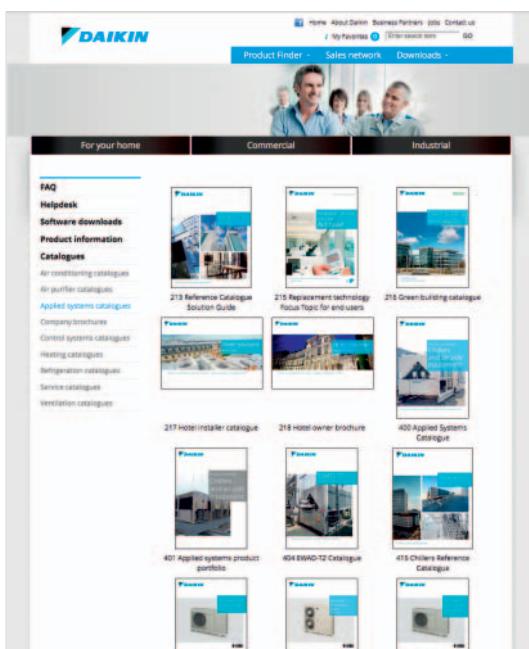

- › Energy efficient solutions without compromising on reliability and performance
- › Latest technology embedded in all our products

### Benefits for end users

- › Remarkable savings on running costs
- › Eurovent and AHRI certification

## Chiller selection software

- › The Daikin chiller selection software allows consultants and building engineers to select proper units based on application type, efficiency and sound level and required capacity. The tool presents all possible series and generates for selected units a detailed technical data book.

## Air cooled mini inverter chiller

- › Inverter technology to ensure low sound values and **leader-of-class ESEER**
- › Wide operating range
- › Easy 'plug and play' installation
- › Single phase power supply and low starting currents make the unit ideal **for residential applications**
- › **Built-in hydronic module:** no buffer tank required and a standard pump and main switch are included

# Air cooled mini inverter chiller

- › Inverter technology to ensure low sound values and **leader-of-class ESEER**
- › Wide operating range
- › Built-in hydronic module: no buffer tank required and a standard pump and main switch are included
- › Easy 'plug and play' installation
- › Single phase power supply **for residential applications**, three phase power supply model available **for light commercial applications**

# Air cooled scroll inverter chiller

- › High efficiency with **leader-of-class ESEER**
- › Minimal starting currents and short payback times
- › No buffertank required for standard applications
- › **Large operation range** (ambient temperature up to 43°C)
- › A modbus gateway (RTD-W) can be installed per unit in order to allow the control and monitoring by a Daikin controller or a third-party BMS, which will increase further the efficiency of the system
- › All systems that are connected with RTD-W can be controlled and **monitored centrally** with the master/slave control kit: the sequencing controller EKCC-W

# Air cooled multi-scroll chiller, high efficiency, standard/low sound

- › Reliable and efficient scroll compressors with high EER values
- › A series of advantages thanks to the use of large-capacity scroll compressors: increased competitiveness, reduced weight, clearances around the unit

**› Reduced footprint thanks to the V-shaped frame**

- › Large operation range: ambient temperatures up to 52°C and down to -18°C

**› Ideal solution for a broad range of comfort and process applications**

- › The unit can be equipped with a hydraulic module optimizing installation time, space and cost
- › MicroTech III controller with superior control logic and easy interface

# Air cooled multi-scroll chiller, standard efficiency, standard/low sound

- › Reliable and efficient scroll compressors with high EER values
- › A series of advantages thanks to the use of large-capacity scroll compressors: increased competitiveness, reduced weight, clearances around the unit
- › **2 truly independent refrigerant circuits**
- › Reduced footprint thanks to the **V-shaped frame** (EWAQ210-350/400F-SS/SL & EWAQ200-330/370F-SR)
- › Large operation range: ambient temperatures up to 52°C and down to -18°C
- › The unit can be equipped with a hydraulic module optimizing installation time, space and cost
- › Ideal solution for a broad range of comfort and process applications
- › MicroTech III controller with superior control logic and easy interface

# Air cooled multi-scroll inverter chiller, high efficiency, standard sound

- › High efficiency **DC inverter scroll** compressors
- › Advanced compressor and fan design resulting in low operating sound levels
- › Dual independent refrigerant circuit for built-in redundancy and reliable operation
- › Wide operating range in cooling mode
- › Reduced footprint thanks to the **V-shaped frame** (EWAQ210GZXS & EWAQ190GZXR)
- › MicroTech III controller with superior control logic and easy interface

## Air cooled screw chiller, high ambient, standard sound

- ## › High ambient

- › Stepless single-screw compressor
  - › Optimised for use with R-134a
  - › Large operation range (ambient temperature down to -18°C)
  - › MicroTech III controller with superior control logic and easy interface

# Air cooled screw chiller, standard efficiency, standard/low sound

- › Stepless single-screw compressor
- › Large operation range (ambient temperature down to -18°C and up to 46°C)
- › 2-3 truly independent refrigerant circuits
- › DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- › Partial and total heat recovery option available
- › Standard electronic expansion valve
- › MicroTech III controller with superior control logic and easy interface

# Air cooled screw chiller, high efficiency, standard/low sound

- › Stepless single-screw compressor
- › Large operation range (ambient temperature down to -18°C and up to 50°C)
- › 2-3 truly independent refrigerant circuits
- › DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- › Partial and total heat recovery option available
- › Standard electronic expansion valve
- › MicroTech III controller with superior control logic and easy interface

# Air cooled screw chiller with free cooling, high efficiency, standard/low sound

- › Free cooling chiller for space cooling and industrial processes
- › Stepless single-screw compressor
- › Optimised for use with R-134a
- › Greater energy savings and reduced CO<sub>2</sub> emissions during cold season
- › Wide operating range
- › MicroTech III controller with superior control logic and easy interface

## Why choose EWAD-TZ?

Over 1,000 sites around the world with screw chillers installed is demonstrating that we will never stop developing the most advanced technology with highest quality level to offer the best chiller experience to our customers.

### Benefits for the installer

- › Factory leak-tested and pre-charged
- › High serviceability
- › User-friendly smart controls which can be integrated easily with building management systems

### Benefits for the consultant

- › Multiple options available, e.g. rapid restart, variable speed water pumps, smart energy meter, EC fans
- › Ideal for both new and retrofit projects: same footprints of non-inverter unit with higher efficiencies and performance

### Benefits for the end user

- › Rapid payback of three years for comfort cooling applications
- › 50% reduction of energy consumption
- › Designed for sound-sensitive environments

### High efficiencies both at full load and part load

- › Daikin compressor with in-built inverter and Variable Volume Ratio (VVR) for optimized efficiency
- › In-house developed software with dynamic condensing pressure management and innovative economizer control logic

### Rapid return on investment

- › Payback of three years, compared to a non-inverter unit for comfort cooling applications
- › Less than one year for process cooling applications

### Perfect comfort level

- › Infinitely variable load regulation
- › Precise leaving water temperature control thanks to stepless regulation

### Compact design

- › More compact heat exchanger with superior efficiencies
- › Reduced electrical panel dimensions thanks to the inverter compressor mounted

## Marketing tools

- › Download the chiller selection software from the business portal

- › EWAD-TZ movie: [www.youtube.com/DaikinEurope](http://www.youtube.com/DaikinEurope)

- › Visit the mini-site: [www.daikineurope.com/minisite-process-cooling-comfort-cooling-chiller-EWAD-TZ](http://www.daikineurope.com/minisite-process-cooling-comfort-cooling-chiller-EWAD-TZ)

### Lowest sound levels

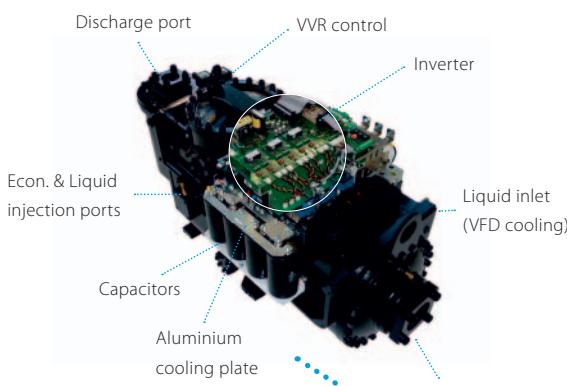

- › Down to 86 dB(A) sound power at full load and even lower at part load thanks to fans and compressors variable speed
- › Quiet compressor thanks to special acoustic executions
- › Unique Daikin fans design with reduced noise impact and vibrations

### Unrivaled and proven reliability

- › Extensive testing in laboratories, Daikin factories and specific job sites
- › Reduced energy demand without compromising on reliability and performance

### Extensive option list

- › Rapid restart after power failure
- › Variable speed water pumps
- › Integrated smart energy meter
- › EC fans

# Air cooled screw inverter chiller, standard efficiency, standard/reduced sound

- › Optimized energy efficiency both at full and part load conditions
- › Stepless single-screw compressor
- › Advanced compressor technology featuring **integrated inverter** and **variable volume ratio (VVR)**
- › Compact design for small footprint and minimized installation space
- › Low operating sound levels are achieved by the latest compressor and fan design
- › One or two truly independent refrigerant circuits for outstanding reliability

# Air cooled screw inverter chiller, premium efficiency, standard/reduced sound

- › Premium energy efficiency both at full and part load conditions
- › Stepless single-screw compressor
- › Optimised for use with R-134a
- › Advanced compressor technology featuring **integrated inverter** and **variable volume ratio (VVR)**
- › Compact design for small footprint and minimized installation space
- › Low operating sound levels are achieved by the latest compressor and fan design
- › One or two truly independent refrigerant circuits for outstanding reliability

# Air cooled mini inverter heat pump

- > Inverter technology to ensure low sound values and **leader-of-class ESEER**
- > Wide operating range
- > Easy 'plug and play' installation
- > Single phase power supply and low starting currents make the unit **ideal for residential applications**
- > Built-in hydronic module: no buffer tank required and a standard pump and main switch are included

# Air cooled scroll inverter heat pump

- › High efficiency with **leader-of-class ESEER**
- › Minimal starting currents and short payback times
- › No buffertank required for standard applications
- › **Large operation range** (ambient temperature up to 43°C)
- › A modbus gateway (RTD-W) can be installed per unit in order allow the control and monitoring by a Daikin controller or a third-party BMS, which will increase further the efficiency of the system
- › All systems that are connected with RTD-W can be controlled and **monitored centrally** with the master/slave control kit: the sequencing controller EKCC-W

# Air cooled scroll inverter heat pump, split version

- Hydronic module for indoor installation eliminating the need for glycol
- Ideal for colder climates as the lack of glycol will allow for high efficiencies
- Compact dimensions and limited pipework allow for installation in very restricted spaces
- Easy transportation as separate units will fit in an elevator

# Air cooled multi-scroll heat pump, high efficiency, standard/low sound

## > Class A efficiency in heating mode

- Extended operation range: ambient temperatures from -10°C up to +46°C in cooling mode and down to -17°C in heating mode
- 2 truly independent refrigerant circuits
- Reduced footprint thanks to the **V-shaped frame** (EWYQ160-230F-XS/XL & EWYQ160-220F-XR)
- Reliable and efficient scroll compressors with **high EER values**
- Chiller series design entirely based on new European directives (EN14511, EN14825)
- Top serviceability level thanks to reduced weight, compact footprint and optimized components accessibility

- The unit can be equipped with a hydraulic module optimizing installation time, space and cost
- Wide range of available options and accessories
- Inverter fans management for enhanced part load efficiencies
- Nordic kit option to improve the chiller working conditions in heating mode
- MicroTech III controller with superior control logic and easy interface

# Air cooled screw inverter heat pump, standard efficiency, standard sound

> Ideal solution for **commercial comfort cooling and/or heating applications**

- > Optimum ESEER values
- > 2-3 truly independent refrigerant circuits
- > Low starting current
- > DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- > Standard electronic expansion valve
- > Optimised defrost cycles
- > Partial and total heat recovery option available
- > Power factor up to 0.95
- > PID microprocessor control

# Water cooled screw chiller, standard efficiency, standard sound

- › All models are PED pressure vessel approved
- › 1 or 2 stepless single-screw compressors
- › One or two truly independent refrigerant circuits for outstanding reliability
- › Shell and tube heat exchanger
- › Optimised for use with **R-410A**
- › Standard electronic expansion valve
- › Compact design
- › Partial heat recovery available
- › MicroTech III controller with superior control logic and easy interface

# Water cooled scroll heat pump

- › One of the most **compact units** on the market: 600mm x 600mm x 600mm
- › Low energy consumption
- › Low operating sound level
- › Low refrigerant volume
- › Stainless steel plate heat exchanger
- › Extension possible to 195kW
- › Easy installation and maintenance
- › Remote cooling or heating selection
- › Water/water heat pump, with water reversibility
- › Compatible with hydraulic module EHMC (see next page)
- › Advanced  $\mu$ C<sup>2</sup>SE controller for direct connection to a Modbus based BMS or to a remote user interface
- › Standard integrated: main switch, water filter, flow switch, air purge, pressure ports

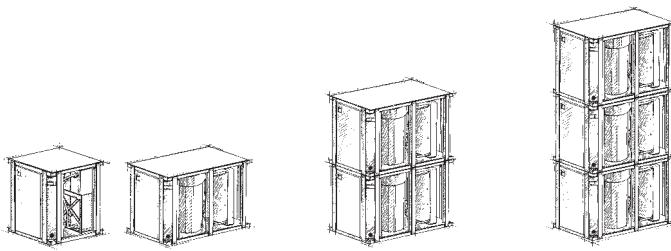

EWWP-KBWIN

## EHMC

## Hydraulic Module

- › Accessory for EWWP-KBW1N chillers
- › 3 models available
- › 100 l tank for all sizes
- › Freeze up protection
- › High static pump (option)
- › Standard drain kit (for indoor use)
- › Standard dual pressure ports (before & behind the pump)

**Legends**

Pump characteristics

1. EHMC30AV1080
2. EHMC10AV1080 & EHMC15AV1080
3. EHMC30AV1010

# Water cooled multi-scroll heat pump reversing on refrigerant side, standard efficiency, standard sound

- › Single refrigerant circuit (2 scroll compressors) with single evaporator
- › Heat pump version with reversibility on refrigerant side available, ideal for geothermal applications
- › Compact design to allow easy indoor installation or retrofit operations
- › Conceived for stacked installation of two single circuit units to reduce the footprint
- › High efficiency and reliable scroll compressor
- › High flexibility for a wide variety of applications
- › Allows sequencing control (up to 4 units) without any external device
- › Stainless steel plate heat exchanger
- › Pump (low 100 kPa and high 200 kPa lift) available for evaporator and condenser

# Water cooled screw chiller, standard efficiency, standard sound

- › Stepless single-screw compressor
- › 1-2 truly independent refrigerant circuits
- › Standard electronic expansion valve
- › DX shell and tube evaporator – one pass refrigerant side for easy oil circulation and return
- › Partial and total heat recovery option available
- › MicroTech III controller with superior control logic and easy interface

## **Water cooled screw chiller, high efficiency, standard sound**

FWWD-I-SS/XS

MicroTech III

# Water cooled screw chiller, standard efficiency, standard sound

- › Compact design to allow easy indoor installation or retrofit operations
- › Daikin semi-hermetic single screw stepless compressor
- › High energy efficiency both at full and part load conditions
- › Chilled water temperatures down to -10°C on standard unit
- › Optimised for use with R-134a
- › MicroTech III controller with superior control logic and easy interface

# Water cooled screw chiller, high efficiency, standard sound

- > High energy efficient units: **full range Eurovent Class A**
  - > **Heat pump version** available
  - > **Flooded type heat exchangers**
  - > MicroTech III controller with superior control logic and easy interface

# Condenserless scroll chiller

- › One of the most **compact units** on the market:  
600mmx600mmx600mm
- › Daikin scroll compressor
- › Electronic DDC controller
- › Low operating sound level
- › Low energy consumption
- › Low refrigerant volume
- › Easy installation and maintenance
- › Stainless steel plate heat exchanger
- › Compatible with hydraulic module EHMC
- › Standard integrated: main switch, pressure ports, flow switch, filter, shut-off valves and air purge
- › Advanced  $\mu$ C<sup>2</sup>SE controller for direct connection to a Modbus based BMS or to a remote user interface.

# Condenserless multi-scroll chiller, standard efficiency, standard sound

- › Single refrigerant circuit (2 scroll compressors) with single evaporator
- › For chilled water production, to be combined with a remote condensing unit
- › Compact design to allow easy indoor installation or retrofit operations
- › Conceived for stacked installation of two single circuit units to reduce the footprint
- › High efficiency and reliable scroll compressor
- › Stainless steel plate heat exchanger

# Condenserless screw chiller, standard efficiency, standard sound

- › Compact design to allow **easy indoor installation or retrofit operations**
  - › Daikin semi-hermetic single screw stepless compressor
  - › **High energy efficiency both at full and part load conditions**
  - › Chilled water temperatures **down to -10°C** on standard unit
  - › Optimised for use with **R-134a**
  - › MicroTech III controller with superior control logic and easy interface

# Condenserless screw chiller, standard efficiency, standard sound

- › Stepless single-screw compressor
  - › Optimised for use with **R-134a**
  - › **1-2 truly independent refrigerant circuits**
  - › Standard electronic expansion valve
  - › DX shell and tube evaporator – one pass refrigerant side for easy oil circulation and return
  - › All models are PED pressure vessel approved
  - › Partial heat recovery available
  - › MicroTech III controller with superior control logic and easy interface

MicroTech III

# Water cooled centrifugal chiller, high efficiency, standard sound

- › Totally oil-free operation resulting in reduced maintenance costs and increased reliability
- › An inverter driven compressor allows the capacity to be adjusted precisely to match variations in room and outside temperatures
- › Onboard digital electronics provide smart controls

## Water cooled centrifugal chiller, high efficiency, standard sound

- › Optional Variable Frequency Drive (VFD) to improve the part load efficiency
- › High efficiency flooded type shell and tube evaporator/condensers
- › Lower equipment, installation and annual operating costs than two single compressor chillers (DWDC)
- › Main components can be removed or repaired without shutting down the unit as the chiller has two of everything (compressors, lubrication systems, control systems and starters) (DWDC)
- › Unloading to 5% (DWSC) or 10% (DWDC) of full load provides improved stability of the chilled water temperature and less harmful cycling of compressors
- › Single stage centrifugal compressor (DWSC)

<b>Cooling only</b>		<b>DWDC/DWSC</b>	<b>DWDC</b>	<b>DWSC</b>

(1) Option 08 includes option 29 - (2) Option 99(a) includes 'Fan overload protection' - (3) Piping between the inertial tank and the unit is not included. Electric heater power supply has to be provided from external source -

(4) The order of inverter compressor will have an impact on the delivery time: please contact the factory - (5) Unit performance will be affected; contact factory for information. It is mandatory to order the option 26 when selecting CU-Ni 90-10 condenser tubes - (6)

Sound proof system - compressor enclosure - (7) Compressor enclosure - (8) Soundproof cabinet will be supplied in a separate kit and not assembled. For better performance the cabinet will be integral kind (around the whole chiller, not only around compressors).

Cabinet assembly is not included in the supply - (9) Special transport is required (flat rack truck and open top when option 01 is selected) for model sizes as follows: EWWDC12I-5S - EWWDC18I-5S (10) Forklift loading-unloading operations are not allowed when option 01

## Options - Medium and large chillers (Part 2)

is selected for model sizes as follows: EWWDQC1B-SS - EWWDQC1B-MS - (11) STD Transport is required (flat rack truck and open top) for model sizes as follows: EWLDC10I-SS - EWLDCT1B-SS or EWWQC1B-SS - EWWQC2B-SS or EWWQC10B-XS, EWWQC12B-XS - EWWQC2B1B-XS - (12) Forklift loading/unloading operations are not allowed for model sizes as follows: EWLDCT10I-SS - EWLDCT1B-SS or EWWQC1B-SS - EWWQC2B-SS or EWWQC10B-XS, EWWQC12B-XS - EWWQC2B1B-XS - (13) STD only for single circuit unit (14) STD only for Premium and High efficiency version  
 Cc = Contact the factory - STD = Standard - SO = Specify at Order entry - NC = No additional cost

CF = Contact the factory - STD = Standard - SO = Specify at Order entry - NC = No additional cost

Fan Coil Units are a highly efficient means of turning a water chiller, heat pump or hot water boiler into an efficient, quiet air conditioning system. These units are an effective solution to provide a comfortable environment for both commercial and residential applications. Daikin offers a wide range of Fan Coil Units for both concealed and exposed applications. Three models are available in flexible application. The only moving part in the units is the fan, making them ideal for use in offices, hotels and at home. The goal is to obtain the right solution, both technically and aesthetically.

## Fan coil units with BLDC motor

As more buildings undergo renovation, the need to be able to deliver high indoor air quality in a specific space in an **efficient and cost-effective way** without having to do a radical re-fit of the entire HVAC system has made fan coil technology an obvious solution.

Daikin has a full capacity range of **aesthetically pleasing** fan coil units with advanced controls that reliably deliver **excellent comfort levels**. And by using a refined range of advanced DC fan motors, we are able to offer flexibility while maintaining very low noise levels.

## Why choose Daikin fan coil units?

- The new brushless DC ranges reflect Daikin's commitment to developing highly efficient fan coil units that help to reduce energy consumption, without compromising on reliability and performance.
- High level quality is written large for us and we are pleased to offer high technology solutions to the market.

### Benefits for the installer

- › Reduced amount of sizes: less stock space needed
- › Modular designs for multiple configurations
- › Easy integration in BMS system via modbus protocol

### Benefits for the consultant

- › Best solution in the market in order to have top efficiency, best comfort and lowest sound levels
- › Product flexibility: wide range of options, accessories and controls

### Benefits for the end user

- › High comfort level
- › Up to 70% savings on running costs
- › Controller with timer programmed operating mode
- › FWESCA controller that can satisfy all customer requirements in terms of FCU management

## Fan coil unit software

Select your unit via our selection software

- › Selection logic is based on cooling and/or heating mode conditions the user enters.
- › User can indicate cooling mode and/or heating mode conditions and list available fan coil units.
- › A detailed report including technical specifications and wiring diagram can be printed.

## Payback tool

Prove quickly the saving in electric cost using the new BLDC motor technology instead of the AC motor technology via our payback tool available on our Extranet.

## BLDC fan motors - Video

## Benefits of brushless inverter technology on fan coil units:

### Higher efficiency than AC (Alternative Current) motor

- › Up to 70% energy savings
- › No heat generation
- › No power losses
- › Higher efficiency than AC motors to reach set point

### High comfort level

- › Less fluctuation of air temperature and relative humidity
- › More consistent output level
- › Stepless speed change for gradual air output
- › More accurate adjustments to reach set point

### Low sound levels

- › Lower minimum rotation speed
- › No start-stop sequence
- › Gradual air output

### High flexibility level

- › Multiple configurations: cassettes, floorstanding units, flexi type units with or without cabinet and ducted units
- › Wide capacity range in heating and cooling
- › Different piping topologies and connection valves

# Product overview

Type	Model	Product name	Fan motor type
Ceiling mounted cassette	<b>4-way blow ceiling mounted cassette</b>	FWG-AT/AF	BLDC
	- Brushless DC fan motor unit for ceiling mounting - High efficiency, continuous air flow regulation and fan speed modulation - Reduced sound emissions - Easy installation and maintenance		
	<b>Round flow cassette</b>	FWC-BT/BF	BLDC
	- Brushless DC fan motor unit for ceiling mounting - 360° air discharge ensures uniform air flow - Integrated fresh air intake - Easy installation in corners - Standard drain pump with 850 mm lift		
Floor standing unit	<b>4-way blow ceiling mounted cassette</b>	FWF-BT/BF	AC
	- AC fan motor unit for ceiling mounting - Integrated fresh air intake - Horizontal auto swing - Easy installation in corners - Standard drain pump with 750 mm lift		
	<b>4-way blow ceiling mounted cassette</b>	FWF-CT	AC
	- AC fan motor unit for ceiling mounting - Easy installation and maintenance - High power air flow - Standard drain pump with 700 mm lift		
Flexi type unit	<b>Floor standing unit</b>	FWZ-AT/AF	BLDC
	- Brushless DC fan motor for vertical mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels		
	<b>Flexi type unit</b>	FWV-DAT/DAF	AC
	- AC fan motor unit for horizontal or vertical concealed mounting - Insulated valve packages, no extra drain pan required - Fast-on connections for electrical options: no tools needed - Easy maintenance		
Wall mounted unit	<b>Flexi type unit</b>	FWR-AT/AF	BLDC
	- Brushless DC fan motor unit for horizontal or vertical mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels		
	<b>Concealed flexi type unit</b>	FWL-DAT/DAF	AC
	- AC fan motor unit for horizontal or vertical concealed mounting - Insulated valve packages, no extra drain pan required - Fast-on connections for electrical options: no tools needed - Easy maintenance		
Concealed ceiling unit	<b>Concealed flexi type unit</b>	FWS-AT/AF	BLDC
	- Brushless DC fan motor unit for horizontal or vertical concealed mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels		
	<b>Concealed ceiling unit with low ESP</b>	FWM-DAT/DAF	AC
	- AC fan motor unit for horizontal concealed mounting - Available static pressure up to 50 Pa - Easy installation and maintenance - 4-speed fan motor - High power air flow		
	<b>Concealed ceiling unit with medium ESP</b>	FWE-CT/CF	AC
	- Brushless DC fan motor unit for horizontal concealed mounting - Instant adjustment to temperature and relative humidity changes - Available static pressure up to 80 Pa - Low sound levels		
	<b>Concealed ceiling unit with medium ESP</b>	FWP-AT	BLDC
	- AC fan motor unit for horizontal concealed mounting - Available static pressure up to 80 Pa - 7-speed electrical motors (thermal protection on windings) - Easy maintenance		
	<b>Concealed ceiling unit with high ESP</b>	FWB-BT	AC
	- AC fan motor unit for horizontal or vertical concealed mounting - Available static pressure up to 120 Pa - Easy maintenance		
	<b>Concealed ceiling unit with high ESP</b>	FWD-AT/AF	AC
	- AC fan motor unit for horizontal or vertical concealed mounting - Available static pressure up to 120 Pa - Easy maintenance

## 4-way blow ceiling mounted cassette

BLDC fan motor unit for ceiling mounting. High efficiency, continuous air flow regulation and fan speed modulation

- › Up to 70% **energy savings** with brushless DC motor technology compared to traditional technology
- › Instant adjustment to temperature and relative humidity changes
- › Continuous modulation of fan speed resulting in **reduced sound emissions**, in comparison with fixed speed AC motor fan coil units
- › **Easy installation and maintenance**

## Round flow cassette

BLDC fan motor unit for ceiling mounting. 360° air discharge

- › 360° air discharge ensures **uniform air flow** and temperature distribution
- › Modern style decoration panel in white (RAL9010)
- › **Fresh air intake integrated** in the same system thus reducing installation cost as no additional ventilation is required
- › Comfortable horizontal air discharge ensures **draughtfree operation** and prevents ceiling soiling
- › Possibility to shut 1 or 2 flaps for **easy installation in corners**

- › Standard drain pump with 850mm lift increases flexibility and installation speed

## 4-way blow ceiling mounted cassette

### AC fan motor unit for ceiling mounting

- › 4 way air discharge and air swing
- › Compact casing enables unit to fit flush into ceilings and match standard architectural modules
- › **Air suction from underneath**
- › Easy installation and maintenance
- › Built-in high pressure drain pump with **700mm lift**
- › Double-intake centrifugal fans
- › High power air flow
- › 3-speed fan motor

## Floor standing unit

BLDC fan motor unit for vertical mounting. Continuous air flow regulation and fan speed modulation

- › Up to 70% **energy savings** with brushless DC motor technology compared to traditional technology
- › **Instant adjustment** to temperature and relative humidity changes
- › **Low operating sound level**
- › Highly flexible solutions: multiple sizes, piping topologies and connection valves
- › Requires **very little installation space**

## Floor standing unit

AC fan motor unit for vertical mounting

- › **Pre-assembled 3-way/4-port on/off valves** are available
- › **High efficiency** heat exchanger
- › Valve packages are **insulated**, no extra drain pan required
- › Valve packages contain balancing valves and sensor pocket
- › Fast-on connections for electrical options: no tools needed
- › **Washable air filter**, easily removable for maintenance
- › Electric heater: no relay up to 2kW capacity
- › Electric heater: equipped with two overheat cut-out thermostats

## Flexi type unit with cabinet

BLDC fan motor unit for horizontal or vertical mounting.  
Continuous air flow regulation and fan speed modulation

- › Up to 70% **energy savings** with brushless DC motor technology compared to traditional technology
- › **Instant adjustment** to temperature and relative humidity changes
- › **Low operating sound level**
- › Highly flexible solutions: multiple sizes, piping topologies and connection valves
- › Requires very **little installation space**

## Wall mounted unit

AC fan motor unit for wall mounting

- › High **aesthetic cabinet design**
- › **Optimum air distribution**
- › Easy to install
- › 3-speed fan motor
- › **Low operating sound level** thanks to tangential fan
- › Insulated with self-extinguishing class 1 heat insulation
- › Removable washable air filter (self-extinguishing class 1)

# Low ESP ducted unit

AC fan motor unit for horizontal concealed mounting

› Easy installation and maintenance

› 4-speed fan motor

› High power air flow

› Wired electronic controllers range

› Available static pressure up to 50Pa

› Wide operating range

› Standard left and right side water connection

› Extended drain pan as standard

› Factory mounted valve (both left and right side)

› Nylon filter G2 class

› Polyethylene insulation

## Medium ESP ducted unit

AC fan motor unit for horizontal concealed mounting

- › **Compact dimensions**, can easily be mounted in a narrow ceiling void
- › 3, 4 or 6 stage row cooling coil
- › Drain pan to collect the condensate from: heat exchanger and regulating valves
- › **7-speed electrical motors** (with thermal protection on windings)
- › All 7 speeds **pre-wired in the factory** in the terminal block of the switch box
- › **Washable air filter**, easily removable for maintenance

## Medium ESP ducted unit

BLDC fan motor unit for horizontal concealed mounting.  
Continuous air flow regulation and fan speed modulation

- › **Blends unobtrusively** with any interior décor: only the suction and discharge grills are visible
- › Up to 50% **energy savings** with brushless DC motor technology compared to traditional technology
- › **Instant adjustment** to temperature and relative humidity changes
- › **Low operating sound level**
- › Highly flexible solutions: multiple sizes, piping topologies and connection valves

Daikin air handling units, with their plug-and-play design and inherent flexibility, can be configured and combined specifically to meet the exact requirements of any building, no matter what it is used for or who is to work there. Our systems are designed to be the most environmentally friendly and the most energy efficient on the market, thus reducing their ecological impact, while, at the same time, keeping costs down through the minimisation of energy consumption. When combined with the small physical footprint of the system, these features make our air handling units ideal for all markets.

## Daikin air handling units

### Why choose Daikin air handling units?

- Maximum energy efficiency and indoor air quality
- Wide range of functions and options
- **High quality** in component selection
- **Innovative** technology: Unique features and state of the art technology for short payback
- Operation **efficiency** and energy **savings**
- Outstanding **reliability** and **performance**
- Various applications are possible including air conditioning applications, industry-type process cooling, and large-scale district heat source systems.
- Plug and play concept for easy installation and commissioning

### Benefits for the installer

- › Simple precise commissioning through pre-programmed DDC controller
- › Reduced installation time thanks to internal electrical wiring and external terminal connections avoiding drilling into unit panels
- › Flush mounted electrical control panel avoiding risk of damage during transport and installation

### Benefits for the consultant

- › Quick selection tool - in-house developed ASTRA software with improved user interface allowing for a professional report in a few clicks
- › Unlimited configuration options

### Benefits for the end user

- › Energy efficient controls, allowing the user to determine a wide range of settings, resulting in excellent operational flexibility
- › Safe operation - fully integrated electrical panel for units taller than 80cm
- › Amazing tailor made capability to meet the specific customer needs

## Marketing tools

- › Watch the time-lapse video of a Daikin AHU construction on [www.youtube.com/daikeineurope](http://www.youtube.com/daikeineurope)
- › Download our brochure on air handling units from [my.daikin.eu](http://my.daikin.eu)
- › ASTRA software: ensure units customized at just 1 cm

### Packaged control solution for Daikin AHU

- › Electrical control panel complete with Direct Digital Control (DDC) controller
- › Internal fitting of all sensors and pressure measurement devices
- › Built-in temperature, humidity and CO<sub>2</sub> sensors
- › Internal electrical wiring for all components

### Energy efficient while focusing on maximum comfort

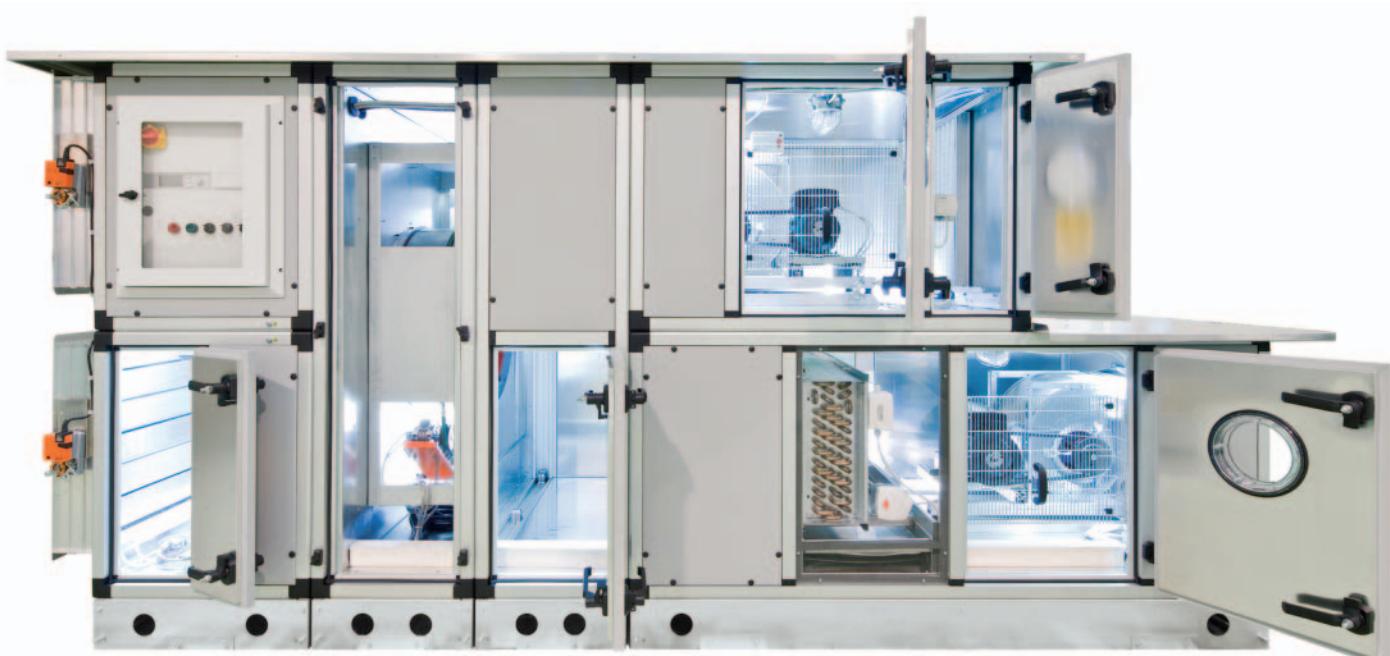

- › Set points can be specified for supply, return or room temperature
- › Precise control of all AHU components such as mixing dampers, heat recovery wheels, water valves, pressure switches for filters and fans, fan motors and inverters

### Plug and play design

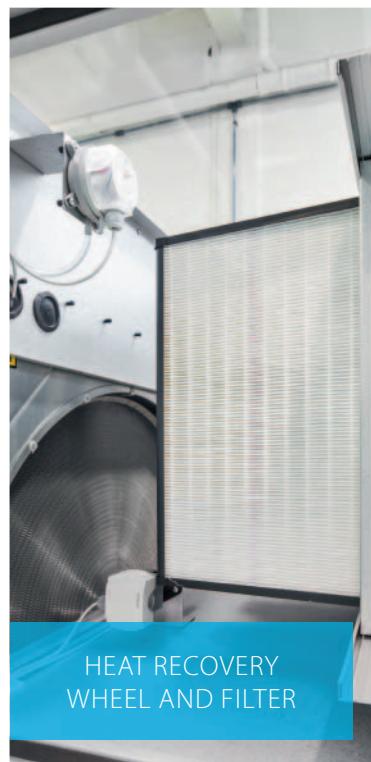

- › Low voltage fast connectors in between AHU sections

### Easy start-up and commissioning

- › Pre-programmed and factory-tested controls ensuring all wiring is installed correctly
- › Reduced energy and operating costs

## Air handling Units

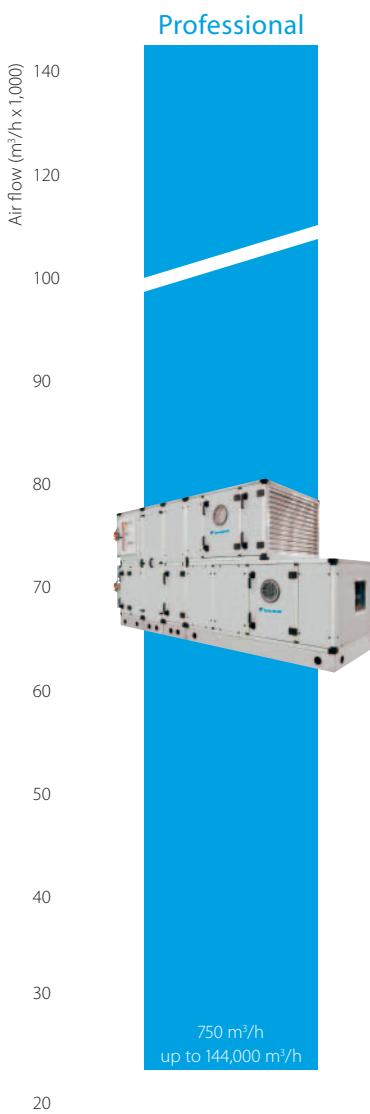

COMMERCIAL AND  
INDUSTRIAL APPLICATIONS

COMFORTABLE  
INDOOR CLIMATE

## Overview D-AHU range

Energy

750 m<sup>3</sup>/h  
up to 100,000 m<sup>3</sup>/h

### Professional

- › Pre-configured sizes
- › Tailored to the individual customer
- › Modular construction

### Energy

- › High-end solution for optimised energy consumption
- › High efficiency components
- › Strong Return on Investment

### Easy

- › Space-optimized unit
- › Pre-configured sizes

### Modular

- › Pre-configured sizes
- › Plug & Play concept
- › EC Fan Technology
- › High Efficiency Heat Wheel
- › Compact Design

Easy

500 m<sup>3</sup>/h  
up to 33,000 m<sup>3</sup>/h

Modular

500m<sup>3</sup>/h  
up to 25,000 m<sup>3</sup>/h

# Software

## ASTRA Pro

ASTRA is the powerful software that Daikin has developed to offer a **quick** and **comprehensive service** for the customer in order to make the technical choice and the **economic valorization** of each air handling unit. It is a complete tool that can configure any type of product and respond exactly to the strictest design needs. The result is a comprehensive **economic** offer including all the technical data and drawings, the psychrometric diagram with the relative air treatment and the fans' performance curves. However, Daikin didn't stop there, they went further.

MECCANO is the other powerful software developed and designed to quickly **convert the offer in the executive order**. Technical drawings to be sent and approved by the client, executive drawings for the production, bill of material, code generation for each component used are just a few of the many functions of the instrument.

The ASTRA-MECCANO integration has therefore made possible the complete automated management of the process by **reducing the time of the offer** and of the delivery and improving the service to our customers.

## ASTRA Xpress

- › Quick AHU selection that will save you precious time, drastically reducing selection time through the new software interface.
- › Very competitive solution available within the Wizard thanks to pre-uploaded parameters.
- › High selection quality, thanks to the huge number of the pre-engineered units embedded within the software.

## 4 steps to configure an air handler in just 2 minutes

- 1 Select a configuration
- 2 Select coils
- 3 Select other components
- 4 Design conditions ----> Print report

# Eurovent certification

Daikin Applied Europe S.p.A. participates in the Eurovent Certified Performance programme for Air Handling Units.

Check ongoing validity of certificate:

[www.eurovent-certification.com](http://www.eurovent-certification.com)

or [www.certiflash.com](http://www.certiflash.com)

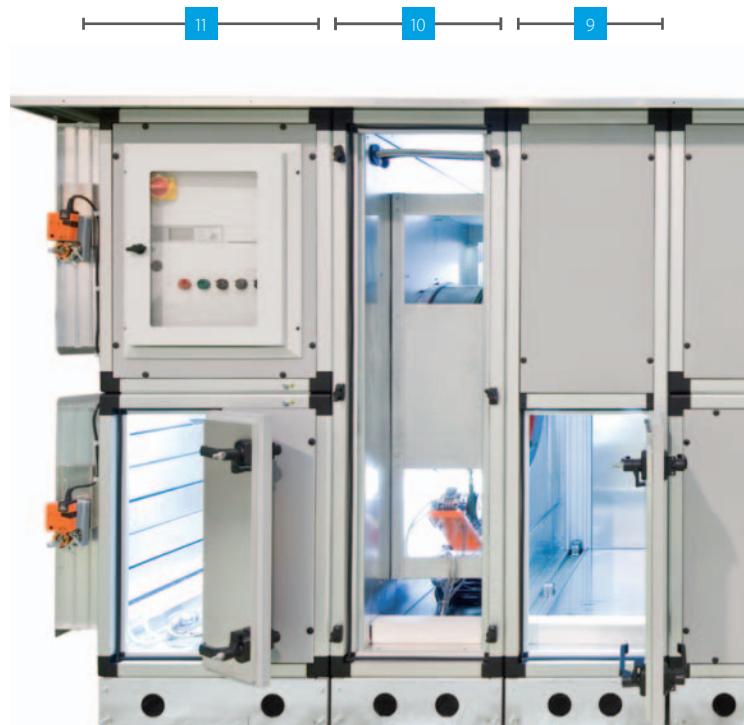

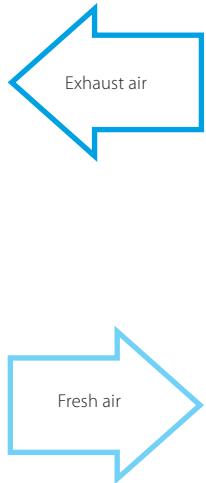

Result sp65		Eurovent Classification according to EN1886

# The working principle at a glance

Typical configurations for Daikin air handling units provide a versatile range of functions. Our system offers numerous options for customisation through an extensive range of variations and added functionality.

## Supply side

- 1 Damper section including ventilation grilles, factory-mounted actuators
- 2 Bag filter with factory-mounted differential pressure manometer and hinged door
- 3 Heat recovery system (plate heat exchanger or rotation heat exchanger)
- 4 Mixing box with damper and factory-mounted actuators
- 5 R-410A with heat recovery system with galvanised condensate tray and drip protection
- 6 Supply air fan (with hinged door, opening, drive monitoring, mounted and cabled lighting and ON/OFF switch)

## Fans

- › Forward curved fan
- › Backward curved fan
- › Backward airfoil blades fan
- › Plug fan
- › EC plug fan

## Exchangers

- › Water coils
- › Steam coils
- › Direct expansion coil
- › Superheated water coils
- › Electric coils

## Humidifiers

- › Evaporative humidifier without pump (loss water)
- › Evaporative humidifier with re-circulating pump
- › Air washer without pump (loss water)
- › Air washer with re-circulating pump
- › Steam humidifier with direct steam production
- › Steam humidifier with local distributor
- › Atomized water spray humidifier

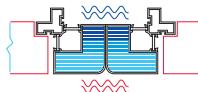

### Control system on plug and play solution basis

- › Air temperature control
- › Chilled water and DX cooling system control
- › Free cooling
- › CO<sub>2</sub> automatic control

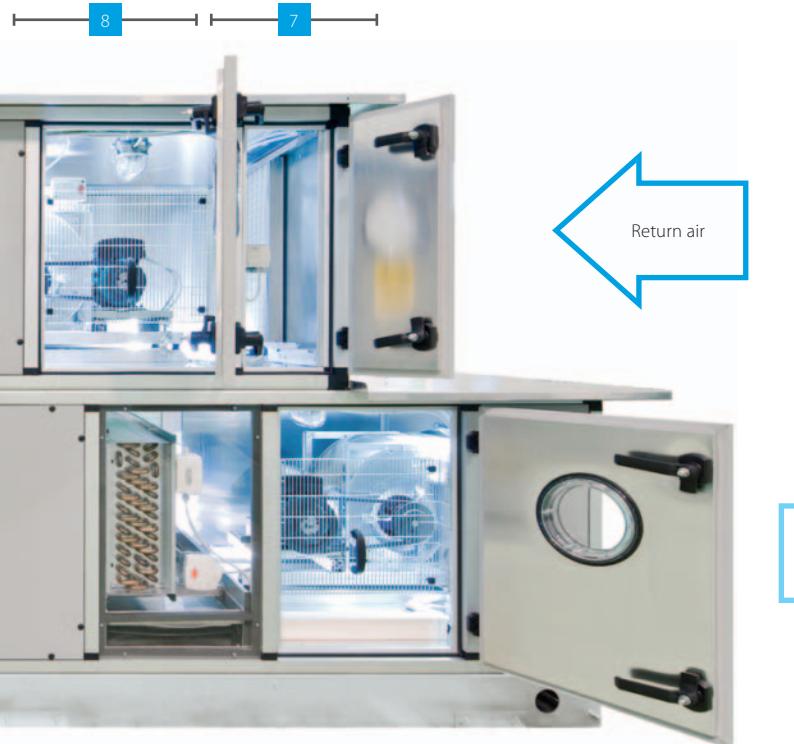

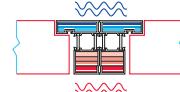

### Unique section to section thermal break profile

- › Thermal bridge free for the entire AHU
- › Smooth interior surface with improved IAQ (Indoor Air Quality)

Conventional design

Daikin design

### Return side

- 7** Bag filter with factory-mounted differential pressure manometer and hinged door.
- 8** Exhaust air fan (with hinged door, opening, drive monitoring, mounted and cabled lighting and ON/OFF switch)
- 9** Mixing box with damper and factory-mounted actuators
- 10** Heat recovery system (plate heat exchanger or rotation exchanger)
- 11** Damper section including ventilation grilles, factory-mounted actuators

### Heat recovery systems

- › Heat wheel, sensible or sorption
- › Plate heat exchanger (optional bypass)
- › Run-around coils

### Other section

- › Attenuator section
- › Mixing box section with actuators or manual controlled dampers
- › Empty section

### Filters

- › Synthetic pleated filter
- › Flat filter aluminium mesh
- › Rigid bag filter
- › Soft bag filter
- › High efficiency filter
- › Carbon absorption filter
- › Carbon deodorizing filter

### Accessories

- › Control features
- › Frost protection
- › Manometers
- › Drive guard
- › Roof
- › ...

# Professional

## Flexible solution for custom applications

### Flexible design

Daikin Professional air handlers are available in 27 pre-defined configurations, optimized for the most cost-effective selection and manufacturing standardization.

- › Airflow from 500 m<sup>3</sup>/h up to 144,000 m<sup>3</sup>/h
- › All the sizes are modularly manufactured to facilitate the transport and the assembly on site.

### Variable dimensioning

Size	Airflow (m <sup>3</sup> /h)	Height - mm	Width - mm
1	1,105	550	850
2	1,550	600	900
3	1,980	650	950

10	6,600	900	1,550
11	7,950	1,100	1,550
12	9,320	1,100	1,650
13	10,050	1,150	1,650

Size	Airflow (m <sup>3</sup> /h)	Height - mm	Width - mm
14	13,200	1,400	1,850
15	19,200	1,500	2,100
16	25,300	1,580	2,650
17	31,500	1,750	2,750
18	37,000	1,800	3,240
19	43,400	2,100	3,090
20	51,300	2,250	3,340
21	58,000	2,250	3,820
22	67,500	2,400	4,040
23	78,000	2,450	4,490
24	84,700	2,700	4,490
25	98,000	2,850	4,890
26	111,000	2,850	5,490
27	124,000	3,000	5,990

- › 1 cm increment for width & height dimensions
- › No additional cost for customized unit size
- › No additional lead time

### Example

Airflow (m <sup>3</sup> /h)	Unit Size	Height (mm)	Width (mm)	Face Velocity (m/s)
15,000	STD 15	1,500	2,100	1.95
	1,500x1,750	1,500	1,750	2.46

### Plug and play: More control, more flexibility

The plug and play control system allows for more precise control than ever before, allowing the user to determine a wide range of settings, resulting in excellent operational flexibility. The factory-fitted electrical control panel, complete with Direct Digital Control (DDC) is combined with in-built temperature, humidity and CO<sub>2</sub> sensors to control mixing dampers, heat recovery wheels, water valves, pressure switches

for filters and fans, fan motors and inverters. All these components are wired internally and individual AHU modules are linked by fast connectors. The AHU control system can manage the chilled water coil, hot water coil, DX cooling and/or heating coil(s) (in conjunction with ERQ/VRV) of single or multiple refrigerant circuits (up to a maximum of four circuits per DX coil).

# Energy

## High-end solution for the highest energy efficiencies

### High efficiency heat recovery

The D-AHU Energy series is equipped with high efficiency heat recovery system with rates up to 90%. Various models are available with a heat recovery system equipped with a condensation wheel, an enthalpy wheel or a sorption wheel.

### Return on investment

An air handling unit is critical to an effective climate control system and, although the initial investment can appear high, the savings generated by our advanced designs and operating efficiencies guarantee a rapid return on the investment made. Our D-AHU Energy series has been designed to deliver exceptional performance thus driving down the energy consumed and so lowering energy bills. Taken over the expected 15-year life-span of the equipment, this will result in an enormous saving, especially in a time of ever increasing energy prices.

### Premium efficiency motor

Premium efficiency motors in line with EU regulation (EC) no. 640/2009 are available for the Energy series in order to further reduce electrical power consumption.

### High efficiency fan

Fans with double-width, double-inlet and backward curved airfoil blades are available with efficiencies of up to 85% as well as reinforced bearings for longer lifespan.

Specific Fan Power (SFP) is a measure used in the evaluation of the energy consumed by an air handling unit. In other words, the lower the SFP, the lower the power consumption of the entire air handler. Thanks to very efficient components our Energy series can provide just that.

### Plug and play controls

Daikin has developed a control system to efficiently manage all components selected either independently or through an external supervision system. The control package includes the control panel, advanced microprocessor and in-built sensors for temperature, humidity and air quality.

# Easy

## Quick solution for climate control

The range covers an area of airflow rates from 500 m<sup>3</sup>/h up to 33,000 m<sup>3</sup>/h\*, with the possibility to choose the more appropriate face velocity, depending on the treatment required.

Fifteen predefined configurations optimized to reach the best compromise between competitiveness and manufacturing standardization.

### Quick and easy installation

Designed to overcome installation constraints where space requirements of the section "height x width" must be adapted to the available space. The Easy series of air handling units allow to tailor the unit sizes through increments of 1 cm average.

Size	Airflow (m <sup>3</sup> /h)	Height (mm)	Width (mm)
Std 1	1,105	550	850
Std 2	1,550	600	900
Std 3	1,980	650	950
Std 4	2,600	780	1,100
Std 5	3,170	780	1,150
Std 6	3,550	800	1,150
Std 7	4,000	800	1,250
Std 8	4,800	850	1,300
Std 9	5,560	900	1,350
Std 10	6,600	900	1,550
Std 11	7,950	1,100	1,550
Std 12	9,320	1,100	1,650
Std 13	10,050	1,150	1,650
Std 14	13,200	1,400	1,850
Std 15	19,200	1,500	2,100

### Example

Airflow (m <sup>3</sup> /h)	Unit Size	Height (mm)	Width (mm)	Face Velocity (m/s)
15,000	STD 15	1,500	2,100	1.95
	1,500x1,700	1,500	1,700	2.48

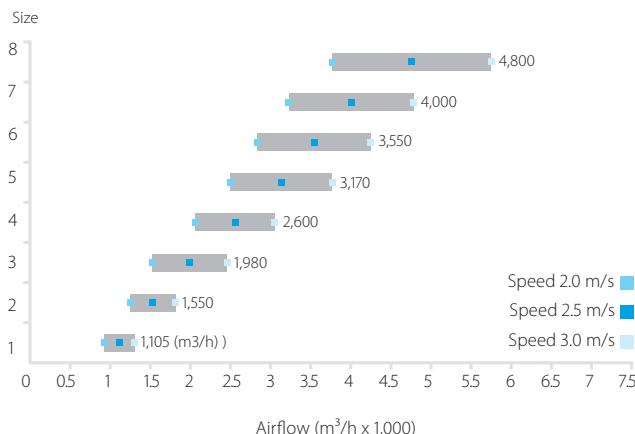

### Infinitely variable sizes

#### Flexible sizing for AHU optimization

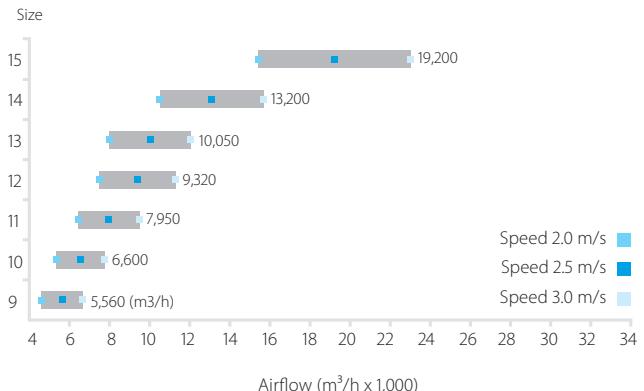

- › 1 cm increment for width & height dimensions
- › No additional cost for non-standard unit size
- › No additional lead time

\*Airflow limits of 500 m<sup>3</sup>/h and 33,000 m<sup>3</sup>/h are calculated using non standard sizes (max dimensions 2,150x2,150) and considering 2.5 m/s coil face velocity

### D-AHU Easy 1-8

### D-AHU Easy 9-15

# Modular

## High-end solution with heat recovery

### Energy efficiency and indoor air quality

- › Predefined sizes
- › IE4 premium efficiency motor
- › High efficiency heat wheel (heat recovery)
- › Compact design
- › Advanced control features
- › Easy installation
- › Indoor air quality compliant with VDI 6022 hygiene guideline
- › Operating limits from -25 °C, -40 °C with electric heaters, up to +46 °C ambient temperature
- › VRV IV and ERQ coupling capability
- › Indoor and outdoor versions
- › Free cooling capability
- › Economy and Night mode operation
- › Monitoring and control through Daikin ITM

### EC Fan

- › Air flow or pressure control (Variable Air Volume - Constant Air Volume)
- › Nominal air flow programmed at factory
- › Silent operation

### Simple, quick installation

The Modular series' Plug & Play design is more than just a convenient feature for installers. It offers cost-saving benefits as there is no need for expensive adjustments before the unit is commissioned. Plug & Play makes everyone's life simpler, safer and more economical.

# Air handling unit application

## Daikin Fresh Air package

The Daikin fresh air package provides a complete solution, including all unit controls (expansion valve, control box an AHU controller) and sensors factory mounted and configured.

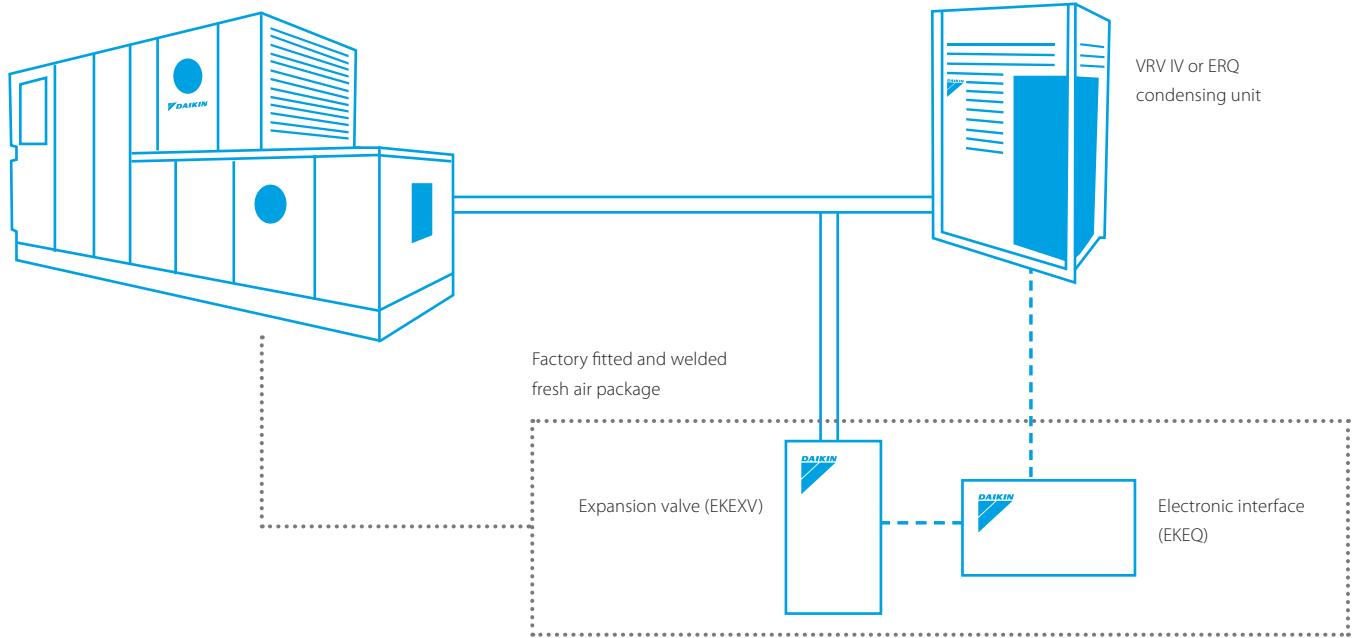

This unique solution allows for plug and play connection of our AHU series to Daikin ERQ and VRV condensing units.

### High efficiency

Daikin heat pumps are renowned for their high energy efficiency. Integrating the AHU with a heat recovery system is even more effective since an office system can frequently be in cooling mode while the outdoor air is too cold to be brought inside in an unconditioned state. In this case heat from the offices is merely transferred to heat up the cold incoming fresh air.

### High comfort levels

Daikin ERQ and VRV units respond rapidly to fluctuations in supply air temperature, resulting in a steady indoor temperature and resultant high comfort levels for the end user. The ultimate is the VRV range which improves comfort even more by offering continuous heating, also during defrost.

For more information on the connection of VRV or ERQ DX units with air handling units refer to the chapter Ventilation & Biddle air curtains of this catalogue

## Why choose Daikin refrigeration?

- **High efficient** solutions to match your refrigeration needs
- For all types of **commercial and industrial** applications
- Innovative and reliable VRV technology: proven and tested for ZEAS and CONVENI-PACK
- Compliant with **new F-Gas regulation** (R-410A)
- Proven refrigeration technology with over 3,000 R-410A field installations in Europe
- Urban proof solutions in terms of **compact dimensions** and **low sound levels**

### Benefits for the installer

- › Plug and play solutions
- › Pre-charged and factory-tested
- › Compact design for restricted installation space

### Benefits for the consultant

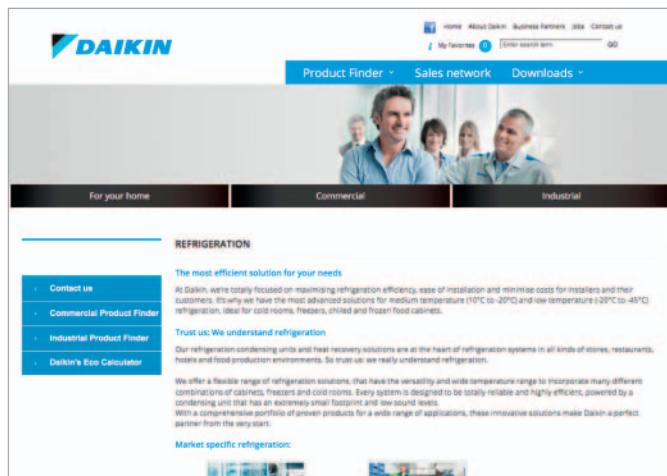

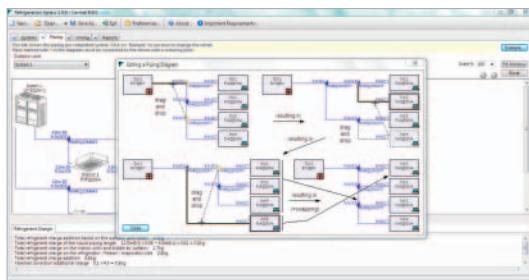

- › Daikin ZEAS identified as best available technology according to Eco-design
- › Easy and intuitive selection of outdoor condensing units with Refrigeration Xpress
- › Wide range to match most refrigeration needs according to F-gas Regulation according to F-gas Regulation

### Benefits for the end user

- › High efficiency technology for high ROI
- › Heat recovery technology on Conveni-Pack
- › Proven reliability and high performance
- › Ideal for urban applications

## Selection software

Visit the website: [www.daikineurope.com/refrigeration](http://www.daikineurope.com/refrigeration)  
Download the selection software Refrigeration Xpress from the business portal.

The most efficient solution for your needs  
At Daikin, we're totally focused on maximizing refrigeration efficiency, ease of installation and minimizes costs for installers and their customers. That's why we have the most advanced solutions for medium temperature (10°C to -20°C) and low temperature (-20°C to -45°C) refrigeration, ideal for cold rooms, freezers, chilled and frozen food cabinets.

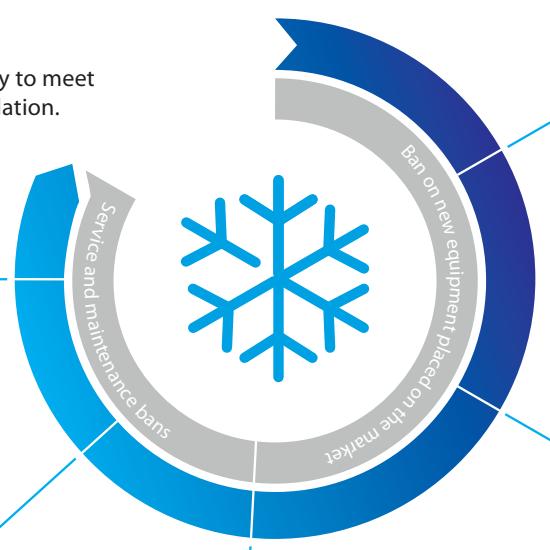

## F-Gas compliant

Daikin refrigeration units are ready to meet the targets of the new F-Gas regulation.

01/01/2030  
Service ban on recycled HFCs with GWP of 2500 or more

Service ban on use in the maintenance or servicing of existing refrigeration equipment with a charge size of 40 tonnes of CO<sub>2</sub> eq or more - provided they have been recovered from the equipment. Can only be used by the firm that recovered it or by the firm whose installation it was recovered from.

01/01/2030  
Service ban on reclaimed HFCs with GWP of 2500 or more  
Used for the maintenance or servicing of existing refrigeration equipment with a charge size of 40 tonnes of CO<sub>2</sub> eq or more - provided they are labelled appropriately.

01/01/2020  
Ban on HFCs with GWP of 2500 or more

Applies to stationary refrigeration equipment or its associated remote plant. Equipment operating below -50 deg C is exempt

01/01/2022  
Ban on HFCs with GWP of 150 and over

Applies to multipack centralized refrigeration systems for commercial use with a rated capacity of 40kW or more - except where used in the primary refrigerant circuit of cascade systems, where HFCs with a GWP of less than 1500 may be used

\* Regulation n° 517/2014 on fluorinated greenhouse gases of 16 April 2014

## ZEAS condensing unit for refrigeration

### Why choose ZEAS?

- High energy efficiency
  - › Daikin inverter scroll compressor with economizer technology
  - › DC inverter fan technology
- Reliable operation
  - › Error-proof component selection
  - › Factory leak-tested and pre-charged
- Small foot print and low weight
  - › Very compact design
  - › Easy to install, even in small spaces
- Comfort
  - › Quiet operation
  - › High grade sound insulation on both panels and compressors
  - › Specially designed fan blades to limit sound emissions
  - › 4 low sound operation settings including night mode
- Intelligent control
  - › Unit can be connected to a 3rd party monitoring system
  - › Remote control of target evaporation temperature and error reset

### Benefits for installers

- › Reduced delivery time thanks to European manufacturing plant
- › Reduced piping requirements and installation time
- › Integrated electrical & control box
- › Unit already pre-charged with refrigerant

### Benefits for consultants

- › One model can cover for most refrigeration needs in the market
- › Wide capacity range
- › High modularity of the refrigeration system
- › Suitable to indoor installations through the use of high ESP fans

### Benefits for end users

- › Energy consumption is cut by 10 to 35% compared to traditional refrigeration equipment
- › Small footprint and low weight requiring only light weight supporting structures
- › A neighbourhood-friendly choice with its special night operation mode

# ZEAS condensing unit for commercial refrigeration with scroll technology

Refrigeration solution for medium to large capacity applications featuring proven VRV technology

- › Perfect solution for all cooling and freezing applications with variable load conditions and high energy efficiency requirements. In particular used in supermarkets, cold storage, blast coolers and freezers etc.
- › DC inverter scroll compressor with economiser function results in high energy efficiency and reliable performance
- › Factory tested and pre-programmed for quick and easy installation and commissioning
- › Increased installation flexibility thanks to limited dimensions
- › Low sound level including „night mode“ operation
- › For small freezing capacity, single ZEAS units can be connected to a booster unit
- › Dedicated unit to allow multi combination of 2 x 15 HP or 2 x 20 HP resulting in less pipework or installation time

(1) Cooling: evaporating temp. -10°C; outdoor temp. 32°C; suction SH10°C (2) Cooling: evaporating temp. -35°C; outdoor temp. 32°C; suction SH10°C (3) Sound pressure data: measured at 1m in front of unit, at 1.5m height | RLA is based on following conditions: outdoor temp. 32°CDB; suction SH 10°C; saturated temperature equivalent to suction pressure -10°C

# Mini-ZEAS

Plug and play system  
reduces installation time and cost

Two models available

F-Gas compliant (R-410A)

Lowest sound levels

Small footprint  
(up to 60% smaller than  
equivalent products in  
the market)

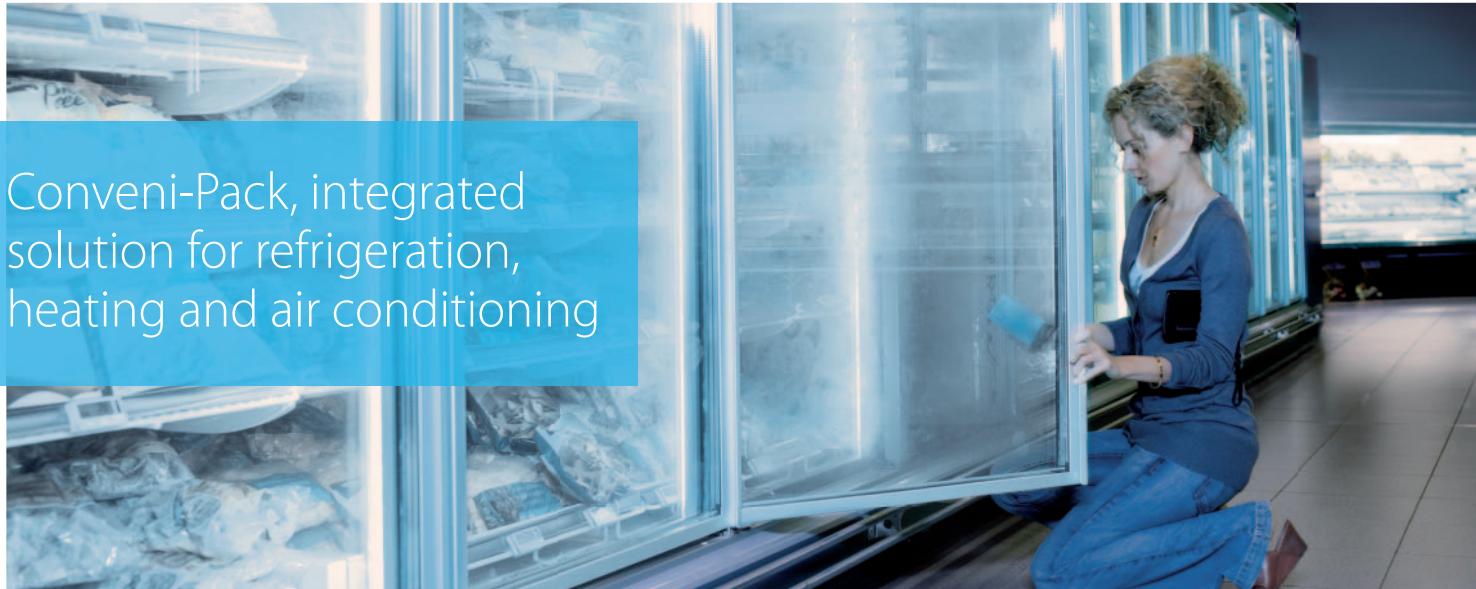

Coming:  
**Spring**  
2016

Ideal solution  
for multiple smaller  
refrigeration applications  
(butcher shops, bakeries,  
restaurants,...)

High efficiency  
reducing energy costs

 DAIKIN

## Conveni-Pack, integrated solution for refrigeration, heating and air conditioning

### Why choose Conveni-Pack?

- Energy-saving combination
  - › First mass-produced, whole-building system to combine refrigeration, heating, air conditioning in one circuit
- High energy efficiency
  - › Heat recovery
  - › Savings of up to 50% on energy costs
  - › Daikin inverter scroll compressor with economizer technology
- Reliable operation
  - › Error-proof component selection
  - › Factory leak-tested and pre-charged
- Very compact design
  - › Easy to install, even in small spaces
  - › Small footprint and low weight
  - › Reduced piping requirements
- Comfort
  - › Quiet operation : Improved acoustics thanks to night operation mode, inverter control and inverter driven fans with optimised blades and grills
  - › High grade sound insulation on both panels and compressors
  - › Specially designed fan blades to limit sound emissions
  - › 4 low sound operation settings including night mode

### Benefits for installers

- › Integrated electrical & control box
- › Unit already pre-charged with refrigerant
- › Established VRV technology ensuring optimised installation and maintenance

### Benefits for consultants

- › Flexible system for multiple applications
- › Connectable to all grocery refrigeration applications and supplied with a wide range of air conditioning indoor units to meet shop requirements
- › Outdoor units can be positioned up to 35m above or 10m below the indoor units
- › Piping length possible up to 130m
- › Suitable for indoor installation through the use of high ESP fans

### Benefits for shop owners

- › Thought design for supermarkets and smaller retail outlets
- › Maximised retail sales space available as
- › Conveni-Pack has a footprint up to 60% smaller than conventional grocery refrigeration systems
- › Reduced energy consumption by up to 50% through heat recovery
- › Quiet operation, thus ideal for densely populated urban areas

## Marketing tools

### Refrigeration Xpress

User-friendly design software for Conveni-Pack and ZEAS condensing units. Its detailed report includes a list of materials, piping and wiring diagrams, and device options.

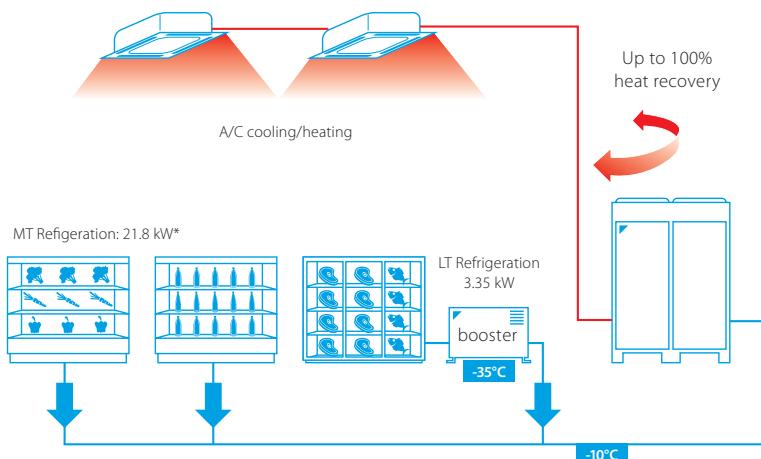

### Short videos

- › Visit the Daikin Europe channel YouTube for a short animation on the unique refrigeration solution Conveni-Pack
- › Discover why a Belgian petrol station owner chose Daikin for its shop comfort and refrigeration needs.  
[www.youtube.com/DaikinEurope](http://www.youtube.com/DaikinEurope)

### Energy efficient heat recovery

- › Conveni-Pack recovers up to 100% of the heat generated by refrigeration showcases or evaporators and re-uses it to heat the retail space at no additional cost.

\*maximum available refrigeration capacity when no booster units are connected

### Reference

#### Edeka Buschkühle supermarket (Germany)

2 Conveni-Pack systems supply 32 meters of service counters, 12.5 meters of convenience fridges, one cooling storage room for fruit, an air curtain and 5 indoor units; the ZEAS system supplies two deep-freeze cabinets with a total capacity of 5 kW.

Discover more references on  
[www.daikineurope.com/references](http://www.daikineurope.com/references)

### Internationally awarded

Since the introduction Conveni-Pack was recognized as innovative and environmentally – proof of which are the recent German and Irish award:

- › Winner of 2014 Institute of Refrigeration Ireland (IRI) Environmental award
- › Case: application of Carel controls to Daikin Conveni-Pack refrigeration at a Tesco store
- › Environmental Friendliness category of the Top Retail Product Awards 2014 in Germany

# Conveni-Pack refrigeration system with heat recovery

Refrigeration solution for food retailers featuring award winning technology for heat recovery

- › Integrates high and low temperature refrigeration and air conditioning (including heating) into one system
- › By using heat recovery, optimised controls and state of the art compressor technology, Conveni-pack can reduce annual energy consumption up to 50% or more, compared to conventional systems
- › Lower associated CO<sub>2</sub> emissions thanks to the heat pump technology
- › Conveni-pack's modular design allows it to be used for smaller as well as larger shops
- › The modularity of the Conveni-pack system maximises installation flexibility. Outdoor units can be grouped into blocks or rows, or distributed around the building, to meet individual installation constraints
- › The heat extracted from the refrigeration showcases or evaporators can be re-used for comfort heating of the shop at no extra cost
- › Low sound level including „night mode“ operation

# Condensing unit for commercial refrigeration

## Main benefits

- › Low operation sound level
- › Easy to install - fully equipped - packaged
- › Energy efficiency and performance
- › Robust and reliable design

## Installer benefits

- › Small, compact and robust for easy handling and installation in limited space
- › Fully factory tested and pre-wired electrical box for quick and easy installation and commissioning
- › Easy service thanks to very accessible components behind removable robust panels

## End-user benefits

- › Very quiet operation
- › Strong anti-corrosion housing for long life, even in harsh environmental conditions
- › Trustworthy units, with proven component reliability and fully qualified for the most demanding applications
- › Reduced energy consumption, thanks to efficient compressors and condenser fan speed control (except series 1)
- › Fully packaged unit at a competitive price

GWP : R-134a (1430), R-404A (3921.6), R-407A (2107), R-407C (1773.85), R-407F (1825)

# Condensing unit for industrial refrigeration

Designed for outdoor use, the large condensing units are a perfect medium to high capacity refrigeration solution for cold stores, distribution platforms, supermarkets, food processing, etc in low and medium temperature applications.

These industrial condensing units are real workhorses designed for maximum performance in minimum space.

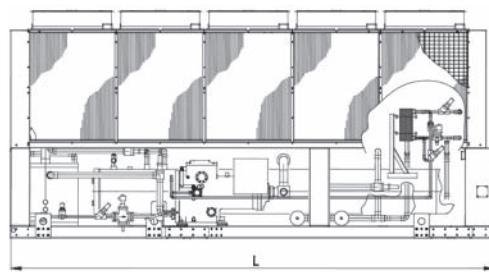

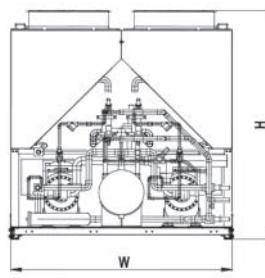

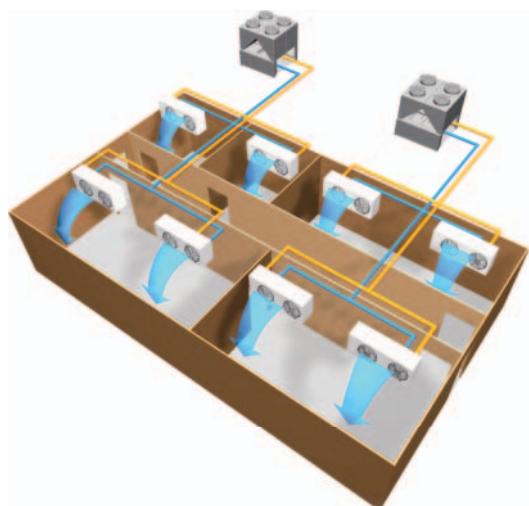

- › High energy efficiency: inverter controlled compressor, economizer, high performance condenser
- › Possibility of having a stand-by compressor
- › Easy installation, ready to connect evaporators
- › Integrated starter and control panel with electronic controller
- › Space saving construction due to the compact design of the condenser coils arranged in a 'W' configuration
- › Low sound operation
- › Approved according to EN 378: 2008 (Safety and environmental requirements)
- › Refrigerants: R-404A, R-134a, R-407C, R-507A

A comprehensive product range with 1 or 2 compressors and 4, 6, 8 or 10 condenser fans

- › Chilled application:  
R-404A | 113 - 417 kW  
R-134a | 72.5 kW - 315.4 kW  
R-407C | 100.3 kW - 430.2 kW  
(at T<sub>0</sub> = -10°C / Tamb = +32°C)
- › Frozen application:  
R-404A | 37 - 159 kW  
(at T<sub>0</sub> = -35°C / Tamb = +32°C)

\* R-134a GWP = 1,430, R-407C GWP=1,773.85, R-507A GWP=3,985, R-404A GWP=3,921.6

# Market leading controls for 2016

- Intuitive & user-friendly interface
- Cross pillar integration
- Cloud control
- Smart energy management
- Integration of Daikin and third party products

**Intelligent Manager**

## Mini BMS for medium to large commercial buildings

- › Price competitive mini BMS
- › Cross-pillar integration of Daikin products
- › Integration of third party equipment via WAGO or BACnet/IP
- › Connect up to 512 indoor units groups

→ [more information on page „Functions overview“ on page 492](#)

**DCC601A51**

## Advanced centralised controller with Cloud connection

- › Simply control your entire building centrally
- › Total solution concept (integration of Split, Sky Air, VRV, ventilation, air curtains and hot water)
- › Stylish optional screen fits any interior
- › Cloud connection offers additional services such as online control, energy monitoring, comparison of energy consumption of multiple sites
- › Connect up to 32 indoor units

→ [more information on page „Advanced centralised controller with Cloud connection“ on page 490](#)

## Requirement tables per application

**Daikin offers various control solution adapted to the requirements of even the most demanding commercial application.**

- › Basic control solutions for those customers with few requirements and limited budget
- › Integrating control solutions for those customers that would like to integrate Daikin units into their existing BMS system

- › Advanced control solutions for those customers that expect Daikin to deliver a mini BMS solution, including advance energy management

## Controllers

## BR1E52A/B

# User friendly remote control with contemporary design

Graphical display of indicative electricity consumption  
(Function available in combination with FBQ-D, FCQG and FCGHQ)

### A series of energy saving functions that can be individually selected

- › Temperature range limit
- › Setback function
- › Presence & floor sensor connection (available on round flow and fully flat cassette)
- › kWh indication
- › Set temperature auto reset
- › Off timer

### Temperature range limit avoids excessive heating or cooling

Save energy by constraining the lower temperature limit in cooling and upper temperature limit in heating mode.

note : Also available in auto cooling/heating change over mode.

### kWh indication keeps track of your consumption

The kWh indication shows an indicative electricity consumption of the last day/month/year.

## BR1E53A/B/C

**COMING SPRING 2016**

# User friendly remote control incl. infrastructure cooling functions

- › Replaces BRC1E52A/B in Spring 2016 and includes following additional functionalities:
  - Duty rotation and back-up for infrastructure cooling
  - Remote control save mode : screen turns off when no person is changing mode or adjusting settings
  - Demand control: decreases the power consumption to 70 or 40 % when other large appliances need to be switched on
  - Selection of quiet mode function for the outdoor unit

### Other functions

- › Up to 3 independent schedules can be set, so the user can easily change the schedule himself throughout the year (e.g. Summer, winter, mid-season)
- › Possibility to individually restrict menu functions
- › Easy to use: all main functions directly accessible
- › Easy setup: clear graphical user interface for advanced menu settings
- › Real time clock with auto update to daylight saving time
- › Built-in backup power: when a power failure occurs all settings remain stored up to 48 hours
- › Supports multiple languages:  
English, German, Dutch, Spanish, Italian, Portuguese, French, Greek, Russian, Turkish, Polish (BRC1E52A)  
English, German, Czech, Croatian, Hungarian, Romanian, Slovenian, Bulgarian, Slovak, Serbian and Albanian (BRC1E52B)

## BR2E52A / BR3E52A

# Simplified wired remote control developed for hotel applications

BR2E52A

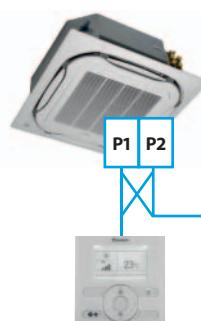

Heat recovery type

BR3E52A

Heat pump type

- › Symbol driven interface for intuitive control
- › Functions restricted to basic customer needs
- › Contemporary design
- › Energy saving thanks key card, window contact integration and set point limitation (BRP7A51)
- › Flexible setback function ensures room temperature remains within comfortable limits to ensure guest comfort

### Key card and window contact integration

- › Flat backpanel for easy installation
- › Easy commissioning: intuitive interface for advanced menu settings
- › 2 versions available:
  - Heat pump type: temperature, fan speed, ON/OFF
  - Heat recovery type: temperature, mode, fan speed, ON/OFF
- › Replaces existing BRC2C51 & BRC3A61

BRC073

## Wired remote control for residential use

BRC073

- › User friendly remote control with contemporary design
- › Easy to use: all main functions directly accessible
- › Easy commissioning: intuitive interface for advanced menu settings
- › Optimise your air conditioning system by activating a series of energy saving functions (temperature range limit, setback function, off timer, ...)
- › Set up to 3 independent schedules, so the user can easily change the schedule himself throughout the year (e.g. summer, winter, mid-season)
- › Real time clock with auto update to daylight saving time

- › Supports multiple languages (English, German, French, Italian, Spanish, Portuguese, Dutch, Czech, Croatian, Hungarian, Slovenian, Romanian, Bulgarian, Russian, Greek, Turkish, Polish, Serbian and Slovak) (depending on language package)
- › Possibility to individually restrict menu functions
- › Possibility to individually restrict each button
- › Possibility to individually restrict each operation mode (Cooling, Heating, Auto, etc.)
- › When a power failure occurs all settings remain stored up to 48 hours thanks to the built-in backup power and the clock remains running
- › Setback operation maintains the indoor temperature at your specified comfort level during absence, thus saving energy

BRC1D52

## Wired remote control

BRC1D52

- › Schedule timer:  
Five day actions can be set as follows:
  - set point: unit is switched ON and normal operation is maintained
  - OFF: unit is switched OFF
  - limits: unit is switched ON and min./max. control (cf. limit operation for more details)
- › Home leave (frost protection): during absence, the indoor temperature can be maintained at a certain level. This function can also switch the unit ON/OFF
- › User friendly HRV function, thanks to the introduction of a button for ventilation mode and fan speed
- › Immediate display of fault location and condition
- › Reduction of maintenance time and costs

### Display

ARC4\*/BRC4\*/BRC7\*

## Infrared remote control

ARC466A1

BRC4\*/BRC7\*

Operation buttons: ON / OFF, timer mode start / stop, timer mode on / off, programme time, temperature setting, air flow direction (1), operating mode, fan speed control, filter sign reset (2), inspection (2)/ test indication (2)  
Display: Operating mode, battery change, set temperature, air flow direction (1), programmed time, fan speed, inspection / test operation (2)

1. Not applicable for FXDQ, FXSQ, FXNQ, FBDQ, FDQS, FBQ
2. For FX\*\* units only
3. For all features of the remote control, refer to the operation manual

ARCWLA / ARCWB

*Siesta*

## Siesta individual control systems

### Overview controllers for Siesta Sky Air

Siesta Sky Air indoor units	Controllers

### Overview of features

ARCWB

	Feature	ARCWB
		AHQ-C and ACQ-D / Standard for ABQ-C
1	ON/OFF switch	-
2	Temperature setting	<ul style="list-style-type: none"> <li>Default range 16-30°C</li> <li>Optional range 20-30°C</li> <li>Switch between °C and °F</li> </ul>
3	Room temperature sensor on remote control	-
4	Cool / Fan dry / Heat / Auto	-
5	Sleep mode	-
6	Fan Speed selection	-
7	Delay timer	• •
8	7-days programmable timer	-
9	Real time clock display	-
10	Air swing selection	<ul style="list-style-type: none"> <li>ON/OFF swing mode</li> <li>Change swing option (draft/soil prevention or standard)</li> </ul>
11	LCD display without backlight	-
12	Key lock	-
13	Error code indication	-
14	IR receiver to enable compatibility with infrared remote control (disabled when lock function is activated)	-
15	Last state memory from indoor PCB	-
16	Silent mode	•
17	Turbo mode	•
18	Compressor test model (compressor force ON)	-
19	Daikin inverter error code	-
20	UART communication port (for Daikin protocol)	-
21	Backup battery	-

### Specifications

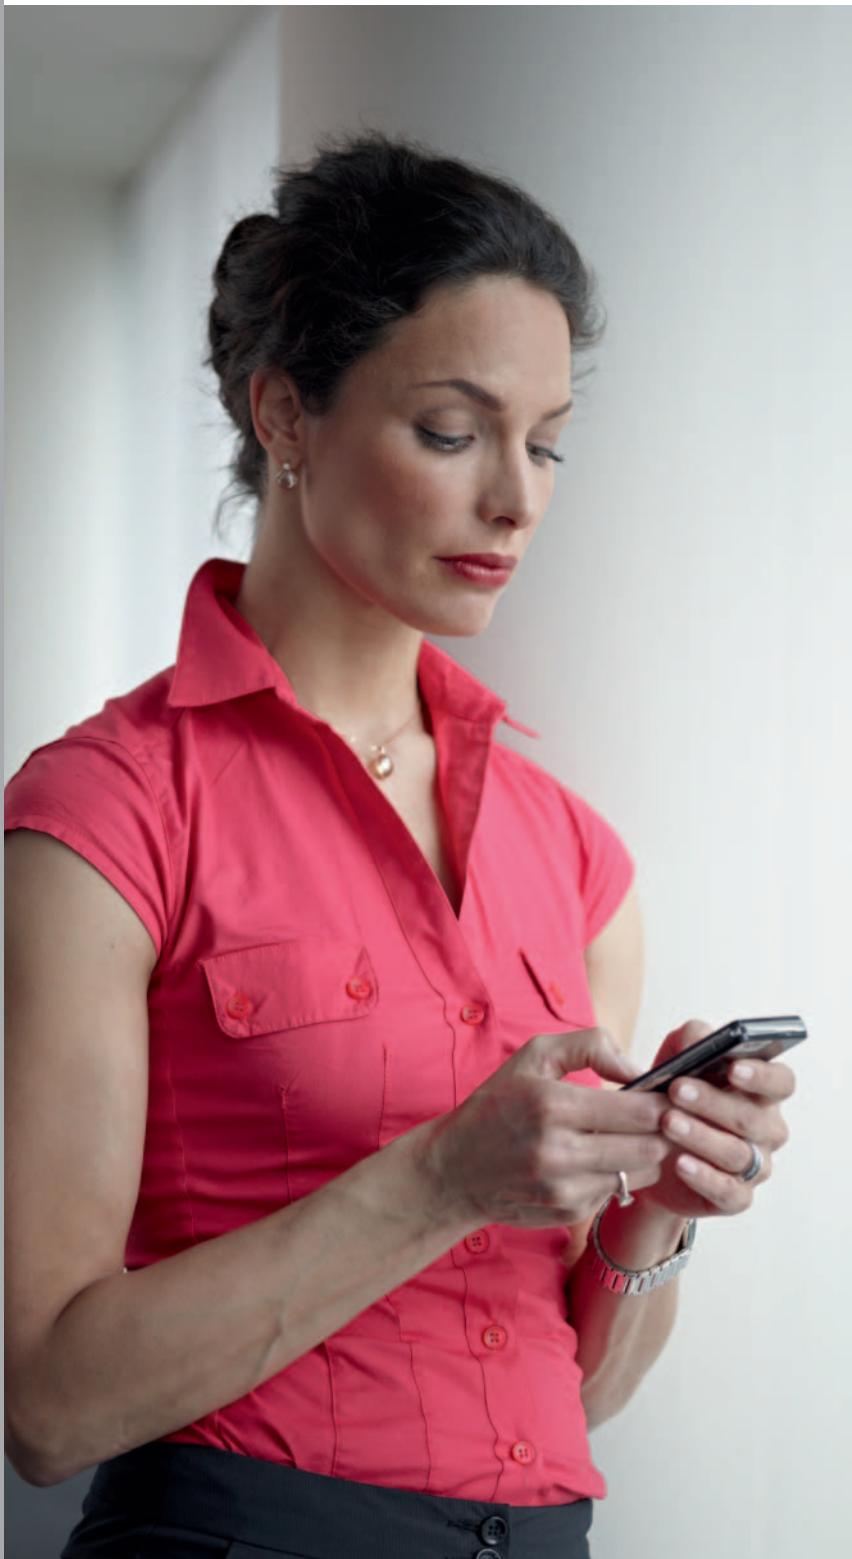

- › Dimensions (length x width x height) ARCWB:  
0.15 m x 0.21 m x 0.04 m.
- › ARCWB comes standard with a 10 metre cable, which can be extended to maximum cable length of 15 metres. ARCWB can only control one indoor unit at a time; group control is only possible when using option R04084124324.

- Standard
- By dipswitch selection
- 1, 2 & 4 hours delay

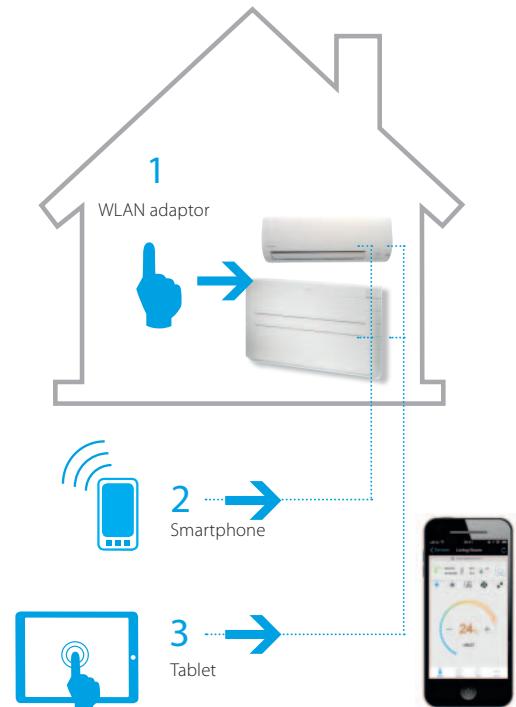

## Online controller

BRP069A41/42/43/45

# Always in control, no matter where you are

The plug-and-play Online Controller allows you to set and even schedule the temperature from anywhere using Apple or Android systems. So you can manage the unit when away from home, offering optimal climate control while saving energy.

With the Daikin Online Controller application in combination with the plug-and-play wireless LAN device and an active internet connection, you can manage your unit from anywhere, offering optimal climate control while saving energy.

The Daikin Online Controller application can control and monitor the status of up to 50 units and allows you to:

- › Monitor the status of your heat pump unit
- › Control the operation mode, set temperature, air flow rate and direction
- › Schedule the set temperature and operation mode with up to 4 actions per day for each day of the week

**Connectable indoor units**

\* controller included with the unit

**Features Online Controller**

The Daikin online controller can manage your unit in several ways.

You can operate it in-home by connecting your smartphone to a private wireless network or out-of-home by connecting your smartphone to a mobile network (e.g. 3G) or an external wireless network.

Feature	In-home operation	Out-of-home operation
Start/stop operation	•	•
Set operation mode:	•	•
- Automatic		
- Cooling		
- Heating		
- Fan only		
- Dry		
Set temperature point	•	•
Set weekly schedule timer		
Available actions: Start/stop operation, select operation mode, set temperature set point. Maximum 4 actions per day (28 actions total).	•	•
Set air flow rate	•	•
Set air flow direction	•	•
Readout current room temperature	•	•
Readout current outdoor temperature	•	•
Readout current humidity		
Readout smartphone application version	•	•
Readout wireless adapter firmware version	•	•
Readout error code (if any)	•	•
Set custom adapter name	•	•
Disable/enable adapter LED's	•	•
Child lock function	•	
Connection test function	•	
Remote adapter software updates	•	
Automatic daylight saving time function	•	•
Demo function (internet connection required)		•

## Centralised control systems

Centralised control of the Sky Air and VRV system can be achieved via 3 user friendly compact remote controllers. These controls may be used independently or in combination with 1 group = several (up to 16) indoor units in combination and 1 zone = several groups in combination.

A centralised remote control is ideal for use in tenanted commercial buildings subject to random occupation, enabling indoor units to be classified in groups per tenant (zoning).

The schedule timer programmes the schedule and operation conditions for each tenant and the control can easily be reset according to varying requirements.

### DCS302C51

## Centralised remote control

Providing individual control of 64 groups (zones) of indoor units.

- › a maximum of 64 groups (128 indoor units, max. 10 outdoor units) can be controlled
- › a maximum of 128 groups (128 indoor units, max. 10 outdoor units) can be controlled via 2 centralised remote controls in separate locations
- › zone control
- › group control
- › malfunction code display
- › maximum wiring length of 1,000m (total: 2,000m)
- › air flow direction and air flow rate of HRV can be controlled
- › expanded timer function

### DST301B51

## Schedule timer

Enabling 64 groups to be programmed.

- › a maximum of 128 indoor units can be controlled
- › 8 types of weekly schedule
- › a maximum of 48 hours back up power supply
- › a maximum wiring length of 1,000m (total: 2,000m)

### DCS301B51

## Unified ON/OFF control

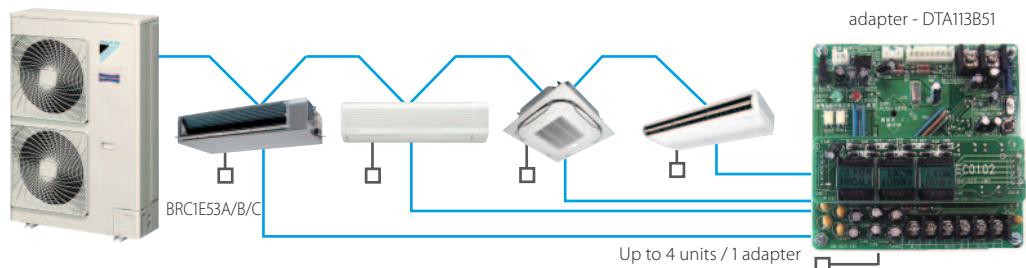

Providing simultaneous and individual control of 16 groups of indoor units.

- › a maximum of 16 groups (128 indoor units) can be controlled
- › 2 remote controls in separate locations can be used
- › operating status indication (normal operation, alarm)
- › centralised control indication
- › maximum wiring length of 1,000m (total: 2,000m)

## DTA113B51

## Basic solution for control of Sky Air and VRV

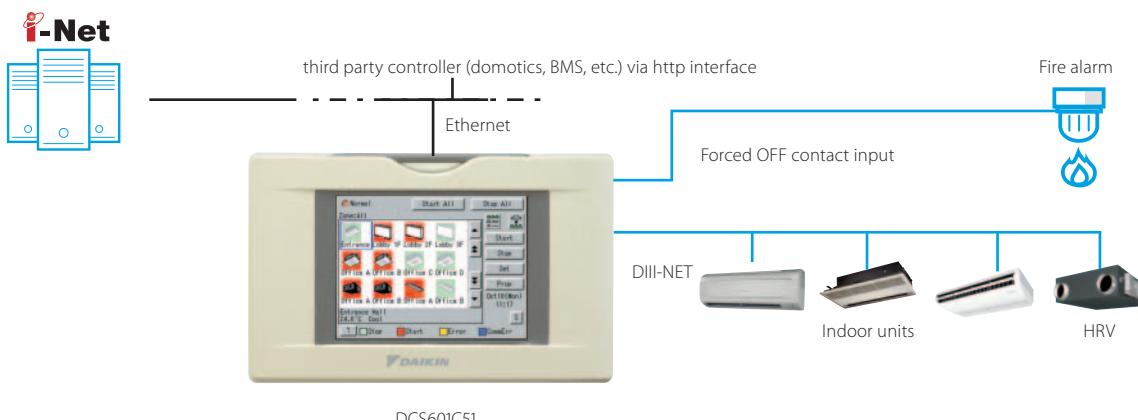

- › Rotation function
- › Backup operation function.

## Intelligent Controller

## DCS601C51

Detailed & easy monitoring and operation of VRV systems (max. 64 indoor units groups).

**Languages**

- › English
- › French
- › German
- › Italian
- › Spanish
- › Dutch
- › Portuguese

**System layout**

- › Up to 64 indoor units can be controlled
- › Touch panel (full colour LCD via icon display)

**Control**

- › Individual control (set point, start/stop, fan speed) (max. 64 groups/indoor units)
- › Set back schedule
- › Enhanced scheduling function (8 schedules, 17 patterns)
- › Flexible grouping in zones
- › Yearly schedule
- › Fire emergency stop control
- › Interlocking control
- › Increased HRV monitoring and control function
- › Automatic cooling / heating change-over
- › Heating optimization
- › Temperature limit
- › Password security: 3 levels (general, administration & service)
- › Quick selection and full control
- › Simple navigation

**Monitoring**

- › Visualisation via Graphical User Interface (GUI)
- › Icon colour display change function
- › Indoor units operation mode
- › Indication filter replacement
- › Multi PC

**Cost performance**

- › Free cooling function
- › Labour saving
- › Easy installation
- › Compact design: limited installation space
- › Overall energy saving

**Open interface**

- › Communication to any third party controller (domotics, BMS, etc.) is possible via open interface (http option DCS007A51)

**Connectable to**

- › VRV
- › HRV
- › Sky Air
- › Split (via interface adapter)

## DCC601A51

### Advanced centralised controller with Cloud connection

- Intuitive and user-friendly interface
- Flexible concept for stand alone and multi site applications
- Total solution thanks to integration of 3rd party equipment
- Monitor & control your small commercial building, no matter where you are

#### 2 solutions:

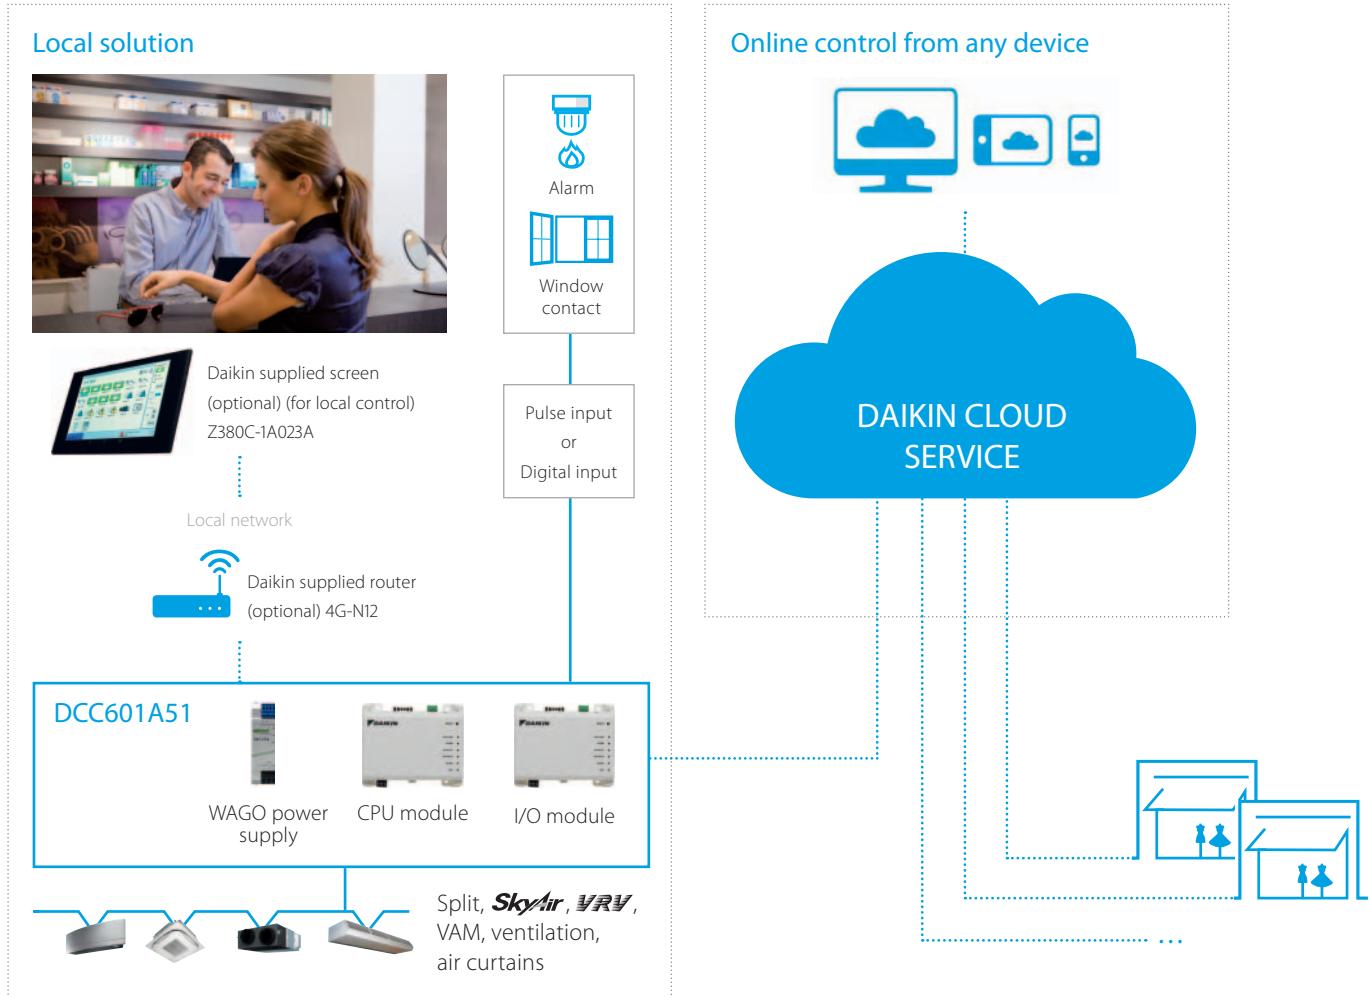

##### Local solution

- › Offline centralised control via stylish optional screen
- › Stylish interface fits any interior

##### Cloud solution

- › Flexible online control from any device (Laptop, tablet...)
- › Monitor & control one or multiple sites
- › Benchmark the energy consumption of different installations
- › Energy consumption follow-up to comply with local regulations

#### System layout

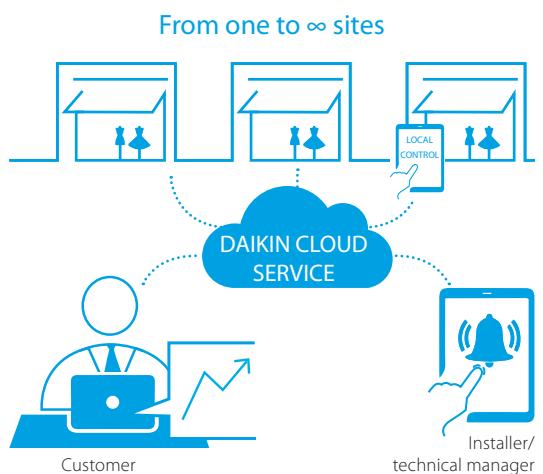

## Total solution

- › Total solution thanks to a large integration of Daikin products and 3rd party equipment
  - › Connect a wide range of Daikin units (Split, Sky Air, VRV, Ventilation, air curtains)
  - › Simply control your entire building centrally
  - › Increased customer shopping experience by better management of your shop comfort level

Daikin Cloud Services

- › Control your building no matter where you are
  - › Monitor and control multiple sites
  - › Installer or technical manager can remotely login to the site in case of malfunctions for first troubleshooting
  - › Benchmark the energy consumption of different installations
  - › Manage & track your energy use
  - › Monitor the long time operating units to keep the consumption under control

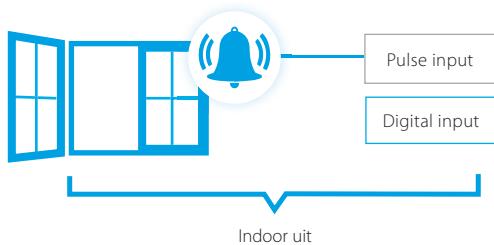

User friendly touch control

- › Stylish Daikin supplied optional screen for local control fits any interior
  - › Intuitive and user-friendly interface
  - › Full solution with simple control
  - › Easy commissioning

## Flexible

- › Inputs via digital and pulse input for 3rd party equipment such as kWh meters, emergency input, window contact, ...
  - › Modular concept allows your cloud to grow with your business
  - › Control up to 32 indoor unit groups , with a maximum of 32 indoor units

## Functions overview

		Local solution	Cloud solution
<b>Languages</b>	EN, FR, DE, IT, ES, NL, PT	●	●
<b>System layout</b>	Nº of connectable indoor units	32	32

	VAM, VKM ventilation	●	●
	Air curtains	●	●

# Mini BMS

## with full integration across all product pillars

- Price competitive mini BMS
- Cross-pillar integration of Daikin products
- Integration of third party equipment

### System overview

## User friendliness

- › Intuitive user interface
- › Visual lay out view and direct access to indoor unit main functions
- › All functions direct accessible via touch screen or via web interface

## Smart energy management

- › Monitoring if energy use is according to plan
- › Helps to detect origins of energy waste
- › Powerful schedules guarantee correct operation throughout the year
- › Save energy by interlocking A/C operation with other equipment such as heating

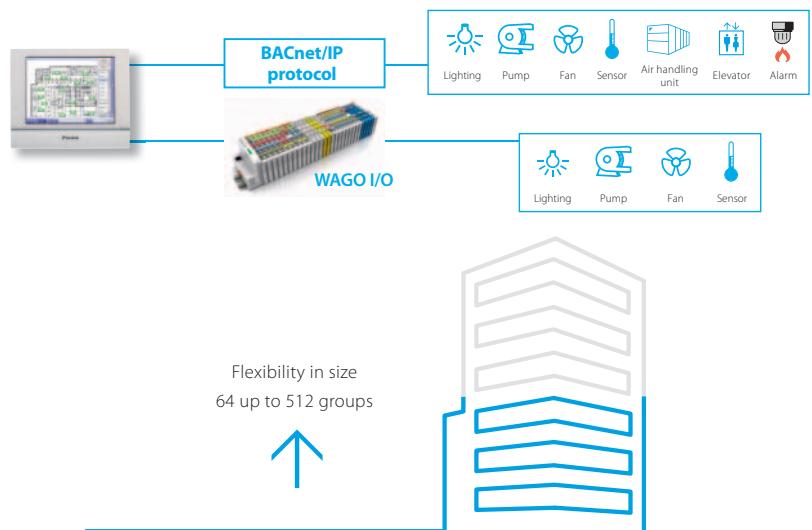

## Flexibility

- › Cross-pillar integration (heating, air conditioning, applied systems, refrigeration, air handling units)
- › BACnet protocol for 3rd party products integration
- › I/O for integration of equipment such as lights, pumps... on WAGO modules
- › Modular concept for small to large applications
- › Control up to 512 indoor unit groups via one ITM and combine multiple ITM via web interface

## Easy servicing and commissioning

- › Remote refrigerant containment check preventing on site visit
- › Simplified troubleshooting
- › Save time on commissioning thanks to the pre-commissioning tool
- › Auto registration of indoor units

## Functions overview

### Languages

- › English
- › French
- › German
- › Italian
- › Spanish
- › Dutch
- › Portuguese

### System layout

- › Up to 512 unit groups can be controlled (ITM plus Integrator + 7 iPU (incl. iTM adaptor))
- › Ethernet TCP/IP

### Management

- › Web access
- › Power Proportional Distribution (option)
- › Operational history (malfunctions, ...)
- › Smart energy management
  - monitor if energy use is according to plan
  - detect origins of energy waste
- › Setback function
- › Sliding temperature

### Control

- › Individual control (512 groups)
- › Schedule setting (Weekly schedule, yearly calendar, seasonal schedule)
- › Interlock control
- › Setpoint limitation
- › Temperature limit

### WAGO Interface

- › Modular integration of 3rd party equipment
- › WAGO coupler (interface between WAGO and Modbus)
- › Di module
- › Do module
- › Ai module
- › Ao module
- › Thermistor module
- › Pi module

### Connectable to

- DX Split, Sky Air, VRV
- Chillers (via POL638.70 controller)
- Daikin AHU
- Fan coils
- Daikin Altherma Flex type
- LT and HT hydroboxes
- Air curtains
- WAGO I/O
- BACnet/IP protocol

## Modbus Interface

### RTD

#### RTD-RA

- › Modbus interface for monitoring and control of residential indoor units

#### RTD-NET

- › Modbus interface for monitoring and control of Sky Air, VRV, VAM and VKM

#### RTD-10

- › Advanced integration into BMS of Sky Air, VRV, VAM and VKM through either:
  - Modbus
  - Voltage (0-10V)
  - Resistance
- › Duty/standby function for server rooms

#### RTD-20

- › Advanced control of Sky Air, VRV, VAM/VKM and air curtains
- › Clone or independent zone control
- › Increased comfort with integration of CO<sub>2</sub> sensor for fresh air volume control
- › Save on running costs via
  - pre/post and trade mode
  - set point limitation
  - overall shut down
  - PIR sensor for adaptive deadband

#### RTD-HO

- › Modbus interface for monitoring and control of Sky Air, VRV, VAM and VKM
- › Intelligent hotel room controller

#### RTD-W

- › Modbus interface for monitoring and control of Daikin Altherma Flex Type, VRV HT hydrobox and small inverter chiller

## Overview functions

Main functions	RTD-RA	RTD-NET	RTD-10	RTD-20	RTD-HO

## Standard protocol interfaces

# DIII-net Modbus interface

### EKMBDXA

**Integrated control system for seamless connection between Split, Sky Air, VRV and small inverter chillers and BMS systems**

- › Communication via Modbus RS485 protocol
- › Detailed monitoring and control of the VRV total solution
- › Easy and fast installation via DIII-net protocol
- › As the Daikin DIII-net protocol is being used, only one modbus interface is needed for a group of Daikin systems (up to 10 outdoor unit systems).

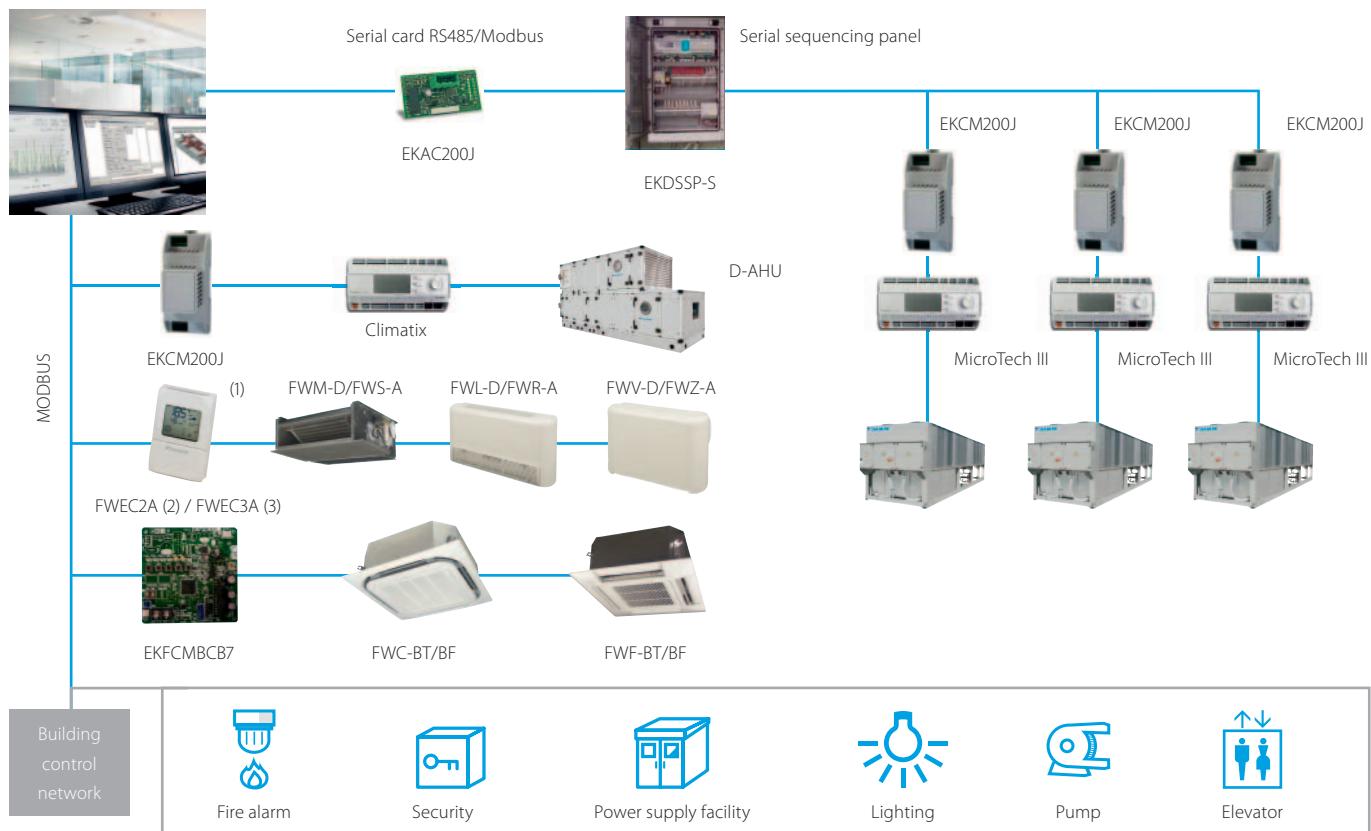

\* Additional centralized controller might be required. For more information contact your local dealer.

		EKMBDXA7V1	
Maximum number of connectable indoor units		64	
Maximum number of connectable outdoor units		10	
Communication	DIII-NET - Remark	DIII-NET (F1F2)	
	Protocol - Remark	2 wire; communication speed: 9600 bps or 19200 bps	
	Protocol - Type	RS485 (modbus)	
	Protocol - Max. Wiring length	m	500
Dimensions	HeightxWidthxDepth	mm	124x379x87
Weight	kg		2.1
Ambient temperature - operation	Max.	°C	60
	Min.	°C	0
Installation	Indoor installation		
Power supply	Frequency	Hz	50
	Voltage	V	220-240

# Modbus interface

Integrate chillers, fan coil units and air handling units in BMS systems via modbus protocol

(1) The communication module is integrated in the controller (2) Connection to FWV-D, FWL-D & FWM-D (3) Connection to FWV-D, FWL-D, FWM-D and to FWZ-A, FWR-A, FWS-A

Integrate Refrigeration units in BMS systems via modbus protocol

\* For all connectable indoor units and Biddle air curtains please refer to the Conveni-pack pages in this catalogue

## KNX interface

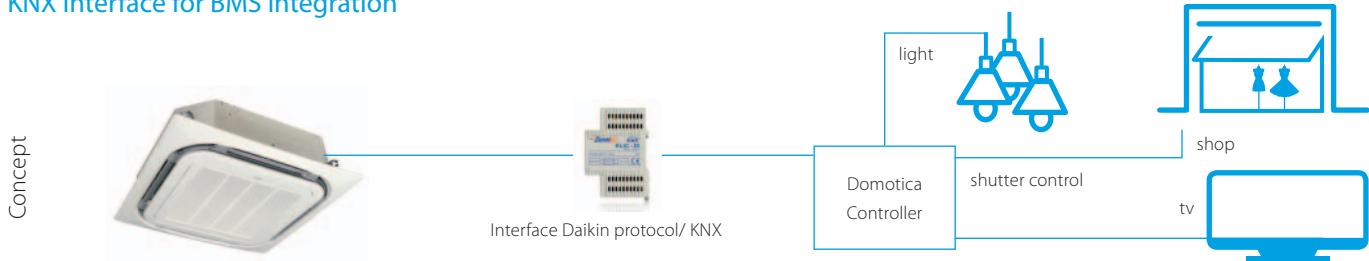

KLIC-DD  
KLIC-DI

### Integration of Split, Sky Air and VRV in HA/BMS systems

Connect split indoor units to KNX interface for Home Automation system

Connect Sky Air / VRV indoor units to KNX interface for BMS integration

### KNX interface line-up

The integration of Daikin indoor units through the KNX interface allows monitoring and control of several devices, such as lights and shutters, from one central controller. One particularly important feature is the ability to programme a 'scenario'

- such as "Home leave" - in which the end-user selects a range of commands to be executed simultaneously once the scenario is selected. For instance in "Home leave", the air conditioner is off, the lights are turned off, the shutters are closed and the alarm is on.

### KNX interface for

	<b>KLIC-DD Size 45x45x15mm</b>	<b>KLIC-DI Size 90x60x35mm</b>

# BACnet Interface

DMS502A51 / EKACBACMSTP / EKCMBACIP / EKCMBACMSTP

Integrated control system for seamless connection between VRV, applied systems, air handling units and BMS systems

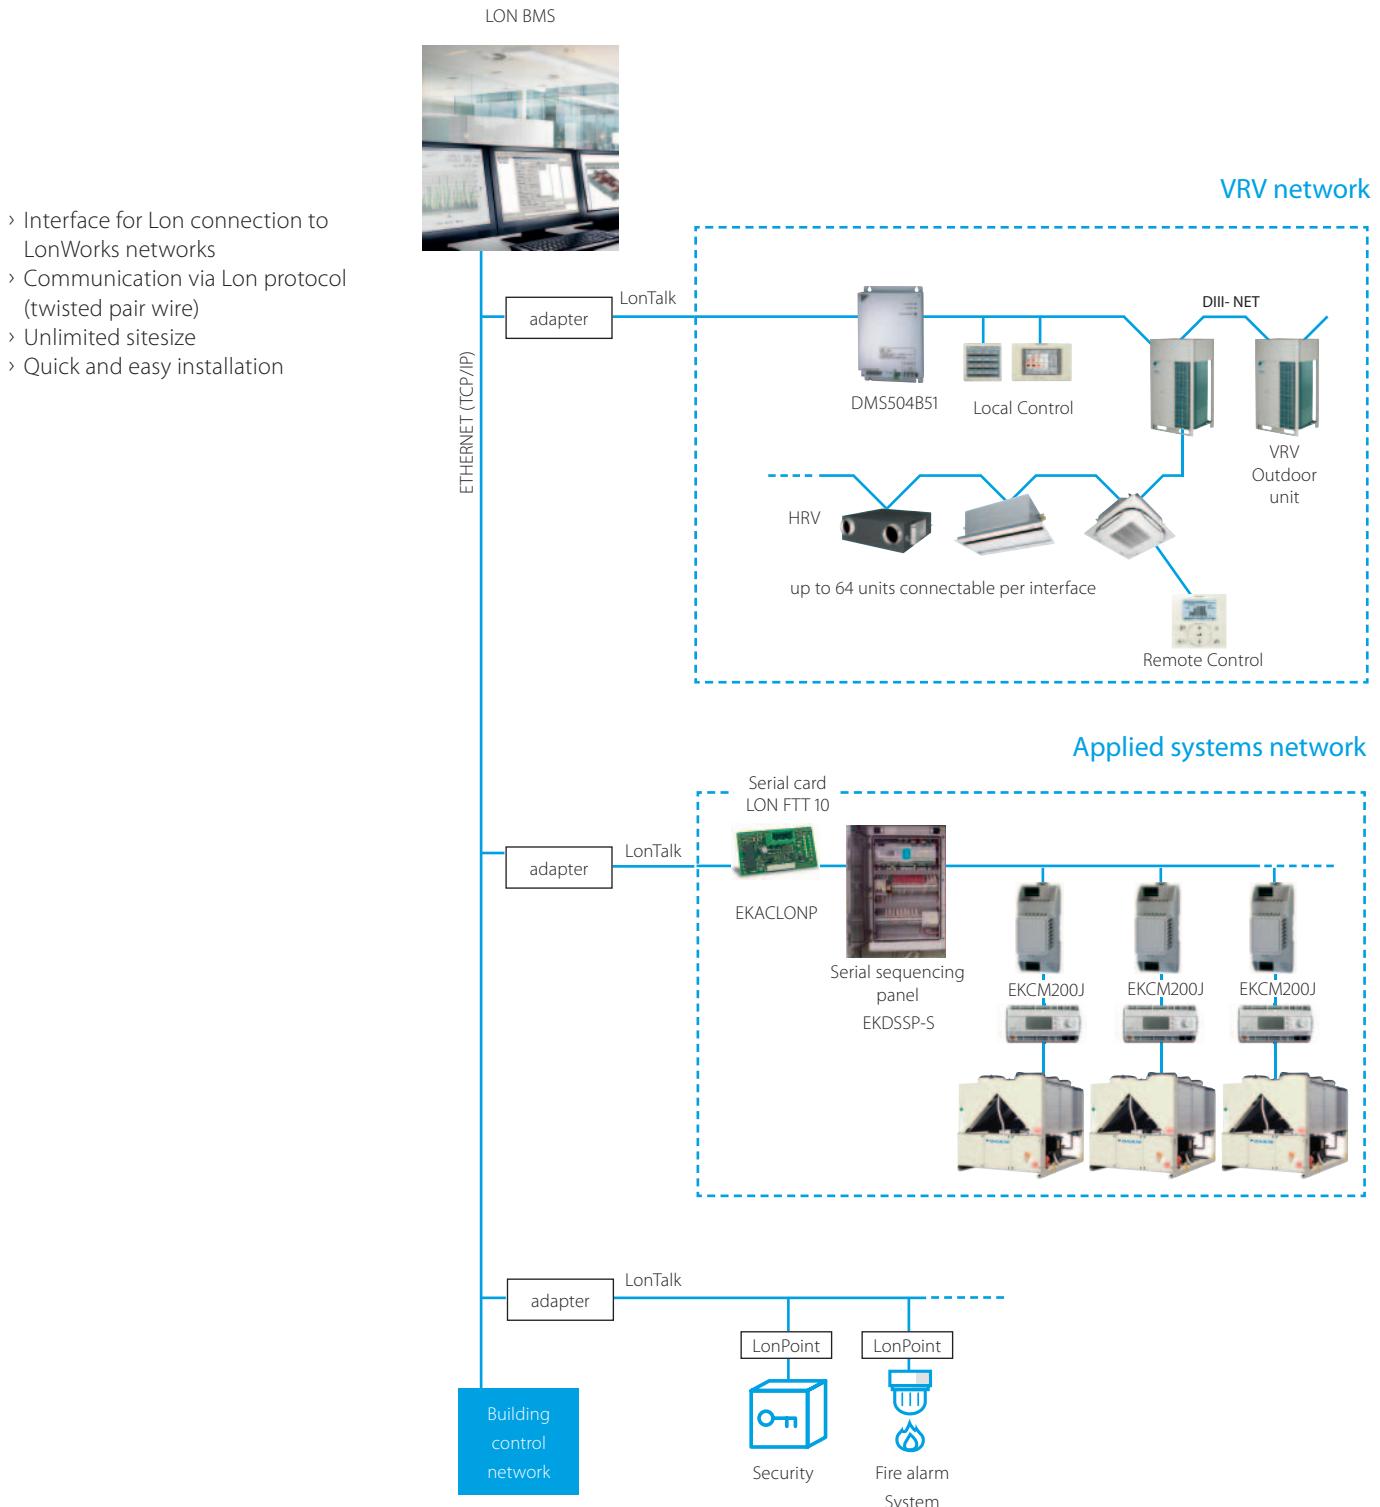

- › Interface for BMS system
- › Communication via BACnet protocol (connection via Ethernet)
- › Unlimited sitesize
- › Easy and fast installation
- › PPD data is available on BMS system (only for VRV)

# LonWorks Interface

DMS504B51 / EKACLONP

Open network integration of VRV and applied systems monitoring and control functions into LonWorks networks

# Daikin Configurator Software

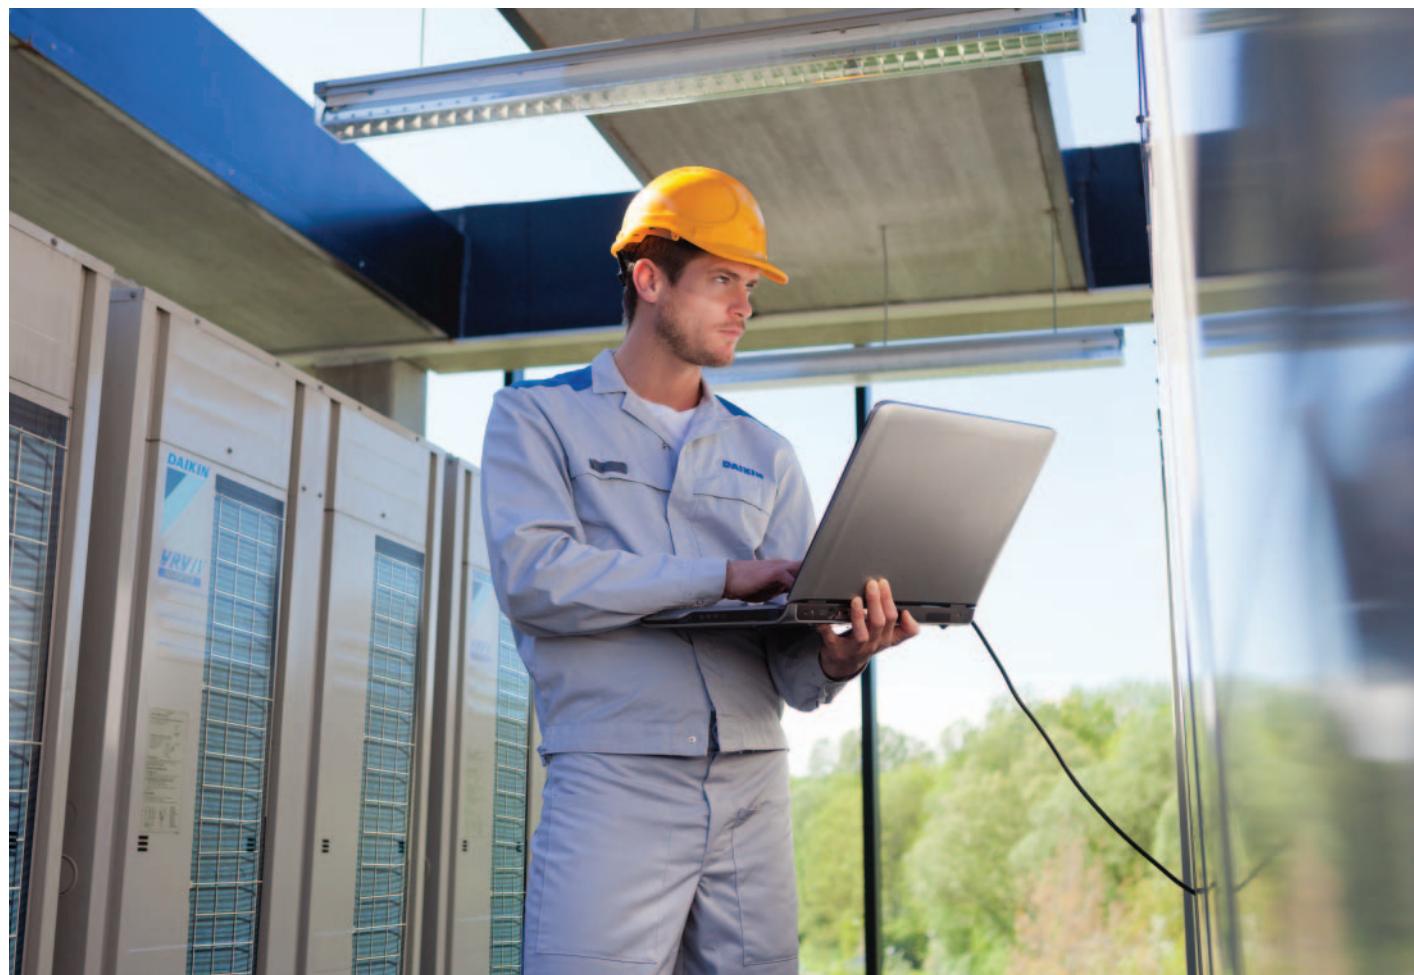

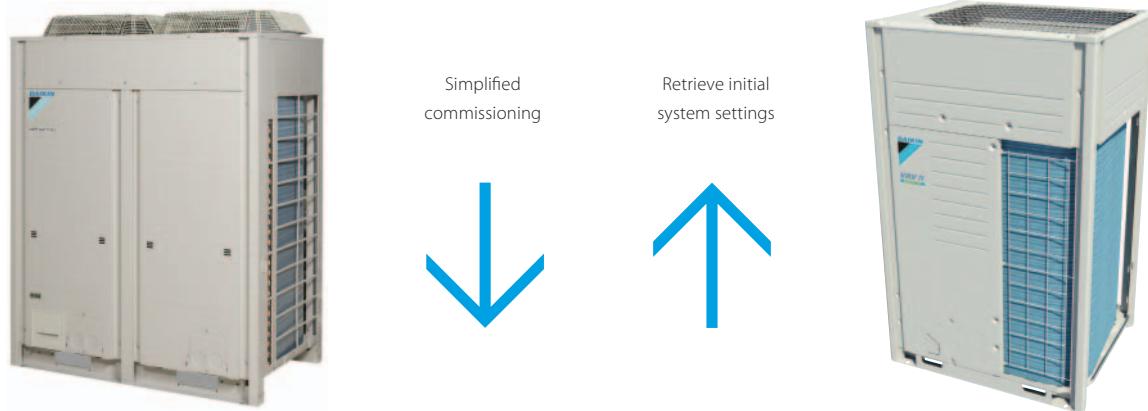

EKPCCAB3

**Simplified commissioning:**  
graphical interface to configure, commission  
and upload system settings

## Simplified commissioning

The Daikin configurator for Daikin Altherma and VRV is an advanced software solution that allows for easy system configuration and commissioning:

- › Less time is required on the roof configuring the outdoor unit
- › Multiple systems at different sites can be managed in exactly the same way, thus offering simplified commissioning for key accounts
- › Initial settings on the outdoor unit can be easily retrieved

# What is I-Net?

## A service based on our global remote monitoring technology, keeping your system trouble-free and working with top efficiency.

### What does I-Net offer you

Safeguarding the lifelong optimum operation of your air conditioning system means getting geared up to operate the system in a energy efficient way and reduce unexpected breakdowns and costs to the absolute minimum. This is where I-Net helps to improve the effectiveness of your building management.

I-Net is about 'being connected' with Daikin, the Internet-based link between you, your air conditioning system and Daikin's Remote Monitoring Centre. This allows you to monitor your energy consumption and Daikin's expert service engineers to monitor your entire system's status non-stop, all year round. Through predicting malfunctions and offering technical advice from data analysis, you can maximise equipment uptime, as well as controlling energy costs with no sacrifice in comfort levels. By doing this, i-Net will prevent problems, prolong your system's service life while reducing the energy bill.

### I-Net Services

i-Net consists of 2 main services: the VRV Cloud and I-Net performance monitoring and analysis.

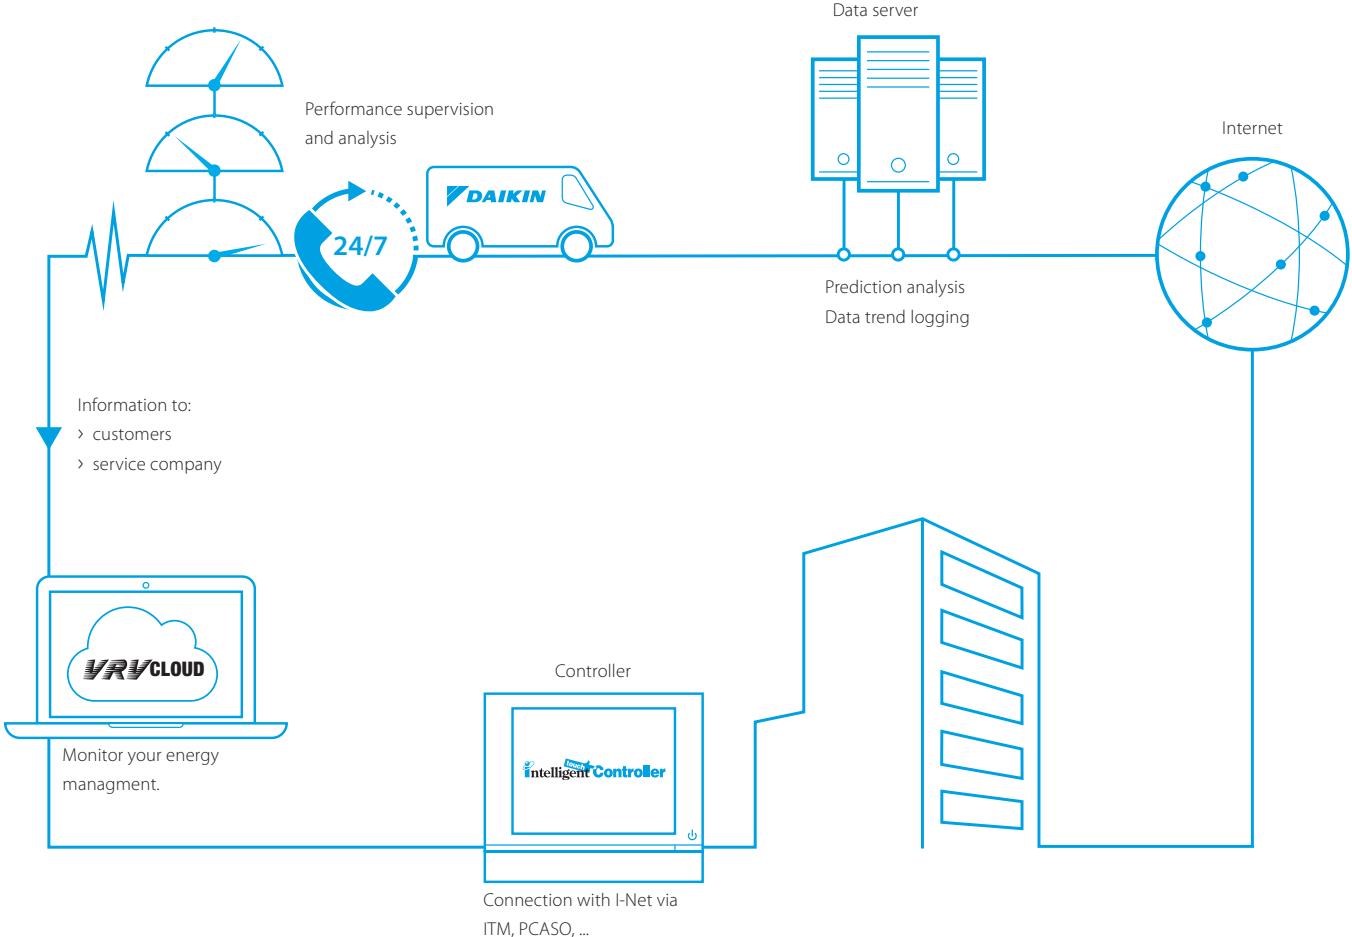

#### VRV Cloud

The VRV Cloud puts you in the driving seat of your energy management. The easy-to-use energy data trending and analytic tools puts you in control and shows you CO<sub>2</sub> footprint reduction opportunities and energy savings of up to 15%.

Saving starts by measuring. Enhance your company's sustainability !

#### I-Net performance monitoring and analysis

Focus on your core business and hand the HVAC over to Daikin. Daikin I-Net connects your system continuously with Daikin. It notifies alarms and early warnings of system deviations to maximise system uptime and the comfort of the people in the building. Service providers have webbased access to operation data so that they are fully prepared when they arrive on-site. Specialists run trend analyses. All of which boosts your system's reliability by ensuring that it is running at optimum efficiency.

## i-Net

### Daikin VRV Cloud

#### Helps you manage your energy through Daikin technology.

- › Intelligent energy visualization tool that helps you with your energy management
- › 24/7 online monitoring by the customer from any location.
- › User friendly visualization of VRV energy management (kWh)
- › Analysis support of waste operation
- › Multiple site monitoring

- › Performance Supervision by Daikin experts enhances a maintenance plan.
- › This service aims to enhance the service level, to respond fast and accurate, to save on unexpected repair costs and assure the peace of mind. Repetitive interventions and disturbance of building tenants and maintenance teams are kept to a minimum.

#### Long lifetime systems

- › I-Net will maximise the installation's lifetime, by assuring the equipment runs in optimal conditions and avoid unnecessary stress on components.

### Performance monitoring

**Daikin's unique I-Net Service aims to prevent the equipment coming to an unexpected stop or needing emergency repair.**

#### Fast response, better prepared

- › If an alarm does occur, the service provider is immediately alerted and receives all crucial information.
- › Early fault indication (predictions) : operation data are 24/7 checked by I-Net prediction algorithms to act as early as possible, averting unscheduled breakdowns.

### Analysis

**Be connected with Daikin's experts, this gives you a clear overview of operability and use of the air conditioning system.**

- › Daikin continuously monitors energy, operation and comfort data. Thanks to periodic analysis of the data, Daikin can suggest ways of improving performance.
- › if there is a problem, Daikin specialists will analyse the operation data history to provide remote support.

## Wireless room temperature sensor

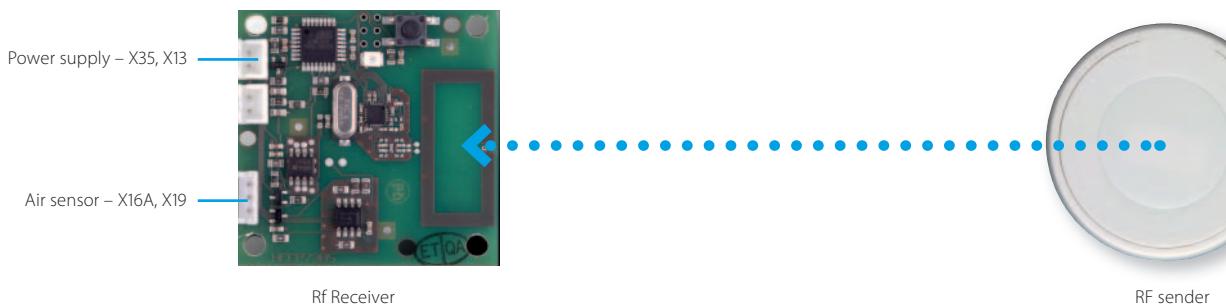

K.RSS

### Flexible and easy installation

- › Accurate temperature measurement thanks to flexible placement of the sensor
- › No need for wiring
- › No need to drill holes
- › Ideal for refurbishment

### Connection diagram Daikin indoor unit PCB (FXSQ example)

### Specifications

	Wireless room temperature sensor kit (K.RSS)		
	Wireless room temperature receiver	Wireless room temperature sensor	
Dimensions	mm	50 x 50	ø 75
Weight	g	40	60
Power supply		16VDC, max. 20 mA	N/A
Battery life		N/A	+/- 3 years
Battery type		N/A	3 Volt Lithium battery
Maximum range	m	10	
Operation range	°C	0-50	
Communication	Type	RF	
	Frequency	868.3 MHz	

- › Room temperature is sent to the indoor unit every 90 seconds or if the temperature difference is 0.2°C or larger.

## Wired room temperature sensor

KRCS01-1B  
KRCS01-4B

- › Accurate temperature measurement, thanks to flexible placement of the sensor

### Specifications

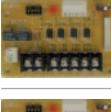

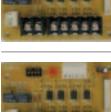

Dimensions (HxW)	mm	60 x 50
Weight	g	300
Length of branch wiring	m	12

# ADAPTER PCBs

## Simple solutions for unique requirements

### Concept and benefits

- › Low cost option to satisfy simple control requirements
- › Deployed on single or multiple units

			Connectable to:		
			Split	Sky Air	VRV
	<b>(E)KRP1B*</b> adapter for wiring	<ul style="list-style-type: none"> <li>• Facilitates integration of auxiliary heating apparatus, humidifiers, fans, damper</li> <li>• Powered by and installed at the indoor unit</li> </ul>		●	●
	<b>KRP2A*/KRP4A*</b> Wiring adapter for electrical appendices	<ul style="list-style-type: none"> <li>• Remotely start and stop up to 16 indoor units (1 group) (KRP2A* via P1 P2)</li> <li>• Remotely start and stop up to 128 indoor units (64 groups) (KRP4A* via F1 F2)</li> <li>• Alarm indication/ fire shut down</li> <li>• Remote temperature setpoint adjustment</li> <li>• Cannot be used in combination with a central controller</li> </ul>		●	●

## Conversion table refrigerant piping

inch	mm
1/4"	6.4 mm
3/8"	9.5 mm
1/2"	12.7 mm
5/8"	15.9 mm
3/4"	19.1 mm
7/8"	22.2 mm
1 1/8"	28.5 mm
1 3/8"	34.9 mm
1 5/8"	41.3 mm
1 3/4"	44.5 mm
2"	50.8 mm
2 1/8"	54 mm
2 5/8"	66.7 mm

## F-gas regulation

For fully/partially charged equipment: contains fluorinated greenhouse gases. Actual refrigerant charge depends on the final unit construction, details can be found on the unit labels.

For non pre-charged equipment (Chillers: split chiller (SEHVX/SERHQ), condensing units and condenserless chillers + refrigeration (LCKQ-AV1, JEHCCU/JEHSCU and ICU): Its functioning relies on fluorinated greenhouse gases.

## Measuring conditions

### Air conditioning

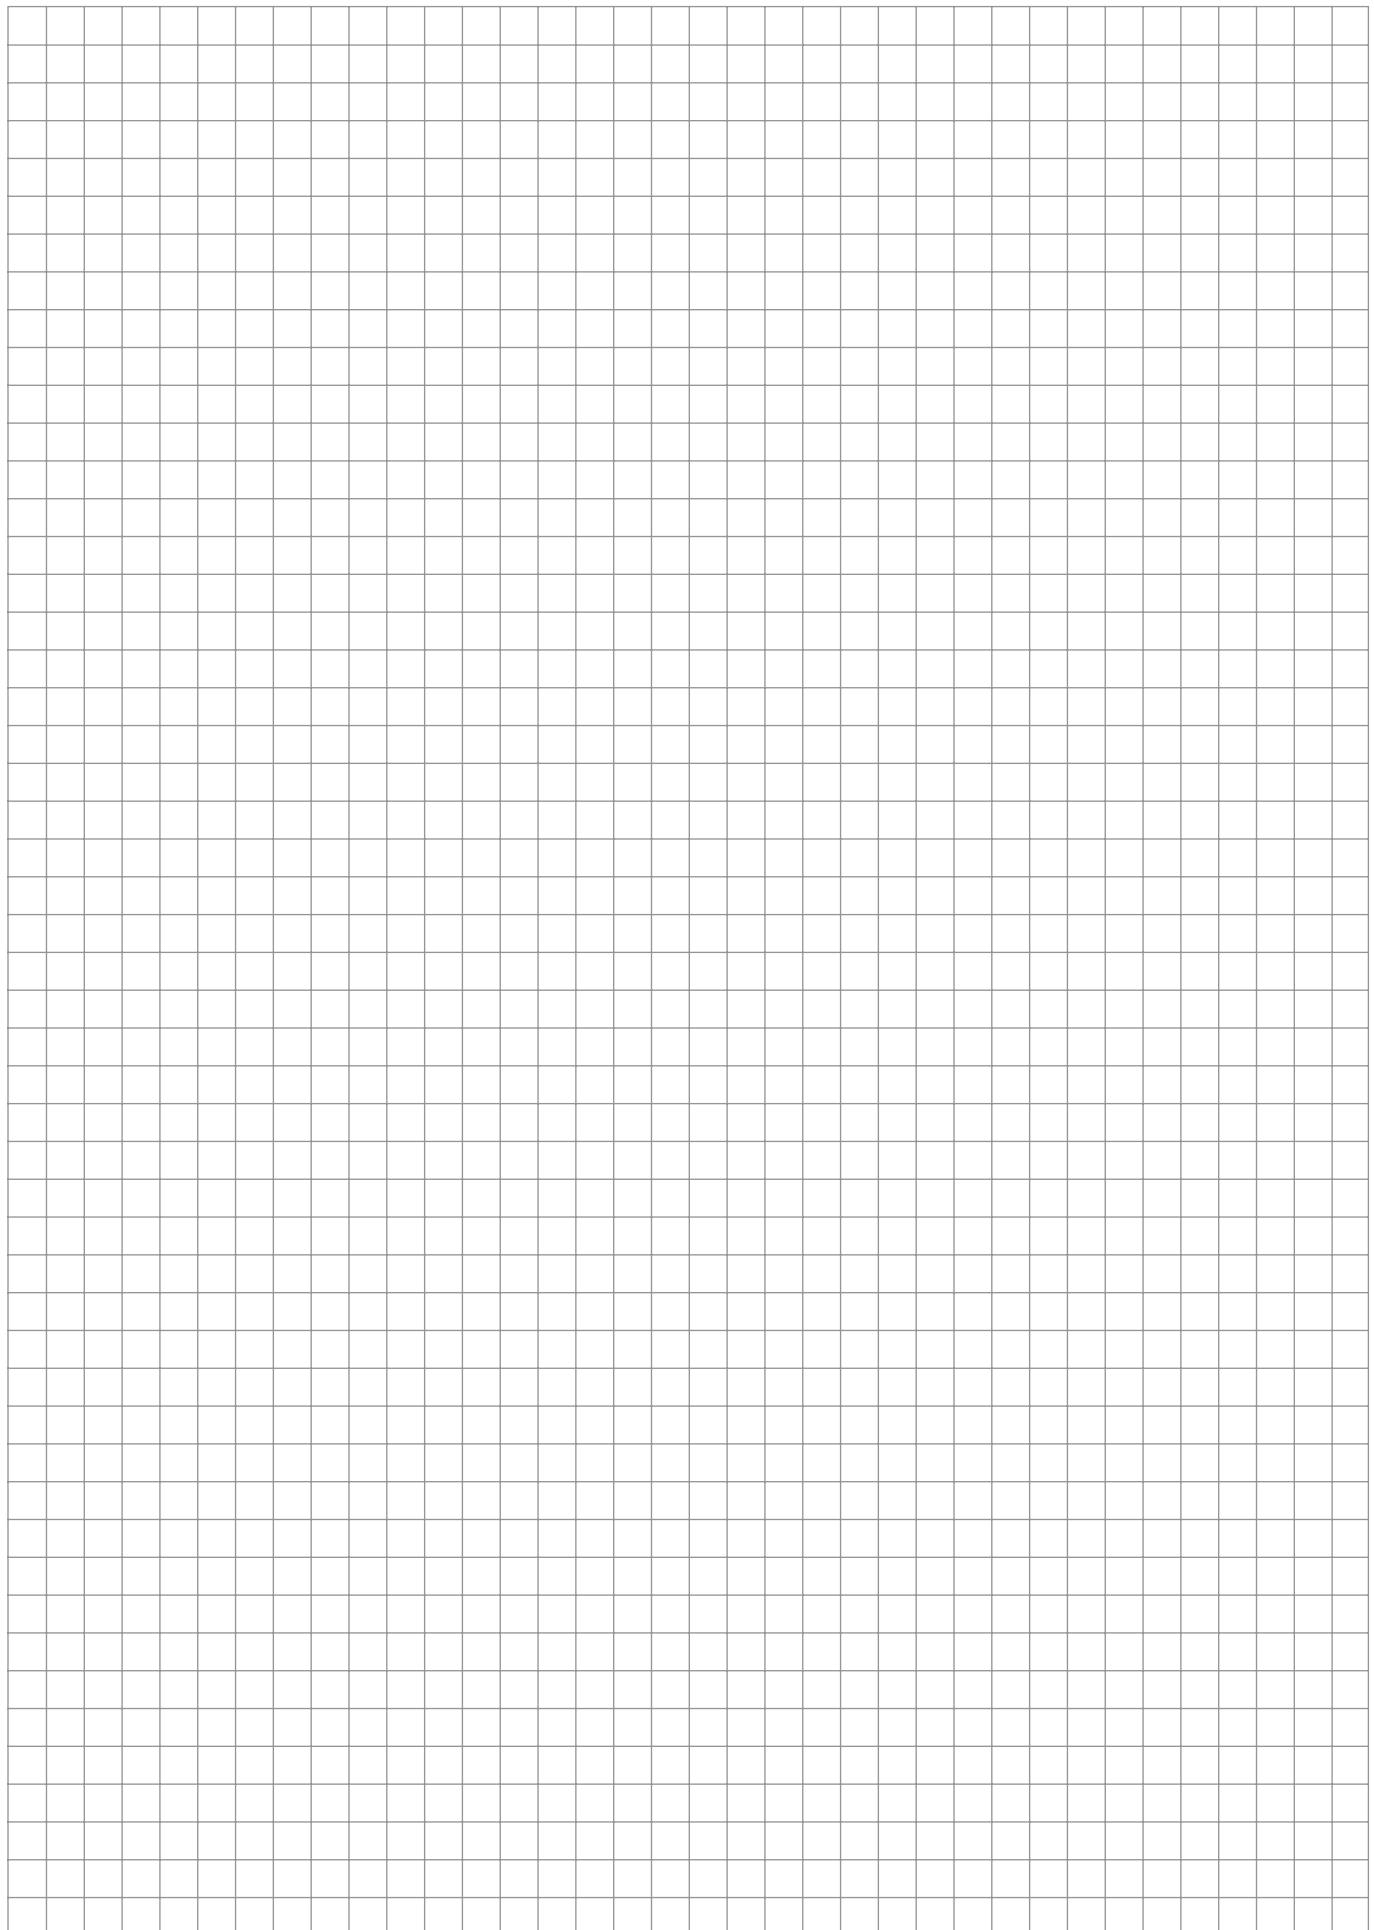

1) Nominal cooling capacities are based on:	
Indoor temperature	27°CDB/19°CWB
Outdoor temperature	35°CDB
Refrigerant piping length	7.5m - 8/5m VRV
Level difference	0m
2) Nominal heating capacities are based on:	
Indoor temperature	20°CDB
Outdoor temperature	7°CDB/6°CWB
Refrigerant piping length	7.5m - 8/5m VRV
Level difference	0m

## Applied systems

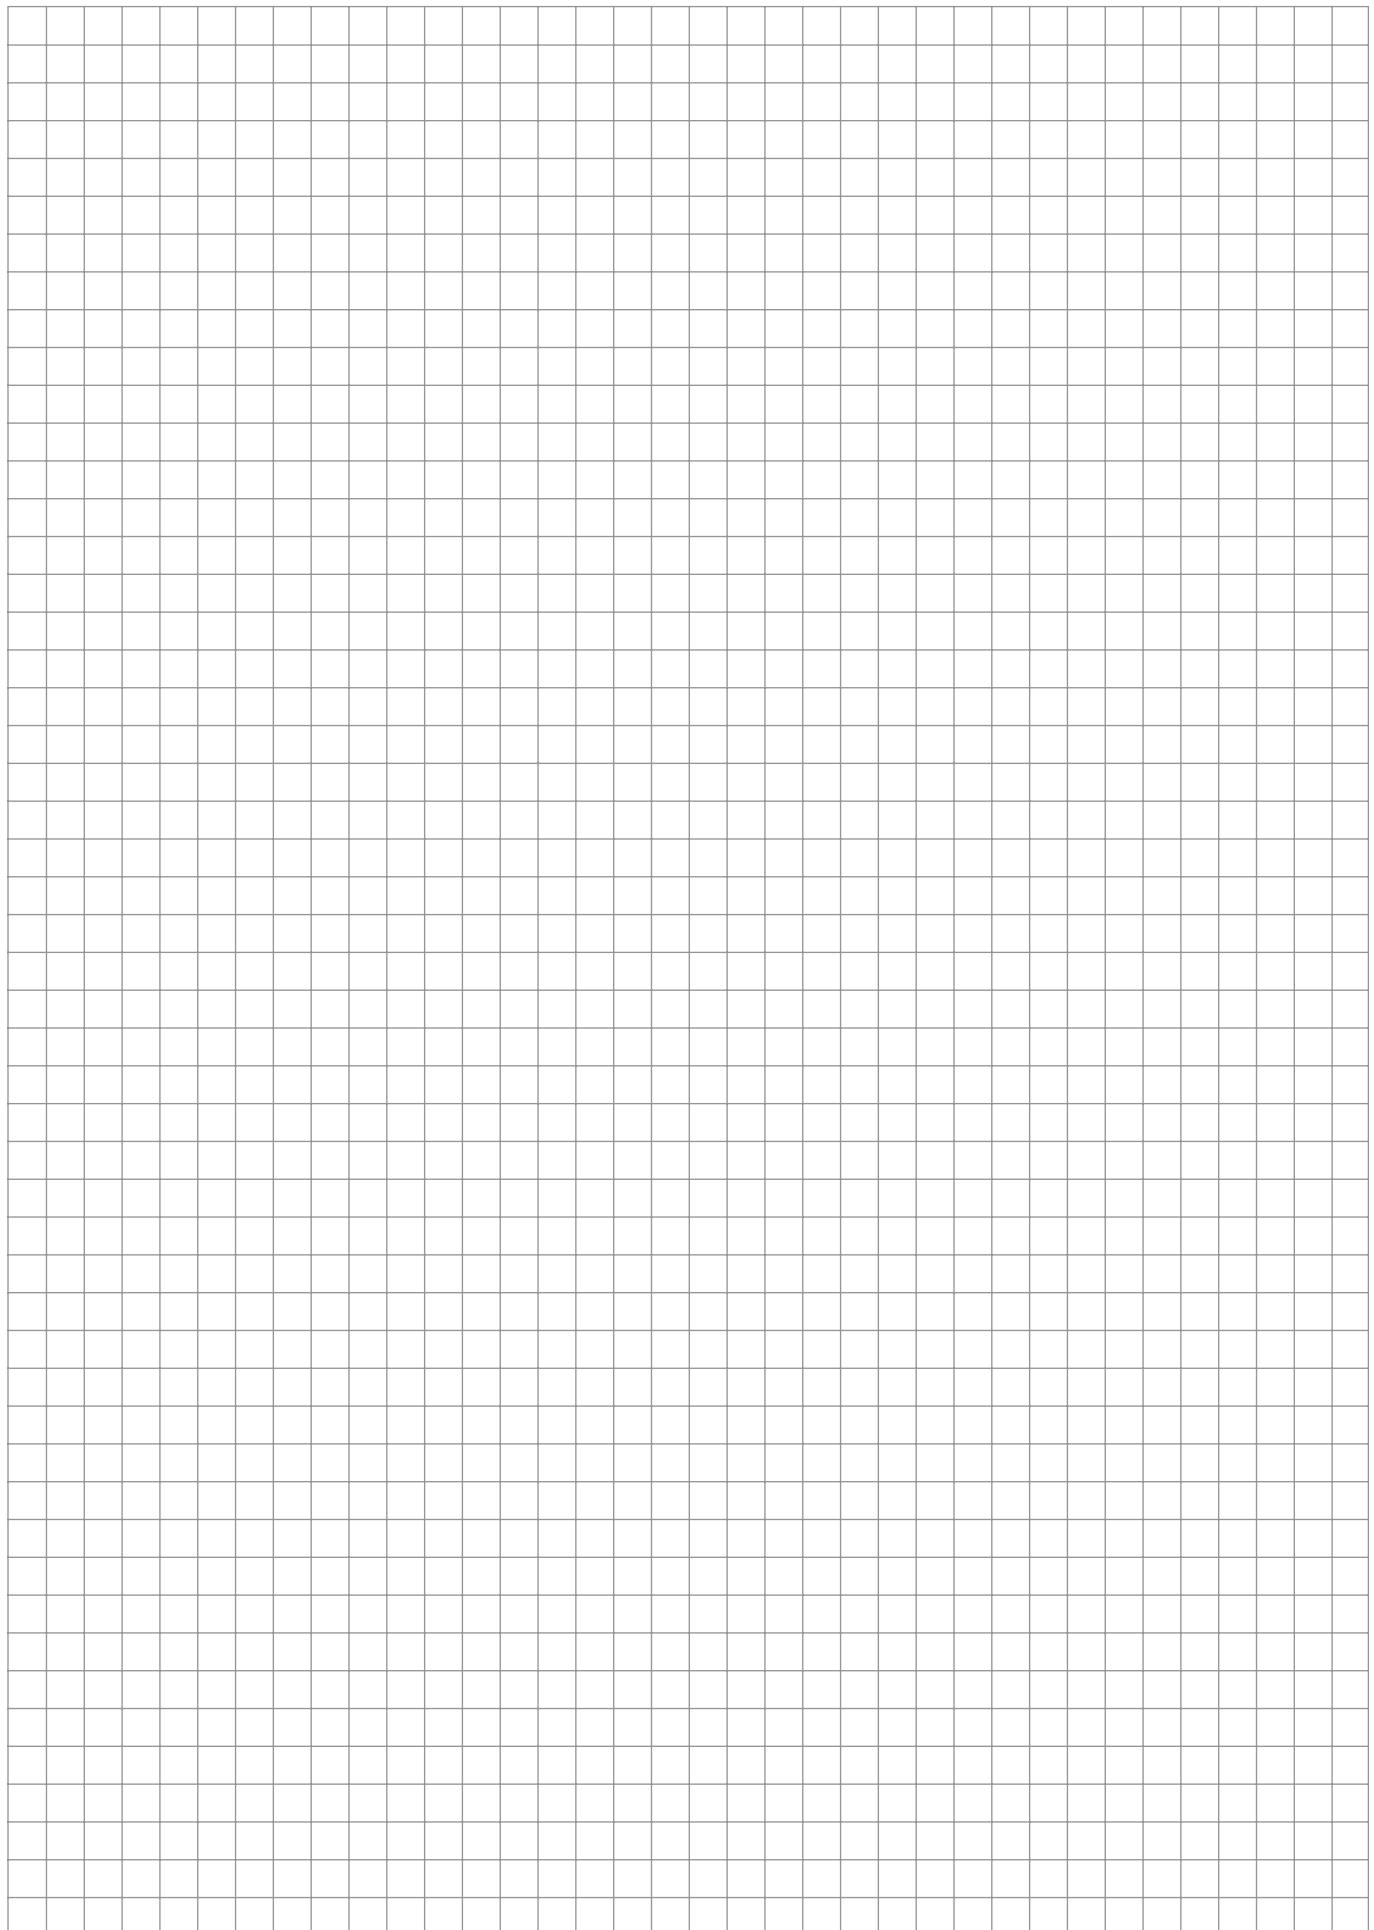

Air cooled	Cooling only	Evaporator: 12°C/7°C	Ambient: 35°CDB
	Heat pump	Evaporator: 12°C/7°C Condenser: 40°C/45°C	Ambient: 35°C Ambient: 7°CDB/6°CWB
Water cooled	Cooling only	Evaporator: 12°C/7°C Condenser: 30°C/35°C	Ambient: 7°CDB/6°CWB
	Heating only	Evaporator: 12°C/7°C Condenser: 40°C/45°C	Ambient: 7°CDB/6°CWB
Condenserless chiller		Evaporator: 12°C/7°C Condensing temperature: 45°C / liquid temperature: 40°C	Ambient: 7°CDB/6°CWB
		Room temperature: 27°CDB/19°CWB Water inlet/outlet temperature: 7°C/12°C	Ambient: 7°CDB/6°CWB
Fan coil units	Cooling	2 pipe: Water inlet temperature: 50°C (same water flow as in cooling mode) 4 pipe: Water inlet/outlet temperature: 70°C/60°C	Ambient: 7°CDB/6°CWB
	Heating	2 pipe: Water inlet temperature: 50°C (same water flow as in cooling mode) 4 pipe: Water inlet/outlet temperature: 70°C/60°C	Ambient: 7°CDB/6°CWB

The sound pressure level is measured via a microphone at a certain distance from the unit. It is a relative value, depending on the distance and acoustic environment (for measuring conditions: please refer to the technical databooks). The sound power level is an absolute value indicating the "power" which a sound source generates. For more detailed information please consult our technical databooks.

# Benefits

## We care icons

	<b>Seasonal efficiency, smart use of energy</b> Seasonal efficiency gives a more realistic indication on how efficient air conditioners operate over an entire heating or cooling season.		<b>Econo mode</b> This function decreases the power consumption so that other applicances that need large power consumption can be used. This function is also energy saving.
	<b>Auto-cleaning filter</b> The filter automatically cleans itself once per day. Simplicity of upkeep means optimum energy efficiency and maximum comfort without the need for expensive or time-consuming maintenance.		<b>Movement sensor</b> The sensor detects whether someone is in the room. When the room is empty, the unit switches to economy mode after 20 minutes and restarts when a person enters the room.
	<b>Inverter technology</b> In combination with inverter controlled outdoor units		<b>Home leave operation</b> During absence, the indoor temperature can be maintained at a certain level.
	<b>2 area intelligent eye</b> Air flow is sent to a zone other than where the person is located at that moment. Detection is done in 2 directions: left and right. If no people are detected, the unit will automatically switch over to the energy-efficient setting.		<b>Fan only</b> The air conditioner can be used as fan, blowing air without cooling or heating.
	<b>3 area intelligent eye</b> Air flow is sent to a zone other than where the person is located at that moment. Detection is done in 3 directions: left, front and right. If no people are detected, the unit will automatically switch over to the energy-efficient setting and eventually switch off.		<b>Free cooling</b> By exploiting the low external air temperatures to cool the water, free cooling reduces the load on the compressors and decreases considerably the annual operating costs during the cold season.
	<b>Energy saving during operation standby</b> Current consumption is reduced by about 80 % when operating on standby.		<b>Floor &amp; presence sensor</b> The presence sensor directs the air away from any person detected in the room, when the air flow control is on. The floor sensor detects the average floor temperature and ensures an even temperature distribution between ceiling and floor.
	<b>Night set mode</b> Saves energy, by preventing overcooling or overheating during night time.		

## Comfort

	<b>Comfort mode</b> The unit automatically changes the angle of the air discharge louvre depending on the mode. In cooling operation the air will be directed rather upwards to avoid cold draught, while in heating operation the air will be directed rather downwards to avoid cold feet.		<b>Draught prevention</b> When starting to warm up or when the thermostat is off, the air discharge direction is set horizontally and the fan to low speed, to prevent draught. After warming up, air discharge and fan speed are set as desired.
	<b>Powerful mode</b> If the temperature in the room is too high/low, it can be cooled down/heated quickly by selecting the 'powerful mode'. After the powerful mode is turned off, the unit returns to the preset mode.		<b>Auto cooling-heating changeover</b> Automatically selects cooling or heating mode to achieve the set temperature (heat pump types only).
	<b>Whisper quiet</b> Daikin units are whisper quiet. (with sound levels as low as 19dB(A))		<b>Indoor unit silent operation</b> To ensure a quiet environment for studying or sleeping the user can lower the operation sound of the indoor unit by 3 dB(A) via remote control.
	<b>Outdoor unit silent operation</b> To ensure a quiet environment for the neighbourhood the user can lower the operation sound of the outdoor unit by 3 dB(A) via remote control.		<b>Night quiet mode (cooling only)</b> Lowers the operation sound of the outdoor unit automatically at night. Installer has to make special setting on outdoor unit or wired remote controller, depending on model.
	<b>Comfortable sleeping mode</b> Increased comfort function that follows a specific temperature fluctuation rhythm.		<b>Radiant heat</b> The front panel of the indoor unit radiates additional heat to add to your comfort on cold days

## Air flow

	<b>Ceiling soiling prevention</b> A special function prevents air blowing out too long in horizontal position, to prevent ceiling stains.		<b>3-D Air flow</b> This function combines Vertical and Horizontal auto-swing to circulate a stream of cool/warm air right to the corners of even large spaces.
	<b>Vertical auto swing</b> Possibility to select automatic vertical moving of the air discharge louvre, for uniform air flow and temperature distribution.		<b>Horizontal auto swing</b> Possibility to select automatic horizontal moving of the air discharge louvre, for uniform air flow and temperature distribution.
	<b>Auto fan speed</b> Automatically selects the necessary fan speed to reach or maintain the set temperature.		<b>Fan speed steps</b> Allows to select up to the given number of fan speed.
	<b>Individual flap control</b> Flexible installation thanks to the possibility of easily closing one flap via the wired remote controller, to suit any new room configuration. Optional closure kits are available as well.		

# Benefits

## Humidity control

### Ururu - humidification

Moisture is absorbed from the outdoor air and evenly distributed throughout the indoor areas.

### Dry programme

Allows humidity levels to be reduced without variations in room temperature.

### Sarara - dehumidification

Reduces indoor humidity, without affecting the room temperature, by mixing cool, dry air with warm air.

## Air treatment

### Flash streamer

The Flash Streamer generates high-speed electrons that powerfully break down odours and formaldehyde.

### Titanium photocatalytic air purification filter

Removes airborne dust particles, and decomposes the odours of for example tobacco and pets. It also decomposes harmful organic chemical substances such as bacteria, viruses and allergens.

### Photocatalytic deodorising filter

Removes airborne dust particles, decomposes odours and restrains the reproduction of bacteria, viruses and microbes, this to ensure a steady supply of clean air.

### Air filter

Removes airborne dust particles to ensure a steady supply of clean air.

## Remote control & timer

### Weekly timer

Timer can be set to start operation anytime on a daily or weekly basis

### 24 Hour timer

Timer can be set to start cooling/heating anytime during a 24-hour period.

### Timer

Allows to preset the air conditioner to start/stop at a specified time.

### Infrared remote control

Infrared remote control with LCD to start, stop and regulate your indoor unit from a distance.

### Wired remote control

Wired remote control to start, stop and regulate the air conditioner from a distance.

### Centralised control

Centralised control to start, stop and regulate several indoor units from one central point.

### Online controller via app

Control your indoor unit from any location via app. (optional WLAN adapter)

## Other functions

### Auto-restart

The unit restarts automatically at the original settings after power failure.

### Twin/triple/double twin application

2, 3 or 4 indoor units can be connected to only 1 outdoor unit even if they have different capacities. All indoor units operate within the same mode (cooling or heating) from one remote control.

### VRV for residential application

Up to 9 indoor units (even different capacities and up to 71 class) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.

### Multi tenant

The indoor unit's main power supply can be turned off when leaving the hotel or office building.

### Scroll compressor

Scroll compressors consist of two scrolls, one is fixed while the other orbits eccentrically without rotating. Designed for small and medium capacities, they provide constant reliability and high efficiency throughout its service life.

### Centrifugal compressor

Centrifugal compressors use an impeller and volute section to convert the velocity energy into pressure energy. Centrifugal compressors are designed with either optional variable speed drives (VFD) for superior part-load performance for single or dual compressor units, or with magnetic bearings and totally oil-free operation.

### Guaranteed operation down to -20°C

Daikin heat pumps are suitable for all climates, even withstandig severe winter conditions with an operation range down to -20°C

### Infrastructure cooling

Remove in a reliable, efficient and flexible way the heat constantly generated by the IT and server equipment to ensure maximum uptime while offering the best return on investment.

### Self-diagnosis

Simplifies maintenance by indicating system faults or operating anomalies.

### Multi model application

Up to 5 indoor units (even different capacities) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.

### Drain pump kit

Facilitates condensation draining from the indoor unit.

### Swing compressor

Swing type compressors have a unified vane and roller with fewer moving parts producing low vibration and friction, achieve higher reliability and efficiency compared to conventionally rotary compressors.

### Screw compressor

Single screw compressors consist of a main single screw and two gate rotors. Optimal performance through step less capacity control, they are designed for high capacities and optimal performances.

### Reciprocating compressor

The reciprocating type compressor consists of a cylinder, pistons and valves. The compression is accomplished by reciprocating movements of the piston in the cylinder.

### Guaranteed operation down to -25°C

Daikin heat pumps are suitable for all climates, even withstandig severe winter conditions with an operation range down to -25°C

# New business portal

## Easy search / Personalised / Mobile

### Easy to do business with

We are setting new standards in customer support. With the introduction of our cutting-edge business portal, our solutions are just a click away.

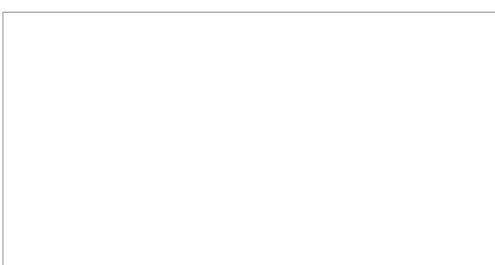

Our new business portal is built around your needs, enabling you to find information quickly and easily. Our aim is that you find the information you need in seconds.

To make life even easier for you, our portal is accessible no matter where you are, via desktop, tablet and smartphone.

Discover and enjoy using our business portal at [my.daikin.eu](http://my.daikin.eu)
